Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that he would include a provision in the management contract that City Council appoint a liaison to the URTV, Inc.

The motion to amend failed on a 3-3 vote, with Mayor Worley, Councilman Davis and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

The original motion appointing 2 members to URTV, Inc., carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 75

Councilman Newman moved to adopt Resolution No. 03-209 receiving the report of the PACC and thanking them for their service. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 76

Vice-Mayor Mumpower moved to adopt Ordinance No. 3079 dissolving the PACC. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 35

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of November 14-December 4, 2003: JoAnn Watley (Streets), Jesse Turner (Streets), Mary Juanita Theobald (Streets), Diane Douglas (Fire), BellSouth (Water), Arthur Graham (Sanitation) and Denise Hollifield (Water).

The following claims were received during December 5-11, 2003: Jerry Queen (Water), Toni Pisani (Water), Joanne Allison (Water), Richard Pierce (Streets) and Max L. Morgan (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English felt that City Council should not bother the pushcart owner located at the County Courthouse for driving over the curb to put the pushcart on the sidewalk when other vehicles drive over the curbs for various reasons.

Mr. Roy Harris praised City Council for the professional way they handle themselves during Council meetings.

Mr. Don Yelton encouraged City Council to address the PACC questions put before them today.

Mr. Mike Fryar presented City Council with Ordinance No. 3035 annexing his property on Smoky Park Highway and a map of the property alleging that the description in the ordinance does not accurately correspond with the map. He asked City Council to either rescind the ordinance or waive the 60-day time period within which to appeal the ordinance.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that he was not aware of a process in the statute by which we can rescind an annexation. He believed that requires legislative action.

Based on information Mr. Fryar has brought before Council, Vice-Mayor Mumpower asked if Council has the authority to extend the period of appeal. City Attorney Oast replied no and that he felt it was a jurisdictional issue. Regarding the accuracy, City Attorney Oast said the City operated within reasonable parameters of accuracy.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:25 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 6, 2004 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Joseph C. Dunn

CONSENT:

Support for Statewide Passenger Rail Service

Summary: The consideration of a resolution supporting statewide passenger rail service.

Since 1999, a group called the Western Carolina Rail Corridor Committee has been meeting and working to advocate and generate momentum for getting passenger rail service from Salisbury to Asheville. The Committee consists of representatives from each of the nine locations along the route where a depot either currently exists or, in the case of Asheville, is proposed. Following this example, a similar 'Committee' has recently formed around a similar movement for passenger rail service between Raleigh and Wilmington/or Morehead City. Now, both groups are collaborating to promote a statewide passenger rail system across North Carolina. To that end, they are asking all affected units of local government, local business organizations, and other groups for their support by adoption of a resolution of support. Their plan is to present the collective resolutions to the NC General Assembly during the upcoming session as a demonstration of wide support for the service.

Staff recommends Council approve the resolution supporting statewide passenger rail service.

New Street Name of "Gabrielle Lane"

Summary: The consideration of a resolution accepting the new proposed street name "Gabrielle Lane."

Gashes Creek Ridge LLC, owner of lots off of Gashes Creek Road, has petitioned the City of Asheville to accept the street name " Gabrielle Lane."
The new street will begin at Gashes Creek Road and end at the cul-de-sac on Gabrielle Lane.

City staff recommends adoption of the resolution accepting the new street name "Gabrielle Lane."

Budget Amendment for NC DOT TEA 21 Enhancement Grants

Summary: The consideration of a budget amendment for three municipal agreements with the N. C. Dept. of Transportation (NCDOT) for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

On October 11, 2003, City Council authorized the City Manager to sign three municipal agreements with the NCDOT accepting the award of TEA 21 Enhancement grants for the three aforementioned sidewalk and pedestrian projects. The NCDOT will disburse TEA 21 funds for all three projects directly to the City; however, the City is responsible for only the New Haw Creek

Road/Avon project and is required to provide a local cash match. The City will distribute the other TEA 21 grant funds to the Pack Square Conservancy, who is responsible for managing the Pack Square Pedestrian Improvement project, and to Mountain Housing Opportunities, who will manage the West End/Clingman Project. Because all funds will initially be issued to the City for subsequent disbursement, a budget amendment authorizing the use of these funds is required.

The specific amounts of the grants are as follows:

(1) New Haw Creek Road/Avon Road Sidewalk – The TEA-21 grant award for this project is $172,132. The State is matching this grant with $150,000 from its Small Urban Fund Grant. Additional matches include $5,000 from the Haw Creek Community Association, and $40,000 from the City, which is already budgeted in the City's fee-in-lieu of sidewalks account.

(2) Pack Square Pedestrian Improvements – The amount of the grant is $140,000. Pack Square Conservancy will provide the match for the project.

(3) West End/Clingman Pedestrian Improvements – The amount of the grant is $172,131. The match for the project will be made by Mountain Housing Opportunities.

Staff recommends that a budget amendment for three municipal agreements with NCDOT for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

City Engineer responded to various questions from Councilman Newman about sidewalk priorities.

City Engineer Cathy Ball responded to questions from Councilman Newman regarding sidewalks.

Budget Amendment for Fair Housing Assistance Program Grant

Summary: The consideration of a budget ordinance, in the amount of $172,700, for the Fair Housing Assistance Program (FHAP) for Fiscal Year 2003-04.

The City has been carrying out its Fair Housing Program under contract with the Asheville-Buncombe Community Relations Council (ABCRC) and Fair Housing Commission since January 1988, using HUD FHAP funds. The City's Community Development Division serves as Lead Entity and monitors the program.

We have received notification of the grant awarded to the City for the federal fiscal year of 10/1/02-9/30/03. Staff has submitted the necessary paperwork to HUD. It is characteristic of this grant program that we receive notification of the grant amount at the end of the program year.

A budget ordinance amendment is required in order to receive these funds and subgrant them to ABCRC.

Community Development staff recommends adoption of the ordinance.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

URBAN RIVERFRONT MASTER PLAN

Planning & Development Director Scott Shuford said that several years ago, the City contracted with RiverLink for the preparation of a master plan for the urban areas of the French Broad and Swannanoa rivers. Later, the scope for this plan was broadened to include what is now called the Wilma Dykeman Riverway concept.

Working with a large, broad-based group of citizens and with City staff, RiverLink has completed a draft Urban Riverfront Master Plan that envisions nodes of relatively dense urban development in a scenic riverfront setting. The plan capably marries land use, transportation, water quality, and economic development goals in a manner that implements City Sustainable Economic Development Task Force and Smart Growth objectives. Under the plan, the main road linking the two rivers will become a unified transportation corridor; economic development opportunities and strategies are identified and mapped out; and a land use pattern consistent with traditional development design throughout the City is encouraged. Additionally, environmentally sensitive restoration of the rivers to promote public access, recreation, and commerce is to be accomplished.

While there has been considerable public involvement to date, RiverLink continues to seek public input on the Urban Riverfront Master Plan and wants to receive preliminary feedback from City Council concerning the direction of the plan and any additional public input deemed appropriate by Council.

Ms. Karen Cragnolin, Executive Director of RiverLink, updated City Council on the Urban Riverfront Master Plan. The goal of this plan is to create the vision, direction and foundation that will excite and motivate many people to place their bets in the riverway corridor. She explained the public process, identified facts of the French Broad River Watershed, and showed maps identifying the growth in the Swannanoa River Subwatershed. The Plan is for balance, economic development, transportation, health, environment, recreation and education. She showed the boundaries of the riverway project. The Riverway will be divided up into seven districts: the Buncombe County Turnpike District, Cotton Mill District, River Arts District, Tannery District, Roundhouse District, Biltmore Village District, Donald Ross District, and WNC Nature Center District. She explained the market and economic development feasibility study that was performed. The estimated cost of the 17 mile plan is $34 Million. Ms. Cragnolin then explained the economic and community impacts. She said that after additional public input, she will be bringing this Master Plan back to City Council for consideration of approval.

Ms. Cragnolin responded to various questions/comments from Council, some being, but are not limited to: how does this plan coincide with the West End/Clingman Avenue Area Plan; has contact been made with the Housing Authority regarding Hillcrest Apartments; has the Transportation Advisory Commission been involved in this plan; and is it realistic that this plan can be implemented.

On behalf of City Council, Mayor Worley thanked Ms. Cragnolin for her excellent presentation.

ANNUAL AUDIT REPORT

Finance Director Bill Schaefer said that this is the presentation of the City of Asheville annual audit report for the Fiscal Year Ended June 30, 2003.

City Council retained an independent audit firm, Crisp Hughes Evans LLP of Asheville, N.C., to perform an audit of the City of Asheville for the fiscal year ended June 30, 2003, as required by North Carolina General Statute 159-34. The auditors gave the City an unqualified audit opinion. (The term "unqualified" means that the auditors' opinion that the financial statements present fairly the financial position of the City is not modified by reservations or restrictions.)

Mr. Brian Broom, Director of Crisp, Hughes Evans LLP, gave a brief presentation of their findings. He said their report for the 2003 audit expresses and unqualified opinion (clean) on the fair representation of the general purpose financial statements in all material respects, in conformity with generally accepted accounting principles. This year the City was required to implement Government Accounting Standards Board Statement No. 34. As a result, the format of the financial statement has significantly changed. He then summarized some of the more significant changes. The Local Government Commission recommends governmental entities maintain, at a minimum fund balance equal to 8% of annual expenditures in the General Fund. The City's fund balance for 2003 is about 19%.

Mr. Broom and Mr. Schaefer answered various questions from Council regarding the financial report.

Councilwoman Jones asked for some way to monitor the budget, understanding why a mid-year report would not be accurate due to various reasons.

At 5:06 p.m., Vice-Mayor Mumpower left the meeting to attend the Buncombe County Commissioners meeting regarding Memorial Stadium.

At 5:15 p.m., Mayor Worley announced a short recess.

UDO AMENDMENT REVIEW

City Attorney Oast said that this Unified Development Ordinance amendment is being brought before City Council in order that staff may respond to questions Council may have prior to the public hearing, which has been scheduled on January 13, 2004. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Add duplex uses as a use by right subject to special requirements in all single family districts, to eliminate this use as a conditional use in the same zoning districts, and to provide for revised parking requirements for triplex and quadraplex uses in single family zoning districts.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to add duplex uses as a use by right subject to special requirements in all single family districts, to eliminate this use as a conditional use in the same zoning districts, and to provide for revised parking requirements for triplex and quadraplex uses in single family zoning districts.

This code amendment provides for administrative (staff) approval of duplex uses in all single family zoning districts. This code amendment has been under development for some time and City Council has asked staff to expedite its completion. Under the proposed amendment, duplex uses would go from being conditional uses to uses by right subject to special requirements. This amendment was originally proposed to include triplex and quadraplex uses as well, but meetings with a focus group of developer and neighborhood members resulted in this staff-recommended compromise. The following development standards would have to be met in order for staff to approve a duplex use:

- Separation requirements of 150 feet or 300 feet between such uses (depending on the zoning district), subject to block size provisions.

- Minimum lot size requirements.
- Parking in the rear of the site, except in certain circumstances.
- Architectural design standards to ensure that duplex structures resemble single family homes in the neighborhoods in which they are located, including: door and window placement requirements; structure height limits; roof design, pitch and materials requirements; setback limits; and siding requirements.
- Infrastructure sufficiency determination.
- Property maintenance standards.

Duplex uses in single family zoning districts help promote the infill development and affordable housing goals of the City, while providing financial incentives for the development of infill lots. Going from a conditional use permit process that requires a minimum of two public hearings to a staff-administered design review process would greatly reduce the amount of time necessary for obtaining permits for construction of these uses, reducing development costs and uncertainty about approval.

This code amendment also provides for revised parking requirements for triplex and quadraplex uses in single family zoning districts. Council has directed staff to prepare an amendment to the code to provide parking flexibility for duplex, triplex and quadraplex uses in single family zoning districts. This has been accomplished in the proposed administrative standards for duplexes but an additional amendment is necessary for triplexes and quadraplexes.

The amendment has been routed to CREIA, the Affordable Housing Task Force of Asheville and Buncombe County, Coalition of Asheville Neighborhoods and Council of Independent Business Owners for review and comment.

On December 3, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0. City staff recommends approval of the proposed code amendment.

Councilwoman Bellamy was concerned that we may be putting too many standards on the duplexes that they might not be affordable.

Discussion occurred about whether triplexes should be included in this amendment; on-street parking; the option of a petitioner going through this administrative process or going through the conditional use process, concern of distance between units and the way it is measured; reporting back to City Council in one year to see if the amendment is a good planning tool; whether the suggestions should go back to the focus group that worked on this amendment; whether some of the suggestions would need to be remanded back to the Planning & Zoning Commission; and to make sure that the requirements for a conditional use permit do not conflict with these requirements.

It was the consensus to place this public hearing on the January 13, 2004, formal City Council agenda.

ANNEXATION UPDATE

Planning & Development Director Scott Shuford said that this is the consideration of resolutions stating the intent of the City to annex the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Sand Hill/Oakview area, the Ashwood Area, the Heathbrook area, and the Sweeten Creek Road area.

It is now time for the City to initiate the next phase of annexations for 2004. Our annexation strategy has been to (1) select areas that are clearly developed; (2) include areas where water and sewer have been extended; (3) improve city limits by eliminating pockets and clarifying boundaries; and (4) disperse areas geographically. Staff has identified seven areas: Heritage Business Park, Honey Drive, Enka Park, Sand Hill/Oakview, Ashwood, Heathbrook, and Sweeten Creek Road with potential for being annexed. Under State law the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

Heritage Business Park – This area contains commercial and vacant lots. This contains nine lots totaling 12.63 acres. There is no estimated population. If the property is annexed, it would bring in $7,591 in annual property tax revenue.

Honey Drive area – This area contains single-family residential. This contains seven lots totaling 4.4 acres. There is an estimated population of 13. If the property is annexed, it would bring in $6,037 in annual property tax revenue.

Enka Park area – This area contains single-family residential and industrial. This contains 89 lot totaling 30.27 acres. The estimated population is 170. If the property is annexed, it would bring in $39,257 in annual property tax revenue.

Sand Hill Road/Oakview Road – This area contains single-family residential and condominiums. This contains 340 lots totaling 173.86 acres. The estimated population is 621. If the property is annexed, it would bring in $195,761 in annual property tax revenue.

Ashwood Area – This area contains single-family residential and mobile homes. This contains 56 lots totaling 14.35 acres. The estimated population is 113. If the property is annexed, it would bring in $30,681 in annual property tax revenue.

Heathbrook Area – This area contains single-family residential. This contains 23 lots totaling 4.43 acres. The estimated population is 47. If the property is annexed, it would bring in $27,956 in annual property tax revenue.

Sweeten Creek Road Area – This area contains single-family residential, condominiums and multi-family residential, and commercial. This contains 190 lots totaling 74.86 acres. The estimated population is 545. If the property is annexed, it would bring in $140,303 in annual property tax revenue.

The following steps and dates meet the process required by State law:

Council Adoption of Resolutions of Intent	January 13, 2004
Council Adoption of Plans of Services	January 27, 2004
Staff-Sponsored Public Informational Meeting	March 4, 2004
City Council Public Hearings	March 23, 2004
Council Adoption of Annexation Ordinances	April 13, 2004
Effective Date of Annexations	June 30, 2004

City staff recommends that City Council adopt the resolutions of intent stating the City's intent to annex the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Sand Hill/Oakview area, the Ashwood area, Heathbrook area, and the Sweeten Creek Road area.

Mr. Pettibone responded to questions from Council about industrial sites and why the City doesn't annex to the north of Colony Drive.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda

SETTING PUBLIC HEARING ON FEBRUARY 10, 2004, TO CLOSE A PORTION OF AN UNOPENED ALLEY OFF FOREST STREET

Assistant Public Works Director David Cole said that this is the consideration of a resolution of intent to close a portion of an unopened unnamed alley off Forest Street and setting a public hearing on February 10, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close a portion of an unopened unnamed alley off Forest Street, the entry of which is located approximately 165 feet east of the intersection of Forest Street and Hendersonville Road (US Hwy 25).

Public Works Department staff has researched and determined that this alley is not a City maintained street and is not in use as a means of ingress or egress for any of the properties abutting the alley. There are three lots that abut this portion of the unnamed alley. They are identified by PIN Nos. 9647.20-90-3952; 9647.20-90-5910; and 9647.20-91-4067.

The developer has agreed to preserve a 17-foot easement to connect future utilities.

City staff recommends that City Council adopt the resolution of intent setting a public hearing for February 10, 2004 to close a portion of an unopened unnamed alley off Forest Street.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

OTHER BUSINESS

Councilwoman Jones said that a new radio station (WRES-FM) will broadcast information for minority and low-income communities in and around the downtown area of the City. They will offer programming relating to homeownership, employment, credit establishment, entrepreneurship, and other subjects that will enhance the quality of life for those who listen. She felt that this would be an excellent tool for reaching out to people who many not be reached through our mainstream communications. They have raised $15,500 and have a good solid diverse base of funders. She felt the City of Asheville should be a part of the success story of the radio station and asked City Council to consider funding $4,500 as a one-time start-up cost to WRES-FM to cover the cost of a remote unit and console.

Although Vice-Mayor Mumpower felt this was a good concept, he felt this should be referred to the Outside Agency Committee for their recommendation. Personally he didn't think the City should be investing our tax dollars to fund an effort of this nature and that it would be setting a precedent.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

CLOSED SESSION

At 6:26 p.m., Councilman Davis moved to go into closed session to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G. S. 143-318.11 (a) (4). This motion was seconded by Councilwoman Bellamy and carried unanimously.

At 6:50 p.m., Councilwoman Bellamy moved to go out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 6:50 p.m.

Magdalene Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 13, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Retired Air Force Veteran Mick Dove led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Mumpower gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Councilwoman Bellamy asked that Consent Agenda "D" be removed from the Consent Agenda for an individual vote.

Vice-Mayor Mumpower asked that Consent Agenda "B" be removed from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 16, 2003, AND THE WORKSESSION HELD ON JANUARY 6, 2004

B. RESOLUTION SUPPORTING STATEWIDE PASSENGER RAIL SERVICE

This item was removed from the Consent Agenda for individual discussion.

C. RESOLUTION NO. 04-1 - RESOLUTION ACCEPTING THE NEW STREET NAME OF "GABRIELLE LANE"

Summary: The consideration of a resolution accepting the new proposed street name "Gabrielle Lane."

Gashes Creek Ridge LLC, owner of lots off of Gashes Creek Road, has petitioned the *City of Asheville to accept the street name " Gabrielle Lane." The new street will begin at Gashes* Creek Road and end at the cul-de-sac on Gabrielle Lane.

City staff recommends adoption of the resolution accepting the new street name "Gabrielle Lane."

RESOLUTION BOOK NO. 28 – PAGE 77

D. BUDGET AMENDMENT FOR N.C. DEPT. OF TRANSPORTATION TEA 21 ENHANCEMENT GRANTS FOR NEW HAW CREEK ROAD/AVON ROAD SIDEWALKS, PACK SQUARE PEDESTRIAN IMPROVEMENTS, AND WEST END/CLINGMAN PEDESTRIAN IMPROVEMENTS

This item was removed from the Consent Agenda for an individual vote.

E. ORDINANCE NO. 3080 - BUDGET AMENDMENT FOR FAIR HOUSING ASSISTANCE PROGRAM GRANT

Summary: The consideration of a budget ordinance, in the amount of $172,700, for the Fair Housing Assistance Program (FHAP) for Fiscal Year 2003-04.

The City has been carrying out its Fair Housing Program under contract with the Asheville-Buncombe Community Relations Council (ABCRC) and Fair Housing Commission since January 1988, using HUD FHAP funds. The City's Community Development Division serves as Lead Entity and monitors the program.

We have received notification of the grant awarded to the City for the federal fiscal year of 10/1/02-9/30/03. Staff has submitted the necessary paperwork to HUD. It is characteristic of this grant program that we receive notification of the grant amount at the end of the program year.

A budget ordinance amendment is required in order to receive these funds and subgrant them to ABCRC.

Community Development staff recommends adoption of the ordinance.

ORDINANCE BOOK NO. 21 - PAGE 36

F. RESOLUTION NO. 04-2 - RESOLUTION OF INTENT TO SET A PUBLIC HEARING ON FEBRUARY 10, 2004, TO CONSIDER THE CLOSING OF A PORTION OF AN UNOPENED UNNAMED ALLEY OFF FOREST STREET

Summary: The consideration of a resolution of intent to close a portion of an unopened unnamed alley off Forest Street and setting a public hearing on February 10, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close a portion of an unopened unnamed alley off Forest Street, the entry of which is located approximately 165 feet east of the intersection of Forest Street and Hendersonville Road (US Hwy 25).

Public Works Department staff has researched and determined that this alley is not a City maintained street and is not in use as a means of ingress or egress for any of the properties abutting the alley. There are three lots that abut this portion of the unnamed alley. They are identified by PIN Nos. 9647.20-90-3952; 9647.20-90-5910; and 9647.20-91-4067.

The developer has agreed to preserve a 17-foot easement to connect future utilities.

City staff recommends that City Council adopt the resolution of intent setting a public hearing for February 10, 2004 to close a portion of an unopened unnamed alley off Forest Street.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances and the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA

RESOLUTION NO. 04-3 - RESOLUTION SUPPORTING STATEWIDE PASSENGER RAIL SERVICE

Summary: The consideration of a resolution supporting statewide passenger rail service.

Since 1999, a group called the Western Carolina Rail Corridor Committee has been meeting and working to advocate and generate momentum for getting passenger rail service from Salisbury to Asheville. The Committee consists of representatives from each of the nine locations along the route where a depot either currently exists or, in the case of Asheville, is proposed. Following this example, a similar 'Committee' has recently formed around a similar movement for passenger rail service between Raleigh and Wilmington/or Morehead City. Now, both groups are collaborating to promote a statewide passenger rail system across North Carolina. To that end, they are asking all affected units of local government, local business organizations, and other groups for their support by adoption of a resolution of support. Their plan is to present the collective resolutions to the NC General Assembly during the upcoming session as a demonstration of wide support for the service.

Staff recommends Council approve the resolution supporting statewide passenger rail service.

Vice-Mayor Mumpower asked what the cost estimate was for the entire statewide service. Director of Economic Development Mac Williams said that he doesn't have that estimate, however, just the western portion from Salisbury to Asheville will be approximately $130 Million for track upgrade that will accommodate both passenger and freight trains. There will be additional expenses for equipment, operations for the station upgrades, etc. A 2001 estimate for the equipment was approximately $12 Million.

Mr. Williams then answered numerous questions/comments from Council, some being, but are not limited to: do we have a site for a station in Asheville and are there any estimates for the purchase of the site; what are the projected daily ridership numbers; are there any statistics on interstate travel east and west; there should be adequate parking at the station; have there been any studies on the economic impact of Asheville if rail service did come; and what is the state's projected budget for this system.

Councilman Dunn said that this rail service might not be cost effective because there are only two light rail systems in the United States that have made money. He didn't feel there is a need for this service in Asheville.

When Councilman Dunn asked if the rail service had potential to make money for our taxpayers, Mr. Williams said that the western corridor service was estimated to be a subsidized service.

City Manager Westbrook said that the money will be coming from the federal government. If the largest city in WNC doesn't support this in some way, it won't support the message that says we want part of those funds.

Mr. Williams explained that the resolution is being advocated so that we can keep the statewide passenger rail service effort alive to do the necessary studies and integrate passenger rail service into the transportation system as an option. He said that 70 jurisdictions (including Buncombe County, the Land-of-Sky Regional Council, and the French Broad Metropolitan Planning Organization) have supported the resolution.

Councilman Newman said that he has heard that Asheville is the most requested Amtrak destination in the country that is not currently served by rail service. Mr. Williams said that the Asheville Chamber of Commerce said that Amtrak has reported that to them.

Councilman Newman said that this is a lot of money but all parts of our transportation structure costs a lot of money. The Airport will never pay for itself, but it's still important to our economy and to our infrastructure.

Vice-Mayor Mumpower said this should be researched prior to Asheville's support. He felt that Asheville doesn't approach the density requirements to support the system.

Mr. Don Yelton felt that the idea of rail is good, however, he encouraged Council to revise the resolution to encourage the legislators to come up with hard figures.

Mr. Fred English felt Asheville did not need this rail service and we should use the money for street maintenance.

Ms. Judy Calvert Ray, Chair of the WNC Rail Corridor Committee, said they are not requesting the City to support passenger rail service at this point in time. They are only asking Council to support the initiative to develop a statewide rail system as an alternative mode of transportation for the state.

Councilman Newman said that he is sympathetic to the concerns raised, however, he understands how difficult it is to move projects like this forward in the legislature. He wondered if it would diminish the value of the resolution if Council spoke with a somewhat different voice than other towns and cities are saying. Ms. Calvert Ray said they worded the resolution as carefully as they could stating that it is an initiative to develop and support a statewide rail system. She would like for council to adopt the resolution as is, but if changes need to be made, she did not know how much impact it would have.

Mr. Alan Ditmore, Leicester resident, felt this was something good for Asheville. He felt that trains are more efficient than airplanes. He suggested reallocating the Airport money towards the rail system.

Ms. Judy Marshall spoke in favor of riding a train to Raleigh.

Councilwoman Jones felt that it is important for Asheville to be a regional player and the counties surrounding Asheville felt this will benefit us all. Therefore, she moved adoption of Resolution No. 04-3 with the understanding that our Transit Director will follow the progress, ask the hard questions and get data as it comes forward. This motion was seconded by Councilman Newman.

Mayor Worley supported the resolution and felt this was the right direction for Asheville to head. He did note that the state has a lot of studies to do in order to move forward.

Councilwoman Bellamy said that she is Vice-Chair of the N. C. League of Municipalities Community and Economic Development Committee. They have been briefed on the light rail system initiative and the desire for other municipalities across the state to see this go forward. The Committee found that if we study this issue and accumulate more data, we could get more support in the legislature so that is why as a Committee we supported this initiative.

Councilman Dunn felt the Council should have experts come in and tell us what their experience is with light rail.

The motion made by Councilwoman Jones and seconded by Councilman Brownie carried on a 4-3 vote, with Mayor Worley, Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 79

ORDINANCE NO. 3081 - BUDGET AMENDMENT FOR N.C. DEPT. OF TRANSPORTATION TEA 21 ENHANCEMENT GRANTS FOR NEW HAW CREEK ROAD/AVON ROAD SIDEWALKS, PACK SQUARE PEDESTRIAN IMPROVEMENTS, AND WEST END/CLINGMAN PEDESTRIAN IMPROVEMENTS

At the request of Councilwoman Bellamy, Councilwoman Jones moved Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

Summary: The consideration of a budget amendment for three municipal agreements with the N. C. Dept. of Transportation (NCDOT) for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

On October 11, 2003, City Council authorized the City Manager to sign three municipal agreements with the NCDOT accepting the award of TEA 21 Enhancement grants for the three aforementioned sidewalk and pedestrian projects. The NCDOT will disburse TEA 21 funds for all three projects directly to the City; however, the City is responsible for only the New Haw Creek Road/Avon project and is required to provide a local cash match. The City will distribute the other TEA 21 grant funds to the Pack Square Conservancy, who is responsible for managing the Pack Square Pedestrian Improvement project, and to Mountain Housing Opportunities, who will manage the West End/Clingman Project. Because all funds will initially be issued to the City for subsequent disbursement, a budget amendment authorizing the use of these funds is required.

The specific amounts of the grants are as follows:

(1) New Haw Creek Road/Avon Road Sidewalk – The TEA-21 grant award for this project is $172,132. The State is matching this grant with $150,000 from it's Small Urban Fund Grant. Additional matches include $5,000 from the Haw Creek Community Association, and $40,000 from the City, which is already budgeted in the City's fee-in-lieu of sidewalks account.

(2) Pack Square Pedestrian Improvements – The amount of the grant is $140,000. Pack Square Conservancy will provide the match for the project.

(3) West End/Clingman Pedestrian Improvements – The amount of the grant is $172,131. The match for the project will be made by Mountain Housing Opportunities.

Staff recommends that a budget amendment for three municipal agreements with NCDOT for TEA 21 Enhancement Grants for (1) New Haw Creek Road/Avon Road Sidewalks; (2) Pack Square Pedestrian Improvements; and (3) West End/Clingman Pedestrian Improvements.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3081. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 38

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT SAND HILL ROAD (HABITAT FOR HUMANITY) FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED 61 LOT SUBDIVISION

ORDINANCE NO. 3082 - ORDINANCE REZONING PROPERTY LOCATED AT SAND HILL ROAD (HABITAT FOR HUMANITY) FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:47 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Carter Pettibone, Urban Planner, said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

Mr. Pettibone submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners), and City Exhibit 3 (Staff Report).

Mr. Pettibone said that this is the consideration of a request to rezone property located at Sand Hill Road (Habitat for Humanity) from RS-2 Residential Single Family Low Density District and RS-4 Residential Single-Family Medium Density District to RS-8 Residential Single Family High Density District/Conditional Use; and a request to issue a conditional use permit for a proposed 61 lot subdivision. The applicant has revised his application for a 60 lot subdivision.

He said that the project accommodates infill development on an underutilized site and supports efforts to increase the supply of affordable housing, two goals of the 2025 Asheville City Development Plan.

Asheville Habitat for Humanity, the applicant, had submitted a petition for a regular rezoning to RS-8 last year. The Planning and Zoning Commission recommended denial and the applicant did not appeal.

The applicant wishes to conditionally rezone the properties in order to develop a 61-lot single-family residential subdivision (City Exhibit 3 – Location Map). The intent of the RS-8 District is to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development.

The properties are located just outside the City limits in the extraterritorial jurisdiction area on the north side of Sand Hill Road. There is a mix of zoning districts in the area, with Commercial Industrial, RM-6, and RS-4 to the east, RS-2 and RS-4 to the north, and RS-2 directly to the west and south. Land uses include primarily single-family residential to the east with a small commercial property directly northeast on Sand Hill Road, recreational uses to the north and vacant property to the west.

The development, as proposed in the conditional use plan, would be accessed from Sand Hill Road and consist of one main road, three cul-de-sac streets to serve the 61 lots, and a stub street to the north (City Exhibit 3 – Copy of Site Plan for 60 lot subdivision). While not required due to the proposed density of the subdivision, the applicant has proposed an undisturbed buffer along its boundary with the Captain's Drive development to the north and east. The applicant has also proposed reservation of other undeveloped open spaces within the development, including an area around the cemetery located on the site. The property owner and applicant would also like to propose a condition that, if approved, the properties would revert back to the original RS-2 and RS-4 zoning if for some reason the applicant does not take possession of the property.

The Technical Review Committee (TRC) reviewed this request at its November 17, 2003, meeting and recommended approval with a number of conditions. Chief among these conditions was an Engineering Department requirement that the applicant provide another access to the development or a stub to adjoining property. Unable to provide a street connection to Captain's Drive due to a narrow strip of property between the development and Captain's Drive, and after discussion with the TRC, the applicant had agreed to pursue a stub street to the Buncombe County recreational property to the north and explore other possible connections or stubs.

The Planning and Zoning Commission held a public hearing for this petition on December 3, 2003, and voted to recommend approval with the conditions identified by the TRC and an added condition that the applicant augment the proposed undisturbed buffer to maintain at least a 25' wide "C" type landscape buffer along the portion of the site that adjoins the Captain's Drive subdivision to the north and east.

The applicant has revised the site plan to address most of the TRC and Planning and Zoning Commission conditions. Conditions still outstanding include augmenting the proposed buffer between the site and the Captain's Drive subdivision with plantings to achieve at least a "C" type buffer and increasing the cul-de-sac diameter width from 70' to 90' or some alternative width

Mr. Pettibone said that this is the consideration of a request to rezone property located at Sand Hill Road (Habitat for Humanity) from RS-2 Residential Single Family Low Density District and RS-4 Residential Single-Family Medium Density District to RS-8 Residential Single Family High Density District/Conditional Use; and a request to issue a conditional use permit for a proposed 61 lot subdivision. The applicant has revised his application for a 60 lot subdivision.

He said that the project accommodates infill development on an underutilized site and supports efforts to increase the supply of affordable housing, two goals of the 2025 Asheville City Development Plan.

Asheville Habitat for Humanity, the applicant, had submitted a petition for a regular rezoning to RS-8 last year. The Planning and Zoning Commission recommended denial and the applicant did not appeal.

The applicant wishes to conditionally rezone the properties in order to develop a 61-lot single-family residential subdivision (City Exhibit 3 – Location Map). The intent of the RS-8 District is to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development.

The properties are located just outside the City limits in the extraterritorial jurisdiction area on the north side of Sand Hill Road. There is a mix of zoning districts in the area, with Commercial Industrial, RM-6, and RS-4 to the east, RS-2 and RS-4 to the north, and RS-2 directly to the west and south. Land uses include primarily single-family residential to the east with a small commercial property directly northeast on Sand Hill Road, recreational uses to the north and vacant property to the west.

The development, as proposed in the conditional use plan, would be accessed from Sand Hill Road and consist of one main road, three cul-de-sac streets to serve the 61 lots, and a stub street to the north (City Exhibit 3 – Copy of Site Plan for 60 lot subdivision). While not required due to the proposed density of the subdivision, the applicant has proposed an undisturbed buffer along its boundary with the Captain's Drive development to the north and east. The applicant has also proposed reservation of other undeveloped open spaces within the development, including an area around the cemetery located on the site. The property owner and applicant would also like to propose a condition that, if approved, the properties would revert back to the original RS-2 and RS-4 zoning if for some reason the applicant does not take possession of the property.

The Technical Review Committee (TRC) reviewed this request at its November 17, 2003, meeting and recommended approval with a number of conditions. Chief among these conditions was an Engineering Department requirement that the applicant provide another access to the development or a stub to adjoining property. Unable to provide a street connection to Captain's Drive due to a narrow strip of property between the development and Captain's Drive, and after discussion with the TRC, the applicant had agreed to pursue a stub street to the Buncombe County recreational property to the north and explore other possible connections or stubs.

The Planning and Zoning Commission held a public hearing for this petition on December 3, 2003, and voted to recommend approval with the conditions identified by the TRC and an added condition that the applicant augment the proposed undisturbed buffer to maintain at least a 25' wide "C" type landscape buffer along the portion of the site that adjoins the Captain's Drive subdivision to the north and east.

The applicant has revised the site plan to address most of the TRC and Planning and Zoning Commission conditions. Conditions still outstanding include augmenting the proposed buffer between the site and the Captain's Drive subdivision with plantings to achieve at least a "C" type buffer and increasing the cul-de-sac diameter width from 70' to 90' or some alternative width as approved by the City's Engineering Department. With the revised site plan, the applicant has also increased the width of the proposed buffer between the site and Captain's Drive from 25' to 30' along Captain's Drive and increased the amount of open space above the minimum required by the Unified Development Ordinance (UDO).

The City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety;

Final approval for the development of the site would need to receive technical approval from the Water Resources Department, MSD, Engineering, and other City and County Departments as part of a subdivision review. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

Any development on the site must comply with all City standards in regards to clearing and grading, erosion control, and maximum slope. Extensive grading is not expected. The applicants have also received preliminary approval for the location of the entrance road relative to the floodplain of nearby Hominy Creek.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

The applicant plans to present evidence that the proposed development will have minimal, if any, negative impact on values of abutting or adjoining properties.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

There appears to be no clear development pattern or character in the general area of the proposed site, as there exist a wide variety of lot sizes, zoning districts and land uses nearby. While the nearest residential subdivision, Captain's Drive, is built to a lower density, other residential developments in close proximity like the Biltmore Commons Condominium development directly southeast across Sand Hill Road and the Biltmore Grove subdivision to the east of Captain's Drive are developed at a similar or even greater density than the proposed site.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

Any proposed development on the site would be required to comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies. The proposed plan also addresses some of the goals and objectives of the 2025 City Development Plan and Smart Growth Policies, including accommodating infill development on underutilized sites and supporting efforts to increase the supply of affordable housing.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities;

Any development of the site would need to receive technical approval from applicable City and County Departments, which include representatives of the Water Resources Department, MSD, Engineering, and County Fire and Building Safety Departments.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

During TRC review, the City's Engineering department did not identify significant issues regarding traffic congestion or safety. No undue traffic congestion or traffic hazards are anticipated as a result of this development.

Rezoning the properties to RS-8/Conditional Use Zoning would allow the applicant the opportunity to develop the property for 61 single-family residences and appears to be consistent with the intent and purpose of the UDO and goals of the City's smart growth policy and 2025 City Development Plan.

The Planning and Zoning Commission voted 5-1 to recommend approval with the conditions identified by the TRC and an additional condition that the applicant would augment the existing vegetation to achieve a "C" type buffer in the area along the portion of the site that adjoins the Captain's Drive subdivision.

Since there are still outstanding conditions, staff recommends approval of the conditional use permit portion of the request subject to the following conditions:

- The buffer between the development and Captain's Drive is supplemented to achieve at least a "C" type landscape buffer.
- The diameter width for each cul-de-sac is increased to 90' or to an alternative width as determined by the City's Engineering Department.
- The location of the fence line surrounding the cemetery that abuts the Captain's Drive development is moved back to accommodate a "C" type buffer but still contain the graves located within the cemetery.
- All other outstanding TRC conditions are addressed.
- If the applicant does not take possession of the properties, the zoning of the properties will revert back to the original RS-2 and RS-4 zoning (requested by applicant).

When Councilman Newman asked if the schools are notified of the projects, Mr. Pettibone said that TRC agenda and the Planning & Zoning Commission agendas are sent to the schools. We have not heard anything about school capacity problems resulting from this project.

Upon inquiry of Councilman Davis, Mr. Pettibone said that there is no more property in this tract that is developable because of the floodplain.

Councilman Davis asked if this property were to be developed under it's current zoning how many units could be built, given the floodplain and slope. Mr. Pettibone said that they have not done an analysis of that, however, it would be somewhere from 40-50 units.

Mr. Gerald Green, representing Habitat for Humanity, spoke in favor of the conditional use zoning and conditional use permit. He explained that Habitat provides housing for the working people in our community and expounded on the services Habitat performs. The Habitat communities add to, not detract, from the surrounding properties. There is no evidence of adverse impact of values of the surrounding properties. Since homes are appraised often on a square foot basis, what we found is that the square foot appraised value of Habitat homes is equal to many of the homes in the surrounding areas on a square foot basis. Those homes are often a bit larger so there is a chance that those homes will be valued more, but on a square foot basis the cost is approximately the same. Some advantages of the site is it's proximity to schools and to the Buncombe County soccer complex, which the stub street will provide access to. The site has easy access to interstates and a range of transportation networks. There is also growing employment opportunities in the area with the development of Biltmore Lake, the industrial park that is being developed, Southeastern Container and the other industrial complexes along Sardis Road and the Sand Hill Road area. The infrastructure is adequate. This is a 60-lot single-family subdivision. The current zoning would permit 47 single-family homes, given the existing topography. We are requesting an addition of only 13 lots over the current zoning on 17.33 acres. The average density will be 3.5 units per acre. Taking out for the street system and amount of open space (which is in excess of what is required by the City), the density will actually be 5 homes per acre. Landscaping will be provided to enhance the appearance of the community. He said that no buffer is required by the City but Habitat has proposed a 25' buffer. Following the Planning & Zoning Commission meeting, Habitat agreed to extend the buffer from 25' to 30' at the northern top. The advantage of this conditional use zoning is that City Council can place additional conditions on the zoning of the property to assure that this development will fit in with the neighborhood and not have an adverse impact on the surrounding property owners. A stub street has been added since the Planning & Zoning Commission going to the County's property. At this point the County said that they have no plans to build any street or to allow a street to be built on this property. At this point the street will go nowhere, but it will have a sidewalk along it and will be a good place for the community to access the County's recreational facilities. He then reviewed their responses of the City's seven conditional use standards (City Exhibit 3 – Applicant's Findings of Fact). Benefits of the project include providing housing to meet the needs of the community; infill development; meets the goals of the City by providing affordable housing and infill development; and it is in an excellent location. He urged City Council to vote in favor of the conditional use zoning and permit.

Mr. Gordon Greenwood, President of the Board of Directors for Habitat for Humanity, said that since 1983 they have built 183 homes in our community. Improvements from land to houses to date exceed $9.5 Million. Property taxes paid by Habitat homeowners in 2003 exceeded $108,000. The new subdivision will increase the tax base by $7.5 million. Habitat homes have been appraising from $112,000. It is anticipated that the homes in this project will be appraised from $120-125,000. He gave other statistics about Habitat's homes. They would like to start construction in the summer of 2005 and be concluded in 2009. A family of four with an income of $15,600 to $34,720 could quality from an income standpoint for a Habitat house with monthly payments as low as $365, which would include taxes and insurance. He felt this was a good project and asked for Council's support.

Ms. Lynette Sills, Realtor in Buncombe County for 8 years and member of the Board for Habitat for Humanity, reviewed with Council information from the Buncombe County tax records and from the Asheville Board of Realtors Multiple Listing Service. With the exception of 2 lots, all of the lots on Captain's Drive range from .24 acres to .45 acres. The two exceptions are one lot at .51 acres and another at 1.69 acres. With the exception of the home with 1.69 acres on it, the selling prices for homes on Captain's Drive in the past four years have ranged from $125-166,500. The list prices have ranged from $129-189,900. The square footage of these homes ranges from a little over 1,700 heated square feet to a little over 2,000 heated square feet. The price per square foot ranges from a little over $71 to a high of $100 with an average resale of $84 per square foot. The tax records show that these houses are valued for tax purposes between $138-196,400. She gave similar statistics about the homes on Garden Grove. Te homes Habitat proposes to build on the property are 2-4 bedroom homes and the heated square footage ranges from 900-1,300 square feet. The most recent homes appraised by Habitat appraised at $112,900. She pointed out that their price per square foot is comparable to price per square foot in Biltmore Grove and to Captain's Drive and to comparable properties selling in West Asheville.

Upon inquiry of Mr. Steve Barden, attorney representing some residents on Captain's Drive, Mayor Worley explained that when dealing with a conditional use zoning and permit, Council does consider the proposed use because if approved, it is restricted to that use only. For a normal rezoning, City Council would not be able to consider the proposed use of that property but would have to consider all the uses under that district.

Mr. Barden said that the rezoning request to RS-8 could allow up to 138 lots in this 17 acre area. There are no other RS-8 districts in that general vicinity. Rezoning this property to RS-8 would basically spot this particular area isolated from other areas of like zoning density. The residents of Captain's Drive bought their property with a reasonable expectation that this area would be low density. He felt this development will directly affect the property owners and their property values. He doesn't think the pattern of Habitat's previous projects has been in such a low density area. On Captain's Drive the average lot size is .49 acres, which is a far cry from the proposed zoning use of RS-8. It's their position that the current zoning of 40-50 I should be enough. He urged Council to deny the conditional use zoning.

The following individuals (who supported Habitat and it's efforts) spoke in opposition to the proposed conditional use zoning for some reasons, some being, but are not limited to: the wildlife will be destroyed in the beautiful woods along Captain's Drive; adding 100 or more cars in area will add to the already congested street system; RS-8 will crowd families to close together which will create conflict between neighbors; a home on .2 lots or less won't give those homeowners a chance to improve their home like adding garage, shrubs, flowers, trees, carport, etc. that other homes in the area have; homes and lots will be smaller than the surrounding area; homes will not be close to the value of the surrounding area homes; RS-8 zoning is out of character with Captain's Drive; this will allow a high density population in a low density community; no public transportation to that area and no plans for the bus service to come to that area; since the development is in the County the homeowners will have an added expense of garbage collection; the development can only be made legal by the exception to the existing regulations; the cemetery and surrounding area deserves special attention because of it's historical value; the lots, not the homes, are not compatible; adjoining property values will be decreased; there will be additional significant traffic congestion; residents have been waiting for 25 years for Sardis Road to be widened and 10 years for a longer exit lane at Exit 44; City has recognized traffic concerns by requiring a second road access but there is only a stub street; property damage collisions have increased 50% on Sand Hill Road; property damage collisions have increased 91.6% on Sardis Road; there will be no public access to the cemetery; trees will be cut; environment will be destroyed; school capacity not addressed; homes should be built to current zoning; stub street will be a safety hazard for children at the soccer complex; applicant has not worked with the community to find a common ground; tax figures by applicant do not reflect basement square footage; no sidewalks on Sand Hill Road; dangerous intersection at proposed project and Biltmore Commons; who will maintain cemetery; a home on 1/8 acre will not equal monetary value of a home on ½ acre; Habitat home will average 1,100 square feet whereas home on Captain's Drive averages 1,852 square feet (68% larger); average Habitat home will be on .20 acre whereas home on Captain's Drive averages on .48 acre (2.5 times larger); no published 2025 Plan; 350 single-family homes being built on Oakview Road, 400 proposed homes in Biltmore Lake; new apartment complex behind school with 48 homes, 250 apartments at Biltmore Commons – all with no school or road upgrading; and Sand Hill School Road is too narrow to allow a school bus and a full-size SUV to pass:

Ms. Sandra Bailey, resident on Captain's Drive
Mr. Steve Ayala, resident on Captain's Drive
Mr. Fred English, resident in Haw Creek
Ms. Kathleen Bailey, resident on Captain's Drive (Neighborhood Exhibit 1)
Mr. Scott Bailey, resident on Captain's Drive
Ms. Dawn Treadway, resident on Sand Hill Road

Mr. Roger Cook, resident on Captain's Drive
Ms. Julie Case, resident on Sand Hill Road
Mr. John Owen, resident on Captain's Drive
Ms. Carol Tracy, resident on Captain's Drive
Ms. Gail Crawford, resident on Captain's Drive
Mr. Joe Treadway, resident on Sand Hill Road (City Exhibit 3 – Arial Photo and Neighborhood Exhibit 2)
Mr. Tom Rogers, resident in Sand Hill Road area
Mr. Tommy Plemmons, resident on Sand Hill Road
Ms. C. Russell, resident on Captain's Drive
Mr. Kevin Varner, resident on Captain's Drive
Mr. Russ Tracy, resident on Captain's Drive

Mr. Alan Ditmore, resident in Leicester, spoke in favor of the proposed development.

Mr. Martin Lewis, partner with Fletcher Partners, supported the proposed development. His company is proposing to build an industrial center adjoining the property which will have a tremendous economic impact in Buncombe County with jobs and state/local tax revenues and they would be happy to have the view of the Habitat community.

Mr. Green responded to the various comments voicing opposition to the proposed development. He said that Habitat will consider voluntary annexation into the City after the homes are constructed. The lots are similar in size to the size of the lots in Biltmore Grove Subdivision located on the other side of Captain's Drive and that development has not adversely impacted the property values on Captain's Drive. The second access was required for future road construction because of the length of the street. They will work with the residents on Captain's Drive to provide public access to the cemetery. They are trying to protect the environment by minimizing tree clearance and providing a large open area around the cemetery and other open spaces, as well as the undisturbed 30' buffer along Captain's Drive which will be enhanced. They are preserving a much larger area around the cemetery to assure there is no disturbance of the cemetery or any of the unmarked or poorly marked graves. Regarding contact with the schools, Ms. Welsh with Habitat contacted Mr. Marshall Roberts who is the Facility Director of Buncombe County Schools. He stated that Enka High School is projected to be 37 over capacity this year. Enka Middle School is near capacity and Sand Hill Venable Elementary School is in good shape. He said that Mr. Roberts further stated that while the Enka district has seen steady growth over the past 8 years he doesn't believe the community should perceive school overpopulation to be a problem.

Mr. Barden said that the average of the 17 lots on Captain's Drive is .48 acres. He doesn't think the fact that one lot over one acre really skews those figures. Regarding the stub street, the applicant has given no evidence if they can ever get right-of-way out of that through the County property. And, there is no evidence they can ever get legal right-of-way out of the cemetery property into Captain's Drive. They feel the developer is asking for a large zoning change and the residents in the surrounding area are entitled to the same kind of protection that anyone else in the County has. Changing zoning to increase the density is a very serious step and he urged City Council to protect the rights of the property owners.

Mayor Worley closed the public hearing at 7:40 p.m.

Mayor Worley then announced a short break.

Mr. Pettibone then responded to various questions/comments from Council that arose out of the public hearing, some being, but are not limited to: describe the buffer planned; where is the buffering planned; can City Council increase the buffering; and was the second access an issue of concern.

Upon inquiry of Councilwoman Bellamy, Mr. Anthony Butzek, the City's Traffic Engineer, said that the need for the second access point is dictated by the length of the cul-de-sac. The City typically does not allow cul-de-sacs that exceed 1,000 feet in length (based on the Fire Code). When that situation does occur we require a second connection to be made. In this case, the first possibility we looked at was connecting to Captain's Drive, however, that was determined to not be feasible. With the floodplain on the opposite side of the project that was also infeasible. The only connection that had any feasibility was the connection to the Buncombe County parcel. It is true that connecting a street through there is unlikely, at least in the near future, but we hope to get is a sidewalk or greenway connection to the park.

Vice-Mayor Mumpower asked what the recommendation would be been if there was no other access. Mr. Butzek said that if the cul-de-sac length exceeded 1,000 feet and there were no other solutions and traffic were not a concern, we would probably permit it with the condition that it does meet this particular standard and let City Council make that determination.

Ms. Butzek and Mr. Pettibone answered various questions from Council, some being, but are not limited to, why a traffic impact study was not required; what the level of service is on area roads; why can't the other access be on Captain's Drive; why doesn't the City like to approve cul-de-sacs; are they required to provide fire hydrants along the street; and the pattern of development in the area (City Exhibit 4).

There was considerable discussion about the stub street and it's function.

Vice-Mayor Mumpower was concerned that Standard No. 3 has not been met. He felt there would be a impact. If there is not an impact, it's going to be because property values in Asheville are going up and compensate for changes in neighborhood. But if property values weren't going up he wondered if this project wouldn't have a negative impact. He was also concerned that Standard No. 4 has not been met. He said that the area seems to compile about every zoning district Asheville has. Their most immediate neighbors are RS-2 and RS-4 and Biltmore Commons is really a significant distance from this property.

Councilman Davis said that Biltmore Grove changed the pattern of development in the area. He did note that it is built out much more densely than when it came before the Planning & Zoning Commission a couple of years ago. Therefore, he had some concerns when we start comparing what that neighborhood really looks like to what it looked like before Biltmore Grove.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that the consideration of school overcrowding is not one of the factors that is listed in the ordinance. He noted that Council received information going to both sides of that issue.

Planning & Development Director Scott Shuford addressed Councilman Dunn's concern that Standard No. 4 was not met because the development in the surrounding area is not in the "neighborhood in which it is located."

Upon inquiry of Councilman Davis, Mr. Lou Kraus, representing Habitat for Humanity, said that they had a preliminary meeting with the neighborhood before the Planning & Zoning Commission and TRC meetings. They invited neighbors in the surrounding area to A-B Tech, showed them their proposed plan (which at the time was 64-units), heard their concerns and took those comments into their consideration regarding the buffering and reduction of some units.

Upon inquiry of Councilman Davis, Mr. Kraus said that a 13-lot loss would probably put them out of the market for affordable housing on the property.

Councilman Davis was not sure that Standard No. 4 has been met. He does think there may be some compromise if a few units were dropped off. Mr. Kraus said that they have reduced the number of units from 64 to 60 already.

Councilman Dunn pointed out that we all want affordable housing, however the density and scale doesn't seem it fit Standard No. 4. He hoped there was a way to scale the project down.

Councilman Davis felt there should be a provision for maintenance of the cemetery due to it's historic nature. Mr. Kraus said that if the project moves forward, there would be a homeowners association that would be responsible for all of the common land and property in that area. Part of that would be their responsibility to maintain the cemetery.

Upon inquiry of Mayor Worley, City Attorney Oast said that to the extent that the cemetery is included in the site plan then it's consideration is relevant.

Upon inquiry of Councilman Newman regarding property values, City Attorney Oast explained the courts have interpreted similar provisions in other ordinances is the showing must be that the property values will be lower if the project goes in than they are if the project doesn't.

Discussion occurred regarding the ability to adopt the conditional use zoning and then continue the conditional use permit part to give the parties an opportunity for discussion to see what might be amended in the site plan.

When Councilwoman Jones asked if there were a less dense development would the stub street be required. Mr. Butzek responded that the stub street is based entirely upon the length of the cul-de-sac exceeding 1,000 feet. It is the general policy of the City to encourage connectivity among streets. The Fire Code also limits the maximum length of the cul-de-sac to 1,000 feet without another connection.

Councilman Davis noted that for all practical purposes the stub street doesn't really do anything. Mr. Butzek said that the applicant is meeting the intent of the ordinance by making every effort to achieve the connection to allow for a future connection in a most likely spot possible. Mr. Shuford also responded to not discount the stub street as just a paper way to meet the requirement. The Buncombe County soccer facility is very well attended and having a secondary access point to that facility, through this neighborhood, might be something the County would be very interested in.

Mr. Shuford said that the best secondary connection would be to Captain's Drive, however, the subdivider of the property put a 1-foot strip to keep the adjoining property owner from every being able to access Captain's Drive. Therefore, there needs to be some flexibility if this property is to be developed regardless of how many homes are placed on it. There have been efforts by the applicant to try to meet both the spirit and intent of those standards. The City's Traffic Engineer and the City's Fire Marshal are satisfied that those standards have been met.

In response to Vice-Mayor Mumpower, Mr. Kraus said that on an area such as this, they would clear all rights-of-way that would be needed for roads and utilities. They do not go in and clear-cut an area, grade it and then begin their house construction. They clear each individual lot at a time, cutting out the necessary house seat and the area around it. If there are trees that will have root damage when the house seat is cut in, we have found from experience that it's best to go ahead and take some of those trees out immediately rather than go back in when they die and pay a high cost to take the trees down. They have every intent of preserving the wooded integrity and the look of this area. They have a landscaping budget for each house. These sorts of amenities can be done and still keep our housing costs more affordable than in giving up another 3-5 lots in a subdivision.

At 9:01 p.m., Mayor Worley re-opened the public hearing in order to hear from the public regarding the following new information received: traffic access, connectivity, stub street, neighborhood/developer meeting, density necessary for the project to work financially, and buffer width.

Upon inquiry of Councilman Dunn, Mr. Kraus said that they have already reduced the project by five lots and probably a sixth one with the stub street. All of this represents dollars in terms of affordable housing. We do not want to see this project fall apart. In addition to what we have given up already, if Habitat needed to forfeit another 2-3 lots maximum we will take that under consideration without saying this project is dead. If we are going beyond that then these developed land costs are out of the realm of affordable housing.

When Councilman Dunn asked about selling prices, Mr. Kraus said that the selling prices, on no interest loans, will be for the appraised value, but the amount that the homeowner will pay back to Habitat (money reinvested back into their program) will be approximately $85-95,000.

Mr. Barden said there is confusion on the legal access of the stub street. Obviously there is no foreseeable access through the Buncombe County property so the stub street is basically useless. It is his understanding that there has been no substantial meeting between the developer and the property owners since June of 2003. Regardless of the trees, the density is high and you have to cut down a lot of trees in order to fit a 1,100 square foot house on lots that small.

Mr. Joe Treadway said that the TRC meeting on November 17, 2003, discussed the stub street and the minutes reflect that the developer needs the secondary access.

Mr. Don Yelton suggested Council exempt this development from having the stub street. He also suggested Council add a condition that no cars be parked on the cul-de-sacs in the subdivision.

Ms. Gail Crawford said that the applicant did meet with neighborhood in June of 2003. At the July 22, 2003, Planning & Zoning Commission meeting, the Commission highly recommended the developer meet again with the neighborhood, but they have not.

Mayor Worley closed the public hearing at 9:15 p.m.

Upon inquiry of Vice-Mayor Mumpower, Mr. Kraus said that they would be happy to lose the stub street because it is a one-lot loss. Regarding meetings with the neighborhood, Mr. Kraus also said that there have been a lot of public meetings, 2 Planning & Zoning Commission public hearings, TRC meeting and this City Council public hearing.

Councilwoman Bellamy moved to adopt Ordinance No. 3082 to rezone property located at Sand Hill Road (Habitat for Humanity) from RS-2 Residential Single Family Low Density District and RS-4 Residential Single-Family Medium Density District to RS-8 Residential Single Family High Density District/Conditional Use. This motion was seconded by Councilwoman Jones.

Mayor Worley said that he would be willing to continue the conditional use aspect in order to give the participants an opportunity to explore whether there is some reduction possible. He explained how the two biggest concerns surrounded impact on property values and harmony with the existing neighborhood. He felt the objections brought up don't hold up when you really look at it closely and look at the surrounding neighborhood in total and at the density of the proposed project compared to the allowable density immediately surrounding it.

Vice-Mayor Mumpower felt the neighborhood has legitimate concerns. He hoped that when the parties meet that considerations be given to deleting the stub street and giving us something tangible that will have more impact on our future than the dead-end, a community path to access the soccer field, and holding onto trees to mitigate visual impact. He encouraged the developer and neighborhood to meet and not get into token reduction of lot size.

City Attorney Oast said that since there are two different considerations to be made. The first issue is the rezoning. The question Council needs to be considering is whether the requested zoning classification is appropriate for this site if the use is conditioned and not necessarily get into the specifics of the proposal which is fluid and subject to change before Council considers the conditional use permit.

Councilwoman Jones said that the County-City Housing Task Force has just presented their report that notes that the number one barrier for affordable housing is zoning. She felt Habitat is a reputable developer that delivers quality projects and she appreciated the voluntary annexation openness. She believed that many of the concern raised, Council will be able to protect with the rezoning because of the buffer. We can't enforce the buffer unless we have a conditional use.

City Attorney Oast reminded Council that this is not a vote on who the applicant is, but what is happening on the property.

Councilman Dunn pointed out that we do need affordable housing, however, we also need to consider the people that are currently living in the area. He was not sure whether this development would hurt property values in the long run, but it may in the short term. He hoped the developer would be amenable to decrease the lot sizes.

Councilman Davis said that we are not really changing the complexion of that area because that has been done already. He believed that if this was a straight rezoning and the developer was going to build 45 units, the neighborhood would probably be just as upset. He hoped that in the conditional use permit, Council consider perhaps a little more buffer than 30 feet. He would support the rezoning part since the area has already changed, but with reluctance.

Councilwoman Bellamy felt that the site plan helps our community. She urged the developer and neighborhood to come together because there are more commonalities than you think. She felt the RS-2 zoning abutting the property is misleading.

The motion made by Councilwoman Bellamy and seconded by Councilwoman Jones carried unanimously.

Councilwoman Bellamy then moved to continue consideration of the conditional use permit until February 24, 2004, in order for the developer and neighborhood to meet to discuss the stub street, additional buffer, fewer lots, and/or other things that might make the development more attractive or palatable. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

At 9:43 p.m., Mayor Worley announced a short recess.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE THE REVIEW AND APPROVAL PROCESS FOR DUPLEXES IN SINGLE-FAMILY ZONING DISTRICTS AND TO ESTABLISH NEW DEVELOPMENT STANDARDS FOR THESE USES IN SINGLE-FAMILY ZONING DISTRICTS, AND TO REVISE THE ADDITIONAL CONDITIONAL USE STANDARDS FOR PARKING ASSOCIATED WITH TRIPLEXES, AND QUADRAPLEXES IN SINGLE-FAMILY ZONING DISTRICTS

ORDINANCE NO. 3083 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO REVISE THE REVIEW AND APPROVAL PROCESS FOR DUPLEXES IN SINGLE-FAMILY ZONING DISTRICTS AND TO ESTABLISH NEW DEVELOPMENT STANDARDS FOR THESE USES IN SINGLE-FAMILY ZONING DISTRICTS, AND TO REVISE THE ADDITIONAL CONDITIONAL USE STANDARDS FOR PARKING ASSOCIATED WITH TRIPLEXES, AND QUADRAPLEXES IN SINGLE-FAMILY ZONING DISTRICTS

Mayor Worley opened the public hearing at 9:55 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to Chapter 7 of the Code of Ordinances of the City of Asheville (Unified Development Ordinance) to revise the review and approval process for duplexes in single-family zoning districts and to establish new development standards for these uses in single-family zoning districts, and to revise the additional conditional use standards for parking associated with triplexes, and quadraplexes in single-family zoning districts. This public hearing was advertised on January 2 and 9, 2004.

This code amendment provides for administrative (staff) approval of duplex uses in all single family zoning districts. This code amendment has been under development for some time and City Council has asked staff to expedite its completion. Under the proposed amendment, duplex uses would go from being conditional uses to uses by right subject to special requirements. This amendment was originally proposed to include triplex and quadraplex uses as well, but meetings with a focus group of developer and neighborhood members resulted in this staff-recommended compromise. As of December 3, 2003, the following development standards would have to be met in order for staff to approve a duplex use:

- Separation requirements of 150 feet or 300 feet between such uses (depending on the zoning district), subject to block size provisions.
- Minimum lot size requirements.
- Parking in the rear of the site, except in certain circumstances.
- Architectural design standards to ensure that duplex structures resemble single family homes in the neighborhoods in which they are located, including: door and window placement requirements; structure height limits; roof design, pitch and materials requirements; setback limits; and siding requirements.
- Infrastructure sufficiency determination.
- Property maintenance standards.

Duplex uses in single family zoning districts help promote the infill development and affordable housing goals of the City, while providing financial incentives for the development of infill lots. Going from a conditional use permit process that requires a minimum of two public hearings to a staff-administered design review process would greatly reduce the amount of time necessary for obtaining permits for construction of these uses, reducing development costs and uncertainty about approval.

This code amendment also provides for revised parking requirements for triplex and quadraplex uses in single family zoning districts. Council has directed staff to prepare an amendment to the code to provide parking flexibility for duplex, triplex and quadraplex uses in single family zoning districts. This has been accomplished in the proposed administrative standards for duplexes but an additional amendment is necessary for triplexes and quadraplexes.

The amendment has been routed to CREIA, the Affordable Housing Task Force of Asheville and Buncombe County, the Coalition of Asheville Neighborhoods and the Council of Independent Business Owners for review and comment.

At the January 6, 2004, City Council worksession, Council directed the amendment to be revised as follows:

- Reflect a linear, blockface measurement for the separation requirement.
- Maintain a conditional use permit option for developers of duplex uses not wishing to meet the use by right subject to special requirements conditions.
- Provide for on-street parking.
- Increase the number of parking spaces allowed in the front yard from two to three.

City staff will need to return to Council with a separate code amendment that makes the separation standards for these uses consistent with the conditional use permit requirements.

On December 3, 2003, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0. City staff recommends approval of the proposed code amendment.

Ms. Barber Melton, President of the Coalition of Asheville Neighborhoods, explained why they would not be supportive of the changes City Council directed staff to make at their January 6, 2004, worksession. She urged City Council to adopt the ordinance which was unanimously adopted by the Planning & Zoning Commission stressing there was consensus of many organizations on that proposed ordinance.

Ms. Norma Baynes, representing the Shiloh Community Association, also urged City Council to adopt the original proposed ordinance and explained why.

Mr. C.D. Williams, representing the Jackson Park/Woolsey Neighborhood, asked City Council to adopt the original proposed ordinance because there was consensus reached by many groups.

Mr. Scott Dedman, member of the County-City Housing Task Force, felt the ordinance, with amendments by City Council on January 6, 2003, was a modest step in the right direction.

Mayor Worley closed the public hearing at 10:15 p.m.

Councilman Newman felt it was good to integrate attractive small scale multi-family homes into residential areas in the City, if we have design standards that are going to allow them to fit in well with the character of those neighborhoods. He thinks that this ordinance is a good step in the right direction for doing that. He would be comfortable with the idea that, if we have good design standards, that the small scale multi-family, including the quadraplexes and smaller, be allowed in the residential areas without distance requirements. He felt the development standards are very strong and believes there are opportunities to make them a little more simple and easy to understand. He felt that if we are going to have the strong design standards and not allow triplexes or quadraplexes, he would be comfortable in having an ordinance that duplexes would be allowed without a distance requirement.

Councilman Dunn would not support the ordinance amendment because we are giving City Council's authority to staff.

Councilman Davis would not be supportive of revising the design standards at this point because they were given good thought from the focus group and they gave us their best recommendation. He felt that we have taken a lot of the ability of a neighborhood to be heard away.

Mayor Worley stated that it is the general agreement of City Council to revisit this matter in one year to see if we are having construction occur.

Councilwoman Bellamy felt that the ordinance is asking a lot but is willing to give it a try for a year. She pointed out that committee recommendations are not etched in stone and even though they are very helpful to Council, City Council will revise any recommendation if they feel it is for the best for the entire City.

Councilman Newman felt there are issues about fairness to neighborhoods. We need policies so that we are treating different neighborhoods with the same kinds of standards that we treat other neighborhoods. The reality is that the historic pattern of development that we have in Asheville is that there were small scale multi-family dwellings built in all of the older neighborhoods. His perspective on this is that we have some neighborhoods in Asheville which are zoned multi-family where developers can built anything they want with no design standards. Whereas in other neighborhoods you can't build any multi-family homes at all even though there are multi-family homes integrated throughout them. That is a fundamental fairness issue we need to talk about. This step is a step in the right direction.

City Attorney Oast responded to a question from Councilman Dunn about restrictive covenants.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved to adopt Ordinance No. 3083, with the changes outlined by Mr. Shuford resulting from the January 6, 2003, worksession. This motion was seconded by Councilman Davis.

Councilman Newman moved to amend the motion that there not be a distance requirement as it applies to duplexes with the design standards outlined in the ordinance. This motion was seconded by Councilwoman Jones and failed on a 3-4 vote, with Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

Vice-Mayor Mumpower believed that there is a natural order to development patterns and Council can nudge those but he believes it's naive and arrogant that City Council can control them.

The original motion made by Councilwoman Jones and seconded by Councilman Davis carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 42

IV. UNFINISHED BUSINESS:

A. SECOND READING OF RESOLUTION NO. 03-207 – RESOLUTION PERMANENTLY CLOSING AN UNOPENED SECTION OF EMMA ROAD BETWEEN LEICESTER HIGHWAY AND OLD COUNTY HOME ROAD

Mayor Worley said that the public hearing and first reading of this resolution occurred on December 16, 2003. Due to the vote, a second reading was required.

Mayor Worley announced that the applicant has worked with the City and worked out alternates thus changing City staff's recommendation to approve the closing.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 03-207. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 28 – PAGE 73

V. NEW BUSINESS:

A. ORDINANCE NO. 3084 - BUDGET AMENDMENT TO ALLOCATE FUNDS TO WRES-FM

Councilwoman Jones said that a new radio station (WRES-FM) will broadcast information for minority and low-income communities in and around the downtown area of the City. They will offer programming relating to homeownership, employment, credit establishment, entrepreneurship, and other subjects that will enhance the quality of life for those who listen. She felt that this would be an excellent tool for reaching out to people who many not be reached through our mainstream communications. They have raised $15,500 and have a good solid diverse base of funders. She felt the City of Asheville should be a part of the success story of the radio station and asked City Council to consider funding $4,500 as a one-time start-up cost to WRES-FM to cover the cost of a remote unit and console.

Mr. John Hayes, President and CEO of the Empowerment Resource Center, spoke in support of the radio station and the requested budget allocation. Buncombe County has allocated them $5,000.

Mr. Fred English, Haw Creek resident, spoke in opposition of using tax dollars for this purpose.

Mr. Don Yelton spoke against this allocation and requested information on non-profits opening up their books for the public to review.

Mr. Scott Dedman, Board member of the Empowerment Resource Center, spoke in support of the allocation to the radio station for equipment.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Newman moved to approve Ordinance No. 3084. This motion was seconded by Councilwoman Jones.

Councilman Dunn explained why he would not support public dollars for this kind of issue.

Councilwoman Bellamy said this is a one-time allocation and she would support it.

Vice-Mayor Mumpower was opposed to City tax dollars being used for this purpose, however, he was supportive of the concept.

Councilman Davis supported the one-time allocation for better communication.

Mayor Worley supported the request, however, was concerned about the timing of the request and the process itself.

The motion made by Councilman Newman and seconded by Councilwoman Jones carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 46

Councilwoman Bellamy asked the City Manager if there was anyway to provide education on the tax system and non-profits and how they relate.

At 11:11 p.m., Mayor Worley announced a short recess.

B. RESOLUTIONS OF INTENT TO ANNEX THE HERITAGE BUSINESS PARK AREA, THE HONEY DRIVE AREA, THE ENKA PARK AREA, THE ASHWOOD AREA, THE HEATHBROOK AREA, AND THE SWEETEN CREEK ROAD AREA AND SETTING A PUBLIC INFORMATION MEETING ON MARCH 4, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING CITY COUNCIL PUBLIC HEARINGS ON MARCH 23, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Urban Planner Carter Pettibone said that this is the consideration of resolutions stating the intent of the City to annex the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood Area, the Heathbrook area, and the Sweeten Creek Road area.

He said that the State of North Carolina enables cities to grow by annexation of areas that meet certain statutory requirements. This state legislation is based on the proposition that strong cities are the basis of a strong state economy and essential to the continued economic development of the state, and that cities are the best units of government to meet the needs of urban areas. The state's intent is often summed up as "what is urban should be municipal."

North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population.

The City of Asheville has initiated annexations for the past four years – six areas in 2001, five areas in 2002 and seven areas in 2003 and five in 2004. These recent annexations, like the ones being presented are designed to include: areas that are clearly urban, areas surrounded by the City but not within the City of Asheville and can only be accessed through the City; areas that will create a more logical City boundary; and areas with at least some existing water and sewer service.

It is now time for the City to initiate the next phase of annexations for 2004. Staff has identified six areas: Heritage Business Park, Honey Drive, Enka Park, Heathbrook, Ashwood, and Sweeten Creek Road with potential for being annexed. Another area, the Sand Hill/Oakview area, was initially identified as a seventh candidate for annexation, but after further review, staff has determined some technical issues that would affect the area's ability to be annexed and be appropriately served by City services. We are not recommending the City pursue annexation of this area until these issues have been further studied and addressed.

The following steps and dates meet the process required by State law:

Council Adoption of Resolutions of Intent	January 13, 2004
Council Adoption of Plans of Services	January 27, 2004
Staff-Sponsored Public Informational Meeting	March 4, 2004
City Council Public Hearings	March 23, 2004
Council Adoption of Annexation Ordinances	April 13, 2004
Effective Date of Annexations	June 30, 2004

City staff recommends that City Council adopt the resolutions of intent stating the City's intent to annex the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, Heathbrook area, and the Sweeten Creek Road area.

Mr. Pettibone stated that the resolutions of intent state that (1) it is the intent of the City Council of the City of Asheville to consider annexation of the territory described in the resolution pursuant to Part 3 of Article 4A of Chapter 160A of the North Carolina General Statutes; (2) a public informational meeting on the question of annexing the above-described territory will be held in the Public Works Building located at 161 S. Charlotte Street, Asheville, N.C., at 5:30 p.m. on the 4th day of March, 2004, at which time a representative of the City of Asheville shall make an explanation of plans for extending services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given the opportunity to ask questions and receive answers regarding the proposed annexation; (3) a public hearing on the question of annexing the above-described territory will be held in the Council Chamber located on the 2nd Floor of the City Hall Building, 70 Court Plaza, Asheville, N.C., at 5:00 p.m. on the 23rd day of March, 2004, at which time a representative of the City of Asheville will make an explanation of plans for extending Services to said territory and all residents and property owners in said territory and all residents of the City of Asheville will be given an opportunity to be heard; (4) a report of plans for extending services to the above-described territory shall be made available for public inspection at the office of the City Clerk at least thirty (30) days prior to the date of the public informational meeting; (5) the statement of financial impact contained in the report shall be delivered to the Buncombe County Board of Commissioners at least thirty (30) days prior to the date of the public informational meeting; (6) a legible map of the area to be annexed and a list of identified persons holding freehold interests in property in the area to be annexed shall be posted in the office of the City Clerk, Asheville City Building, 70 Court Plaza, Asheville, North Carolina, at least thirty (30) days prior to the date of the public informational meeting; (7) the effective date of annexation shall be at least one year, but no more than 400 days, from the date of passage of the annexation ordinance; and (8) notice of the public informational meeting and public hearing shall be given as required by law.

Our annexation strategy has been to (1) select areas that are clearly developed; (2) include areas where water and sewer have been extended; (3) improve city limits by eliminating pockets and clarifying boundaries; and (4) disperse areas geographically.

Heritage Business Park – This area contains commercial and vacant lots (existing business park, some properties split by the City limits and New Leicester Highway area). This contains 11 lots totaling 12.85 acres. There is no estimated population. If the property is annexed, it would bring in $7,953 in annual property tax revenue.

Honey Drive area – This area contains residential and vacant lots (single-family subdivision located in Chunn's Cove area). This contains 9 lots totaling 4.5 acres. There is an estimated population of 13. If the property is annexed, it would bring in $5,909 in annual property tax revenue.

Enka Park area – This area contains residential and commercial (densely developed older subdivision, large commercial building, Enka area). This contains 89 lot totaling 30.27 acres. The estimated population is 170. If the property is annexed, it would bring in $45,258 in annual property tax revenue.

Ashwood Area – This area contains residential and vacant lots (single-family subdivision and single-family and mobile homes on West Chapel Road/School Road). This contains 58 lots totaling 14.42 acres. The estimated population is 117. If the property is annexed, it would bring in $29,955 in annual property tax revenue.

Heathbrook Area – This area contains residential and vacant lots (single-family residential section of Biltmore Park development in Long Shoals Road area). This contains 24 lots totaling 4.43 acres. The estimated population is 47. If the property is annexed, it would bring in $27,117 in annual property tax revenue.

Sweeten Creek Road Area – This area contains residential, commercial and vacant lots (large area, single-family, condominiums, multi-family residential, small commercial portion between Sweeten Creek Road and Hendersonville Road). This contains 190 lots totaling 74.86 acres. The estimated population is 545. If the property is annexed, it would bring in $136,561 in annual property tax revenue.

Upon inquiry of Councilman Newman, Mr. Pettibone explained the resolution of consideration annexation approach.

Councilman Dunn asked for a list of small and large businesses in the area.

Mr. Mike Fryar alleged a discrepancy in what City staff said was built directly across from Enka Village and what is actually there.

Mr. Alan Ditmore asked why the City doesn't annex the Biltmore Estate and how does annexation affect zoning.

Mr. Don Yelton suggested, as City Council annexes, that they review the density and the history of Asheville.

City Attorney Oast said that City Council members have received the written descriptions of each area, along with a correction sheet, and asked that they be incorporated into the resolutions of intent.

Vice-Mayor Mumpower always had the difficulty of forced annexation but has viewed it as a necessary evil because we don't have control over our water and sewer resources and that is what compels people to voluntary annex. There is an issue of fairness. If you live near the City, drive on City roads, benefit from being near a population center, and if you look like the City, then you should help share the costs of running the City. However, he doesn't think our tax structure is fair. We should explore issues like room tax which has the potential to take some of the direct tax burden off property owners. Also explore the issues of prepared food and beverage taxes and user fees. We have a large percentage of our City taken by non-profits and other organizations that don't pay taxes. This is a state issue, but it's time for us to reach toward the state and ask that they explore about these groups beginning to carry some of their share of law enforcement costs, fire protection, etc. He also has serious concerns about annexing manufacturing industries. This is a high risk time for those jobs and the City shouldn't be a part of helping to nudge people away.

Councilman Dunn felt that annexation throughout our state is hurting our economy. Asheville is No. 2 in sales tax expenses already. He fells that one of the reasons why North Carolina has the highest unemployment in the south is partly due to aggressive annexation. He hoped Council would open their minds up to other ways. The number one issue is cutting government spending and lowering taxes. We cannot keep taxing people.

Councilwoman Jones asked that the state data be followed up on regarding the correlation between annexation and unemployment in Asheville. She is not pleased with annexation, however, it does need to get started and then Council can look deeper at the service plans.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 04-4 - RESOLUTION OF INTENT TO ANNEX THE HERITAGE BUSINESS PARK AREA, SETTING A PUBLIC INFORMATION MEETING ON MARCH 4, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MARCH 23, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-4. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 81

RESOLUTION NO. 04-5 - RESOLUTION OF INTENT TO ANNEX THE HONEY DRIVE AREA, SETTING A PUBLIC INFORMATION MEETING ON MARCH 4, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MARCH 23, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-5. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 85

RESOLUTION NO. 04-6 - RESOLUTION OF INTENT TO ANNEX THE ENKA PARK AREA, SETTING A PUBLIC INFORMATION MEETING ON MARCH 4, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MARCH 23, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-6. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 89

RESOLUTION NO. 04-7 - RESOLUTION OF INTENT TO ANNEX THE ASHWOOD AREA, SETTING A PUBLIC INFORMATION MEETING ON MARCH 4, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MARCH 23, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-7. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 93

RESOLUTION NO. 04-8 - RESOLUTION OF INTENT TO ANNEX THE HEATHBROOK AREA, SETTING A PUBLIC INFORMATION MEETING ON MARCH 4, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MARCH 23, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-8. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 97

RESOLUTION NO. 04-9 - RESOLUTION OF INTENT TO ANNEX THE SWEETEN CREEK ROAD AREA, SETTING A PUBLIC INFORMATION MEETING ON MARCH 4, 2004, IN THE PUBLIC WORKS BUILDING LOCATED AT 161 S. CHARLOTTE STREET, AT 5:30 P.M., AND SETTING A CITY COUNCIL PUBLIC HEARING ON MARCH 23, 2004, IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF THE CITY HALL BUILDING AT 5:00 P.M.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-9. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 101

C. REQUEST BY PACK SQUARE CONSERVANCY

Ms. Carol King, Chair of the Pack Square Conservancy Board of Trustees, asked City Council to (1) move from consideration any proposal now or in the future for the construction of a "high rise" building on the land known as Site "A" which was formerly under consideration by the Grove Park Inn; (2) delay by City Council on any sale or development activity on that City-owned site; (3) allow the Pack Square Conservancy time to develop alternate plans for Site "A" that will help enhance the park; and (4) approval of the concept of moving forward with an easement activity between the City of Asheville and the Conservancy for the park area.

Vice-Mayor Mumpower asked how much time the Conservancy might need before they can report back to Council. Ms. King said their design team will be back in town in a couple of weeks. They will work with them and look at putting together a design workshop following the process that they have used all along to develop the design on the park. It would take approximately two months to get back to City Council.

Councilwoman Bellamy asked that in their process they have at least two public meetings and that the meetings be advertised in different media outlets. She suggested we put the meetings in the City's eNews so we can address the issue of the public not being informed. Ms. King said that they would be happy to do that.

Ms. Julie Brandt, representing Asheville People Advocating Real Conservancy, supports the Conservancy's request to rule out any high rise building at the corner of College and Market Streets and to enact a moratorium on sale or development. However, she asked specifically that the City designate the entire parcel of land known as Site "A" as park land in perpetuity. She asked for some legal documentation that the park is preserved for the people and that only park enhancements would be permitted, not building-type development. In addition, the Conservancy has stated that they want to ask the public to help decide what goes on the property and to move ahead with the park renovation project. She requested the Conservancy formulate and publicize in a timely fashion a policy and process of how they will integrate that public input into the park renovation plans. She asked City Council to require that the Pack Square Conservancy business, meetings and minutes be open to the public on order to make this a truly, inclusive public process.

Councilwoman Bellamy appreciated the Conservancy's support regarding the easement.

Vice-Mayor Mumpower moved to approve the Conservancy's request with the caveat of sixty days. This motion was seconded by Councilman Dunn and carried unanimously.

VI. OTHER BUSINESS:

ABC Board

Councilman Dunn reported that Mayor Worley and he met with the Chair of the ABC Board. He outlined several questions directed to the Board and they agreed to all of them. He was concerned, however, that since that meeting he has asked for several more pieces of information and have not received them yet. He felt the ABC Board does need to be more responsive.

Claims

The following claims were received by the City of Asheville during the period of December 12-31, 2003: Amanda H. Sadler (Police), BellSouth (Water), Suzette M. Roberts

(Police); Beverly Bryan (Civic Center), Kenneth Hamlin (Water), Donald Lamb (Parks & Recreation); Chamin W. Meadows (Transit Services) and Jeanne Murphy (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English didn't appreciate someone disputing his remarks at the conditional use zoning held earlier in the meeting.

Mr. Don Yelton invited City Council to a citizens speak meeting on January 14, 2003, at which time they will prioritizing people's needs, wants and wishes and developing a system in Buncombe County to keep people informed.

Mr. Mike Fryar submitted to council a list of questions and asked for response. Councilman Dunn asked Attorney Martin Reidinger the following three questions, after which Mr. Reidinger responded: in what way does the City's annexation ordinance not comply with the annexation statutes, can City Council repeal an annexation ordinance; and can City Council waive the 60-day limitation within which to appeal an annexation. After hearing thu responses, Councilman Dunn asked for guidance from Council. Councilwoman Bellamy said that this should be a matter for a closed session in order to receive advise from our attorney.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 12:17 a.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 20, 2004 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson
Absent:	City Manager James L. Westbrook Jr.

CONSENT:

Broadway at Five Points Sanitary Sewer Rehabilitation Project Easement with the Metropolitan Sewerage District

Summary: The consideration of a resolution authorizing the Mayor to execute a permanent easement for Metropolitan Sewerage District (MSD) to make improvements on a sanitary sewer line and associated manholes within portions of the Reed Creek Greenway.

During the past year the Metropolitan Sewerage District has been working with the City of Asheville regarding a sanitary sewer project proposed within the Reed Creek Greenway corridor. City staff, along with the Metropolitan Sewerage District, would like to improve this important line that is in disrepair with minimum impact to municipal property. MSD staff has worked closely with City of Asheville staff regarding an appropriate design and implementation strategy that will enable project improvement while retaining the integrity of the proposed greenway and its natural resources.

The Parks and Recreation staff recommends the approval of the improvements as proposed by the Metropolitan District in the Broadway at Five Points Sanitary Sewer Rehabilitation Project along with the associated permanent easement for the new line of pipe.

Broadway Avenue Sanitary Sewer Rehabilitation Project Easement with the Metropolitan Sewerage District

Summary: The consideration of a resolution authorizing the Mayor to execute a permanent easement for Metropolitan Sewerage District (MSD) to make improvements on a sanitary sewer line and associated manholes within portions of the Reed Creek Greenway

During the past year the Metropolitan Sewerage District has been working with the City of Asheville regarding a sanitary sewer project proposed within the Reed Creek Greenway corridor. City staff, along with the Metropolitan Sewerage District, would like to improve this important line that is in disrepair with minimum impact to municipal property. MSD staff has worked closely with City of Asheville staff regarding an appropriate design and implementation strategy that will enable project improvement while retaining the integrity of the proposed greenway and its natural resources.

The Parks and Recreation staff recommends the approval of the improvements as proposed by the Metropolitan District in the Broadway Avenue Sanitary Sewer Rehabilitation Project along with the associated permanent easement for the new line of pipe.

Merrimon Avenue Project Easement with the Metropolitan Sewerage District

Summary: The consideration of a resolution authorizing the Mayor to execute a permanent easement for Metropolitan Sewerage District (MSD) to make improvements on a sanitary sewer line and associated manholes within Weaver Park.

During the past year the Metropolitan Sewerage District has been working with the City of Asheville regarding a sanitary sewer project proposed within Weaver Park. The Metropolitan Sewerage District would like to improve this line that presently is in need of repair. The current line is located within the center of the park and it will be moved to the northern edge of the property to minimize current and future impact on the park. MSD staff has worked closely with City of Asheville staff regarding a sensitive engineering solution that will include the replacement of a substantially deteriorated parking lot and basketball court at no cost to the Parks & Recreation Department.

The Parks and Recreation staff recommends the approval of the improvements as proposed by the Metropolitan District in Weaver Park along with the associated permanent easement for the new line of pipe.

Grant Application and Budget Amendment for Memorial Stadium Renovations

Summary: The consideration of a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the N.C. Parks and Recreation Trust Fund, to assist with the renovations to Memorial Stadium, and an associated budget amendment, in the amount of $550,000.

The renovation of Memorial Stadium has been identified as a high priority with the Parks and Recreation Department and the community. The Stadium was originally constructed in the late 1920's and dedicated in the early 1930's as a memorial for veterans who served and died in WWI. The Stadium was dedicated again to WWI and WWII veterans in the 1940's. However, a true memorial to the men and women who gave the ultimate sacrifice to our country was never properly constructed.

In addition, Memorial Stadium was for years the home of both Lee Edwards/Asheville High Cougars and the Stephens-Lee Bears. Today, a number of youth sports groups including the Asheville Youth Sports, Asheville Grizzlies, WNC Bears, Asheville Assault, Asheville Splash, Asheville-Buncombe Youth Soccer Association, and a number of other groups currently call Memorial Stadium home.

The Stadium is in desperate need of repairs to a number of features including the lights, press box and Stadium seating. More importantly, a proper recognition to our war dead as originally planned still needs to be constructed at this site. A plan has been developed by the Parks and Recreation staff to incorporate these issues into a conceptual design for the Stadium. This plan will address a number of funding options that include local civic club contributions, veterans groups, grants and foundation funding, and sponsorships. It is anticipated that the cost for the renovations and upgrades will total $2 million. This conceptual plan was approved by City Council in November, 2003. An Action Committee has been formed and is working with the Parks and Recreation Department to aggressively secure funding through grants, foundations and sponsorships, as well as the Capital Improvement Plan for the City of Asheville.

The Parks and Recreation Department is requesting $250,000 in grant funds from the North Carolina Parks and Recreation Trust Fund, which requires a dollar-for-dollar cash match. The cash match is available through a partnership with the Eblen Children Charities and through grass root fundraising efforts with a number of individuals and groups. Funds from the grant will be used to renovate the playground, build new basketball courts, construct a new picnic shelter, add and renovate a new walking trail, and create a new public event plaza area recognizing those who served our country.

In addition, staff is requesting approval of a budget amendment totaling $550,000 that incorporates the contribution of Eblen Children Charities and individual donations.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund to assist with the renovations to Memorial Stadium and to adopt the associated budget amendment in the amount of $550,000.

Mr. Irby Brinson, Director of Parks & Recreation, responded to various questions from Council, some being, but are not limited to, detail of the site plan; how does it fit into the long-range Parks & Recreation goals; why was this an elevation in the Master Plan prioritization given the overall needs; why is the Eblen Children Charities going outside their mission on this project; what other projects did Parks & Recreation consider for the grant funds; where does the $550,000 matching funds come from; is there room to add other conflicts to the Park; and how much was the conceptual plan..

Vice-Mayor Mumpower said that there are three driving forces for this Park: it is an area that needs attention, we need to honor the memorial, and we need to enhance the utility of that resource.

2004/2005 Budget Schedule

Summary: The consideration of a motion approving the Fiscal Year 2004/2005 budget schedule.

The proposed Fiscal Year 2004/2005 budget schedule identifies key dates for completion of all phases of the budget process leading to adoption. Key phases of the budget process include the City Council Annual Retreat, presentation of the proposed budget to City Council, a public hearing and formal adoption. This year's schedule includes five scheduled budget worksessions, allowing City Council sufficient time for effective budget deliberations. Adoption of the Fiscal Year 2004/2005 budget is scheduled for June 22, 2004.

City staff recommends City Council to adopt the Fiscal Year 2004/2005 budget schedule.

Budget Director Ben Durant answered various questions from Council, some being, but are not limited to, what are some changes from last year's schedule; will there be an opportunity at each worksession to make changes; what is the process for Council to add an item to the Capital Improvement Program; and when does Council get to discuss their initiatives with the budget needs.

Assistant City Manager Richardson said that prior to the retreat ending the facilitator will make it clear what the next steps will be.

Scheduling Public Hearing for February 10, 2004, to Consider an Economic Development Incentive Grant for Dave Steel Company

Summary: The consideration of a resolution setting a public hearing on February 10, 2004, for an economic development incentive grant for Dave Steel Company.

Dave Steel Company, a local fabricator of structural steel, is adding new production equipment valued at $600,000. This equipment diversifies the company's capabilities allowing them to expand into new markets. This, in turn, will help stabilize employment for the current workforce and lead to the creation of 25 new jobs in 2004. The project qualifies for a Level 1 grant under the City Economic Development Incentive Policy.

City staff recommends Council approve the resolution setting a public hearing on February 10, 2004, for an economic development incentive grant for Dave Steel Company.

Budget Amendment for Reimbursement for Hazardous Materials Response

Summary: The consideration of a budget amendment, in the amount of $31,836, for reimbursement from the North Carolina Department of Crime Control and Public Safety, Emergency Management Division, for hazardous materials response as a result of the Beacon Manufacturing fire.

The City of Asheville Fire and Rescue Department responded to the Beacon fire in two capacities. One was mutual aid for fire suppression. The other was a request by North Carolina Emergency Management due to a spill of hazardous materials as a result of the fire. An extreme amount of equipment and resources was required that exceeded the Fire and Rescue Department's inventory. Therefore, a private contractor was contacted to assist the Asheville Fire and Rescue Department. These funds will replace equipment supplied by the Fire and Rescue Department used at multiple locations to contain the spill and replace funds used to pay for the resources from the private contractor.

City staff recommends City Council approve the budget amendment to receive the reimbursement from the N. C. Department of Crime Control and Public Safety, Emergency Management Division.

Budget Amendment for Grant from U.S. Department of Homeland Security

Summary: The consideration of a budget amendment, in the amount of $174,578, to receive grant money from the U.S. Department of Homeland Security (DHS), sub-granted through the Federal Emergency Management Agency's (FEMA) FY 03 Assistance to Firefighter's Grant Program, for procurement of replacement self contained breathing apparatus (air packs) and replacement portable radios (walkie-talkies).

The City of Asheville Fire and Rescue Department with endorsement of the Asheville City Council in March, 2003 requested $122,205 from the U.S. Department of Homeland Security to replace 44 of the department's self contained breathing apparatus (air packs) and 24 of the department's VHF portable radios (walkie-talkies). The Federal grant was for 70% of the costs with the City to match 30%, or $52,373 from our contingency account. Staff was successful in obtaining those Federal funds.

/

Air packs and walkie-talkies are daily use equipment by firefighters and are used on virtually every emergency that occurs within the city.

Fire and Rescue staff plans to request funds in the Fiscal Year 2004 Assistance to Firefighter's Grant Program to complete replacement of the department's self contained breathing apparatus (air packs).

City staff recommends City Council approve the budget amendment to receive grant money from the U.S. Department of Homeland Security.

Upon inquiry of Councilman Dunn, Fire Chief Greg Grayson said that these replacement radios are compatible with Buncombe County's system.

West Annexation, Phase IV, Sanitary Sewer System Improvements Contract

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Wheeler Construction Company Inc., for West Area Annexation - Phase IV- Sanitary Sewer System Improvements.

This project is the last Phase of the West Annexation Area. It is called the West Area Annexation - Phase IV- Sanitary Sewer System Improvements and consists of the installation of approximately 2,105 linear feet of eight inch (8") diameter sanitary sewer line and related appurtenances.

The Engineering Department received and publicly opened six (6) bids on Thursday, January 8, 2004, at 2:00 p.m. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, Wheeler Construction Company, Inc., was found to be the lowest responsible bidder with a total bid of $ 218,434.50.

Project will be financed with moneys generated by General Obligation Bonds Series 2000 of December, 2000.

Wheeler Construction Company, Inc., has performed several projects of this nature in the past in a satisfactory way.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Staff recommends that City Council adopt a resolution awarding the bid for West Area Annexation - Phase IV- Sanitary Sewer System Improvements to Wheeler Construction Company, Inc., the responsible low bidder.

Budget Amendment for 2003-04 Senior Center General Purpose Funding

Summary: The consideration of a budget amendment, in the amount of $14,519, for the annual appropriation from the N.C. Dept. of Health and Human Services, Division on Aging, for the Harvest House and Senior Opportunity Center.

Funds will be used at Harvest House to purchase equipment and supplies, improve landscaping and to assist with special needs transportation. Funds will be used at Senior Opportunity Center to purchase equipment and supplies, replace the heating and air conditioning unit and make improvements in the sewer lines.

The Parks and Recreation Department recommends City Council approve the budget amendment, in the amount of $14,519, to establish a budget for the projects at Harvest House and Senior Opportunity Center.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place these items on the next formal City Council agenda.

WATER SYSTEM ASSET MANAGEMENT PROGRAM UPDATE

Interim Water Resources Director David Hanks said that the engineering firm of Brown & Caldwell, along with City staff, has taken a comprehensive look at all aspects of the water system operations, including water treatment plants, distribution system, leak detection, meter accuracy, financial, and administration.

The Regional Water Authority of Asheville, Buncombe and Henderson contracted with Brown & Caldwell to study the water treatment requirements to meet current and future Environmental Protection Agency (EPA) standards for turbidity in the water. The study also included looking at the asset management of the water system to help determine replacement and refurbishment cost, including distribution lines, pump stations, valves and meters. An asset management team was established consisting of Water Resources and Finance Department staff along with representatives of Brown and Caldwell. The team looked at how the water system is currently being managed, assets of the water system including age of the assets and original costs. A replacement model was created to determine annual funding requirements needed to make necessary improvements to the water infrastructure.

Mr. Richard Stahr, representing Brown and Caldwell, presented a comprehensive presentation on the water system including meeting current and future turbidity standards, asset management and replacement and refurbishment requirements of the water system and funding requirements to make needed improvements.

In summary, the implementation of the Asset Management Program is underway; the Business case analysis is being used for decision-making resulting in cost savings; replacement cost of infrastructure is ~$0.75 billion; and increased funding for R&R will be necessary to sustain the infrastructure.

Mr. Stahr responded to various questions from Council regarding the program, noting that any information he was not able to respond to he would supply to Council.

COUNTY-CITY HOUSING TASK FORCE FINAL REPORT

Ms. Janet Moore, Chair of the County-City Housing Task Force said that the County-City Housing Task Force was created in November, 2002 to bring together individuals in the community who were concerned about housing in Asheville and Buncombe County.

According to the resolution adopted by the County and City, the purpose of the Task Force shall be to "provide the Buncombe County Commissioners and the Asheville City Council with information on current housing needs and programs, including the potential for a joint Housing Trust Fund, recommend changes to current housing policies, and help raise awareness and support throughout the community for housing issues."

The Task Force was appointed by the Buncombe County Board of Commissioners and Asheville City Council. The Task Force is a diverse group—representing housing providers, private developers, housing advocates, and real estate, financial, & construction professionals.

After meeting for approximately eleven months, the Task Force has had the opportunity to discuss affordable housing challenges in the community in considerable detail. The Task Force believes that this was an important part of the mission with which they were charged, to bring together knowledgeable experts to discuss the issues and propose solutions to the challenges at hand.

Eight recommendations were discussed and voted on by the Task Force. In almost every case, the vote on these recommendations was unanimous.

The Task Force believes that bold actions by elected officials to relax cumbersome and costly regulations, reduce fees, and remove subjective decision-making would encourage more private investment in affordable housing. With regard to their specific recommendations, zoning is the most extensive topic.

444

1) Housing Trust Fund - The Task Force recommends that Buncombe County create a County Housing Trust Fund which will be initially capitalized with the equivalent of one cent per $100 of property tax value, or approximately $1.7 million. The Task Force recommends that the Trust Fund be made effective in Buncombe County's next fiscal year budget, fiscal year 2004-05.

2) Fees and Permits - The Task Force recommends that the City and the County develop a plan to reduce fees and permits on homes that are 1500 square feet or less, with greater reductions for even smaller homes.

The recommendation for fee and permit reductions for smaller homes should also be implemented with the Metropolitan Sewerage District and the Asheville-Buncombe Water Authority, similar to the reduced fee plan currently in place for affordable housing. These incentives are not intended to replace or eliminate the current reduced fees for development of homes which are guaranteed to remain affordable by the developer.

3) Duplex, Triplex and Quadraplex Development - Duplex, Triplex, and quadraplex development in areas zoned single family should be permitted and should be a use by right. We request two changes to the Duplex, Triplex, & Quadraplex policy as originally proposed by the City of Asheville and these are as follows: 1) design standards must be clearly defined and limited; and 2) there should be no parking requirements.

4) Density Bonuses – Density bonuses should be permitted for affordable housing. The Task Force recommends that density bonuses be provided as a use by right, instead of a conditional use in the UDO.

5) Multi-Family Housing - The City of Asheville should increase the amount of land that allows multifamily housing development as a use by right. In 1997, the UDO rezoned approximately 50% of the existing multifamily land to single family zoning. Much of this multifamily land was zoned 16 multifamily units per acre and is now zoned single family and much less dense. The Task Force recommends that enough land currently zoned single family should be rezoned to multifamily so that the same percent of Asheville land is zoned multifamily as it was before the UDO was passed in 1997.

6) Lot Size – Lot size is a factor in that it influences the full development of parcels for maximum density, therefore maximum affordability. This recommendation has already been considered and approved by City Council. The Task Force recommended that the City of Asheville decrease minimum lot sizes so that additional acreage would be free to develop entry roads, provide set-backs, and allow for development standard flexibility.

7) Not In My Backyard (Nimbyism) – Nimbyism was cited by the Task Force as a huge factor in preventing affordable housing development. The Task Force recommends that City staff seek to reduce public hearing requirements considerably, and to significantly limit the types of developments that are subject to a vote of City Council and developments that are subject to petitions requiring a "super majority" vote of City Council.

8) Review Thresholds - More permitting decisions should be made by the Technical Review Committee and planning staff, rather than elected officials. Permit applications not denied within 90 days should be deemed approved.

The cost of housing in Asheville is a problem for all but the wealthiest homebuyers, and it is an embarrassment for our community. The Task Force focused on the cost component of this equation. Any long term solution to the problem of housing affordability, however, must address the wage factor. That jobs rests with the City of Asheville, Buncombe County, and other publicly funded economic development entities.

The Task Force thanked the Buncombe County Board of Commissioners and Asheville City Council for taking the issue of affordable housing seriously.

The Task Force recognizes that many of these recommendations may not be politically popular. However, this Task Force was charged with advising local government about the facts as we see them regarding affordable housing in our community. Making the tough decisions about implementing these recommendations is a proper role of elected officials.

The Task Force sincerely hopes that these recommendations are incorporated by Buncombe County and the City of Asheville both in existing policies as well as future proposals that involve residential development in our community.

Mayor Worley said we need to keep on going on the direction we are moving because there is a collective consensus to help affordable housing and further along other economic development needs.

Ms. Moore and City Development Director Charlotte Caplan responded to various questions from Council regarding the Task Force's recommendations.

Councilman Newman felt that a study should be compiled regarding how the City ranks with affordable housing in the rental market.

On behalf of City Council, Mayor Worley thanked the Task Force members for their hard work on this very difficult task.

CLEAN AIR COMMUNITY TRUST PROGRESS REPORT

Dr. Richard Maas, Chair of the Clean Air Community Trust (CACT) Board, updated City Council on the actions of the Clean Air Community Trust. He reviewed with Council the history of CACT and shared with Council their draft vision statement. He updated Council on current and future programs, along with potential programs. He then outlined their short-term goals.

Dr. Maas requested $5,000 from the City of Asheville and $5,000 from Buncombe County within which to buy 5,000 compact fluorescent light bulbs. They will make them available at cost to other community groups and at a reasonable price to individuals. Thus, they will create a self-perpetuating program that ties citizens actions to energy efficiency and air pollution reduction.

Vice-Mayor Mumpower, liaison to the CACT Board, spoke in favor of this effort because it is a partnership opportunity with Buncombe County. He felt we should refer this to our Outside Agency Committee for review. This is a positive real way to educate the public on clean air.

Councilwoman Jones spoke in support of the program noting it was one of Council's strategic goals to improve air quality. She suggested the CACT bring forward future programs to the Outside Agency Committee as well.

Dr. Maas and Ms. Margie Mears, Executive Director of the CACT, responded to various questions from Council regarding the light bulb program.

Councilman Davis was somewhat bothered about the City being in the light bulb business when we might be competing with people who are making a living selling light bulbs.

Councilman Dunn said our job is to maximize use of taxpayer dollars and he wasn't sure if this program is doing that. Vice-Mayor Mumpower pointed out that this agency was put together by the City and the County.

On behalf of City Council, Mayor Worley thanked Dr. Maas the Board for their hard work.

Councilman Newman felt that perhaps at the City Council retreat City Council could discuss different things that Council can do to address air quality issues.

It was the consensus of Council to refer this program to the Outside Agency Committee for review.

At 5:25 p.m., Mayor Worley announced a short break.

FEDERAL LOBBYING UPDATE REPORT

Mr. Sean Dalton, representing Ball Janik, LLP, updated City Council on the federal lobbying efforts. He reviewed with Council the status of each of the City's appropriations and legislative agenda. Because so many of the annual appropriations bills have not yet been enacted, several items remain "on hold."

1. The Digital Platform Upgrades for Police and Fire Communications – They were unsuccessful in securing a Fiscal Year 2004-directed earmark for the City's police and fire digital platform upgrades. In drafting its initial bill, the House CJSJ Appropriations Subcommittee chose to provide no funding whatsoever for the communications or interoperability needs of first responders. Such funding, the subcommittee stated, would henceforth fall under the jurisdiction of the newly-created Homeland Security Appropriations Subcommittee. The Senate CJSJ Subcommittee disagreed, reserving jurisdiction over such interoperability program earmarks within its bill. The final CJSJ subcommittee conference report followed the Senate's lead, funding several communications and interoperability programs for first responders through individual earmarks. Unfortunately, the City of Asheville was not among those local governments chosen to receive such an earmark. Given the level of education that has already taken place among the WNC Congressional delegation offices about this need, however, the City may wish to include it as an item on its Fiscal Year 2005 appropriations agenda.

2. Traffic Signal System Upgrades – The pending omnibus appropriations bill contains an earmark of $2 million for the City's Traffic Signal System Upgrade program. The House passed this legislation on December 8, 2003 by a vote of 242 to 176. The Senate has not yet voted upon it.

3. City Transit System Fleet Replacement – The pending omnibus appropriations bill contains an earmark of $300,000 for the City's bus fleet replacement. This funding is in addition to an earmark of $6,250,000 for statewide bus and bus facilities, from which the City might also receive funds for transit fleet replacement.

4. WNC Hazardous Response Coordination Center – The Fiscal Year 2004 Homeland Security Appropriations bill included no Congressionally-directed earmarks of any kind; thus, we were unsuccessful in securing an earmark for the Hazardous Response Coordination Center this year. According to the chairmen of the House and Senate subcommittees, it was the preference of Congress to allow the newly-created Department of Homeland Security to fully complete the organization of its program and internal command structure. The absence of earmarked appropriations would provide the Department maximum flexibility in doing so. It is unclear whether the House and Senate will continue with its "no earmarks" policy in the Fiscal Year 2005 Homeland Security Appropriations bill. The City may wish to consider the inclusion of the Hazardous Response Coordination Center as an item on its Fiscal Year 2005 appropriations agenda.

5. Azalea Road Park and Next Generation Project – While the Azalea Road Park proposal was not officially included as part of the City of Asheville's Fiscal Year 2004 appropriations agenda, the offices of each of WNC's Congressional delegation members expressed interest in lending support to this project. The pending omnibus appropriations bill contains a "soft" earmark for this project, meaning that no specific dollar amount has been designated for it. Rather, language in the CJSJ Appropriations section of the bill states: "Juvenile Justice Programs – State Formula Grants – The conference agreement includes $84,000,000 for the Part B – State Formula grants. The conferees ask Governors and relevant State and local officials to review the following proposals and provide grants if warranted . . ." The City's Parks and Recreation Department has previously sought funding for the project through the N.C. Parks & Recreation Trust Fund. With this earmark, Congress has commended the project to the State of North Carolina for potential funding as a juvenile justice program, as well.

6. Effect of Urbanized Area Census Designation on Transit Funding – A six-year reauthorization of TEA-21 – the massive federal law governing spending on highway and transit projects – was due in 2003, and provided the most logical legislative vehicle by which to address the "200,000 Population" issue. Due to policy debates centering upon transportation funding mechanisms, however, only a short-term, five-month extension bill was enacted prior to the end of last year's Congressional session. Through the efforts of Congressman Taylor and Senator Dole, this legislation included an additional "grace period" for newly-urbanized areas over 200,000 in population, allowing Asheville and other cities to use Section 5307 funds for operating expenses through February 29, 2004. While this additional five-month extension provides some breathing room to the Asheville Transit System, we continue to work with the WNC Congressional delegation to seek a longer-term solution to the transit funding flexibility problem. Representatives of the House Transportation and Infrastructure Committee have repeatedly voiced support for Asheville and other cities whose transit funding was adversely affected by the 2000 Census. Staff members of the Senate Banking Committee, however – under whose jurisdiction transit issues fall in that capacity – have continually resisted any additional extensions of the Senate 5307 flexibility. Senator Dole's office has been especially helpful in making Asheville's case to these Senate Banking staff members. In late November, the House unveiled its draft TEA-21 reauthorization bill, which would allow an extension of Section 5307 flexibility through Fiscal Years 2004 and 2005. In joining with a coalition of other municipalities likewise pushed into a "200,000 Population" urbanized area by the 2000 Census, we continue to advocate such an extension to the Senate Banking Committee staff, as well.

Mr. Dalton then gave an outlook for the Omnibus appropriations bill.

Mr. Dalton responded to various questions from Council noting that wherever there is an opportunity to seek funding, they are looking for it.

Upon inquiry of Mayor Worley, Mr. Dalton explained how this process has worked with our congressional delegation to help them be successful in bringing our requests forward.

Upon inquiry of Councilman Newman, Mr. Dalton said attending the U.S. Conference of Mayor's Conference in Washington, D.C., is an opportunity for City Council to become more actively involved in advancing not only Asheville's agenda, but all the cities agendas across the country. Another way for City Council to become more involved is local visits to Raleigh to build face-to-face relationships.

BANNER POLICY

This item has been removed from Council consideration today.

HOUSING TRUST FUND ALLOCATIONS

Community Development Director Charlotte Caplan said that this is the consideration of a resolution allocating $730,000 in Housing Trust Fund loans for affordable housing development

This is the fourth annual allocation of funds from the City's Housing Trust Fund (HTF). The 2004 budget included an appropriation of $600,000 for the HTF and $130,000 has accrued in loan repayments, making a total of $730,000 available for lending in this round. The application process was opened on October 15, 2003, and eight applications were received by the December 8 deadline, requesting a total of $1,275,000. All of the applications received this year were for rental projects.

The applications were evaluated by a panel of City staff and outside experts and then reviewed by the Housing and Community Development (HCD) Committee. The HCD Committee has recommended funding the following six projects:

Mountain Housing Opportunities - 50 units on Grove St.	$140,000(20 years at 2%)
Gateway Construction -100 units on Swannanoa River Rd.	$125,000(30 years at 0%)
Tim & Wendy Vorst - 2 units on Beaucatcher Rd	$ 50,000(30 years at 2%)
Spicewood Development - 42 units on Cedar Hill Rd	$185,000(30 years at 2%)
Thomas Yurchenko - 6 units on Campground Rd.	$150,000(30 years at 2%)
Paul Saylor - 2 units on West St.	$ 80,000(2 years at 2%)
Total (202 units)	$730,000

She summarized with Council all applications submitted and reported on the progress of prior years' projects.

Staff recommend approval of the HTF loans listed above.

Vice-Mayor Mumpower and Councilman Dunn voiced concern about the 0% interest loan for 30 years to Gateway Construction.

Mayor Worley felt the City should have some assurance that the rent will remain affordable for the term of the loan. He suggested a provision in the Note and Deed of Trust that makes the note callable if they don't meet some sort of formula.

Vice-Mayor Mumpower felt we should address the policy regarding future affordable rents in the next application process. Councilwoman Jones agreed and felt that the HCD Committee should look at this issue and report back to City Council in approximately six months.

Ms. Caplan responded to various questions from Council regarding the results of the panel scoring. Mayor Worley expressed concern with loaning money where the company rates a zero regarding affordability on the panel scoring. Councilwoman Bellamy suggested the HCD Committee place more emphasis on the affordability and long-term affordability aspects of the loans.

Councilwoman Bellamy noted that not only do non-profit organizations benefit from the Housing Trust Fund, but for-profit organizations are benefiting as well. She noted that five of the six projects recommended for funding are going to for-profit groups.

Mayor Worley asked for additional information from the applications that rated a zero on affordability from the panel scoring schedule.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY ON THE JOINT PLANNING AREA

City Attorney Bob Oast said that this is the consideration of interlocal agreement with Buncombe County for establishment and administration of Joint Planning Area.

At the request of the Buncombe County Commissioners and Asheville City Council, City and County planning and development staff have been meeting frequently to determine the area to be covered by the Joint Planning Area (JPA), and to develop the regulations to be applicable within the JPA.

When this idea first surfaced, it was thought that a joint planning arrangement would require special legislative authorization, but City and County legal staff have determined that joint planning area administration is possible under current law, and under a local act adopted in 1931 authorizing joint performance by the City and County of administrative functions.

The JPA regulations will consist of three main parts:

- the boundaries of the JPA
- regulations to be applicable within the JPA
- classification of land within the JPA

The details of these main features have been under fairly intense consideration by County and City staff for several months, and to a lesser extent by the planning commissions. The governing bodies have been kept updated on the JPA concept as it has evolved.

The interlocal agreement neither adopts the JPA nor any of the regulations to be applicable within it, but rather establishes a framework and administrative structure pursuant to which those actions may occur.

In essence, the interlocal agreement will provide for:

- the method of establishing the initial JPA, adopting initial regulations, and adopting initial land classifications
- the method for changing any of the regulations
- establishment of the joint planning agency
- definition of the role of County / City staff
- method of financing and allocation of expenses
- amendment, extension, termination of agreement

He reviews with Council an outline of the interlocal agreement to establish and implement the JPA. He explained that this outline will serve as the vehicle for discussion of certain details of administration of the JPA, and a vehicle for Council input. That information can then be incorporated in the interlocal agreement as appropriate, for final consideration as to adoption.

He asked for Council direction as to additional matters to be addressed in the agreement, or matters to be addressed differently or in more detail. He said that Council's comments and direction will be incorporated into an agreement to be presented for adoption.

Upon inquiry of Councilman Davis, Planning & Development Director explained who will do the mapping.

CITY COUNCIL LIAISON ASSIGNMENTS

City Council members were assigned various liaison and member positions on it's various boards and commissions.

At 7:55 p.m., Mayor Worley announced a recess.

BOARDS AND COMMISSIONS

It was the consensus of City Council to readvertise for vacancies on the Board of Adjustment.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Clara Jeter to the Asheville-Buncombe Community Relations Council.

It was the consensus of City Council to have the City Clerk arrange interviews for the Downtown Commission and prepare the proper paperwork to reappoint Andy Archie and Pater Alberice.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint David McConville to the Sustainable Economic Development Task Force.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to reappoint Bill Schaefer to the Firemen's Relief Fund.

It was the consensus of City Council to have the City Clerk arrange interviews for the Greenway Commission and prepare the proper paperwork to reappoint Jack Saye and Phyllis Stiles.

It was the consensus of City Council to appoint Councilwoman Terry Bellamy to the Metropolitan Sewerage District Board.

It was the consensus of City Council to have the City Clerk arrange interviews for the Public Art Board and prepare the proper paperwork to reappoint Barbara Cary and Tina McGuire.

It was the consensus of City Council to have the City Clerk arrange interviews for the Transit Commission.

It was the consensus of City Council to reappoint Monty Wooten and Robert Halliday to the Tree Commission.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:12 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – January 27, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

Councilwoman Bellamy asked that Consent Agenda "X" be removed from the Consent Agenda for an individual vote.

Councilman Newman asked that Consent Agenda "A" be removed from the Consent Agenda to be discussed under "Other Business."

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 13, 2004, AND THE WORKSESSION HELD ON JANUARY 20, 2004

This item was removed from the Consent Agenda to be discussed under "Other Business"

B. RESOLUTION NO. 04-10 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A PERMANENT EASEMENT FOR THE METROPOLITAN SEWERAGE DISTRICT TO MAKE IMPROVEMENTS AT BROADWAY AT FIVE POINTS

Summary: The consideration of a resolution authorizing the Mayor to execute a permanent easement for Metropolitan Sewerage District (MSD) to make improvements on a sanitary sewer line and associated manholes within portions of the Reed Creek Greenway.

During the past year the Metropolitan Sewerage District has been working with the City of Asheville regarding a sanitary sewer project proposed within the Reed Creek Greenway corridor. City staff, along with the Metropolitan Sewerage District, would like to improve this important line that is in disrepair with minimum impact to municipal property. MSD staff has worked closely with City of Asheville staff regarding an appropriate design and implementation strategy that will enable project improvement while retaining the integrity of the proposed greenway and its natural resources.

The Parks and Recreation staff recommends the approval of the improvements as proposed by the Metropolitan District in the Broadway at Five Points Sanitary Sewer Rehabilitation Project along with the associated permanent easement for the new line of pipe.

RESOLUTION BOOK NO. 28 – PAGE 106

C. RESOLUTION NO. 04-11 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A PERMANENT EASEMENT FOR THE METROPOLITAN SEWERAGE DISTRICT TO MAKE IMPROVEMENTS ON BROADWAY AVENUE

Summary: The consideration of a resolution authorizing the Mayor to execute a permanent easement for Metropolitan Sewerage District (MSD) to make improvements on a sanitary sewer line and associated manholes within portions of the Reed Creek Greenway.

During the past year the Metropolitan Sewerage District has been working with the City of Asheville regarding a sanitary sewer project proposed within the Reed Creek Greenway corridor. City staff, along with the Metropolitan Sewerage District, would like to improve this important line that is in disrepair with minimum impact to municipal property. MSD staff has worked closely with City of Asheville staff regarding an appropriate design and implementation strategy that will enable project improvement while retaining the integrity of the proposed greenway and its natural resources.

The Parks and Recreation staff recommends the approval of the improvements as proposed by the Metropolitan District in the Broadway Avenue Sanitary Sewer Rehabilitation Project along with the associated permanent easement for the new line of pipe.

RESOLUTION BOOK NO. 28 – PAGE 107

D. RESOLUTION NO. 04-12 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A PERMANENT EASEMENT FOR THE METROPOLITAN SEWERAGE DISTRICT TO MAKE IMPROVEMENTS ON A SANITARY SEWER LINE WITHIN WEAVER PARK ON MERRIMON AVENUE

Summary: The consideration of a resolution authorizing the Mayor to execute a permanent easement for Metropolitan Sewerage District (MSD) to make improvements on a sanitary sewer line and associated manholes within Weaver Park.

During the past year the Metropolitan Sewerage District has been working with the City of Asheville regarding a sanitary sewer project proposed within Weaver Park. The Metropolitan Sewerage District would like to improve this line that presently is in need of repair. The current line is located within the center of the park and it will be moved to the northern edge of the property to minimize current and future impact on the park. MSD staff has worked closely with City of Asheville staff regarding a sensitive engineering solution that will include the replacement of a substantially deteriorated parking lot and basketball court at no cost to the Parks & Recreation Department.

The Parks and Recreation staff recommends the approval of the improvements as proposed by the Metropolitan District in Weaver Park along with the associated permanent easement for the new line of pipe.

RESOLUTION BOOK NO. 28 – PAGE 108

E. MOTION ADOPTING THE 2004-2005 BUDGET SCHEDULE

Summary: The consideration of a motion approving the Fiscal Year 2004/2005 budget schedule.

The proposed Fiscal Year 2004/2005 budget schedule identifies key dates for completion of all phases of the budget process leading to adoption. Key phases of the budget process include the City Council Annual Retreat, presentation of the proposed budget to City Council, a public hearing and formal adoption. This year's schedule includes five scheduled budget worksessions, allowing City Council sufficient time for effective budget deliberations. Adoption of the Fiscal Year 2004/2005 budget is scheduled for June 22, 2004.

City staff recommends City Council to adopt the Fiscal Year 2004/2005 budget schedule.

F. RESOLUTION NO. 04-13 - RESOLUTION SETTING A PUBLIC HEARING FOR FEBRUARY 10, 2004, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR DAVE STEEL COMPANY

Summary: The consideration of a resolution setting a public hearing on February 10, 2004, for an economic development incentive grant for Dave Steel Company.

Dave Steel Company, a local fabricator of structural steel, is adding new production equipment valued at $600,000. This equipment diversifies the company's capabilities allowing them to expand into new markets. This, in turn, will help stabilize employment for the current workforce and lead to the creation of 25 new jobs in 2004. The project qualifies for a Level 1 grant under the City Economic Development Incentive Policy.

City staff recommends Council approve the resolution setting a public hearing on February 10, 2004, for an economic development incentive grant for Dave Steel Company.

RESOLUTION BOOK NO. 28 – PAGE 109

G. ORDINANCE NO. 3085 - BUDGET AMENDMENT FOR REIMBURSEMENT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY, EMERGENCY MANAGEMENT DIVISION, FOR HAZARDOUS MATERIALS RESPONSE AS A RESULT OF THE BEACON MANUFACTURING FIRE

Summary: The consideration of a budget amendment, in the amount of $31,836, for reimbursement from the North Carolina Department of Crime Control and Public Safety, Emergency Management Division, for hazardous materials response as a result of the Beacon Manufacturing fire.

The City of Asheville Fire and Rescue Department responded to the Beacon fire in two capacities. One was mutual aid for fire suppression. The other was a request by North Carolina Emergency Management due to a spill of hazardous materials as a result of the fire. An extreme amount of equipment and resources was required that exceeded the Fire and Rescue Department's inventory. Therefore, a private contractor was contacted to assist the Asheville Fire and Rescue Department. These funds will replace equipment supplied by the Fire and Rescue Department used at multiple locations to contain the spill and replace funds used to pay for the resources from the private contractor.

City staff recommends City Council approve the budget amendment to receive the reimbursement from the N. C. Department of Crime Control and Public Safety, Emergency Management Division.

ORDINANCE BOOK NO. 21 – PAGE 48

H. ORDINANCE NO. 3086 - BUDGET AMENDMENT TO RECEIVE GRANT MONEY FROM THE U.S. DEPT. OF HOMELAND SECURITY FOR REPLACEMENT OF SELF-CONTAINED BREATHING APPARATUS AND REPLACEMENT OF PORTABLE RADIOS

Summary: The consideration of a budget amendment, in the amount of $174,578, to receive grant money from the U.S. Department of Homeland Security (DHS), sub-granted through the Federal Emergency Management Agency's (FEMA) FY 03 Assistance to Firefighter's Grant Program, for procurement of replacement self contained breathing apparatus (air packs) and replacement portable radios (walkie-talkies).

The City of Asheville Fire and Rescue Department with endorsement of the Asheville City Council in March, 2003 requested $122,205 from the U.S. Department of Homeland Security to replace 44 of the department's self contained breathing apparatus (air packs) and 24 of the department's VHF portable radios (walkie-talkies). The Federal grant was for 70% of the costs with the City to match 30%, or $52,373 from our contingency account. Staff was successful in obtaining those Federal funds.

Air packs and walkie-talkies are daily use equipment by firefighters and are used on virtually every emergency that occurs within the city.

Fire and Rescue staff plans to request funds in the Fiscal Year 2004 Assistance to Firefighter's Grant Program to complete replacement of the department's self contained breathing apparatus (air packs).

City staff recommends City Council approve the budget amendment to receive grant money from the U.S. Department of Homeland Security.

ORDINANCE BOOK NO. 21 – PAGE 50

I. RESOLUTION NO. 04-14 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH WHEELER CONSTRUCTION COMPANY FOR WEST AREA ANNEXATION, PHASE IV, SANITARY SEWER SYSTEM IMPROVEMENTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Wheeler Construction Company Inc., for West Area Annexation - Phase IV- Sanitary Sewer System Improvements.

This project is the last Phase of the West Annexation Area. It is called the West Area Annexation - Phase IV- Sanitary Sewer System Improvements and consists of the installation of approximately 2,105 linear feet of eight inch (8") diameter sanitary sewer line and related appurtenances.

The Engineering Department received and publicly opened six (6) bids on Thursday, January 8, 2004, at 2:00 p.m. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, Wheeler Construction Company, Inc., was found to be the lowest responsible bidder with a total bid of $ 218,434.50.

Project will be financed with moneys generated by General Obligation Bonds Series 2000 of December, 2000.

Wheeler Construction Company, Inc., has performed several projects of this nature in the past in a satisfactory way.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

Staff recommends that City Council adopt a resolution awarding the bid for West Area Annexation - Phase IV- Sanitary Sewer System Improvements to Wheeler Construction Company, Inc., the responsible low bidder.

RESOLUTION BOOK NO. 28 – PAGE 110

J. ORDINANCE NO. 3087 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF HEALTH AND HUMAN SERVICES FOR THE HARVEST HOUSE AND SENIOR OPPORTUNITY CENTER

Summary: The consideration of a budget amendment, in the amount of $14,519, for the annual appropriation from the N.C. Dept. of Health and Human Services, Division on Aging, for the Harvest House and Senior Opportunity Center.

Funds will be used at Harvest House to purchase equipment and supplies, improve landscaping and to assist with special needs transportation. Funds will be used at Senior Opportunity Center to purchase equipment and supplies, replace the heating and air conditioning unit and make improvements in the sewer lines.

The Parks and Recreation Department recommends City Council approve the budget amendment, in the amount of $14,519, to establish a budget for the projects at Harvest House and Senior Opportunity Center.

ORDINANCE BOOK NO. 21 – PAGE 52

K. RESOLUTION NO. 04-15 - RESOLUTION CANCELING THE FEBRUARY 3, 2004, CITY COUNCIL WORKSESSION

RESOLUTION BOOK NO. 28 – PAGE 111

L. RESOLUTION NO. 04-16 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Summary: The term of Clara Jeter, as a member on the Asheville-Buncombe Community Relations Council, expired on December 31, 2003.

On January 20, 2004, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Ms. Jeter to serve an additional three year term, term to expire December 31, 2006, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 112

M. RESOLUTION NO. 04-17 - RESOLUTION APPOINTING A MEMBER TO THE SUSTAINABLE ECONOMIC DEVELOPMENT STRATEGIC PLAN IMPLEMENTATION TASK FORCE

Summary: The consideration of a resolution appointing a member to the Sustainable Economic Development Implementation Task Force.

In June 2003, the Task Force, initially appointed in June 2000, was re-appointed. All original Task Force members were re-appointed except three who resigned at the end of the original three-year term. Three new members were appointed from a slate of six candidates submitted by the Task Force. One of those new members, Daniel Prevost, later resigned (due to unforeseen business related issues), after the official appointment was made, leaving a vacancy.

The Task Force is recommending David McConville, Founder, Black Box Studios, as the replacement for the vacancy created by Mr. Prevost's resignation. Mr. McConville was among those six candidates originally proposed by the Task Force in June 2003. Task Force Chairman, Jack Cecil, has contacted Mr. McConville and he (Mr. McConville) has agreed to serve if appointed.

RESOLUTION BOOK NO. 28 – PAGE 113

N. RESOLUTION NO. 04-18 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Summary: The term of Bill Schaefer, as a member of the Firemen's Relief Fund, expired on January 1, 2004.

On January 20, 2004, it was the consensus of City Council to reappoint Bill Schaefer to serve an additional two year term, term to expire January 1, 2006, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 114

O. RESOLUTION NO. 04-19 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD

Summary: The term of Barbara Field, as a member on the Metropolitan Sewerage District Board, expired on January 19, 2004.

On January 20, 2004, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Councilwoman Terry Bellamy to serve a three year term, term to expire January 19, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 115

P. RESOLUTION NO. 04-20 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Summary: The terms of Monty Wooten and Robert Halliday, as members on the Asheville Tree Commission, expired on December 31, 2003.

On January 20, 2004, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Monty Wooten and Robert Halliday to each serve an additional three year term respectively, terms to expire December 31, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 116

Q. RESOLUTION NO. 04-21 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY ECONOMIC DEVELOPMENT COMMISSION

Summary: At the City Council worksession held on January 20, 2004, the City Clerk was instructed to prepare the proper paperwork to appoint Councilman Newman, as the City's representative to the Buncombe County Economic Development Commission, to serve according to the length of his office.

RESOLUTION BOOK NO. 28 – PAGE 117

R. RESOLUTION NO. 04-22 - RESOLUTION APPOINTING THE CHAIRMAN OF THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

Summary: At the City Council worksession held on January 20, 2004, the City Clerk was instructed to prepare the proper paperwork to appoint Vice-Mayor Mumpower as the Chairman to the Police Officers & Firefighters Disability Review Board to serve a term according to the length of his Vice-Mayor term of office.

RESOLUTION BOOK NO. 28 – PAGE 118

S. RESOLUTION NO. 04-23 - RESOLUTION APPOINTING A MEMBER TO THE DOWNTOWN COMMISSION

Summary: At the City Council worksession held on January 20, 2004, the City Clerk was instructed to prepare the proper paperwork to appoint Councilman Davis, as the City Council representative, to the Asheville Downtown Commission to serve according to the length of his office.

RESOLUTION BOOK NO. 28 – PAGE 119

T. RESOLUTION NO. 04-24 - RESOLUTION APPOINTING A MEMBER TO THE PACK SQUARE CONSERVANCY BOARD OF TRUSTEES

Summary: At the City Council worksession held on January 20, 2004, the City Clerk was instructed to prepare the proper paperwork to reappoint Mayor Worley, as the City Council representative, to the Pack Square Conservancy Board of Trustees, to serve a two-year term, term to expire January 1, 2006, or until his term of office expires, whichever occurs first.

RESOLUTION BOOK NO. 28 – PAGE 120

U. RESOLUTION NO. 04-25 - RESOLUTION APPOINTING A MEMBER TO THE REGIONAL WATER AUTHORITY OF ASHEVILLE, BUNCOMBE AND HENDERSON

Summary: At the City Council worksession held on January 20, 2004, Mayor Charles Worley announced his resignation from the Regional Water Authority.

Also at the January 20, 2004, worksession, the City Clerk was instructed to prepare the proper paperwork to appoint Councilman Dunn to serve the unexpired term of Mayor Worley, term to expire September 30, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 121

V. RESOLUTION NO. 04-26 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENTAL & NATURAL RESOURCES DIVISION OF PARKS & RECREATION IN THE N.C. PARKS & RECREATION TRUST FUND, TO ASSIST WITH THE RENOVATIONS TO MEMORIAL STADIUM

Summary: The consideration of a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the N.C. Parks and Recreation Trust Fund, to assist with the renovations to Memorial Stadium, and an associated budget amendment, in the amount of $550,000.

The renovation of Memorial Stadium has been identified as a high priority with the Parks and Recreation Department and the community. The Stadium was originally constructed in the late 1920's and dedicated in the early 1930's as a memorial for veterans who served and died in WWI. The Stadium was dedicated again to WWI and WWII veterans in the 1940's. However, a true memorial to the men and women who gave the ultimate sacrifice to our country was never properly constructed.

In addition, Memorial Stadium was for years the home of both Lee Edwards/Asheville High Cougars and the Stephens-Lee Bears. Today, a number of youth sports groups including the Asheville Youth Sports, Asheville Grizzlies, WNC Bears, Asheville Assault, Asheville Splash, Asheville-Buncombe Youth Soccer Association, and a number of other groups currently call Memorial Stadium home.

The Stadium is in desperate need of repairs to a number of features including the lights, press box and Stadium seating. More importantly, a proper recognition to our war dead as originally planned still needs to be constructed at this site. A plan has been developed by the Parks and Recreation staff to incorporate these issues into a conceptual design for the Stadium. This plan will address a number of funding options that include local civic club contributions, veterans groups, grants and foundation funding, and sponsorships. It is anticipated that the cost for the renovations and upgrades will total $2 million. This conceptual plan was approved by City Council in November, 2003. An Action Committee has been formed and is working with the Parks and Recreation Department to aggressively secure funding through grants, foundations and sponsorships, as well as the Capital Improvement Plan for the City of Asheville.

The Parks and Recreation Department is requesting $250,000 in grant funds from the North Carolina Parks and Recreation Trust Fund, which requires a dollar-for-dollar cash match. The cash match is available through a partnership with the Eblen Children Charities and through grass root fundraising efforts with a number of individuals and groups. Funds from the grant will be used to renovate the playground, build new basketball courts, construct a new picnic shelter, add and renovate a new walking trail, and create a new public event plaza area recognizing those who served our country.

In addition, staff is requesting approval of a budget amendment totaling $550,000 that incorporates the contribution of Eblen Children Charities and individual donations.

The Parks and Recreation Department recommends the City of Asheville to apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund to assist with the renovations to Memorial Stadium and to adopt the associated budget amendment in the amount of $550,000.

Upon inquiry of Councilman Dunn, Parks & Recreation Director Irby Brinson explained the entire project. He said the Veterans Memorial and the enhancements to the stadium for the Memorial will be non-taxpayer dollars.

RESOLUTION BOOK NO. 28 – PAGE 122

W. ORDINANCE NO. 3088 - BUDGET AMENDMENT TO ALLOCATE FUNDS FROM THE EBLEN CHILDREN CHARITIES AND INDIVIDUAL DONATIONS TO THE MEMORIAL STADIUM RENOVATION PROJECT

Summary: See Consent Agenda Item "V" above.

ORDINANCE BOOK NO. 21 – PAGE 54

X. RESOLUTION ALLOCATING $730,000 IN HOUSING TRUST FUND LOANS FOR AFFORDABLE HOUSING DEVELOPMENT

This item was removed from the Consent Agenda for an individual vote.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA FOR AN INDIVIDUAL VOTE

RESOLUTION NO. 04-27 - RESOLUTION ALLOCATING $730,000 IN HOUSING TRUST FUND LOANS FOR AFFORDABLE HOUSING DEVELOPMENT

Councilwoman Jones moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

Summary: The consideration of a resolution allocating $730,000 in Housing Trust Fund loans for affordable housing development

This is the fourth annual allocation of funds from the City's Housing Trust Fund (HTF). The 2004 budget included an appropriation of $600,000 for the HTF and $130,000 has accrued in loan repayments, making a total of $730,000 available for lending in this round. The application process was opened on October 15, 2003, and eight applications were received by the December 8 deadline, requesting a total of $1,275,000. All of the applications received this year were for rental projects.

The applications were evaluated by a panel of City staff and outside experts and then reviewed by the Housing and Community Development (HCD) Committee. The HCD Committee has recommended funding the following six projects:

Mountain Housing Opportunities - 50 units on Grove St.	$140,000(20 years at 2%)
Gateway Construction -100 units on Swannanoa River Rd.	$125,000(30 years at 0%)
Tim & Wendy Vorst - 2 units on Beaucatcher Rd	$ 50,000(30 years at 2%)
Spicewood Development - 42 units on Cedar Hill Rd	$185,000(30 years at 2%)
Thomas Yurchenko - 6 units on Campground Rd.	$150,000(30 years at 2%)

Paul Saylor - 2 units on West St.	$ 80,000(2 years at 2%)
Total (202 units)	$730,000

She summarized with Council all applications submitted and reported on the progress of prior years' projects.

Staff recommends approval of the HTF loans listed above.

Councilwoman Jones moved for the adoption of Resolution No. 04-27. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 123

III. PUBLIC HEARINGS:

IV. UNFINISHED BUSINESS:

A. BUDGET AMENDMENT FOR THE SECTION 108 GUARANTEED LOAN AND ECONOMIC DEVELOPMENT GRANT

Planning & Development Director Scott Shuford said that this is the consideration of a budget amendment, in the amount of $1,140,000, to recognize receipt of a Section 108 Guaranteed Loan and an Economic Development Initiative (EDI) grant from the U.S. Dept. of Housing and Urban Development and expenditure of the proceeds on the redevelopment of South Pack Square.

Prior staff reports have provided considerable information concerning this budget amendment request to allocate $800,000 of HUD Section 108 loan funds and $340,000 of EDI grant monies to the Eagle Market Streets Development Corporation (EMSDC) project that would, by itself, create 8,700 square feet of additional retail and office space, 14 residential units (market rents) and 17 garage parking spaces. The allocation would also leverage additional monies to be spent in a Mt. Zion Church project resulting in a total of over 12,000 square feet of retail and office space and a total of 47 residential units. Five historically significant buildings will be restored to Secretary of Interior standards and a new infill building will be constructed on vacant property if these two projects are realized.

This is an economic development project that will be funded through private investment using historic tax credits and conventional financing, along with the funding sources from this budget amendment. It is important to note that this project is not an affordable housing project, although the units will be affordable (renting at 95 cents a square foot) to service workers, City employees, and other people that make up our local workforce. This is a greatly underserved group in our downtown housing market.

Staff finds that the proposed project will be fully consistent with the South Pack Square Redevelopment Plan. In addition, the project is fully consistent with all applicable financial review criteria necessary for the City to carry out its responsibility in monitoring the allocation of federal funds and in securing the consequent City financial interest in the project.

Staff recommends that the City Council approve the budget amendment that allocates $800,000 of HUD Section 108 loan funds and $340,000 of EDI grant monies to the EMSDC project.

Mr. Shuford then said that the project has been a long time coming beginning in 1993. He reviewed the goals for the South Pack Square Redevelopment Plan and briefed Council on how the project will meet the Plan's goals. He then outlined for Council reasons to support the project.

Mr. Marvin Chambers, Assistant Treasurer of EMSDC, gave City Council a letter from Robert F. Barron, Jr., President and Chief Executive of Enterprise Real Estate Services dated January 26, 2004; a letter from Mr. Chambers dated January 27, 2004, and a petition (containing 500 signatures) which states "This community, as represented by the signatures listed and attached letters received, requests the Asheville City Council to approve the grant and loan funding for the Eagle, Market Streets Development Corporation Redevelopment Project Phase 1 in order for the renovation and construction to begin without delay. We the undersigned urge that Asheville City Council as our elected representatives move forward swiftly with this project. It is imperative that you hear our call for action to permit this community to fully participate in the asset-building, redevelopment and revitalization of the downtown and preservation of its African American heritage. We wholeheartedly support the work of the Eagle, Market Streets Development Corporation." He said that the EMSDC was established ten years ago to receive federal funding to resolve the blight on the Block. They have worked closely with the City of Asheville to eliminate crime in this part of the downtown and to create an atmosphere conducive to revitalized commerce and rebuilding of a residential neighborhood. They have applied for funding over the last 6 years in order to develop bricks and mortar projects that will encourage and sustain the investments made by other non-profits, private investors, businesses and individuals. The South Market District Project is designed to provide a framework on which to rebuild and stimulate the economic pulse of the historic African American commercial community. They have entered into annual contracts to attain specific goals with respect to the development and job program, and have therefore completed tasks, activities, acquisitions, designs and partnerships that we were asked to do. They need Council's continued support.

Mr. Chambers said that they have learned that (1) the work is difficult and expensive; (2) whatever accomplishment they achieved, they wish they could have done it better – including the creative process, the community involvement process, and in the timing of related events and activities; (3) they were fortunate in finding partners willing to go the extra mile; (4) the partnerships, carefully structured, are complicated; (5) in combining the project with Mt. Zion, they were able to attract a "best in the country" organization to assist Asheville, and draw a developer who is recognized across the state for completing community reinvestment projects and for historic rehabilitation that meets or exceeds the Department of Interior standards; (6) the work is complex and difficult to explain; (7) delay is costly – the $6.3 Million Redevelopment Plan of 1996 is presently $22 Million redevelopment that must be done in phases; (8) developers must be willing to invest personally and to put their reputations on the line; and (9) bringing a project to the point where it can be examined by interested and necessary reviewers means investing a considerable amount of capital. He explained that the advantage of the EMSDC owning property in the area is the assurance of long term community control. He explained why they asked the Enterprise Real Estate Services to provide technical assistance. He said that they have already been receiving calls asking when the apartments will be ready for occupancy. On their visits to neighborhoods in the Community Based Development Area served by the EMSDC, they have been asked by African Americans of all social and income backgrounds on what they can do to invest in the project. He said there is a waiting list of individuals wanting to work in the construction of this project.

Mr. Chambers said that if Council funds the project, (1) within 18 months the return in equity to the area property owners will be substantial; (2) local financial institutions will participate and project leverage will improve for others seeking loans in the area; and (3) African Americans living in Asheville will have tangible evidence that their federal dollars are returning to their community in a way that many have doubted could happen for the last 26 years. To not fund the project repeats an old pattern whereby government holds out the promise of funding but in the end does not The economic reality is that gentrification of Eagle and South Market Street is just around the corner, knocking at the door.

Mr. Chambers asked Council to help them complete the work that they were asked to start. They are humbled by the task and apologetic for those aspects that they have not handled perfectly or well. They have heard Council's concerns and have begun to address them in terms of community involvement and in terms of compliance with the Redevelopment Plan. He asked that City Council support Phase I and release the funds committed to the project.

The following individuals spoke in support of Council releasing the funds for this project for various reasons, some being, but are not limited to: this project is as close to perfect as we have ever come; if we are waiting for a perfect plan, we'll be still talking in 20 years; one can always find fault in a Plan; now is the time to facilitate the project so the community can move forward; the progress must not be held hostage any longer; it took a number of years to purchase the buildings to keep the heritage of the Block and in the hands of the African American community; even though EMSDC has not done everything correctly, they are learning through their mistakes; EMSDC continues to meet with outside groups to talk about the development; people in the area have waited a long time for development to happen; support this effort so that progress can start being made; and this project is a win/win situation – for the Block and for Asheville:

Ms. Althea Goode, concerned citizen
Ms. Andrea Wright, consultant with Eagle-Market Streets Development
The Reverend John Grant, Mt. Zion Missionary Baptist Church
Mr. James Geter, Board Chair and President of EMSDC
The Reverend Charles Mosley, Nazareth First Baptist Church
The Reverend L. C. Ray
Mr. Mike Morgan
Ms. Esther Hart
Mr. Samuel Camp (presented Council with newspaper articles)
Dr. Charles Blair

Mr. Jesse Plaster, representing the property owners, asked City Council to deny Eagle-Market Streets request for funding to continue this project. This is based on a number of arguments. There are a series of violations to the South Pack Square Redevelopment Plan adopted by City Council, with assistance from EMSDC. First are aspects of community involvement which are set forth in this Plan. The EMSDC Board is supposed to be comprised of community members and appointments from within the corporation but also property owners. When Rev. Grant was Chairman of the EMSDC, he told us that all property owners had a seat on that board. It's set forth in the Plan that that should be the composition of the Board. We feel like without a place in that decision-making body we have been left out of the process. Furthermore, community members, business owners and property owners should be updated monthly, as set forth in the Plan. There have been no updates in over three years. There were also supposed to be community design charettes to allow the community at large and any interested parties to participate in the development of the Eagle-Market Streets Plan. There has not been a community design charette in 10 years. A charette held in September of 2002 was a charette open to architects and that was sponsored by the local AIA, but it was not specifically a community charette. The Plan also addresses the involvement of local minority contractors in the redevelopment of the Block. That has not been addressed by the EMSDC. A question was asked, at a public meeting at the Public Works Facility, if the developer had any goals for minority contractor involvement. The developer's response was that they are not required by law to have such goals, and therefore, he does not. Another requirement of the Plan was the preservation of local property owners. As a last resort, EMSDC was given the authority to act on the City's behalf to purchase properties that would be demolished or taken out of the market place. It seems that they have acted in opposition to this requirement of the Plan. A final change to the Plan is the infill proposal. It is clearly laid out in the Plan that it is the intention for infill development but there is nothing in the maps or information documented in the Plan that shows the current site as a potential infill site. And furthermore, it's supposed to be put off until a further, later stage of redevelopment. The first stage of redevelopment is meant to be rehabilitation of existing properties. That is not what is being proposed. A question that keeps coming up about the Plan is the issue of trust. We are told we should trust the developer, even though the buy-back plans are not in place, the long-term agreements are to be held in trust, but our trust has been consistently met with misrepresentation and fabrication. Another issue is the idea of feasibility. This project was first presented as a renovation project of the Dr. Collette Building, the Campbell Building and 3 Wilson Alley. That was presented as a feasible project. EMSDC came back in 2003 and presented the project as infeasible without an infill building. Now the project is presented as infeasible without the inclusion of Mt. Zion, which really doesn't have any relevance in these hearings. That compromises the public trust in their abilities and in their stewardship of these City-owned properties. An important issue to the community is the long-term community control of the buildings. That is one of the reasons that EMSDC should be allowed to purchase properties to assure that they stay within the community and serve the greater good of the community. However, without buy-back agreements in place without a guarantee that the City or the EMSDC will maintain ownership of these properties, it is questionable, after five years, what will take place. A Charlotte-area developer will gain 50% control of the properties after five years and he will also receive 50% of the net proceeds of the properties during the five year period. At that point, the City is given the option of buying back the properties and it's not laid out as yet what that agreement should entail. The property owners are not alone in their opposition to the EMSDC's plans. Fourteen business owners have signed an agreement stating that the EMSDC has failed the community. If the property owners and businesses who are there on the Block now feel like the EMSDC has failed them, it asks serious questions about how they can proceed with the project under those circumstances. If EMSDC loses these funds, the money will not go away. There are a number of private investors who are interested in the area. These properties would have been renovated by now had the EMSDC not purchased them and held them for a number of years. They have owned the Campbell Building for over three years and they have owned the Dr. Collette Building for six months. Given the failures of the EMSDC (inadequate community involvement, numbers that don't agree, and a number of other failures), should they be given license to proceed?

Ms. Amy Plaster, co-owner of the Wilson Building, said that the project contains irregularities and lack of accountability in this public money. We deserve accountability and to see the money used for the community, not having people tell the community what is best for them. Many of us have talked about alternatives to having an infill building. A building is not necessarily progress. We would like to see a space that gives back to the community as well as generating income. We have drawn up some ideas of what that could be.

Upon inquiry of Vice-Mayor Mumpower, Mr. David Rogers, one of the developers on the project, responded to various questions. He explained that when they first looked at the project, it became obvious that tax credits was one of the things that could make the project happen. Since a non-profit cannot use the tax credit, they brought in a tax investor. The tax investor will own the project for five years. At the end of five years, in the agreement, there will be a buy-back procedure where we buy the tax investor out and then EMSDC can buy the developers out of the project. The developers have no desire to own this real estate long-term. His purpose is to get the project developed, active, successful and then turn it back over to the EMSDC. In order to buy us out, the EMSDC will be able to leverage the real estate as an asset to refinance the project. They should be able to borrow 75-80% of the value of the building at a very reasonable rate. Right now we are 50/50 partners with the EMSDC. During the five-year period, the majority of the cash flow will go to the tax credit investor and there will be little money to be shared

464

between the EMSDC and the developer. The rates from the rental apartments will hopefully go up during the five year period of time and the existing loans will be paid down. They will be able to refinance the project and take over 100% control of the project. Mr. Rogers said that the buy-out procedure is in writing and waiting for their lender and tax credit investor to approve.

Upon inquiry of Vice-Mayor Mumpower, Mr. Rogers said that they did a market study on this project. In addition, the Enterprise Real Estate Services did a market study prior to their involvement. Also, they have had it appraised and their lender has checked the market as well.

Upon inquiry of Councilwoman Bellamy, Community Development Director Charlotte Caplan explained the difference between tax credit projects for low income housing and these tax credits, which are for historic rehabilitation. Mayor Worley further explained that if you use the historic tax credits, you are required to own that property for a minimum of five years. If you divest yourself of that property before the five years are up, you are subject to recapture of the income tax benefit that you gained by using those tax credits.

Upon inquiry of Councilwoman Bellamy, Mr. Rogers said the rent for the apartments will be range from approximately $600-850 a month, based on the number of bedrooms.

In response to Councilwoman Bellamy, Ms. Caplan said that there are no requirements on the rent for the EDI grant monies nor for the Section 108 monies because this is an economic development project and not an affordable housing project. These apartments are not required to be affordable by HUD regulations. It is the revitalization and the elimination of slum and blight as the national objective being achieved in HUD terms through this project.

Regarding the heritage of the Block, Councilwoman Bellamy asked how we can ensure that gentrification will not occur. Mr. Shuford said that this is an area that was traditionally not a residential area for the African American community but an area of commerce, retail, restaurants and other activity. That aspect would be covered by the fact that EMSDC will continue to coordinate and be involved in the retail, restaurant and office leases that occur as part of this project. There is no guarantee what the income range or the ethnic background of the people who will be living in the apartments will be, but the fact that the restaurant and retail aspect of it would remain under control of the EMSDC. Secondly, one of the most important parts of the heritage of this area is it's architectural heritage and the Campbell and Collette buildings will be preserved and brought back to their original stature as part of this project. One of the difficulties of doing something different, like a market-type situation, is that we would lose those two buildings as a result of a private sector involvement because there is not going to be an interest in trying to rehabilitate those functionally obsolete buildings. We have certainly learned from this project that renovating existing buildings to historic standards is a lot more expensive than new construction. As a result of that, we would tend to see the rents of any private sector development that would occur here would either not support the retention of the existing buildings or we would end up with a much higher rents as seen in other areas of downtown.

Upon inquiry of Councilwoman Bellamy, Ms. Caplan said that the release of the funds will based on the contract between the City and the EMSDC. We have no financial commitment to the Mt. Zion site of the project.

Councilwoman Bellamy was concerned about the public trust aspect. Ms. Caplan said that there have been imperfections in the public consultation process. Over the years, Eagle-Market Streets have had periods when it has been very active in seeking ideas and periods when it has been less active. However, they went public with these plans at the beginning of October of 2003 and have had 16 weeks of continuous, intense dialog since then. Public consultation does not always lead to 100% agreement by all stakeholders. In fact, over the years she has been involved with the Block, various proposals, not of such a major nature, have been made and in every case there has been opponents. It has not been an area in which it is easy to get 100% agreement. Everyone has different visions and interests in the area. We did advise EMSDC several years ago that they should not have on their Board property owners whose property they might wish, as part of the Redevelopment Plan, to purchase in the future. Obviously to purchase property from one of their own Board members would be a conflict of interest. They do have on their Board at least one property owner in that area, but not from South Market Street or Eagle Street.

In response to Councilwoman Bellamy about the 1993 by-laws regarding Board members, Ms. Caplan said that there was nothing in the Plan that stated how the EMSDC's Board should be composed or what its by-laws should be. It states that EMSDC's Board does contain property owners. That was a statement of fact. Mr. Shuford also noted that at the time the Redevelopment Plan started forward there was an active organization called the South Pack Square Association, which is now defunct. That was one of the key ways communication was to occur. We certainly have not been fully satisfied, up until October, with the performance of EMSDC in getting word out to people. But, at this point in time, everyone should know the specifics about this particular process. One other piece of advice is the process is always suspect when people are not happy with the outcome.

In response to Councilwoman Bellamy's concern about the process, Mr. Shuford said that there is a need for Council to balance different issues and Council needs to decide whether the process flaws outweigh the importance of this project to the community. In his opinion, he thinks that certainly since October when it became apparent that there was a lack of knowledge about the specifics, the EMSDC has been pretty responsive to that. Their Board has been working very hard to look for ways to be more inclusive. In fact, we have basically put them on notice that should we have another project, we will expect them to have a public involvement plan prior to the initiation of even the beginnings of the project. The people who seem most opposed to this have been able to avail themselves of vast amount of documents and other materials. There has been no attempt to hide any of that information. This is a public process but if Council decides that that is a fatal flaw, then that is part of the balancing act that City Council has to do.

Councilwoman Bellamy wondered if we can look through some of the information that was on the table, that didn't go anywhere, for possible compromises that can be developed going forward.

Ms. Elizabeth Russell, Executive Director of EMSDC, said that over the last month they have been trying to distribute Board membership applications. They subsequently went to all the businesses with correspondence to make sure that Board applications were out in order to get interested persons to respond. To date we have not received any completed Board applications. However, in order to keep the dialog continuing, we recently met with the YMI Cultural Center's Vice-Chairman and Executive Director and members of the Mt. Zion Community Development to try to see what we need to do to advance this. The outcome of that meeting was that the YMI and the EMSDC are to work together to send a letter to all the previously defined area property owners (going back to the Plan of 1996) to try to put out another call to the South Pack Square Association and make sure we have reached out to everyone who would like to provide input. In addition, at their Board meeting on January 15, the Board has put in place a Redevelopment Advisory Panel composed of property owners, business owners, and tenants in the area, to try to keep dialog open to the EMSDC Board. We are trying to address this on multiple levels.

Councilwoman Bellamy said that not only is she concerned about public trust and public input, but she's concerned about the financial issues as well.

Upon inquiry of Councilwoman Bellamy, Ms. Caplan said that the City will be making the $18,000 payment (because we have already drawn down the $800,000), noting that there will be that much less money to spend on the project. That interest was built in as a construction interest cost. She explained that if the project is further delayed, the City must repay the interest on that loan. That is a loan from HUD to the City, but the way that the project is structured, those loan repayments (principle and interest) will be made from the project revenues.

In response to Councilman Newman, Ms. Caplan said that if this project does not go forward, then the City will have to find another use for those monies that satisfies HUD's criteria. We will have to look around for other projects and get HUD's permission to use the Section 108 loan for these other projects instead. The EDI grant is more difficult. That was a competitive grant and HUD may not allow us to retain that. Most likely they will expect us to reapply for it for new projects and they will make us compete against all the people who got it the same year that we did. We will have to do at least as well as those other EDI recipients in order to retain the money; otherwise they will take it back.

Councilman Dunn asked why we started drawing on the grant without a plan in place. Ms. Caplan responded that we had the option in August of 2002 to take the loan or not. Our view was that its interest rates at that point were historically low and that it was in the City's interest to draw down the loan funds at that time. She consulted with the City's Finance Director and that decision was made by staff that it was a good financial decision to take the loan at that time because interest rates were so low. Mr. Shuford further explained that in 2001 City Council authorized staff to apply for the Section 108 and EDI funds. The City went to HUD and said we have a project that we would like to pursue, which included the infill building and renovation of a building. It was a similar project. It has taken EMSDC awhile to make final acquisition of the property. Again, with the help of our Finance Director, it was a decision made in August because of interest rates being so low. We did not anticipate the level of discord that we have had on this issue. If we have to allocate the money to a new project, we will do our best to make sure that new project reimburses us for the monies because it will still be at a very favorable interest rate.

Councilwoman Bellamy asked how we achieve one of the Plan's goals, which is to ensure that the implemented development is sensitive and responsive to the needs of the people who have traditionally inhabited and conducted business in the area. She wants to make sure that African American businesses have the opportunity to locate in the area. Mr. Shuford said that there are two things Council can physically ensure. The new infill building is going to have to meet the design standards and the five historic buildings will have their own separate standards. Ms. Caplan also responded that Council has heard from many people who did traditionally use and conduct business in this area. One thing we have committed to HUD is that the preponderance of businesses located in this area will be serving the local population, rather than for example high-end art galleries. Wherever possible tenants will be selected who provide goods and services needed by the people who live in the surrounding areas.

In responding to Councilwoman Bellamy, Mr. Geter said that we are living in a time now where we can't guarantee anyone that they will live anywhere or have a business anywhere, but we can ensure that these properties remain in this community and that the income from these properties will help the community. We are actively looking for African American businesses to come in now and get ahead of the curve. The EMSDC wants to continue to help them develop their business. He said they do have people on a waiting list for their businesses to open once the properties have been developed. Ms. Wright was pleased to note that they have nine African American businesses and other minorities ready to go – we just need the buildings.

When Councilwoman Bellamy asked why the project is for 17 parking spaces vs. more business space, Mr. Geter said that parking is at a premium downtown and they tried to keep the building within the same standards as the other buildings. Ms. Russell also responded that part of the parking will be for tenants living in the infill building and in the Del Cardo building, but their intent was to make sure that people utilizing those structures would not glut the traffic parking that was available for other businesses in the area.

Upon inquiry of Councilman Davis, Mr. Rogers said the rent on the commercial space will be $12.50 a square foot, but that provides all the improvements for the tenants. Regarding the size, they will be fitting the spaces to the tenants.

Vice-Mayor Mumpower said that the benefits the developer will reap are dramatic, but the point of balance concerns him. He questioned what would happen if they don't get the rent for the commercial space or if the apartments are not filled, noting that the Grove Arcade is struggling. Mr. Rogers responded that he has been doing this business for 30 years and they have never had a project go over budget nor have they ever had a project fail. They own extensive real estate in North Carolina. He said that most, if not all, of their projects are 100% leased. He then responded specifically to his part in the Grove Arcade pointing out that if the project is failing because of the marketing or how it was put together, he had nothing to do with that.

When Councilman Dunn asked what happens if the EMSDC can't buy the developers out, Mr. Rogers said that they would stay. Again, they are not long-term owners of this real estate. They have set up a three year period for everyone to try to buy us out. If after the 7th year period, we would seek another buyer for the project. But the project is put together as leases from EMSDC and Mt. Zion. Under no circumstances would they ever lose control of the property.

Upon inquiry of Councilman Dunn, Mr. Rogers explained how long the corporations nave been in existence and what the assets of his corporation are.

At the request of Councilman Newman, Mr. Rogers talked about the significance of the Enterprise Real Estate Services Inc., a for-profit developer set up by the Enterprise Foundation, in the project. He explained what their function will be and what they will bring to the table.

Upon inquiry of Councilman Davis, Mr. Rogers said that this phase of the project contains no affordable apartments. However, they are trying to earmark eight affordable apartments in the Mt. Zion project. In addition, the second and third phase of this project will have affordable housing. He said that Enterprise Real Estate Services Inc. would be involved in this phase of the project even if there was no affordable housing component in it.

Upon inquiry of Mayor Worley about there being no buy-back agreements in place, Mr. Rogers again said that the documentation is in the leases drawn up. The EMSDC and the developers have agreed to the documentation and have finalized that. What has not been done is the lender and the tax credit investor have not approved them. His lender is waiting for City Council's decision before they will give him a final commitment.

Councilwoman Jones said that she hasn't seen a recent audit of the EMSDC. She felt that a loan of this magnitude would require a completed audit and asked if that is a requirement for HUD. Ms. Caplan said that it is not a requirement for HUD until the agency receives more than $300,000 in one year. However, it is a requirement from the City and we are expecting to receive the 2002 audit very shortly, noting they been late in producing it.

Councilwoman Jones said she would like to see the most recent audit concerning EMSDC's financial capability before the City releases $1.1 Million.

Councilwoman Jones read that the EMSDC's by-laws, in terms of the Board's composition, and I have concerns of how it is being interpreted in terms of business, property owners and tenants and then trying to cross check with the current board list. Seems like the Board make-up is a huge stretch from their by-laws.

When Councilwoman Jones asked if HUD reviews whether or not organizations follow their by-laws. Ms. Caplan said that HUD will not look at in detail at whether an organization is following its by-laws, except in areas that affect HUD regulations. One of the key HUD regulations here is that EMSDC qualifies as a community-based development organization. They have changed their by-laws and have slightly amended their Board composition specifically in order to quality as such an organization. She did note that the City does monitor the compliance of the EMSDC's Board with the requirements of their status as a community-based development organization.

Councilwoman Jones said that in terms of the audit that we do have and the findings from the auditor, has City staff received documentation that makes them feel that they have addressed the concerns that the auditor found in the last audit. Ms. Caplan said that she has not recently looked at that audit. It has been a year since she has looked at that audit; however, she strongly suspects that they had comments in the audit about separation of duties because that is a constant issue for very small organizations.

Councilwoman Jones said she feels like Council is being put on the spot to make a decision that will either stop 25 years of progress or they will be asked to look the other way about the organizational capacity and public credibility of EMSDC. She wasn't sure if there would be a way to work closer down the road on some of Council's concerns, but that would be her plea.

Councilwoman Bellamy said she wants to see the Block redeveloped, but she has a concern regarding accountability. She wants to make sure that if Council moves ahead, that we they are doing it with the right fiscal responsibilities as well as with the neighbors of EMSDC.

Mayor Worley said that Council has heard that there are irregularities in terms of the process that has been followed and there is an acknowledgment that the process certainly could have been better. He asked if from a legal standpoint, not from a standpoint of is it the best process and what we would traditionally try and follow, are there irregularities that would preclude us from considering this or violate the terms of the Redevelopment Plan. City Attorney Oast responded that the process by which the Eagle-Market Streets Project, and in particular the infill development building was approved, did comply with the law in the Plan.

Upon inquiry of Mayor Worley, Ms. Caplan explained that several hundred thousand dollars, as well as property acquisition, has already gone into this project since 1993.

At 7:33 p.m., Mayor Worley announced a recess.

Mayor Worley said that this is a difficult decision and the process has a lot of flaws but they don't rise to the level of legal impediment. He said that for the EMSDC, the history of the project goes back over 10 years of efforts to revitalize and resurrect the Block. There have already been considerable funds expended in this process. He felt the project itself would do a good job for the Block. It would restore the Block and bring about economic development we have long desired in the Block. He asked that Council not halt the project because of process flaws because the end result will be what the City has long envisioned for the Block, with the developer and the other funding in place to bring that about. A very important question was raised about the 2002 audit and he has already expressed his concerns over the agreement process. However, he would support approval of the project, subject to the receipt of a satisfactory audit for 2002, with a deadline for that audit to be received, and subject to the drafting and execution of a document clearly setting forth the expectations of this City in terms of the processes to be followed by EMSDC for public input and public involvement going forward for the remainder of this project and for any other phases that might come down the road. He did think it was important for this City to move forward with the redevelopment of the Block and he thinks that turning this project down will bring about substantial additional delay in any substantive progress on the Block and in the desirability of returning the Block to what it was for the community and making it something for the community going forward.

Councilwoman Bellamy said that it was important that Council address the concerns going forward and not be misleading to say that we support you, but the only way we're going to support you is if you get this information together. She thinks that we should create that understanding and give it to them and say, this is what we want and when they present Council with the information, then move forward. Ms. Russell said that they are meeting with individuals and group members to resolve some of the issues, but that isn't working. She thinks City Council needs to get involved because we all want to see this happen. She felt Council should have a heavier hand in making the process occur, even if we have to hold their hands. We all need to be satisfied with the process and the project. We need to do whatever it takes to get people at the table, receive the audit, look at the performance, and to deal with those issues before we move forward. She suggested postponing the vote for four weeks because they need time to get together more than once. She said maybe a committee of Council could meet with the parties involved to make this process work and she would be happy to be available. If the parties involved don't want to meet or provide what Council has asked for - receipt of the 2002 audit, review of the pro forma, to look at the issues of sustainability - then that shows Council has done what they could to make the project work.

Councilman Dunn voiced concern over the fence was put up by EMSDC that divided the community. He said that the City has a lot of money invested and a fiduciary responsibility to use this money somewhere. If the parties can't come together, he is prepared to go somewhere else.

Councilman Davis said he was disappointed that we have some trust issues that haven't been dealt with. There is a fairly huge riff in the community because of this and there was hope that there was some progress being made. He too asked that they go to the table again to see if there can't be inclusiveness. He was not in a position to be able to vote on the project at this time.

When Mayor Worley asked what a delay would mean to EMSDC, Mr. Geter said that they have already waited for years to revitalize the Block. He asked for Council's decision at this time. He explained that it's wrong to think that an entire community needs to speak with one voice and you don't find that in any community. We are all individuals and don't think alike. If some people say yes and some no, that's a good thing because it tells us that we are all thinking. They have sent Council a plan for inclusion and their Vice-Chair has taken over that task to make sure that all of the property owners and business people on the Block have a voice. We already said that EMSDC, the YMI, the City and Mt. Zion have met and agree they need to look at a plan that is more inclusive. It was all of us because we don't know who the other players are but those are items that we sat down to discuss. It was then decided to have another meeting in February but in the meantime the Executive Directors from EMSDC and the YMI will meet and form these lists to bring back to the complete body. Then we can start to bring everyone else in. We are also working to be more inclusive by having an advisory committee made up of all the property owners and all of the business people on the Block to advise the EMSDC. We are doing the things we can do to be more inclusive.

Mr. Geter asked what would happen if after the four weeks are over and Council still doesn't have enough information. He wondered if Council will continue this until they don't have the backing of the developers. Vice-Mayor Mumpower said we want the matter continued until we find solutions and City Council is not convinced that we have exhausted that run yet. We feel like there is a little bit more room to work, talk and find some solutions.

Mayor Worley said that this Council is not asking EMSDC to come back with a consensus from the entire community. He sensed Council is asking for (1) receipt if the 2002 audit and time within which to review it; (2) time within which to review the pro forma; and (3) a signed memorandum of understanding setting forth the expectations of this City in terms of the processes to be followed by EMSDC for public input and public involvement going forward for the remainder of this project and for any other phases that might come down the road.

Mr. Geter asked for Council to vote on this issue tonight contingent upon EMSDC having certain things in place as outlined by Council, including City Council sitting down and talking with them.

Councilman Newman said that the audit is reasonable information to have. If the audit is received and it is a good audit, the infill building will still be a controversial issue. If the majority of the members of Council don't believe this infill building should be constructed, then we should just make that decision and move on. Or, if the audit can be supplied and it indicates that they are a sound financial operation, and based on that we do want to more forward, then we should. He doesn't think that any number of weeks the fundamental issues around the development will be any less controversial than they are right now.

City Attorney Oast said that the Community Development Block Grant Agreement that the City has entered into with EMSDC provides the framework for insisting on the provision of certain information. In fact, it provides that cause for suspension or termination of the Agreement is a failure to comply with the terms and conditions of the Agreement or submission to the City of reports that are incorrect or incomplete. The City has the authority, irrespective of what happens tonight to terminate our Agreement with the EMSDC for any material failure of that nature.

City Attorney Oast also noted that this is a budget ordinance amendment and even if it is voted down tonight, it can be brought up again in two weeks. Council is not prevented from reconsidering it at any time.

Councilman Dunn said that his decision will be based on other things – not solely the audit. He felt that the pro forma provided has problems.

Councilwoman Jones said that the infill building is not an issue with her, but her concerns are more of the organizational capacity and credibility. She will be looking at the audit in other places as well. She was, however, pleased that EMSDC has an organizational consultant working with them.

Councilman Newman said that it would be helpful for him to understand what information other members of Council feel like they need to make a decision. He feels like the audit is information that would be helpful for him. Other than that, he has the information he needs to make a decision.

Vice-Mayor Mumpower said that there was a meeting over a month ago at a worksession where a lot of the parties at the table felt like there was a plan in place, but it didn't happen. There was some opportunity there that he personally doesn't think was fulfilled. Subsequent to that, the organized opposition took out a lawsuit. He was still wondering if there is opportunity to get back to that table and try to find some more common ground. Secondly, he's not terribly concerned about the audit, but the pro forma is a big issue for him. EMSDC is initiating a new adventure in an area that has not thrived for a long time and to assume that level of performance that quickly to me steps beyond the balance of common sense. He needs more solid reassurance before he could feel comfortable with that.

Mr. Geter responded that they have asked for a number of banks to look at the pro forma and wondered what other kind of assurance is needed.

Councilman Davis said that the audit is probably the one tangible piece Council needs to make a decision, but the intangibles is what bothers him most of all. We have talked about getting people back to the table. To not consider some of the property owners in the area who have invested a lot of money is not a good thing. He would like to try to heal some of problems in the community. This is a very important project. When we get into the Block itself, that was a commercial place in nature. These people who have taken their private money and invested in it in order to develop it and attract other private developers down there, might do a better job of keeping the heritage of the Block. Again, he felt that the people who have already made an investment in that area should be brought back to the table. More than waiting for the audit, he wanted to try to get the people back together and see if we can't develop together a good project.

Mayor Worley felt that if Council is going to consider a delay then it should be for tangible reasons. Healing the problems in the community is an intangible, and he didn't see how we can quantify that over a 2 or 4 week period – that is a much longer process. Tangible reasons might include the receipt of the audit and any other specific documentation, and perhaps an agreement to provide for the inclusionary process. Questions about the pro forma are hard to quantify because you can have different people look at it and say different things about it. You can't quantify who is right and who is wrong on those.

Councilwoman Jones felt the trick with the tangible for the audit is it depends what it says. It should not say there are outstanding checks, the bank statements didn't reconcile, or that there are overdrafts. Those substantial issues and if they are in the audit, she will not feel good about releasing $1.1 Million to that organization. She would like to have a conversation about how the by-laws are being implemented and maybe they need to be revised a little bit, because she has some real issues about if they are being followed. A conversation with the organizational consultant would address some of her concerns. She also pointed out that there are no terms for board members. There are some organizational boring things that really matter. Another conversation that she would like to have is to spell out some of those capacity issues, because if we can deal with the capacity, then we can start moving toward the credibility. That is what we need to do to go forward. She also agreed that fleshing out the public involvement plan is needed as well.

Councilman Dunn moved to not allocate the $1,400,000 of Section 108 Guaranteed Loan and Economic Development Incentive Grant to EMSDC. This motion was seconded by Councilman Davis.

Vice-Mayor Mumpower felt that the intangibles should guide Council's decisions. He would like to see additional work done. He is not convinced that there aren't some solutions to more of our concerns.

Councilwoman Bellamy said that City Council has delayed other matters before them in order to give them an opportunity to meet with the neighborhoods and try to find some common ground. She felt a 4-week delay is necessary to make this project work.

Councilman Newman said he would support a delay if there was a sense that the neighborhood and developers were close together and if Council delayed action there might be some sort of agreement or compromise. However, he felt the infill development is the controversy in the community and a few weeks delay won't change anyone's view on that. His sense is that on the substance of this project, beyond the infill building, everyone is happy with the development. He hasn't heard anyone say to not rehabilitate these historic buildings. He has only heard objections to the infill building. He thinks the trust issues are also things that will not be solved in the short-term and he hoped they can be solved in the long run. If Council does approve this loan for this development, it would certainly be a prerequisite for him to provide any future support for public funding for redevelopment in that community to be 100% sure that there is a much better process in terms of inclusion and that the organizational capacity issues that have been brought up are addressed for any future development. His support would be contingent upon that. The substance of the infill building and the trust issues are not things that we can solve in the short-term.

The motion made by Councilman Dunn and seconded by Councilman Davis failed on a 3-4 vote, with Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Mayor Worley, Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no."

Councilwoman Jones moved to continue this matter until February 24, 2004, and based on documentation requested by Council at this meeting, Council will make a determination based on that additional information provided at the February 25, 2004, meeting. This motion was seconded by Councilwoman Bellamy.

Councilman Dunn asked Mr. Geter if EMSDC will consider the project dead or will they try to address Council's concerns in the time allotted. Mr. Geter said that he would take this back to the full EMSDC Board and let them make that decision.

Upon inquiry of Councilman Newman, Councilwoman Bellamy said that when Council approves or disapproves the funding, it's for support of the entire project as it stands. We are not voting up or down just on the infill building.

Mr. Geter said that in talking to the developer, one of the issues that they have is whether the investors will stay in this project. If in four weeks from now, after EMSDC provides Council the information requested, would a decision be made on that date? He said the developer and the investors won't stay here forever. Mayor Worley responded that it is the clear intent of City Council to make a decision on February 24, 2004. Mr. Geter replied then he thought the Board wouldn't have a problem with that.

The motion made by Councilwoman Jones and seconded by Councilwoman Bellamy carried unanimously.

Mayor Worley stated that on February 24, 2004, public comment would be limited only to the new information City Council requested at this meeting.

V. NEW BUSINESS:

A. REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE FOLLOWING SIX AREAS PROPOSED FOR ANNEXATION WHICH ARE GENERALLY KNOWN AS (1) THE HERITAGE BUSINESS PARK AREA; (2) THE HONEY DRIVE AREA; (3) THE ENKA VILLAGE AREA; (4) THE ASHWOOD SUBDIVISION AREA; (5) THE HEATHBROOK AREA; AND (6) THE SWEETEN CREEK ROAD AREA

Urban Planner Carter Pettibone said that the Annexation Services Plan is being submitted for Council's approval for the following areas: the Heritage Business Park area, the

Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area.

City Council approval of this document is the second step in the annexation process that began on January 13, 2004, when Council adopted the resolutions of intent to annex these six areas.

Upon review and approval by City Council, the Plan will be made available for public review. The follow steps will complete the annexation process.

Approval of Annexation Services Plan	January 27, 2004
Public information meeting	March 4, 2004
Public hearings	March 23, 2004
Adoption of annexation ordinances	April 13, 2004
Effective date of annexations	June 30, 2004

The N.C. General Statutes require that municipalities exercising annexation authority make plans for the extension of services to the area proposed to be annexed and shall, prior to the public hearing and public information meeting, prepare a report setting forth such plans.

The Statutes require that the reports include:

1) Maps showing: (a) The present and proposed boundaries of the municipality; (b) The present major water and sewer lines, and any proposed extensions; and (c) The general land use pattern in the area to be annexed.

2) A statement that the area to be annexed meets the standards of N. C. Gen. Stat. sec. 160A-48 (basically contiguity and urbanization).

3) A statement setting forth the plans of the municipality for extending to the annexation area each major municipal service performed within the municipality. Specifically, (a) police protection, fire protection, solid waste collection and street maintenance on the date of annexation; and (b) extension of major trunk water mains and sewer outfall lines so that property owners in the area will be able to secure public water and sewer service according to the municipal policies in effect for extending such service to individuals lots or subdivisions.

4) The method under which the municipality plans to finance extension of services into the area to be annexed.

5) A statement of the impact of the annexation on any rural fire department providing service in the area to be annexed and a statement of the impact of the annexation on fire protection and fire insurance rates in the area to be annexed.

6) A statement showing how the proposed annexation will affect the City's finances and services, including City revenue change estimates.

He then reviewed with Council the specifics of how each area qualifies for annexation.

Mr. Pettibone then explained the Plan for extension of services, including police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection.

Police protection: The additional land area, street mileage, dwelling units, businesses and improvements will require expansion of the Police Department. Extending service into the proposed annexation areas will require operational adjustment in two primary areas (1) configuration of patrol districts covering the proposed annexation areas so as to provide for effective manpower deployment and a balanced response time to calls for service; and (2) filling vacancies in sworn personnel positions to accommodate the anticipated increase in demand for police services. He explained how each area would be served by an expansion of a particular district. Two police officer positions have been approved at an annual cost of $70,000 plus associated capital costs for equipment on or before January 1, 2005, in the previous annexation. Based on the projected population increase at the time of annexation, it will be necessary to add one police officer to maintain the current ratio of one officer to 407 residents. The plan of services calls for the addition of this officer, at the annual cost of $35,000, on or before January 1, 2005.

Fire protection: A Deputy Fire Marshal position has been approved at an annual cost of $37,000 plus associated capital costs for equipment on or before January 1, 2005, in a previous annexation. The additional land area, street mileage, dwelling units, businesses and improvements in this annexation will require this position to be placed in service on July 1, 2004. The N.C. Gen. Statutes require the City to offer existing fire service entities contract opportunities, which allow for the continued service of annexed areas by existing rural fire departments. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the suburban fire department may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances and may affect its plan for extending fire protection; therefore, the City has developed a plan that incorporates alternative solutions to extending fire protection to annexed areas.

Solid waste collection: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Sanitation Division. The City is required to offer existing private service entities contract opportunities which allow for the continued service of annexed areas by existing companies. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the existing private companies may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances and may affect its plan for extending solid waste collection services; therefore, the City has developed a plan that incorporates alternative solutions to extending solid waste collection services to annexed areas.

Street maintenance services: The additional land area, street mileage, dwelling units, businesses and improvements will not require immediate expansion of Public Works Department, Street Maintenance Division. Existing personnel and equipment are planned to serve the proposed additions to the City maintenance system; therefore, no specific personnel and equipment additions will be made.

Water distribution: On the effective date of annexation, all residents, businesses and property owners within the proposed six annexation areas that are adjacent to existing water facilities will receive service on a basis substantially equal to all current portions of the City. The following four areas require no water line improvements: Heritage Business Park area, Enka Park area, Ashwood area and Heathbrook area. In the Honey Drive area, there is a lack of fire protection coverage. Therefore, there is a need to upgrade the existing two-inch water line to bring fire protection coverage to the same level as other parts of the City. Approximately 1,225 linear feet of six-inch ductile iron water line, 2 fire hydrants and all related appurtenances shall be installed along Honey Drive. All existing water service connections shall be reconnected to the proposed six-inch water line and the existing two-inch water line shall be abandoned. In the Sweeten Creek Road area, there is a lack of fire protection coverage in the northern section. Therefore, there is a need to upgrade the existing two-inch water line along Cedar Lane to bring fire protection coverage to the same level as other parts of the City. Approximately 1,035 linear feet of six-inch ductile iron water line, 1 fire hydrant and all related appurtenances shall be installed along Cedar Lane. The proposed water line shall connect to the existing six-inch water line on Sweeten Creek Road at the intersection of Cedar Lane and Sweeten Creek Road. All existing water service connections shall be reconnected to the proposed six-inch water line and the existing two-inch water line shall be abandoned. All water system improvements are planned for completion by June 30, 2006.

Sewer collection: The following five areas require no sanitary sewer system improvements: Heritage Business Park area, Honey Drive area, Enka Park area, Ashwood area and Heathbrook area. In the Sweeten Creek Road area, major sanitary sewer trunk lines and interceptors are currently in place for the majority of this area; however, upgrades will be required to the existing sanitary sewer infrastructure in order to bring this area to substantially the same level as other parts of the City. Approximately 400 linear feet of eight-inch sanitary sewer line and all related appurtenances shall be installed along Sweeten Creek Road, beginning approximately 460 feet north of the intersection of Sweeten Creek Road and Weston Road. All sanitary sewer system improvements are planned for completion by June 30, 2006.

Administrative and other municipal services: The City provides a full range of services. Basically key professional and department directors specializing in public works, police protection, fire protection, urban land use planning and zoning, building code enforcement, legal matters, parks and reaction and various other municipal activities and functions. The City is active in minimum housing code and State building code administration, zoning and subdivision ordinance administration, recreational programs and parks administration, community revitalization and affordable housing grants administration, economic development efforts and many other planning and related activities.

Financial Impact:

Revenue: Total ad valorem property tax revenue - $254,055; Total state utility tax revenue - $22,742; Total local option sales tax - $91,799; Total Powell Bill allocation - $21,276; and Total fees, permits, licenses and charges for services - $38,845. Total revenue - $424,717.

Annual recurring expenditures: Police (one additional officer) - $35,000; Fire (rural fire department contracts expected to be in place for at least 5 years. Additionally, there is a general annual expenditure not associated with a particular area of $17,000 to reflect a portion of the cost for the hiring of a Deputy Fire Marshal. This position will be hired effective January 1, 2005) - $62,446; Solid waste - $13,827; Recycling - $3,922; and Street lighting - $101. Total recurring expenditures - $115,296.

Annual capital expenditures: Water lines - $135,020; Sewer lines - $31,200; Solid waste (cost equals potential economic loss compensation for private solid waste haulers) - $60,839; Rollout containers - $16,760; Street signs - $2,100; Street repair - $39,500; Sidewalks - $232,000. Total annual capital expenditure - $517,419.

Mr. Pettibone asked City Council to adopt the resolutions approving the report of plans for the six annexation areas.

Councilwoman Bellamy asked if we were looking for any issues regarding traffic calming measures in these areas so we can include them in the revenue and capital expenditures. Planning & Development Scott Shuford said that every year City Council provides a certain funding for traffic calming. The projects are picked based upon the neighborhood desires it and then a process is followed. But, there is also a priority effort to do outreach to the different neighborhoods. What we would typically do in a neighborhood that we are annexing and we do

476

not have a known traffic calming issue, would be to evaluate the annexed areas and add them on the list of priorities. This is done just as we do with street paving and other issues so we would not be showing newly annexed areas favoritism over existing areas.

Councilwoman Bellamy suggested City Council consider addressing traffic calming now in our capital expenditures so as we take the annexed areas into the City they don't have to wait.

City Attorney Oast said that traffic calming is one of the services that these areas will become entitled to once they come into the City. It is not one of the services that we are by law required to extend into these areas. He would be hesitant to include a service that we are not required to account for in our Annexation Services Plan.

Mr. Shuford said that perhaps a different way to address Councilwoman Bellamy's issue is that if Council desires, they could direct staff to treat annexed areas with a higher priority than areas that have not been annexed.

Councilwoman Bellamy hoped that we could continue that process with the existing areas within the City and at the same time add to our capital expenditures for the newly annexed areas to address their concerns. It's not something that the City usually does, but we can create another level of service that we give to people as they come into the City.

After a brief discussion about the ratio of police officers to residents, Mr. Pettibone said that the Annexation Services Plan contains one additional police officer.

City Manager Westbrook said that each time Council annexes, we may not need to add police officers or firefighters unless we annex additional people into the City or, in the case of fire, a lot of buildings. There is a standard that needs to be met. There is also a standard that recommends that you have so much park space per population and we don't measure that way either. Another way of considering the need for additional police officers is that is that we have a fairly low crime rate and that speaks well for the citizens and the Police Department.

Councilwoman Bellamy noted that if the City Council believes more police officers are necessary that Council can include that in our general budget process rather than try to make it up through the annexation process.

Mr. Fred English, Haw Creek resident, spoke in opposition to the City annexing stating that he is paying taxes now and not receiving services.

Mr. Mike Fryar spoke against annexation and felt that the Police Department needed additional police officers.

Mr. Wayne Marshall, resident on Honey Drive, asked specific questions about their trash pickup, tax to the Haw Creek Fire Department, School District changes, a new water line and additional sales taxes.

Upon inquiry of Mr. Dick Washam, Chunns Cove area resident, City Engineer Cathy Ball explained the City's street maintenance process.

Councilman Dunn felt that the $517,419 capital expenditures for this round of annexations should be spent on something more important, like infrastructure improvements. Mr. Shuford explained that the capital improvements have to be accomplished over a two-year period. From a business standpoint, if you are able to have a front-end cost like that and then have an overall positive operating revenue stream that would come from the project, normally you would act on that in a favorable manner.

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

RESOLUTION NO. 04-28 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE HERITAGE BUSINESS PARK AREA

Councilman Newman moved for the adoption of Resolution No. 04-28. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 124

RESOLUTION NO. 04-29 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE HONEY DRIVE AREA

Councilman Newman moved for the adoption of Resolution No. 04-29. This motion was seconded by Councilman Davis and carried on a 4-3 vote with Vice-Mayor Mumpower, Councilman Dunn and Councilwoman Jones voting "no."

RESOLUTION BOOK NO. 28 – PAGE 125

RESOLUTION NO. 04-30 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE ENKA PARK AREA

Councilman Newman moved for the adoption of Resolution No. 04-30. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 126

RESOLUTION NO. 04-31 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE ASHWOOD AREA

Councilman Newman moved for the adoption of Resolution No. 04-31. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 127

RESOLUTION NO. 04-32 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE HEATHBROOK AREA

Councilman Newman moved for the adoption of Resolution No. 04-32. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 128

RESOLUTION NO. 04-33 - RESOLUTION APPROVING THE REPORT OF PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION WHICH IS GENERALLY KNOWN AS THE SWEETEN CREEK ROAD AREA

Councilman Newman moved for the adoption of Resolution No. 04-33. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

RESOLUTION BOOK NO. 28 – PAGE 129

VI. OTHER BUSINESS:

APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 13, 2004, AND THE WORKSESSION HELD ON JANUARY 20, 2004

Councilman Newman asked for clarification of the Pack Square Conservancy motion from City Council's January 13, 2004, meeting. He feels like there needs to be some clarity on whether or not the City supports the recommendations of the Pack Square Conservancy to remove from consideration the construction of a high rise building on Site A. It is his understanding that the Conservancy needs that issue to be clarified so that they can refocus on their basic mission of raising funds to develop a plan for the park.

Mayor Worley said the minutes of the January 13, 2004, regarding Pack Square Conservancy's request are accurate. He thinks the understanding differs among various members of Council as to the effect of the motion. He said the maker of the motion intended for all of the recommendations to be subject to a 60 day review period. His belief would be that if that was the intent then that would be the effect of the motion, although that might not necessarily be what was understood and intended at the time by the majority of City Council. He felt that the issue is probably moot because it is highly unlikely for any proposal to come before City Council before the Pack Square Conservancy can report back with their recommendations on March 16, 2004.

Councilman Davis felt it would be strange to take a definitive action without the recommendation being presented in a more formal manner. He thought the Conservancy was bringing their recommendations forth to air their views and then when Vice-Mayor Mumpower made the motion, he felt as though he was saying let's look at this for a sixty-day period and come back in a more final style for a permanent recommendation.

Vice-Mayor Mumpower apologized for his lack of eloquence when he made the motion, but when you look at the repercussions of taking the high rise off the table permanently, it's pretty significant and he wouldn't want to do that without a formal staff report and a lot more discussion and details.

Councilman Brownie said that as unlikely as a high rise may be, it would seem to make sense to get the community rallied around a great park design and bring some sense of closure to the community on the high rise matter.

Vice-Mayor Mumpower said that it is his understanding that the City is going to have some significant infrastructure costs associated with this and that a good bit of that money was going to be coming from the sale of this site and the on-going tax revenue from this site. If we take it off the table, we are eliminating a significant revenue source that has the potential to come back into our City tax dollars.

City Manager Westbrook said that there were some off-site issues that the City has to take care of as the project progresses and they are quite expensive. It was the understanding from the very beginning was that there would be some real estate that the City would have to sell to make the project move forward and that was a possible revenue source. If that doesn't come about, then the City will have to do their best to get grants and do other things to make that happen.

Mayor Worley said there are two issues here. One is the question of the high rise itself. It was the request of the Conservancy to take the high rise off the table, whatever precisely that means including whatever the definition of high rise is. The other was not to entertain any other developmental proposals for that site until they could review their guidelines. Their request was not to eliminate that site as a potential building site, but simply to eliminate it as a potential building site for a high rise, again, whatever that definition is.

Vice-Mayor Mumpower moved to approve the minutes of the January 13, 2004, meeting and the January 20, 2004, worksession. This motion was seconded by Councilman Newman and carried unanimously.

Councilman Newman moved that it is not the intention of this City Council to pursue the development of a high rise building on Site A and Council await the proposal from Pack Square Conservancy for the appropriate use of Site A. This motion was seconded by Councilwoman Jones.

Upon inquiry of Councilman Davis, City Attorney Oast said that it will require more than a motion to actually finalize Council's intention, if the motion passes. He was not sure whether City Council can bind their own discretion on that.

Vice-Mayor Mumpower was concerned about the process. He felt it was foolish for City Council to spend months considering the Grove Park Inn proposal which passed on a 6-1 vote, to now just decide to take the high rise building off the table without any foundation or discussion.

The motion made by Councilman Newman and seconded by Councilwoman Jones carried on a 4-3 vote, with Mayor Worley, Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

CLAIMS

The following claims were received by the City of Asheville during the period of January 1-15, 2004: Roy Rogers (Streets), Lorie Poteat (Water), Fred Higginbottom (Streets), Matthew Hartwiger (Water), Dorinda R. Watford (Transit Services), Aerial Dev. (Water), Craig Culbertson (Streets), Martha Papp (Water), and Sondra Peterson (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English commented about the Housing Authority audit, the option of the Grove Park Inn, possible economic development in the County, the Public Art sculpture and annexation in general.

Ms. Jan Howard, resident on Reservoir Road, presented City Council with information and asked that City Council close Reservoir Road due traffic concerns, alleging it is her private driveway. City Attorney Oast said that he would submit a report to City Council on this matter.

Mr. Christopher Fielden reviewed with Council the numerous violations by Wal-Mart on the Sayles Bleacneries site. He urged City Council to advise City staff to closely monitor the development and enforce the Unified Development Ordinance. City Engineer Cathy Ball said that her staff is on the site every day and she personally visits the site every week. She did feel that the developer should do more because of the size and importance to the community. Councilwoman Jones asked that Ms. Ball contact the N.C. Dept. of Environment and Natural Resources and ask that they visit the site just in case there are possible violations.

Mr. Mike Fryar asked for answers to his previous questions from prior meetings. He said that he is trying to figure out what was wrong with the annexation process of his property on Smoky Park Highway. Mayor Worley said that there is concern on Council about his situation and Council will address that concern shortly. At Councilwoman Bellamy's suggestion, Mr. Fryar said that he would be happy to meet with the City Manager. When Councilwoman Bellamy asked Mr. Fryar if he wanted City Council to take a formal vote to say that Council will re-consider his annexation, Mr. Fryar replied "no" that he just wanted City Council to decide what to do and explain why a certification was put on his annexation map after the fact. City Clerk Burleson explained that the certification on the map from the Buncombe County Register of Deeds Office is required by state statute to be included on any maps before recording in their office.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:35 p.m.

Magdalen Burleson	Charles R. Worley
CITY CLERK	MAYOR

Tuesday – February 10, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Commander of VFW Post 891 Harold Stines led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

RECOGNITIONS

Mayor Worley recognized eight students and two educators from Montenegro who are being hosted by Junior Achievement of WNC. The students are attending Asheville High School and are being hosted by ten different Asheville families. Vice-Mayor Mumpower said that he has met the students and was impressed by their achievements.

Councilwoman Bellamy introduced an intern from Mars Hill College who will be working with her this current semester.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY 2004 AS "BLACK HISTORY MONTH"

Councilwoman Bellamy read the proclamation proclaiming February, 2004, as "Black History Month" in the City of Asheville. She briefed City Council on some activities taking place during the month.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 27, 2004

B. RESOLUTION NO. 04-34 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME OF "STEGALL LANE"

Summary: The consideration of a resolution accepting the new proposed street name "Stegall Lane."

EBJ Inc., owner of lots off of Mountainbrook Road, has petitioned the City of Asheville to accept the street name " Stegall Lane." The new street will begin at Mountainbrook Road and end at cul-de-sac on Stegall Lane.

City staff recommends adoption of the resolution accepting "Stegall Lane" as a new street.

RESOLUTION BOOK NO. 28 – PAGE 130

C. RESOLUTION NO. 04-35 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME OF " TASHA LANE"

Summary: The consideration of a resolution accepting the new proposed street name "Tasha Lane."

Tamella Spivy Mundy and Curtis J. Gudger, owners of lots off of Grandview Road, have petitioned the City of Asheville to accept the street name " Tasha Lane." The new street will begin at Grandview Road and end at "T" turnaround on Tasha Lane.

City staff recommends adoption of the resolution accepting "Tasha Lane" as a new street name.

RESOLUTION BOOK NO. 28 – PAGE 131

D. RESOLUTION NO. 04-36 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME OF "SCOTTISH CIRCLE"

Summary: The consideration of a resolution accepting the new proposed street name "Scottish Circle."

Harrell and Associates Realty; owner of lots off of Summit Avenue, has petitioned the City of Asheville to accept the street name " Scottish Circle."
The new street will begin at Summit Avenue and circle back into Summit Avenue.

City staff recommends adoption of the resolution accepting "Scottish Circle" as a new street name.

RESOLUTION BOOK NO. 28 – PAGE 132

E. RESOLUTION NO. 04-37 - RESOLUTION ACCEPTING THE NEW PROPOSED STREET NAME OF "BLEACHERY BOULEVARD"

Summary: The consideration of a resolution accepting the new proposed street name "Bleachery Boulevard."

Home Development - River Bend, LLC, owner of lots in River Bend Marketplace off Swannanoa River Road, has petitioned the City of Asheville to accept the street name " Bleachery Boulevard." The new street will begin at Swannanoa River Road and end at Fairview Road.

City staff recommends adoption of the resolution accepting "Bleachery Boulevard" as a new street name

RESOLUTION BOOK NO. 28 – PAGE 133

F. ORDINANCE NO. 3089 – BUDGET AMENDMENT FOR TRANSPORTATION PLANNING FOR PACK SQUARE RENAISSANCE PROJECT

Summary: The consideration of a budget amendment, in the amount of $25,000, for a grant from North Carolina Department of Transportation (NCDOT) for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

The Pack Square Conservancy requested funds in the amount of $25,000 from the NCDOT for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

Since NCDOT can only provide these funds to municipalities, Pack Square Conservancy and NCDOT originally requested that we accept the money from the state pass it through to the Conservancy. Since that time, Pack Square Conservancy has requested that the City perform this work through a consultant. This grant requires no match from the City.

City Council approved the municipal agreement in March 2004.

City staff recommends City Council adopt the budget amendment, in the amount of $25,000, for a grant from the NCDOT for transportation planning to include evaluating pedestrian movement to allow maximum use of the park area and to provide for adequate vehicular traffic as part of the Pack Square Renaissance Project.

ORDINANCE BOOK NO. 21 – PAGE 56

G. RESOLUTION NO. 04-38 – RESOLUTION ACCEPTING OZARK SPRING LANE AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept Ozark Spring Lane in Riverwood Subdivision off Bell Road in the Haw Creek Community as a City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Ozark Spring Lane is a developer-constructed street with an average paved width of 18 feet and a 45-foot right-of-way. The street is approximately 397 feet in length and ends with a cul-de-sac. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Ozark Spring Lane will be added to the official Powell Bill list. A two-year warranty, from the date of City Council's acceptance, will be required by the developer to cover major failures in the roadway.

City staff requests City Council accept Ozark Spring Lane as a City maintained street.

RESOLUTION BOOK NO. 28 – PAGE 134

H. RESOLUTION 04-39 – RESOLUTION ACCEPTING REMAINDER OF PEACHTREE STREET AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept the remainder of Peachtree Road in Nettlewood Subdivision off Hendersonville Road as a City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

This section of Peachtree Road is a developer-constructed street with an average paved width of 25 feet. The street is approximately 0.62 miles in length. It begins at the end of the existing Peachtree Road and continues to Hendersonville Road. A private qualified consultant inspected this street. The data received by the City indicates that the street was constructed in accordance with the approved standards.

Following City Council's approval of this resolution, the remainder of Peachtree Road as described above will be added to the official Powell Bill list. A two-year warranty, from the time of Council's acceptance, will be required by the developer to cover major failures in the roadway.

City staff requests City Council accept the remainder of Peachtree Road as a City maintained street.

RESOLUTION BOOK NO. 28 – PAGE 135

I. RESOLUTION NO. 04-40 – RESOLUTION ACCEPTING A PORTION OF OLD STONE GATE PLACE, A PORTION OF SENATOR REYNOLDS ROAD AND A PORTION OF ALTAMONT ROAD AS CITY MAINTAINED STREETS

Summary: The consideration of a resolution to accept a portion of the following streets, in Reynolds Mountain Subdivision, as City maintained streets: (1) Old Stone Gate Place; (2) Senator Reynolds Road; and (3) Altamont Road.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

These sections of Old Stone Gate Place, Senator Reynolds Road and Altamont Road are developer-constructed streets. Old Stone Gate Place has an average paved width of 20 feet and a length of 0.3 miles. Senator Reynolds Road has an average paved width of 20 feet and a length of 0.7 miles. Altamont Road has an average paved width of 20 feet and a length of 0.4 miles. Engineering Department staff has inspected these streets finds them to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, the portions of Old Stone Gate Place, Senator Reynolds Road and Altamont Road will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadways.

City staff recommends City Council accept a portion of the following streets in Reynolds Mountain Subdivision as City maintained streets: (1) Old Stone Gate Place; (2) Senator Reynolds Road; and (3) Altamont Road.

RESOLUTION BOOK NO. 28 – PAGE 136

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO CLOSING A PORTION OF AN UNOPENED UNNAMED ALLEY OFF FOREST STREET

RESOLUTION NO. 04-41 - RESOLUTION TO CLOSE A PORTION OF AN UNOPENED UNNAMED ALLEY OFF FOREST STREET

Mayor Worley opened the public hearing at 5:13 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to close a portion of an unopened unnamed alley off Forest Street. This public hearing was advertised on January 16, 23, 30 and February 6, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close a portion of an unopened unnamed alley off Forest Street, the entry of which is located approximately 165 feet east of the intersection of Forest Street and Hendersonville Road (US Hwy 25).

Public Works Department staff has researched and determined that this alley is not a City maintained street and is not in use as a means of ingress or egress for any of the properties abutting the alley. There are three lots that abut this portion of the unnamed alley. They are identified by PIN Nos. 9647.20-90-3952; 9647.20-90-5910; and 9647.20-91-4067.

The developer has agreed to preserve a 17-foot easement to connect future utilities.

City staff recommends that City Council adopt the resolution to close a portion of an unopened unnamed alley off Forest Street.

Councilwoman Bellamy asked if any of the area property owners were notified. Mr. Cole said that all adjoining property owners to the alley signed the petition to close and no notices were sent to area property owners. He did note that the alley was posted on both sides with the resolution of intent along with the legal notice that was in the paper for four successive weeks.

Councilwoman Bellamy said that she recalled this coming before Council a couple of years ago because the alley was the only thing that was stopping a large development on that property. Her concern is that there is a big neighborhood plan that is being worked on and she wanted to wait to see what the neighborhood wanted before considering the closing of the alley. She felt that to close the alley would allow more commercial encroachment into the residential neighborhood.

Mr. George Morosani, developer, said that he was involved with an alley closing on Shiloh Road a couple of years ago, but it was not related to this property. He explained that he has purchased more property in that area and intends to build a multi-use building with a residential component. The property on the other side of the alley will be used for parking. He said that all of his property is zoned commercial and only one parcel that adjoins the alley is zoned office.

Upon inquiry of Councilman Newman, Mr. Cole said that the access to the back side of the alley is off Cornell Street.

Councilwoman Bellamy said that there are a lot of things happening in the Shiloh community and she wished this alley closing would be delayed until the neighborhood plan is formed. She also was concerned that Mr. Morosani might sell the property and the future owner may not wish to build a multi-use building on the property.

Mayor Worley closed the public hearing at 5:17 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 04-41. This motion was seconded by Councilman Davis and carried on a 6-1 vote with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 28 – PAGE 137

B. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO DAVE STEEL COMPANY

RESOLUTION NO. 04-42 – RESOLUTION GRANTING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO DAVE STEEL COMPANY

Mayor Worley opened the public hearing at 5:24 p.m.

Economic Development Director Mac Williams said that this is the consideration of a resolution granting an economic development incentive grant for Dave Steel Company. This public hearing was advertised on January 30 and February 6, 2004.

Dave Steel Company, a local fabricator of structural steel, is adding new production equipment valued at $600,000. This equipment diversifies the company's capabilities allowing them to expand into new markets. This, in turn, will help stabilize employment for the current workforce and lead to the creation of 25 new jobs in 2004. The project qualifies for a Level 1 grant under the City Economic Development Incentive Policy.

The terms of the proposed agreement are summarized as follows: Dave Steel is an Asheville-based fabricator of structural steel that proposes to expand operations at its Meadow Road facility. The expansion is in the form of a capital investment of $600,000 in new production equipment which, in turn, would lead to the creation of approximately 25 new jobs paying at or above the median wage for Buncombe County. Said investment and new jobs are anticipated to be in place during the calendar year 2004.

The City proposes to award to Dave Steel, an incentive grant of $3,577, payable in January 2005, subject to the terms and conditions of a city-required Performance Agreement to be signed between the City and Dave Steel.

City staff recommends Council approve the resolution granting an economic development incentive grant for Dave Steel Company.

Mr. William Lewin, Vice-President of Finance with Dave Steel Company, asked City Council for their support of this incentive grant.

Mr. Fred English, Haw Creek resident, spoke in support of the grant.

Mayor Worley closed the public hearing at 5:29 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-42. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 140

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 04-43 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE DOWNTOWN COMMISSION

Vice-Mayor Mumpower said that the terms of Karen Tessier, Carol King, Andy Archie and Peter Alberice, as members on the Asheville Downtown Commission, expired on December 31, 2003

On January 20, 2003, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Mr. Archie and Mr. Alberice to each serve a three year term respectively, terms to expire December 31, 2006, or until their successors have been appointed.

In addition, on January 20, 2004, it was the consensus of City Council to instruct the City Clerk to arrange interviews for John Rogers, Barry Olen, Michael McDonough and Jesse Plaster. Other candidates that will be considered but not called in for an interview include: Gerald Green, Barbara Field and Jane Mathews.

After Council spoke about the excellent candidates, John Rogers received 4 votes, Barry Olen received 2 votes, Michael McDonough received no votes, Jesse Plaster received 3 votes, Gerald Green received no votes, Barbara Field received 2 votes and Jane Mathews received 3 votes. Since there was a tie between Jesse Plaster and Jane Mathews (with both receiving 3 votes), another vote was taken. Jesse Plaster received 4 votes and Jane Mathews received 3 votes. Therefore, John Rogers and Jesse Plaster were appointed to the Asheville Downtown Commission to each serve a three year term respectively, terms to expire December 31, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 141

B. RESOLUTION NO. 04-44 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE GREENWAY COMMISSION

Vice-Mayor Mumpower said that the terms of Jack Saye and Phyllis Stiles, as members on the Greenway Commission, expired on December 31, 2003. Also, Pauline Kaltsunis has resigned from the Commission, thus leaving an unexpired term until December 31, 2004.

On January 20, 2004, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Jack Saye and Phyllis Stiles to each serve a three year term respectively, terms to expire December 31, 2006, or until their successors have been appointed.

In addition, on January 20, 2004, it was the consensus of City Council to instruct the City Clerk to arrange interviews for Scott Jackson and Jill Jones. Ms. Jones asked not to be considered for any board appointments at this time.

It was the consensus of City Council to appoint Scott Jackson to the Greenway Commission to serve the unexpired term of Ms. Kaltsunis, term to expire December 31, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 142

C. RESOLUTION NO. 04-45 - RESOLUTION APPOINTING MEMBERS TO THE PUBLIC ART BOARD

Vice-Mayor Mumpower said that the terms of Carol Pennell, Barbara Cary, Tina McGuire and Ellen Rickman, as members on the Public Art Board, expired on December 31, 2003.

On January 20, 2004, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Barbara Cary and Tina McGuire to each serve a four year term respectively, terms to expire December 31, 2007, or until their successors have been appointed.

In addition, on January 20, 2004, it was the consensus of City Council to instruct the City Clerk to arrange interviews for Jonathan Flaum and Kathleen Peters.

It was the consensus of City Council to appoint Jonathan Flaum and Kathleen Peters as members to the Public Art board to each serve a three year term respectively, terms to expire December 31, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 143

D. RESOLUTION NO. 04-46 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE TRANSIT COMMISSION

Vice-Mayor Mumpower said that the terms of Claudia Nix, Ron Lambe, Althea Goode and Jennifer Knudtson, as members on the Transit Commission, have expired on December 31, 2003. In addition, James Garner has resigned as a member of the Transit Commission thus leaving a vacancy until December 31, 2004.

In addition, on January 20, 2004, it was the consensus of City Council to instruct the City Clerk to arrange interviews for Bryan Freeborn, Linda Alfredson, Andrew Goldberg, Bill Michie and Karen Austin. Another candidate that will be considered but not called in for an interview is Ryan Pickens.

Bryan Freeborn received 6 votes, Linda Alfredson received 3 votes, Andrew Goldberg received 6 votes, Bill Michie received 5 votes, Karen Austin received 7 votes and Ryan Pickens received 6 votes. Therefore, Bryan Freeborn, Andrew Goldberg, Karen Austin and Ryan Pickens were appointed to each serve a three year term respectively, terms to expire December 31, 2006, or until their successors have been appointed. In addition Bill Michie was appointed to serve the unexpired term of Mr. Garner, term to expire December 31, 2004, or until his successor has been appointed.

A brief discussion was held about whether each Council member had to vote. City Attorney Oast read from City Council Rule No. 30, Appointments, as follows: "During each balloting, a member may case all of his or her votes or fewer than all of them, but he or she shall not cast more than one vote for a single candidate."

RESOLUTION BOOK NO. 28 – PAGE 144

VI. OTHER BUSINESS:

Boy and Girl Scouts

Councilman Mumpower said that we have lost over 500 scouts this past year because no parents will commit to serve in leadership roles. He asked for people to come forward and meet some of the needs of our Boy and Girl Scout programs.

Claims

The following claims were received by the City of Asheville during the period of January 1-15, 2004: BellSouth (Water), Clay Management (Streets), BellSouth (Water), Marie Jordan (Streets) and Gary Branson (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English, Haw Creek resident, relayed to Council an incident where 300 cable electrical pieces were scattered in the street and after several calls to the City no one came to clean up the streets.

Mr. Joseph Smith relayed to Council a situation in which he allegedly exposed illegal activities at the local ABC Board and basically lost his job. Mayor Worley said that City Council would look into the situation. Vice-Mayor Mumpower suggested Mr. Smith meet with a couple of Council members to discuss his situation.

Closed Session

At 5:50 p.m., Councilman Dunn moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a)(3). This motion was seconded by Councilwoman Bellamy and carried unanimously.

At 8:05 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:05 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – February 17, 2004 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Brownie W. Newman

CONSENT:

Multi-Family Housing Revenue Bonds for Battery Park Apartments by Housing Authority

Summary: The consideration of a resolution approving the issuance of revenue bonds by the Housing Authority for the Battery Park Apartments project.

The Housing Authority of the City of Asheville proposes to issue revenue bonds in the amount up to $7,000,000 and to lend the proceeds of the bonds to Battery Park Senior Housing Limited Partnership to acquire and renovate an apartment development known as Battery Park Apartments to be operated for rental to elderly persons.

The Housing Authority held a public hearing on February 10, 2004, on the question of the issuance of the bonds. The bonds must now be considered and approved by the Asheville City Council.

The bonds being issued are "private activity bonds" under IRS regulations. Essentially, this is a form of financing that allows private entities (both for profit and not-for-profit) to engage in public purpose projects, with some of the advantages of tax exempt financing. There are many requirements and limitations in the use of the money derived from bond proceeds. One of the requirements is that the governmental unit having jurisdiction over the area in which the activity occurs must approve the issuance of the bonds, and this approval may only come after a public hearing. According to the Housing Authority's attorney, this public hearing requirement will be satisfied by the public hearing to be held by the Housing Authority prior to the City taking action, and a separate hearing by the City is not necessary. Our bond counsel has confirmed this, and this is the position of the Local Government Commission.

If City Council wishes to approve issuance of the revenue bonds for the Battery Park Apartments project, as required by Sec. 147(f) of the Internal Revenue Code, adoption of the resolution is recommended.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that he would provide additional information on what other agencies City Council must approve the issuance of bonds.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR PASSENGER RAIL FACILITY AND ASSOCIATED BUDGET AMENDMENT

Economic Development Director Mac Williams said that consideration of a resolution authorizing the City Manager to enter into a municipal agreement with the N. C. Dept. of Transportation (NC DOT) for 10% of funding for acquisition of the site for the proposed passenger rail station; and an associated budget amendment, in the amount of $9,600, for funding the transit plan for the future multi-modal transit center.

As preparation for eventual passenger rail service to Asheville, the NC DOT Rail Division is in the process of securing the site for the proposed Asheville station in Biltmore Village. Property appraisals and estimates of related costs have been completed and a project budget for this site acquisition phase has been developed. Before the State can go forward with the actual purchase, by requirement, the NC DOT and the City of Asheville must first enter into a municipal agreement outlining the roles, responsibilities, and costs each agency will incur for this phase of the project. The municipal agreement requires the City provide 10% of the project cost. The project cost for this phase is estimated at $1,418,830. Thus, the required City match would be (not to exceed) $141,883. While City funds are not needed immediately, the City commitment for the funding, via the municipal agreement, is requested immediately for the project to move forward. Actual funding would be contingent upon a future appropriation from City Council.

In addition, it is envisioned that an inter-modal City transit hub could be co-located with the passenger rail station. In order to access federal funding for that portion of the facility, it will be necessary to conduct a Transit Study for the Biltmore location. The study is intended to assess the suitability of the proposed location for the transit system. It will quantify transit needs. In addition, the study will explore facility size, number of bays, etc. and explore how transit would tie in with rail as well as assess the suitability of the location for transit, in light of the needs and plans in the southern part of the city. The estimated cost for the Transit Study is $12,000 of which the City's share would be $9,600. The NC DOT Rail and Transit Divisions feel the study is a priority and needs immediate funding. The NC DOT share of the funds for the study is currently available.

The upside(s) to the implementation of the recommendation include:

- Purchase of an economic development site for 10% of cost
- Demolition of existing site in preparation for construction at 10% of cost
- Potential to develop rail station at fraction of cost
- Potential to place something else prepped on site if rail does not materialize
- Information concerning cost and feasibility of locating a transit sub-station at Rail Station

The downside(s) to the implementation of the recommendations include:

- Expenditure of city funds needed to create asset
- Possibility that this location is not optimal for transit sub-station

City staff recommends approval of the (1) resolution authorizing the City Manager to enter into the municipal agreement; and (2) budget amendment appropriating $9,600 out of Contingency as the City's share of the Transit Study.

There was considerable discussion by Council regarding these matters. From that discussion, Mr. David Bender, Project Manager for the N.C. Rail Division, Mr. Williams and City Transit Director Bruce Black responded to various questions/comments from Council, some being, but are not limited to: what is the chance the State will do the project; what if Asheville wanted to wait and not spend any money until there is something firm from Raleigh whether the project will move forward; request for statistically information on how Asheville has the density to support this program; is the study performed by NC DOT in 2001 accurate; has the 2001 report been updated for inflation and the cost of fuel; what are the 4 different alternatives and the times associated with each trip; what is the percentage breakdown on funding; where is the specific funding allocation from the Federal government coming from for rail service to WNC; what is the ridership of the Carolinian per day; what is the average subsidy for heavy rail across the country; what is the national average on cents per passenger mile; will the funding for this project take away money from other transit options; are there any successful models; are the successful models in high density areas; how fast do the trains travel; is the travel times factored into the times associated with each trip; why doesn't AMTRAK bring passengers into Asheville; what is the cost associated with the service between the Piedmont and Charlotte; what is the fare from Raleigh to Charlotte; what is the subsidy given to the Carolinian and the Piedmont; what is the anticipated passengers per day for WNC; what is the mileage between Asheville and Salisbury; what is the philosophy on why the NC DOT felt rail service was something to expand into; does Salisbury have a multi-modal transit center; what is the economic benefit having a multi-modal transit center; what is the impact on local investment with a multi-modal transit center; what is an estimated annual return on a multi-modal transit center; in Salisbury is their station multi-modal or just rail; need for explaining the whole financial picture regarding the subsidy; is the City going to have to subsidize rolling stock; does Asheville have a stake in subsidizing the train; will the multi-modal transit center enhance or save the City's Transit Department money; will there be operational data that comes out of the transit study; how long will the transit study take; request for a copy of the WNC study; request for copy of map showing density is 4,000 per square mile in the core area of the City; what will happen if the City wants to wait on the municipal agreement; how does the State back away from the project if the research doesn't support rail service; how can the City meet with NC DOT representatives to get specific questions answered; why does the City have to commit now when there is no reassurance that this will proceed; what is the position of the Chamber of Commerce in this; how much time does Council have before a final decision needs to be made on the municipal agreement; has local commitment been obtained up and down the rail line; and what is the time periods on the options to purchase the properties. When responses were unknown, City staff, along with Mr. Bender, said that they would provide additional information to Council.

City Manager Westbrook felt it might be appropriate for City Council to split the municipal agreement regarding 10% funding for the acquisition of the site for the proposed passenger rail station from the budget amendment for the City's share in the transit plan for the future multi-modal transit center.

Mr. Williams said that in anticipation that this project will have a regional impact, he is soliciting financial partnerships with AdvantageWest and the Buncombe County Tourism Development Authority to help with the City's match of $141,883.

It was the consensus of City Council to place the budget amendment, in the amount of $9,600, for the transit plan for the future multi-modal transit center on the next formal City Council agenda. Consideration of the resolution authorizing the City Manager to enter into a municipal agreement with the NC DOT for 10% of funding for acquisition of the site for the proposed passenger rail station will be postponed until March 16, 2004. City Manager Westbrook said that should give Council adequate time to visit NC DOT representatives to discuss the matter further.

LEAGUE OF WOMEN VOTER STUDY ON APPOINTED BOARDS AND COMMISSIONS

Ms. Kathleen Balogh, President of the League of Women Voter's of Asheville and Buncombe County (League), updated City Council on the League's study on appointed boards and commissions. The study is an outcome of recommendations by two committees of the League to the general membership at the 2003 annual meeting. Members shared a perception of the existence of barriers that prevented the appointment of a diverse membership to these boards and commissions – one that reflected make-up of the community in regards to race, gender and socio-economics. A Study Committee, comprised of League members, was convened to examine the application and appointment process used by City Council and the Buncombe County Commissioners in order to understand what works best for applicants, appointed members and the two government bodies they serve in order to support the most effective system of appointed boards and commissions for our community. Councilwoman Terry Bellamy has been City Council's representative on the Study Committee to insure communication between the Study Committee and Council. A representative from the County was invited as well to serve in that capacity.

Ms. Marsha Bate said that the Study Committee identified three distinct steps in the application and appointment process to explore: (1) The application process – what happens between the advent of an opening on a board or commission and the development of an initial list of applicants; (2) the selection process – the screening/review process that ends with a formal list of applicants to be submitted to the appointing body; and (3) the appointment process itself that is conducted by the appointing body.

Outcomes of the study include (1) a written report to include (but not be limited to) the following: (a) a description of how the study was conducted and who was involved; (b) a flow chart to help understand the application and appointment steps in the process; and (c) recommendations to the League Board and partner organizations (including but not limited to City Council and County Commissioners) for strategies to make the process more user-friendly and accessible to community members and support the appointment of a more diverse group of community volunteers; and (2) a community meeting to share the report and to gather feedback and determine if the study process was complete.

Vice-Mayor Mumpower, Chair of the Boards and Commissions Committee, said that he would be happy to be work with the Study Committee in any way they see fit.

Councilwoman Bellamy and Councilwoman Jones thanked the League for their work on this issue. They both felt it would be beneficial to Council as we move forward.

On behalf of City Council, Mayor Worley thanked the League for their efforts on this topic and will welcome them back for their recommendations.

PARKS & RECREATION CO-SPONSORSHIP

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution approving co-sponsored events for 2004.

This year, the Parks and Recreation Department has developed a matrix to assist in determining the minimum requirements for an event to be considered for co-sponsorship. This matrix includes specific points given for such areas as economic development, out-of-town spending, whether the event is designed for raising funds for local charities, or whether the event increases cultural understanding for the community. A total of 41 events were approved last year, which represented an estimated cost to the City of $90,000. This year, the number has been reduced to 30 events, resulting in a cost of approximately $75,000, which represents a reduction of $15,000 from the previous year. The following is a list of the events recommended for approval: Goombay; Greek Fest; Hard Lox Café; Taste of Asheville; Downtown After 5; The Human Race; Fiesta Latina; Light the Night Walk; Citizen Times 1/2 marathon; Walk America 2004; Shindig on the Green; Smokey Mountain Toy Run; Asheville Art Museum Boating Party; Day of Caring; The Sunset Stampede; Very Special Arts Festival; Biltmore Estate 15K; Children First Festival; Heroes for Hope; RiverLink Adventure Weekend; Anti-Cruelty Walk; Organic Fest; Sistahs on Stage; Holiday Parade; Cinema in the Park; Concerts on the Quad; Grove Arcade; October Harvest Festival; Light up the Holidays; Midday Musicals; and Grove Arcade Chili Festival.

Upside of Recommendation:

- Generates in excess of $15 million dollars for the local economy
- New matrix has reduced City's financial contribution
- Increases recognition of cultural diversity of the community
- Allows for fundraising opportunities for various charities
- Expands special events and festivals for the community

Downside of Recommendation:

- City costs for providing services estimated at $75,000
- A few groups that applied will not be co-sponsored which may jeopardize the event
- Events do place a wear and tear on infrastructure and equipment provided to the organizers.

The Parks and Recreation Department recommends that City Council accept the list of co-sponsored events for 2004.

Mr. Brinson did note that a late application was received by Mountain Renaissance Fair. After a brief discussion by Council, it was their consensus to add that Fair to the list of co-sponsorship events for 2004.

Upon inquiry from Councilman Dunn, Mr. Brinson said that dollar figures are based on attendance from out of town visits using the Chamber of Commerce's multiplier.

Upon inquiry from Councilman Dunn, Mr. Brinson said that Bele Chere is not included in this list because it is a City-sponsored event.

Mr. Brinson responded to Councilwoman Bellamy regarding other events his department helps with, e.g., neighborhood block parties.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

At 5:10 p.m., Mayor Worley announced a short break.

UPDATE ON PEDESTRIAN/STREET DESIGN IMPROVEMENTS

Mr. Anthony Butzek, the City's Traffic Engineer, said that this is an update on the basic guidelines and principles used to make design changes to City streets.

The design of our streets becomes more critical and more complex with increasing levels of urbanization. While rural streets typically serve people in vehicles almost exclusively, city streets must serve a much more diverse cross-section of people, including those in vehicles, on bicycles, walking, in wheelchairs, with other disabilities, and sometimes even as venues for festivals and gatherings. Because of the distinct difference in the use of rural and urban streets, it is important to understand the differences associated with their design.

Rural streets are designed for comparatively high-speed travel. Wide travel lanes and shoulders, spacious intersections, and unobstructed visibility corridors are desirable. In urbanized areas, such design features lead to higher speeds, higher crash rates, and are rarely desirable.

Before World War II, streets were designed to accommodate people. In the 1950's and 1960's, transportation policy changed to accommodate the motor vehicle boom, with the principles of street design generally tending toward bigger, wider, faster, and mostly ignoring the needs of all but those in motor vehicles. Although vehicular injuries and fatalities initially declined due to the vast safety improvements rural Interstates afforded, they then increased dramatically as a result of the application of rural design principles to urban America. Urban planners and traffic engineers have, in general, come to realize that "context-sensitive design," the design of transportation facilities to match their context, is necessary.

Pedestrian concerns are of particular importance in cities. With about 42,000 people killed on our streets and highways every year in the U.S., over 5,000 pedestrians are among them. While vehicular fatalities tend toward rural streets due to their high-speed nature, 70% of pedestrians killed are in cities. The following are some additional figures:

- More than 40,000 people are killed every year on our nation's roadways, the leading cause of death among people from age one to 34.
- This number was 42,815 in 2002, or 117 per day, or more than 3,500 per month.
- Walking as a means of getting from here to there is 36 times more dangerous than driving.
- About 5,000 people are killed as pedestrians per year, and about 100,000 are seriously injured.
- Although pedestrian/bicycle trips account for only about 5-6 percent of trips, they account for 12-13 percent of fatalities.
- Less than one percent of federal transportation funds are used for either facilities or safety for these two travel modes.
- 70 percent of pedestrian deaths occurred in urban areas, with more than half of these occurring while trying to cross a street.
- In North Carolina, 10-11% of traffic fatalities are pedestrians, while 0.7% of federal funds are spent on pedestrian safety.
- Asheville has similar pedestrian fatality characteristics: 2001 – 2003: 6 fatal, 12 disabling, about 100 other injury pedestrian crashes.

Why is this important? Everyone is a pedestrian some of the time. Many others would walk more if better facilities existed. A 1996 report by the Federal Transit Administration found that nearly 1/3 of the American population is transportation disadvantaged. This includes the 56 million children are under the driving age, 32 million senior citizens are seeing their driving ability diminish, and 24 million people with disabilities depend on transit, paratransit, or expensive private transportation services. More than one-quarter of all trips are still one mile or less; At least 123 million car trips made each day in the United States were short enough to have been made on foot.

Designing safe crossings is the most challenging aspect of developing a safe pedestrian environment. The main risk factors are:

1. Exposure – duration during which the pedestrian is exposed to traffic
2. Vehicle Speed – affects reaction distance, stopping distance, and severity of injury
3. Visibility of Pedestrian – drivers must be able to see pedestrian to avoid them

The City of Asheville strives to provide a transportation system that supports the continued safety, quality of life, and economic needs of the residents of and visitors to the City. In the City, this means designing streets that everyone can use safely. All users are considered: cars, buses, trucks, pedestrians, bicyclists, wheelchairs, etc. Where pedestrian use is high, priority is placed on minimizing pedestrian crossing distance while still accommodating large vehicles. Large vehicles are expected to use the full width of the street for turning, which is standard and accepted practice. Design right-turning speed is typically 6-10 mph. Excessive widths are avoided, as street width has been determined through research to correlate to high crash rates.

Design principles utilized in Asheville are based on successful projects and practice in other cities across the U.S. Projects involving narrower lanes, tighter corners, traffic calming, pedestrian features and amenities, bicycle lanes, and streetscapes have served many cities well to improve safety for pedestrians and motor vehicle occupants alike while serving as impetus for major economic redevelopment projects. He reviewed several such projects.

No action is necessary by City Council.

Discussion by Council resulted in Mr. Butzek responding to various questions, some being, but are not limited to: when did design practices change, and where were the fatalities in Asheville.

City Engineer Cathy Ball said that if there is an opportunity to make something safe at a reasonable cost, e.g., MSD or another utility doing work in the street, the City will want to do it.

Vice-Mayor Mumpower felt that the City is trying to find a reasonable point of balance with our citizens and our street design.

Upon inquiry of Councilwoman Bellamy, City Manager Westbrook said that he would give Council a written report on traffic calming, improvements and sidewalks at Amboy Road.

UPDATE ON THE GREENWAY CONNECTOR FROM AMBOY ROAD TO HOMINY CREEK

Elizabeth Teague, Transportation Planner, French Broad River MPO, said that this is an update on the scope and status of the Amboy Road to Hominy Creek Greenway; a request to move forward with a survey of the project area, the development of preliminary plans for the project and right-of-way acquisition; and preparation of a Municipal Agreement with the N.C. Dept. of Transportation (NC DOT).

The City of Asheville has an allocation of $300,000 in construction funds from the NC DOT to construct a greenway along the French Broad River from Amboy Road to Hominy Creek Park, overlapping Municipal Sewer District and Progress Energy easements. This portion of the City Greenway Master Plan will link the French Broad River Greenway and Park system to Hominy Creek Road and West Asheville. While no local match for these funds is required up front, the City is responsible for land/right-of-way acquisition, trail design and engineering, and any construction costs over the $300,000.

This project was originally scheduled on the State Transportation Improvement Program (TIP) to be built in coordination with the 240 widening (I-2513) in Federal Fiscal Year 2006. With the projected time frame of that project extending beyond 2006, the State Bicycle Division would like to move the project forward and has amended the TIP to make funds available this fiscal year.

To receive these funds, the City must develop and execute a Municipal Agreement with NCDOT. The Municipal Agreement lays out the scope of the project that the City will undertake, and the amount – up to $300,000 – that NCDOT will reimburse. To define the project scope and alignment, the City must survey the area and the survey will indicate right-of-way or land acquisition needs.

City staff held a preliminary meeting at Southern Waterways with surrounding landowners on September 4, 2003, which indicated general support for the project. Preliminary discussions with representatives of Progress Energy and the Metropolitan Sewer District (MSD) have also been positive.

The positives of this project are that:

- The execution of a Municipal Agreement releases $300,000 in reimbursement dollars to the City for implementation of the Greenway Plan;
- This portion of Greenway will connect West Asheville neighborhoods to the larger Greenway System along the French Broad River;
- This project will clean up and maintain an area along the river which has long attracted pedestrians and fisherman, making it safer and easier to patrol; and
- This project will establish a greenway that will be integrated into the I-240 widening project.

The potential negatives of this project are that:

- The execution of the Municipal Agreement will bind the City to complete construction within a three-year period and to cover any construction costs over the $300,000; and
- The City will need to work with multiple land-owners to obtain the required right-of-way. This will require expenses for Phase I studies, appraisals, legal fees, and possibly out-right purchase of property in cases where the land-owners will not dedicate or donate the needed area.

City staff recommends that City Council authorize the City Manager to direct staff to move forward with a survey and a preliminary plan for the greenway and right-of-way acquisition. City staff will return to Council once the survey and preliminary plans are complete and ask for approval of the Municipal Agreement.

Throughout the discussion, Ms. Teague responded to various questions/comments from Council, some being, but are not limited to: how wide is the MSD sewer easement, is there an opportunity to work with MSD on any line improvements in this area; and what will greenway security include.

Upon inquiry of Councilwoman Jones, City Manager Westbrook said that the City will not be over budget on this project.

It was the consensus of Council that the City Manager direct staff to move forward with a survey and a preliminary plan for the greenway and right-of-way acquisition.

NEW ECONOMIC DEVELOPMENT MARKETING TOOL

Economic Development Director Mac Williams said that consideration of a budget amendment, in the amount of $20,000, for computer coding for the development of a web site to be used as a marketing tool for City development and redevelopment.

At last year's City Council retreat, staff presented an economic development program concept for the City of Asheville. This concept concentrates on building the tax base through the promotion of higher density, higher intensity development consistent with recommendations from the Sustainable Economic Development Task Force and City development policies. Since that time, City Council has adopted a comprehensive plan and a new Neighborhood Corridor zoning district for Broadway. City Council has also previously approved an Urban Village zoning district and, during the coming year, will receive redevelopment plans for the urban riverfront and the WECAN neighborhood. Downtown Asheville is seeing new growth, but has many areas still available for redevelopment. Additionally, we may see changes to a number of big box development sites, as a result of economic conditions, making these sites also suitable for redevelopment at a significantly higher intensity.

As one means of implementing this tax base enhancement plan, staff is now proposing a marketing program intended to provide the development community with a tool for evaluating the development feasibility of targeted redevelopment areas. This is not a new approach – it uses tools that other communities have developed to promote development and redevelopment of city-owned properties and brownfield sites. It is markedly different, however, in the scope and scale of its focus in that our proposed web site will promote broad but targeted areas of our city versus specific parcels; and, the marketing focus is on the real estate developer rather than the end user.

The marketing program (which we are suggesting be called "Priority Places") will use GIS technology to facilitate developer inquiry into suitable areas for high-density, high intensity type development. On the City web site, we will identify areas that have been designated appropriate for development of this type in the City comprehensive plan or in other official plans and documents. Developers will be able to access property appraiser records, census and other demographic information, existing and projected zoning, any available development incentives (such as the affordable housing trust fund, administrative rezoning, or permitting incentives), City staff contact points, surrounding complementary and competing uses, known environmental conditions, and other information necessary for the performance of their preliminary due diligence. Additionally, outreach marketing is planned to further facilitate developer interest in the PRIORITY PLACES web site, including mailings, articles and advertisements in trade journals, visits to developers' offices, and other measures.

Internal staff has been able to establish the framework for this GIS tool and we will provide Council with a simulation during our worksession presentation. However, there is considerable coding work that is needed to complete the tool and we will require a supplemental budget allocation of $20,000 from the City's contingency fund to pay for this technical assistance.

Some points to consider as upside include:

- The Priority Places marketing program supports a wide variety of City goals and policies, including implementation of existing and proposed redevelopment plans, sustainable economic development policies and strategies, land use goals, and affordable housing policies.
- Other local/regional economic development agencies' marketing efforts are on attracting the end user business that will bring jobs. Further, while those efforts cover the City, they are not focused, as this program would be, solely on the City. The Priority Places marketing program is focused on attracting developers creating tax base in specific areas within the City.
- This effort is targeted to developers, both internal and external to the community, interested in this particular kind of development/redevelopment. This is expected to reinforce Council priorities that reflect Asheville as a "business-friendly" community interested in quality development and redevelopment.
- The City is already heavily invested in providing and applying GIS technology. This is an added dimension of its capabilities.

Some points to consider as downside include:

- No funding in the current budget.
- For marketing to be effective, it has to be consistent over time. There will need to be some level of funding beyond this start up to support ongoing marketing of the web site, including GIS support and more traditional marketing efforts.

City staff recommends City Council approve the budget amendment, in the amount of $20,000, for computer coding to enable the Priority Places marketing program to be established as a marketing tool for City development and redevelopment.

Mr. Tim Minter, GIS Coordinator, showed Council a simulation of how the marketing tool would work.

Out of Council's discussion arose several questions/comments, which were responded to by Mr. Williams. Some include, but are not limited to: how does this coincide with zoning; will different areas be added to the data base; can the City try to reduce procedural requirements when someone uses this tool; who will maintain this tool; are there other incentives that will be added to this tool; how will this tool be marketed; does the City anticipate local or outside utilization; has the City shared this concept with other people who will use it; can we ask the Chamber of Commerce to add a link to their website to this tool; will we be able to monitor the number of hits on the site and evaluate the tool in a year; and are there companies that do this type of work for-profit.

Vice-Mayor Mumpower felt the City should run the concept by people who will actually be using it. Planning & Development Director Scott Shuford said that if Council endorses this tool, they intend to have a focus group made up of developers and realtors. He felt this is a wonderful opportunity for people to prepare their marketing plans.

Upon inquiry of Councilwoman Jones, Mr. Williams said that the cost of marketing is estimated at approximately $10-15,000 a year, which will include mail outs to targeted groups, write-ups in publications, and some travel to follow-up on leads.

Upon inquiry of Councilman Davis regarding the importance of keeping this tool updated, City Manager Westbrook said that we have other GIS needs in the City and we may need to get approval for one additional staff person.

Councilwoman Jones noted that if Council approves this, the Contingency fund will only have $26,000 left for the remainder of this fiscal year.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY ON JOINT PLANNING AREA

City Attorney Bob Oast said that this is consideration of a resolution authorizing the City to enter into an interlocal agreement with Buncombe County for the establishment and administration of a joint planning area.

In late 2002, as an outgrowth of the City's most recent ETJ expansion, the City and County undertook to explore the possibility of establishing an area on the periphery of the City within which the City and County would have joint responsibility for administration of land use and development regulations. What emerged was the Joint Planning Area (herein "JPA") concept.

Drawing on various statutory authorities, along with a local law authorizing City-County cooperation, it appears that this type of joint regulatory authority can be provided for in an interlocal agreement under Article 20 of N.C.G.S. Chapter 160A.

The proposed interlocal agreement contains provisions regarding the establishment of the JPA, the classification of land within the JPA, and the adoption of regulations applicable within the JPA. The agreement relies on the laws that provide the extra-territorial jurisdiction for cities, and zoning ordinances for counties, and prescribes how the body of JPA regulations may be amended. The agreement also assigns primary responsibility for administration and enforcement of the JPA regulations. Also included are some provisions that are routine inclusions in agreements of this nature, and are required by law. Some blanks regarding dates remain to be filled in, and may be changed depending on what Buncombe County does.

As noted during an earlier presentation, this interlocal agreement does not by itself implement the JPA or its regulations; it only puts in place the legal framework by which the JPA can happen. No regulations will be effective within the JPA except following an extensive public notice process and several public hearings.

The considerations important to both the County and the City have been discussed at length during many other meetings, are well known, and are too numerous to summarize here.

This is Council's first review of the text of the interlocal agreement; the County Commissioners have not considered it yet. Revisions may be made, and are appropriate at this time, and there may be some negotiation with the County. Once the agreement is in a form that is satisfactory to Council, adoption of it is recommended.

City Attorney Oast said that after he meets with the County attorney to identify and negotiate some points, he will ask that this item be placed on the next available formal City Council agenda.

FIBER OPTIC FRANCHISE

City Attorney Bob Oast said that this is consideration of an ordinance granting a franchise to DukeNet Communications, LLC, pursuant to the City's Telecommunications Ordinance.

Back in September the City considered and adopted Ordinance No. 2056 to provide for the granting of non-exclusive franchises to install telecommunications facilities in the City's right-of-way. Prior to that time, we had some discussions with DukeNet Communications, a Charlotte-based telecommunications service provider affiliated with Duke Energy. DukeNet and the City have since resumed these discussions, with the result that DukeNet now wishes to begin operation in Asheville.

Most of the substantive terms applicable to this franchise (or any telecommunications franchise) are already set forth in the Telecommunications Ordinance, and DukeNet, by accepting the franchise, agrees to abide by the provisions of the ordinance. The main issues to be determined in connection with this particular franchise are the fee that the City will receive and the length of the franchise term.

As to the franchise fee, a team consisting of representatives from Public Works, Engineering, Planning, Legal, Economic Development, and Information Services reviewed such issues as our administrative costs, wear and tear on our right-of-way facilities, other fees charged for right-of-way use in Asheville, and fees for similar right-of-way use charged by other cities. We determined that a two-tiered fee structure based on density would reflect the value of the right-of-way in high density areas while encouraging the extension of service into under-served and less dense areas. Within the downtown area (defined as Charlotte/South Charlotte Streets on the east; Beaumont/Hilliard Streets on the south; Clingman/Haywood Streets on the west; and I-240 on the north), the rate is proposed to be $.10 per foot per month for each linear foot of right-of-way used for the installation. Outside of this core area, the rate drops to $.02 per foot per month.

As to the length of the term, DukeNet has asked for a 10-year term, renewable for two 10-year terms, unless either party terminates. While we have no problem with the length of the term, we think that the rate should be subject to increase based on the CPI after the first five years.

Although DukeNet apparently has some potential customers, they have not revealed the location of their proposed initial installation. Any installation, however, would have to be approved by the City Engineer, at least as to the route and manner of installation, and would become part of the franchise.

Considerations:

(1) This is the City's first telecommunications franchise, and we really have no local experience with such efforts, other than cable television, which is not directly relevant.

(2) The City has the obligation to protect and preserve its right-of-way for public use, and the right to expect fair compensation for its use by profit-making enterprises. The compensation that we receive should be fair and equitable, and we may not prefer one provider over another, so the compensation paid by DukeNet will be a benchmark for future installations.

(3) There is a significant public interest in enabling telecommunications providers to provide their service, and especially to enable, or at least not obstruct, provision of such service to less densely populated and underserved areas.

If Council wishes to grant a franchise to DukeNet, adoption of the ordinance is recommended. Council may suggest alternatives to the proposed fee schedule and the term, but most other substantive issues are already dealt with in the Telecommunications Ordinance adopted in September. Because this is a franchise ordinance, a second reading of it will be required.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

BOARDS AND COMMISSIONS

It was the consensus of City Council to have the City Clerk arrange interviews of John Kiser, Jane Mathews, Lee McElrath, David Brown and Michael Anders for vacancies for alternate positions on the Board of Adjustment.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint John Burchfield to the Citizens/Police Advisory Committee.

It was the consensus of City Council to have the City Clerk arrange interviews of Jim Lawrence, Lillian Alexander, David Schulman, Matthew Marquis and Jon Meneck for vacancies on the Film Commission.

It was the consensus of City Council to have the City Clerk prepare the proper paperwork to appoint Sharon Bell to the Planning & Zoning Commission.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:12 p.m.

Tuesday – February 24, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Vice-Mayor Carl Mumpower, retired Air Force Veteran, led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Dunn gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY 24, 2004, AS "211th MILITARY POLICE COMPANY DAY"

Mayor Worley read the proclamation proclaiming February 24, 2004, as "211th Military Police Company Day" in the City of Asheville. He presented the proclamation to Mr. Brian Freelan, employee with the Police Department, who has just returned home from Iraq. Mayor Worley also recognized the other City employees who are actively serving in the military.

B. PROCLAMATION PROCLAIMING MARCH 7-13, 2004, AS "GIRL SCOUT WEEK"

Mayor Worley read the proclamation proclaiming March 7-13, 2004, as "Girl Scout Week" in the City of Asheville. He presented the proclamation to Ms. Sally Blue, Director of Membership, who presented City Council with boxes of Girl Scout cookies and briefed City Council on some activities taking place during the week.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 10, 2004, AND THE WORKSESSION HELD ON FEBRUARY 17, 2004

B. RESOLUTION NO. 04-47 - RESOLUTION AUTHORIZING THE ISSUANCE OF MULTI-FAMILY HOUSING REVENUE BONDS FOR BATTERY PARK APARTMENTS FOR THE HOUSING AUTHORITY

Summary: The consideration of a resolution approving the issuance of revenue bonds by the Housing Authority for the Battery Park Apartments project.

The Housing Authority of the City of Asheville proposes to issue revenue bonds in the amount up to $7,000,000 and to lend the proceeds of the bonds to Battery Park Senior Housing Limited Partnership to acquire and renovate an apartment development known as Battery Park Apartments to be operated for rental to elderly persons.

2

The Housing Authority held a public hearing on February 10, 2004, on the question of the issuance of the bonds. The bonds must now be considered and approved by the Asheville City Council.

The bonds being issued are "private activity bonds" under IRS regulations. Essentially, this is a form of financing that allows private entities (both for profit and not-for-profit) to engage in public purpose projects, with some of the advantages of tax exempt financing. There are many requirements and limitations in the use of the money derived from bond proceeds. One of the requirements is that the governmental unit having jurisdiction over the area in which the activity occurs must approve the issuance of the bonds, and this approval may only come after a public hearing. According to the Housing Authority's attorney, this public hearing requirement will be satisfied by the public hearing to be held by the Housing Authority prior to the City taking action, and a separate hearing by the City is not necessary. Our bond counsel has confirmed this, and this is the position of the Local Government Commission.

If City Council wishes to approve issuance of the revenue bonds for the Battery Park Apartments project, as required by Sec. 147(f) of the Internal Revenue Code, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 28 – PAGE 145

C. RESOLUTION NO. 04-48 - RESOLUTION APPROVING THE PARKS & RECREATION CO-SPONSORSHIP LIST

Summary: The consideration of a resolution approving co-sponsored events for 2004.

This year, the Parks and Recreation Department has developed a matrix to assist in determining the minimum requirements for an event to be considered for co-sponsorship. This matrix includes specific points given for such areas as economic development, out-of-town spending, whether the event is designed for raising funds for local charities, or whether the event increases cultural understanding for the community. A total of 41 events were approved last year, which represented an estimated cost to the City of $90,000. This year, the number has been reduced to 31 events, resulting in a cost of approximately $75,000, which represents a reduction of $15,000 from the previous year. The following is a list of the events recommended for approval: Goombay; Greek Fest; Hard Lox Café; Taste of Asheville; Downtown After 5; The Human Race; Fiesta Latina; Light the Night Walk; Citizen Times 1/2 marathon; Walk America 2004; Shindig on the Green; Smokey Mountain Toy Run; Asheville Art Museum Boating Party; Day of Caring; The Sunset Stampede; Very Special Arts Festival; Biltmore Estate 15K; Children First Festival; Heroes for Hope; RiverLink Adventure Weekend; Anti-Cruelty Walk; Organic Fest; Sistahs on Stage; Holiday Parade; Cinema in the Park; Concerts on the Quad; Grove Arcade; October Harvest Festival; Light up the Holidays; Midday Musicals; Grove Arcade Chili Festival; and Mountain Renaissance Fair.

Upsides of Recommendation: (1) Generates in excess of $15 million dollars for the local economy; (2) New matrix has reduced City's financial contribution; (3) Increases recognition of cultural diversity of the community; (4) Allows for fundraising opportunities for various charities; and (5) Expands special events and festivals for the community.

Downsides of Recommendation: (1) City costs for providing services estimated at $75,000; (2) A few groups that applied will not be co-sponsored which may jeopardize the event; and (3) Events do place a wear and tear on infrastructure and equipment provided to the organizers.

The Parks and Recreation Department recommends that City Council accept the list of co-sponsored events for 2004.

RESOLUTION BOOK NO. 28 – PAGE 146

D. ORDINANCE NO. 3090 - BUDGET AMENDMENT FOR COMPUTER CODING FOR THE DEVELOPMENT OF A WEB SITE TO BE USED AS A MARKETING TOOL FOR CITY DEVELOPMENT AND REDEVELOPMENT

Summary: This is the consideration of a budget amendment, in the amount of $20,000, for computer coding for the development of a web site to be used as a marketing tool for City development and redevelopment.

At last year's City Council retreat, staff presented an economic development program concept for the City of Asheville. This concept concentrates on building the tax base through the promotion of higher density, higher intensity development consistent with recommendations from the Sustainable Economic Development Task Force and City development policies. Since that time, City Council has adopted a comprehensive plan and a new Neighborhood Corridor zoning district for Broadway. City Council has also previously approved an Urban Village zoning district and, during the coming year, will receive redevelopment plans for the urban riverfront and the WECAN neighborhood. Downtown Asheville is seeing new growth, but has many areas still available for redevelopment. Additionally, we may see changes to a number of big box development sites, as a result of economic conditions, making these sites also suitable for redevelopment at a significantly higher intensity.

As one means of implementing this tax base enhancement plan, staff is now proposing a marketing program intended to provide the development community with a tool for evaluating the development feasibility of targeted redevelopment areas. This is not a new approach – it uses tools that other communities have developed to promote development and redevelopment of city-owned properties and brownfield sites. It is markedly different, however, in the scope and scale of its focus in that our proposed web site will promote broad but targeted areas of our city versus specific parcels; and, the marketing focus is on the real estate developer rather than the end user.

The marketing program (which we are suggesting be called Priority Places) will use GIS technology to facilitate developer inquiry into suitable areas for high-density, high intensity type development. On the City web site, we will identify areas that have been designated appropriate for development of this type in the City comprehensive plan or in other official plans and documents. Developers will be able to access property appraiser records, census and other demographic information, existing and projected zoning, any available development incentives (such as the affordable housing trust fund, administrative rezoning, or permitting incentives), City staff contact points, surrounding complementary and competing uses, known environmental conditions, and other information necessary for the performance of their preliminary due diligence. Additionally, outreach marketing is planned to further facilitate developer interest in the Priority Places web site, including mailings, articles and advertisements in trade journals, visits to developers' offices, and other measures.

Internal staff has been able to establish the framework for this GIS tool and we will provide Council with a simulation during our worksession presentation. However, there is considerable coding work that is needed to complete the tool and we will require a supplemental budget allocation of $20,000 from the City's contingency fund to pay for this technical assistance.

Some points to consider as upside include:

- The Priority Places marketing program supports a wide variety of City goals and policies, including implementation of existing and proposed redevelopment plans, sustainable economic development policies and strategies, land use goals, and affordable housing policies.
- Other local/regional economic development agencies' marketing efforts are on attracting the end user business that will bring jobs. Further, while those efforts cover the City, they are not focused, as this program would be, solely on the City. The Priority Places marketing program is focused on attracting developers creating tax base in specific areas within the City.
- This effort is targeted to developers, both internal and external to the community, interested in this particular kind of development/redevelopment. This is expected to reinforce Council priorities that reflect Asheville as a "business-friendly" community interested in quality development and redevelopment.
- The City is already heavily invested in providing and applying GIS technology. This is an added dimension of its capabilities.

Some points to consider as downside include:

- No funding in the current budget.
- For marketing to be effective, it has to be consistent over time. There will need to be some level of funding beyond this start up to support ongoing marketing of the web site, including GIS support and more traditional marketing efforts.

City staff recommends City Council approve the budget amendment, in the amount of $20,000, for computer coding to enable the Priority Places marketing program to be established as a marketing tool for City development and redevelopment.

ORDINANCE BOOK NO. 21 – PAGE 58

E. RESOLUTION NO. 04-49 - RESOLUTION APPOINTING A MEMBER TO THE CITIZENS/POLICE ADVISORY COMMITTEE

Summary: Ann Flynn has resigned as a member of the Citizens/Police Advisory Committee, thus leaving a vacancy in the Central area until June 30, 2005.

At City Council's worksession on February 17, 2004, City Council instructed the City Clerk to prepare the proper paperwork to appoint John Burchfield as a member of the Citizens/Police Advisory Committee, to serve the unexpired term of Ms. Flynn, term to expire June 30, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 147

F. RESOLUTION NO. 04-50 - RESOLUTION APPOINTING A MEMBER TO THE PLANNING & ZONING COMMISSION

Summary: Selina Sullivan has resigned as a member of the Planning & Zoning Commission, thus leaving a vacancy on the Commission until August 14, 2005.

At City Council's worksession on February 17, 2004, City Council instructed the City Clerk to prepare the proper paperwork to appoint Sharon Bell as a member of the Planning & Zoning Commission, to serve the unexpired term of Ms. Sullivan, term to expire August 14, 2005, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 148

G. ORDINANCE NO. 3091 - ORDINANCE GRANTING A FRANCHISE TO DUKENET COMMUNICATIONS, LLC, PURSUANT TO THE CITY'S TELECOMMUNICATIONS ORDINANCE

Summary: The consideration of an ordinance granting a franchise to DukeNet Communications, LLC, pursuant to the City's Telecommunications Ordinance.

Back in September the City considered and adopted Ordinance No. 2056 to provide for the granting of non-exclusive franchises to install telecommunications facilities in the City's right-of-way. Prior to that time, we had some discussions with DukeNet Communications, a Charlotte-based telecommunications service provider affiliated with Duke Energy. DukeNet and the City have since resumed these discussions, with the result that DukeNet now wishes to begin operation in Asheville.

Most of the substantive terms applicable to this franchise (or any telecommunications franchise) are already set forth in the Telecommunications Ordinance, and DukeNet, by accepting the franchise, agrees to abide by the provisions of the ordinance. The main issues to be determined in connection with this particular franchise are the fee that the City will receive and the length of the franchise term.

As to the franchise fee, a team consisting of representatives from Public Works, Engineering, Planning, Legal, Economic Development, and Information Services reviewed such issues as our administrative costs, wear and tear on our right-of-way facilities, other fees charged for right-of-way use in Asheville, and fees for similar right-of-way use charged by other cities. We determined that a two-tiered fee structure based on density would reflect the value of the right-of-way in high density areas while encouraging the extension of service into under-served and less dense areas. Within the downtown area (defined as Charlotte/South Charlotte Streets on the east; Beaumont/Hilliard Streets on the south; Clingman/Haywood Streets on the west; and I-240 on the north), the rate is proposed to be $.10 per foot per month for each linear foot of right-of-way used for the installation. Outside of this core area, the rate drops to $.02 per foot per month.

As to the length of the term, DukeNet has asked for a 10-year term, renewable for two 10-year terms, unless either party terminates. While we have no problem with the length of the term, we think that the rate should be subject to increase based on the CPI after the first five years.

Although DukeNet apparently has some potential customers, they have not revealed the location of their proposed initial installation. Any installation, however, would have to be approved by the City Engineer, at least as to the route and manner of installation, and would become part of the franchise.

Considerations:

(1) This is the City's first telecommunications franchise, and we really have no local experience with such efforts, other than cable television, which is not directly relevant.

(2) The City has the obligation to protect and preserve its right-of-way for public use, and the right to expect fair compensation for its use by profit-making enterprises. The compensation that we receive should be fair and equitable, and we may not prefer one provider over another, so the compensation paid by DukeNet will be a benchmark for future installations.

(3) There is a significant public interest in enabling telecommunications providers to provide their service, and especially to enable, or at least not obstruct, provision of such service to less densely populated and underserved areas.

If Council wishes to grant a franchise to DukeNet, adoption of the ordinance is recommended. Council may suggest alternatives to the proposed fee schedule and the term, but most other substantive issues are already dealt with in the Telecommunications Ordinance adopted in September. Because this is a franchise ordinance, a second reading of it will be required.

ORDINANCE BOOK NO. 21 – PAGE 60

H. ORDINANCE NO. 3092 - BUDGET AMENDMENT FOR FUNDING THE TRANSIT PLAN FOR THE FUTURE MULTI-MODAL TRANSIT CENTER

Summary: The consideration of a budget amendment, in the amount of $9,600, as the City's share of the transit plan for the future multi-modal transit center.

The N.C. Dept. of Transportation (NC DOT) and the City's Transit Department are studying the need for a transit hub facility in the southern part of the City. One possibility is to co-locate the transit hub with a passenger rail station (proposed for Biltmore Village) in the event that service comes to Asheville. Independent of the rail service, should a hub be needed and a new facility built, and, in order to access federal funding for construction of the transit facility, it will be necessary to have conducted a Transit Study (TS) including the Biltmore location. The estimated cost for the TS is $12,000. The City share for the TS would be $9,600. The NC DOT Rail and Transit Divisions feel the TS is a priority and needs immediate funding. The NC DOT's share of the funds for the TS is currently available.

City staff recommends approval of the budget amendment to appropriate $9,600 out of Contingency as the City share of the Transit Study.

ORDINANCE BOOK NO. 21 – PAGE 73

I. RESOLUTION NO. 04-51 - RESOLUTION MODIFYING THE 2004 CITY COUNCIL MEETING SCHEDULE TO CANCEL THE MARCH 2, 2004, CITY COUNCIL WORKSESSION

RESOLUTION BOOK NO. 28 – PAGE 149

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE REZONING OF 25.429 ACRES ON CRAYTON ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3093 - ORDINANCE TO REZONE 25.429 ACRES ON CRAYTON ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO HIGHWAY BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:20 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone 25.429 acres on Crayton Road from Commercial Industrial District to Highway Business District. This public hearing was advertised on February 13 and 20, 2004.

The property is located within the City limits on the north side of Crayton Road north of Interstate 40. Surrounding land uses and zoning include commercial and office uses to the north zoned Commercial Industrial (CI), commercial and residential property zoned Commercial Industrial (CI) and RS8, respectively, to the east across a railroad right-of-way, Interstate 40 (unzoned) and commercial to the south zoned CI, and commercial and industrial zoned CI to the west.

The applicant, Michael Goodman, wishes to rezone the property in order to utilize it for uses permitted in the Highway Business District. The purpose of the Highway Business (HB) District is to address the needs of commercial development along major thoroughfares.

The Future Land Use and Transportation Plan of the 2025 Asheville City Development Plan identifies the intersection of Sweeten Creek Road and Interstate 40 as the dividing point between an Urban/Neighborhood Corridor to the north and a Gateway Corridor to the south.

Currently, the property is vacant except for a driveway on the far western portion of the site that provides access to the property to the north, which the applicant also owns. The property's access is from Crayton Road, which is accessed via Sweeten Creek Road near its interchange with I-40. Crayton Road also provides access to the commercial property directly east across the railroad right-of-way. Further east of that property, a road barrier has been placed across Crayton Road to prevent commercial traffic from entering the residential neighborhoods to the east.

A gravel and dirt road currently bisects the subject property through its center. This is the beginning of an eventual street that was approved as part of major subdivision for the property in early 2002. Revisions to the approved subdivision plan may result from the proposed rezoning, necessitating another review by the Technical Review Committee (TRC).

The petitioner believes he is not able to develop the property according to the requirements of the CI District, especially as they relate to front setbacks and the inability to provide parking within that setback. Permitted uses, uses permitted by right subject to special requirements, conditional uses, and prohibited uses in both districts are similar, with the main difference being that HB does not permit industrial uses.

Rezoning the properties would allow the applicant the opportunity to develop the property for uses permitted in the HB District. It would provide the property a less intensive zoning district than it has currently. It would also allow the applicant more flexibility in terms of parking requirements as they relate to front setbacks. In consideration of the above, the adjoining zoning and land uses in the area surrounding site, and the site's proximity to Interstate 40 and Sweeten Creek Road, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance.

The pros for the rezoning include:

- Specifically provides for highway and automobile-oriented type development in close proximity to the Interstate 40/Sweeten Creek Road interchange.
- More flexibility for the property owner in terms of parking in the front setback.
- Rezoning to a lesser intensive zoning district (HB) that allows a large number of similar uses permitted in the existing zoning district.

- More likely to result in a better-designed commercial development with HB development standards.

A con for the rezoning is the loss of zoning that permits the option of certain types of industrial and manufacturing uses.

City staff recommends approval of the rezoning request. The Planning & Zoning Commission, at it's February 4, 2004, meeting voted unanimously to recommend approval.

Mayor Worley closed the public hearing at 5:26 p.m.

Mr. Pettibone responded to questions from Council regarding the loss of industrial property.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3093. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 75

IV. UNFINISHED BUSINESS:

A. CONSIDERATION OF THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A PROPOSED 55 LOT SUBDIVISION

ORDINANCE NO. 3094 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A PROPOSED 55 LOT SUBDIVISION LOCATED AT SAND HILL ROAD (HABITAT FOR HUMANITY)

Mayor Worley said that the public hearing and approval of the conditional use zoning was held on January 13, 2004. At that meeting, Councilwoman Bellamy moved to continue consideration of the conditional use permit until February 24, 2004, in order for the developer and neighborhood to meet to discuss the stub street, additional buffer, fewer lots, and/or other things that might make the development more attractive or palatable.

Urban Planner Carter Pettibone said that on Monday, February 16, 2004, Habitat for Humanity held a meeting to discuss the revised plan for their proposed subdivision on Sand Hill Road. In addition to Lew Kraus, Fred Barbour (member of the Habitat's Site Selection Committee), and Gerald Green representing Habitat, twelve neighbors were in attendance, as well as Carter Pettibone of the City's Planning staff.

Mr. Kraus and Mr. Green then presented the proposed changes to the plan, which they felt address the major concerns of the neighbors. The changes to the plan include:

-Reduction of total lots from 60 to 59 (City Exhibit 5 – Revised Site Plan)
-Reduction in the number and increase in the size of lots located closest to the Captain's Drive development
-Changed street stub connection to Buncombe County property to the north to a pedestrian connection
-Changed the two cul-de-sacs near Captain's Drive to "T' type hammerhead turnarounds that will meet City Engineering and County Fire requirements

-Open space has been reduced, but is still well above the minimum required by the Unified Development Ordinance (UDO)
-The proposed buffer between the development and Captain's Drive will utilize existing vegetation and be supplemented to achieve a "C" type buffer as described in the UDO

Mr. Kraus and Mr. Green then fielded questions about the subdivision plan and its proposed changes.

Neighbors expressed concerns about emergency vehicle access, fencing and buffering, status of the contract between Habitat and the property owner (Fletcher Partners), the number of homes and the scale of project, effect on adjoining property values, Habitat's involvement with the subdivision's homeowner's association, and the future maintenance of the subdivision and its common areas. They also indicated they were especially concerned about not just the first set of residents of the development, but future residents and how they will maintain their homes.

Other topics discussed included how Habitat operates and how it looks for available land in the area, other Habitat projects built or under construction, how Habitat develops its subdivisions, and the number of houses Habitat has had to foreclose on in other subdivisions.

Neighbors asked Habitat to consider widening the proposed buffer and installing a minimum eight-foot tall wood privacy fence on Habitat's side of the buffer that would be built by the time the first home is built. They also requested making the fence surrounding the cemetery plastic-coated chain link fencing, and hiring a property management company to maintain the common areas.

Mr. Kraus indicated he would take these requests to his governing committee later that week. He also said he would see if Habitat could retain a stewardship role in the subdivision once it is complete and a homeowner' association is established, but said it would take more time to investigate the legality of the issue.

Some neighbors asked for Habitat to provide copies of the plan, proposed elevations, and copies of HOA covenants from other Habitat subdivisions. Mr. Kraus said he would provide these when they were completed.

The applicant has provided staff with revised plans (City Exhibit 5 – Revised Site Plan). The applicant also informed City staff that additions to the proposed conditions could result from the neighborhood meeting depending on his consultation with Habitat's governing board.

Staff, in conjunction with the Buncombe County Fire Marshal, has reviewed the revised plans and recommends approval of the amended conditional use permit with the following conditions:

- Streets within the development will be at least 24 feet wide with on-street parking permitted only on one side of the street.
- On-street parking is not permitted in the cul-de-sac or hammerhead turnarounds.
- If a street connection to Buncombe County property to the north is waived in lieu of a pedestrian connection, the proposed pedestrian right-of-way is widened to 20 feet and a 10-foot wide asphalt path is constructed within it.
- The developer will retain as many existing trees as possible during the construction process.
- All other applicable outstanding Technical Review Committee (TRC) conditions are addressed.
- If the applicant does not take possession of the properties, the zoning of the properties will revert back to the original RS-2 and RS-4 zoning (requested by applicant).

In addition, Council may want to consider the buffer enhancement proposed by the neighborhood (a fence) or alternative buffering (such as going to a "D" buffer) as an added condition.

Finally, as stated in staff's original report, the TRC recommended approval with the conditions identified by staff. The Planning and Zoning Commission then voted 5-1 to recommend approval with the conditions identified by the TRC (City Exhibit 6)

Mr. Gerald Green, representing Habitat for Humanity, said that in response to comments and direction provided at the January 13, 2004, City Council public hearing, the following revisions have been made to the subdivision plat (Applicant Exhibit 1):

- The cul-de-sac turnaround on the first street has been changed to a hammerhead turnaround in order to increase the land available for the lots abutting the turnaround
- The total number of lots has been reduced to 59
- The proposed stub street to the Buncombe County soccer fields has been removed. In its place a fenced and graveled footprint connecting the subdivision street, sidewalk, and walking trails is proposed
- The lot area of all lots abutting Captain's Drive has been increased. These lots now average 0.40 acre (including buffer areas), the same average size as the adjacent lots in the Captain's Drive development
- Larger homes (3 and 4 bedroom) will be built on the lots abutting Captain's Drive (lots 38, 39, 50, 51 and 52)

Habitat feels that these changes will address the major concerns raised at the January 13 Council meeting. Their goal is to provide homes that are affordable to the working people of Buncombe County in a development that strengthens and enhances the neighborhood, the community, and the City.

Mr. Green showed Council photographs of typical Habitat homes (Applicant Exhibit 2). Regarding neighborhood requests, he said that Habitat will widen the buffering near Captain's Drive to a "D" buffer and will have the fence surrounding the cemetery a plastic-coated chain link fence. Regarding hiring a property management company to maintain the common areas, that is something their attorney is still investigating and how it will impact the home price. Habitat does not feel that a eight-foot tall wood privacy fence on Habitat's side of the buffer is appropriate for two reasons: (1) cost of approximately $20,000; and more importantly, (2) they do not build communities to wall them off from the rest of the City.

Vice-Mayor Mumpower felt that there was going to be a stronger effort to preserve trees, but after seeing the photographs that Mr. Green presented (Applicant Exhibit 2), he was not left with that sense. Mr. Green responded that (1) the examples shown are homes that weren't heavily wooded to begin with; and more importantly, (2) the pictures are only representative of how the homes are built, what they look like and if there are problems, that Habitat addresses them.

Mr. Pettibone used City Exhibit 4 to remind Council what the area looked like from Captain's Drive.

Councilman Dunn felt the 59-lot subdivision is too dense to have room for children to play. He was concerned that the Buncombe County soccer field will not be available for the kids and with the increased traffic from this development, it will be dangerous for those kids who play in the streets. Mr. Green felt that children will play in the yards, in the open spaces, at parks, and playgrounds.

When Councilman Dunn expressed his concern of traffic, Mr. Green responded that the City's traffic engineer did not identify significant issues regarding traffic congestion or safety.

Councilman Davis appreciated Habitat's working with the neighborhood on enlarging the lots and the buffer areas. He was encouraged to see the larger lots around the turnarounds but was distressed to see the size of the other lots along Hominy Creek. He felt that it would be ideal to make the subdivision a little less dense in order to allow the lots along Hominy Creek a more spacious and more space for the children to play. Mr. Green replied that the project originally was planned for 65 lots they have reduced the lots by 10% to 59 lots. However, there may be some room where they can reduce the density a bit more, but the point of affordability can be no less than 55 lots.

Upon inquiry of Vice-Mayor Mumpower, Mr. Pettibone said that this plan is well above the parameters of the open space requirements without the cemetery.

Councilman Dunn felt that Habitat can afford to build less lots because they have volunteer labor. Mr. Green responded that a lot of the costs are the same as for private contracts, e.g., land; infrastructure; water and sewer; sidewalks; curbs and gutters, building materials, reviews, etc.

The following individuals spoke against issuance of the conditional use permit for various reasons, some being, but are not limited to: the housing project is completely out of character with Captain's Drive; Captain's Drive homes have basements, not crawl spaces; the housing project will injure surrounding property values; how can trees be saved with 59 homes; the cemetery is fragile and should not have children playing around it; the City is not making Habitat follow guidelines like other developers; there is a liability issue if there are unsupervised children playing on the County soccer field or on the school property; reducing the lots from 59 to 55 is only a token, not a solution; is the floodplain included as open space; houses will be too close to each other; there will be clear-cutting of trees; children should not play around the cemetery; there is no access to the County soccer park; Habitat has not given the neighborhood anything they wanted; this is an urban development in a suburban area; people will be crammed together; need for open space in the middle of the development for a playground or basketball court; they keep changing what the bottom line is on number of units; let Habitat build to the existing zoning; the stub-street was a TRC requirement and now is completely out of the plan; Habitat is being given preferential treatment; and more open space is needed.

Ms. Sandra Bailey, resident on Captain's Drive
Ms. Carol Tracy, resident on Captain's Drive
Mr. Steve Ayala, resident on Captain's Drive
Mr. Walter Plaue, County resident
Mr. Joe Treadway, resident on Sand Hill Road
Mr. Gail Crawford, resident on Sand Hill Road (Neighborhood Exhibits 4 and 5)
Mr. Tom Plemmons, resident on Sand Hill Road
Ms. Kathleen Bailey, resident on Captain's Drive

Upon inquiry of Mayor Worley, Mr. Green said that the reduction of lots to 55 will result in approximately $5,000 more per house.

When Councilwoman Bellamy asked what the City will do to assure the parking prohibitions, Mr. Pettibone said that the would be achieved by signs. City Attorney Oast said that he would investigate if that provision could be included in the homeowner's covenants, if Council chooses to do that.

Upon inquiry of Councilwoman Bellamy, Mr. Pettibone said that approximately 45 units could be built on the property with the existing zoning.

In response to Councilwoman Bellamy, Mr. Pettibone said that if Habitat acquired additional land, the density would go down.

Mr. Pettibone said that Habitat did not receive any preferential treatment on this development. They had to be reviewed by TRC and comply with all City requirements. Planning & Development Director said that they are not eligible for reduced permit fees nor reduced fees regarding water. However, they would be eligible for a reduced MSD fee.

Councilman Newman asked if children could use the Buncombe County soccer field and the school's recreational facilities if they are supervised. Mr. Pettibone said that they have contacted the County but have not received a response.

Councilwoman Bellamy moved to adopt Ordinance No. 3094 to issue a conditional use permit for property located at Sand Hill Road (Habitat for Humanity) for a 55 lot subdivision, subject to the following conditions: (1) Streets within the development will be at least 24 feet wide with on street parking permitted only on one side of the street; (2) On-street parking is not permitted in the cul-de-sac or hammerhead turnarounds (to be included in the homeowners covenants depending on the City Attorney's investigation); (3) If a street connection to Buncombe County property to the north is waived in lieu of a pedestrian connection, the proposed pedestrian right-of-way is widened to 20 feet and a 10-foot wide asphalt path is constructed within it; (4) The developer will retain as many existing trees as possible during the construction process; (5) All other applicable outstanding TRC conditions are addressed; (6) If the applicant does not take possession of the properties, the zoning of the properties will revert back to the original RS-2 and RS-4 zoning (requested by applicant); (7) The buffer between the development and Captain's Drive is supplemented to achieve at least a "D" type landscape buffer; and (8) Children not be allow to play in the cemetery. This motion was seconded by Councilwoman Jones.

Vice-Mayor Mumpower explained why he felt the development did not meet Standards 3 or 4. He felt the development will have a negative impact on adjoining properties and also that it is not in character of the neighborhood.

Councilman Dunn explained that the developers have not meet Standards 1, 3, 4 or 7. He felt the density was too high, the development does not fit the character of the neighborhood, the development will injure the value of abutting properties and the development will cause undue traffic congestion.

Councilman Newman hoped that if there was going to be more open space that there will be a process on the best way to achieve it. He would rather not marginally increase the lot sizes, but maybe find an open space that might be used for some recreational function.

Councilwoman Bellamy suggested Habitat might want to partner with Quality Forward on tree plantings or work with them regarding playgrounds.

The motion made by Councilwoman Bellamy and seconded by Councilwoman Jones carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no".

City Attorney Oast said that he would draft the Order and bring it back at Council's next formal meeting on March 9, 2004.

ORDINANCE BOOK NO. 21 – PAGE 77

At 6:45 p.m., Mayor Worley announced a recess.

B. BUDGET AMENDMENT FOR THE SECTION 108 GUARANTEED LOAN AND ECONOMIC DEVELOPMENT GRANT

Mayor Worley said that on January 27, 2004, City Council reviewed this matter and continued it until February 24, 2004, to receive additional information. He said that public comment would be limited only to the new information City Council requested at that meeting.

Planning & Development Director Scott Shuford said that this is the consideration of a budget amendment, in the amount of $1,140,000, to recognize receipt of a Section 108 Guaranteed Loan and an Economic Development Initiative (EDI) grant from the U.S. Dept. of Housing and Urban Development and expenditure of the proceeds on the redevelopment of South Pack Square.

Prior staff reports have provided considerable information concerning this budget amendment request to allocate $800,000 of HUD Section 108 funds and $340,000 of EDI grant monies to an Eagle Market Streets Development Corporation project to redevelop property on Eagle and Market Streets.

This is an economic development project that will be funded through private investment using historic tax credits and conventional financing, along with the funding sources from this budget amendment. By itself, it will create over 8,000 square feet of additional retail and office space and 14 residential units. The funding would also leverage additional monies to be spent in a Mt. Zion Church project, resulting in a total of approximately 12,000 square feet of retail and office space and a total of 47 residential units. Five historically significant buildings will be restored to Secretary of Interior standards and a new infill building will be constructed on vacant property if these two projects are realized. It is important to note that this project is not an affordable housing project, although the units will be affordable (renting at 95 cents a square foot) to many service workers, City employees, and other people that make up our local workforce. This is a greatly underserved group in our Downtown housing market.

In January, Council continued this item for additional information. The following are our responses to this information request.

Compliance with Plan - Staff finds that the proposed project will be fully consistent with the South Pack Square Redevelopment Plan. Plan quotes and map references follow.

On page 16, the Plan provides:

> [T]he site plan options present a wide variety of mixed residential, commercial, and support uses to achieve the objectives of this plan. The general obligations presented by the development options are: . . .
>
> 5. To provide for the area the widest possible variety of compatible mixed use development; and
>
> 6. To promote upper story residential development over mercantile business as well as the possibility of new housing construction.

Additionally, in several places, the Plan specifically calls for infill development and new construction:

- There will also be an effort to provide for space for new construction within the project area. (Plan, p. 19).

- Infill on vacant property for new commercial structures on Market Street and Biltmore Avenue is encouraged. (Plan p. 21; emphasis added).

The maps accompanying the Plan also suggest that infill development is generally encouraged and is an appropriate use for the Subject Property:

- The Existing Land Use Maps (Maps 8 & 10) show the Subject Property as being in commercial use;

- The Existing Zoning Map (Map 9) shows the Subject Property zoned to a CBD (Central Business District) classification;

- The Vacancy Map (Map 13) does not identify the Subject Property as vacant;

- The Proposed Site Plan (Options 1 and 2) (Maps 14 & 15) show the Subject Property as available for "mixed use (res./comm.)".

- The Greenway and Open Space Map (Map 17) does not show the Subject Property as being set aside as a greenway or open space.

Pro-Forma Projections – Pro-forma projections appear to be sound. A staff survey of similarly-priced product (100 units total) in our downtown shows a 97% occupancy rate, with waiting lists for units in the larger buildings. In addition, the project is fully consistent with all applicable financial review criteria necessary for the City to carry out its responsibility in monitoring the allocation of federal funds and in securing the consequent City financial interest in the project.

Lease and LLC Agreements - Copies of lease agreement and organizational (LLC) agreements have been provided to Council.

Private Party Background Information – Council has received corporate profiles for Historic Acquisitions LLC and Enterprise Real Estate Services plus informational brochures. Other background information about the private parties involved in the project, including reference information and web-page referrals, has been previously provided.

EMSDC Information – This includes the completed 2002 audit, deadline for the 2003 audit, by-law compliance, board term limits, consultant recommendations on internal organization, evidence of progress in developing an effective and broadly inclusive community involvement plan, and a plan for maximizing economic opportunities from the project for minority and low-income residents. EMSDC will provide this information.

Other Information – The following information has been previously provided:

- Market Study completed in September, 2003.
- Property Appraisal completed in November, 2003.
- Risk to City funds if the project fails or the CDC disbands or is not funded.
- "Exit strategy" should Council choose not to fund this project.
- Rationale for drawing down the Section 108 loan monies in August.

Reasons to Support/Not Support – Pursuant to Council's direction, the following are reasons to support and to not support the project:

Support:

- Residential – builds 14 units; leverages 33 more = 47 total units
- Residential – market rate, workforce housing
- Retail/Restaurant/Office – more than 12,000 square feet
- 5 historic structures restored to Department of Insurance standards
- More than $6 Million in tax base
- Implements South Pack Square Redevelopment Plan
- Partnership with Enterprise Foundation (because of its expertise, reputation, and potential role in future developments in Asheville)
- Partnership with David Rogers (because his expertise gives us confidence it will be constructed as planned)
- Project fully complies with all relevant financial review standards
- All federal monies are fully secured
- There are no local tax monies in the project
- Project rental vacancy and rate projections are sound based on downtown market
- Infill building and renovations approved by two different design review boards
- Public support from EMSDC, Mt. Zion, Preservation Society, and may individuals, particularly African Americans who remember the Block in its heyday

Reasons not to support:

- Fence – poor public relations by EMSDC
- Capacity of EMSDC – management issues
- Residential units not "affordable" enough
- Want something else on infill site (park, parking, etc.)
- Do something else with the money
- Opposed by adjoining property owners
- Council goals have changed

Staff recommends that the City Council approve the budget amendment that allocates $800,000 of HUD Section 108 funds and $340,000 of EDI grant monies to the EMSDC project.

On February 20, 2004, EMSDC provided City Council with the following information: (1) completed audit report for 2002; (2) agreement with auditor for completing the 2003 audit by April 30, 2004; (3) updated list of Board members showing how membership complies with the agency's by-laws and HUD's requirements for Community Based Development Organizations; (4) draft revised by-laws presented for approval by the EMSDC Board on February 24, 2004; (5) organizational development recommendations prepared by management consultant Leslie Anderson in February 2004; (6) summary of "You Stand" program activities for recruiting and developing minority-owned businesses; (7) extract from performance report to the City for year-ended June 30, 2003, relating to "You Stand" activities; (8) residential/business Marketing Outreach Work Plan for 2003-04; (9) Minority Participation Plan by Clancy & Theys, general contractor for the project; (10) draft Community Involvement Plan – SPS Advisory Panels; (11) agenda and other material for SPS meeting held at the YMI on February 19, 2004; and (12) draft memorandum of understanding between EMSDC and the City, on community involvement (staff has not yet had an opportunity to review this).

Mr. Shuford presented Council with the following construction prices per square foot:

- EMSDC - $91/sf
- Harry Pilos – Rehab: clean shell, no structural issues - $90-120/sf
  New construction: 4 story, mixed use, 25% commercial - $135/sf commercial
  $100-110/sq ft residential (unsure if it includes upfit costs, probably not)
- Peter Alberico – Rehab: $50/100/sq ft
  New construction: $150/250/sq ft

Mid grade residential	$150
Mid grade office	$175
Retail	$200
Hi grade residential	$250

- Harry Weiss – Rehab: $90-120/sf (breakdown $60-85/sf hard costs plus soft costs of 25-32% of construction cost)

Mr. Shuford said that City Council has received information which summarized the first community meeting held on February 19, 2004, and information on the alternative projects presented at the community meeting held on February 23, 2004.

Mr. Gene Ellison, co-owner of the Ritz building, said that City Council has challenged them to come up with an alternative plan. He said that in 3.5 days they have come up with an alternative plan that a great deal of people think is a possibility. He said private individuals have invested close to $2 Million on the Block and they need to be included. This project can be done in a lot of different ways.

Mr. C. Crawford Murphy, architect, briefly reviewed with Council his alternative to the EMSDC plan, noting that he used the exact amount of square footage. Showing sketches, he said he added open space, increased the parking and maintained all the retail. A concession to be made is that the alternative might jeopardize the historic tax credits, but in the design alternatives, relatively speaking, we think there is a savings of approximately $500,000 in construction costs. In summary, the plan shifts the infill building to above the Collette building on Eagle Street. The building located at 3 Wilson Alley would be saved and a two-level, open-air parking deck would be constructed on the existing parking lot. There would be an interior park created on the second level of the parking deck that would be accessible through the Collette building. The parking deck is accessed from Market Street via two single lane driveways, one going to the upper deck and another going to the lower deck. He said this is a $3.1 Million project including the parking, which is not in the other plans, and the development of the building in the back.

Mr. Jesse Plaster presented Council with another alternative plan of a renovation-only project. The plan would create a park on the existing parking lot, providing for a public market space and outdoor seating/cafes. The Campbell and Collette buildings, and possibly 3 Wilson Alley, would be renovated in an historically appropriate fashion. Some advantages include (1) renovation is more economical than new construction ($60/sf rehab vs. $80/sf for new construction); (2) tax credits come only from renovation work; (3) Collette and Campbell buildings require little, if any, structural modifications; (4) Eagle-Market Streets properties can be renovated with money in-hand; (5) renovation of building at 3 Wilson Alley will be for affordable housing; (6) precarious nature of EMSDC Plan puts properties at financial risk; (7) this plan uses real numbers for vacancy rates (10%), management fees (10%) and maintenance costs (5%); (8) this alternative requires no subsidy from the City; and (9) this alternative includes a community park with the opportunity for community input on design. He pointed out that using $100/sq ft for renovation and $150/sf for new construction the EMSDC Plan would bring the project over budget by $1.5 Million.

Pastor William Henry Hutchison, tenant of EMSDC, explained to Council his displeasure surrounding alleged forged documents by EMSDC staff regarding a reimbursement request for moving and storage expenses.

The following individuals spoke in favor of revitalizing the Block but preferred an alternative Plan to EMSDC's plan:

Ms. Amy Plaster, owner of the Wilson building at 13 Eagle Street
Mr. Jesse Ray Jr., Vice-Chair of YMI Cultural Center and Chair of YMI Community Development Corporation
Mr. Don Yelton
Mr. Isaac Coleman

The following individuals spoke in favor of revitalizing the Block with the EMSDC's plan:

Ms. Dena Banks, owner of New Ebony Bar and Grill in Collette building
Mr. Marvin Chambers, Board Member of EMSDC
Mr. Marvin Vierra, Board Member of EMSDC
Mr. Fred English, Haw Creek resident
Mr. Billy Adams, former Eagle Street resident

Councilwoman Bellamy had originally asked for the delay at Council's last meeting when this issue was before us in the hopes that we could come to a place where the community can be unified behind one plan or the other. She said Council has been provided with the minutes of the February 19 and February 23 meeting minutes. The two alternative plans have arisen out of the two community meetings and it was her hope that one plan could be supported. There was no consensus of the community on either alternative plan. Throughout the process it has been encouraging to hear the dialog and it was unanimous on February 19 that the vision was to see redevelopment. Now it's just how do we get there. She would be opposed to delaying this issue any longer. The number one goal of the 1996 South Pack Square Redevelopment Plan was to eliminate and prevent further deterioration of South Pack Square. Over the past month she has met with people in the area, but consistently EMS didn't move. That was discouraging. At last night's meeting when there was an opportunity to hear comments, EMS didn't come to the meeting just to hear more public input. Some people felt it wasn't important enough for them to come and in her opinion, they hid behind the fact that they are in a lawsuit and their attorney advised them not to say anything. However, one thing is to listen to the community, and the other thing is to participate. For her, we are asking the lead organization on this development to entrust them with $1.14 Million and it's hard for her to get beyond the hurdle of issues discovered in the last four weeks that were not mentioned before. It's hard for her to entrust this amount of money into an organization who is not willing to listen, even if they say they are not changing. EMSDC is the agent for the City to get the job done, so they should be the extension of what we want to see. The ultimate goal is to see something preserved that is important to the entire community. And, she doesn't see it in the lead organization that we are supposed to entrust our money. She has no doubt that Rogers & Associates can do the work because they are good developers. Her concern is she can't get over the hurdles of the organization's capacity to ensure that when the money is given to them, that they know Rogers are doing the right thing. She doesn't see that at the current level. She would like to see a lot of changes in the Board and staff at EMSDC.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford said that the EMSDC plan is 35,132 square feet with total development cost of $3.2 Million which is approximately $91/square foot (not including the acquisition cost but that is a given for anyone who would build on this particular

18

site). The figure for total development costs, with the acquisition, including hard costs, soft costs, new construction and rehab is $101/sf. In addition, from figures given to him by Mr. Plaster, Mr. Shuford said that Mr. Plaster had earlier quoted his rehab figure of $60/sf, however, his figures show that Mr. Plaster developed his rehab building for approximately $83/sf. Mr. Plaster disagreed stating his rehab amount was $60/sf.

Vice-Mayor Mumpower said that his concerns about Rogers & Associates have been addressed. Even though he doesn't believe Mr. Rogers is responsible, he did note that the Grove Arcade Project had $3 Million in cost overruns and they ran into problems they didn't foresee. If that can happen with the best minds and a strong developmental process, he is left with concerns that the same potential exists in this project.

Responding to Vice-Mayor Mumpower concern about cost-over-runs, Mr. Shuford said that in this project there is a reserve that would allow the project to sustain a 20% vacancy rate for a period of nine years. Given the quality of the developer and the thoroughness of the architect, he felt the chances of having an over-run are small, but there is a provision in the way the financing is set up for that to be accommodated.

Vice-Mayor Mumpower continued to express concerns about hidden cost over-runs and questioned how this project can be developed at $91/sf and others say it cannot be developed at that cost. Ms. Caplan attempted to show Council how resilient the project is to vacancy rates that could exceed 4% for a period of time. She said that the City would expect to see any project coming up for our City support to show a robust pro forma, stressing that an operating reserve is something that should be shown in prudent budgeting.

Councilman Dunn felt that the taxpayer's money that is in the reserve account (20% vacancy rate for nine years) might be used for another project or perhaps the City could build some sidewalks or put in infrastructure somewhere else. Community Development Director Charlotte Caplan explained that this reserve is the bank's money required by the bank lender. It will be reserved from the bank loan funds. Mayor Worley further explained that the money we are talking about under the terms of the grant is money that is from HUD for this purpose only and if it's not used, it goes back to HUD. The City cannot turn around and use that money for any City infrastructure.

Upon inquiry of Councilman Newman, Ms. Caplan said that the developer would potentially lower the rental prices in order to get a higher rate of occupancy. In fact, the pro forma also includes a very generous allowance for marketing incentives, which she thinks is mainly aimed at the commercial tenants.

Vice-Mayor Mumpower asked if there were any unaccounted dollars that staff was aware of that is not in the materials before Council. Ms. Caplan said that two things do not appear in the pro forma: (1) the cost of acquisition of property (because the project will be leased); and (2) approximately $3,000 a month the City has been paying EMSDC for their operating costs.

Mayor Worley asked Mr. Crawford what was the basis upon which he addressed the costs to his alternative plan. Mr. Crawford responded that he took the EMSDC design and began to look in the design concept of the alternative he was offering to see what impact did it have on the costs of the construction, particularly the new construction. He found that in the alternative design there was about 40% less exterior wall, 50% less roof area and there was a whole floor that wasn't needed. Then he added back differences of improving the basement of the Collette building vs. the EMSDC plan to put parking under there. Then at the end he applied $100/sf to remodel and $130/sf to new construction. These are broad stroke figures. He hasn't had time to get relative evaluation between the two. He feels that both are viable alternatives and with enough examination, he felt they are worth consideration. He said that these numbers are so broad that just by changes of the design, you can create economic opportunities.

When Mayor Worley asked Mr. Crawford if he had an opportunity to go through the buildings, Mr. Crawford said that he has been in several of the buildings and examined the Wilson building in a walk around and look through.

Mayor Worley said that he recalled that the Gennett Building is scheduled to be demolished as a part of the EMSDC plan because it was too far deteriorated to be renovated. Mr. Crawford said that he called six companies that specialized in cleaning out buildings like that and he could have had a contract yesterday morning to clean the building out because that is a common task that can be overcome. He hasn't had a chance to look in it, but took the worse case scenario which is to gut the whole inside, leave the exterior, and build back inside. That cost is almost $300,000 for 3500/sf.

Mayor Worley then asked Mr. Plaster what was the basis upon which he addressed the costs to his alternative plan. Mr. Plaster responded that best resources they used was the powerpoint slide EMSDC used, showing how they arrived at $60/sf for rehab and $80/sf for new construction. Regarding the condition of the Gennett building, Mr. Plaster said they talked to Bill Wescott, a preservation engineer, because he has had experience with that building. However, their conversation wasn't directed at this debate at the time he spoke to him. The Gennett building is locked and they have not been able to gain access. However, Mr. Wescott spoke about the interior condition of the building and felt that it could be preserved and that there was significant architectural detail inside the building making it a good case for preservation.

Upon inquiry of Vice-Mayor Mumpower, Mr. Plaster felt the EMSDC's projections are not realistic. His father is an architect and he has grown up with a close relationship to the construction industry. He felt that even $91/sf for an infill residential project is a far cry from most other architect's projections. He said the difficulties of this site are it's in an urban environment, it has immediate adjacencies on three sides, a public street – all of which factor into increased construction costs.

Upon inquiry of Mayor Worley, Mr. David Rogers, with Rogers & Associates, said that one reason the risk factor is low is because he has 30 years experience in rehab of old buildings totaling $1 Billion. He is confident that he has all the unknowns taken care of. They commonly refer to renovations as discovery because after you begin, there may be structural problems they don't see. He explained that they have a contingency in the General Contractor contract and a contingency in the pro forma which should cover any unknowns that should come up. Regarding the Grove Arcade project, he said that the 330,000/sf project at a $332 Million pro forma is approximately $100/sf for that high quality renovation. Regarding the construction numbers, HUD and the City requires them to furnish the City the lump sum guaranteed maximum contract from the contractor, who is bondable and capable of doing that project, which guarantees the costs before any HUD money is spent. That has been furnished to the City. He explained that there is no risk in the construction costs because we have someone guaranteeing the construction costs and they have contingencies built in their numbers. The only thing that would ever go up would be a change order from an unknown and we have money to cover that. The reserves are something that the lender requires and the tax credit investor requires us to fund those reserves at the start and put them in escrow. We cannot touch them – they are there for the project.

Upon inquiry of Councilman Newman, Mr. Rogers said the reserve is higher than normally a lender would require because of the tax credit investor.

Mayor Worley asked Mr. Rogers what his opinion is regarding whether the Gennett building was salvageable or not. Mr. Rogers said that he has looked at the building, the

20

environmental reports and the quotes that EMSDC received. They had 82 people show up and only 2 people quoted (the lowest quote being $315,000), and neither one guaranteed that the mold and spores in the building could be killed. Mold is a very serious problem that is hard to overcome and kill. He said they had another use for the property in another phase in the future.

Upon inquiry of Vice-Mayor Mumpower, Mr. Rogers said that he doesn't spend over $100/sf for any renovation project whether it's a $3 Million project or a $30 Million project

Mayor Worley asked Mr. Rogers if he felt there was merit to any of the concepts of the two alternatives just presented to Council. Mr. Rogers replied that one proposal was 100% different than EMSDC's plan. The other proposal was virtually doing the same thing as the EMSDC plan, but rather than comment on how the EMSDC can change their proposal to fit other needs, they brought forward a brand new proposal. He has heard no comments on what he could do to change EMSDC's plan. He did note that it took them eight months to get where they are at now and it's hard to believe that anyone can come in and tell you in three days what is a good proposal and the cost to make it work.

Councilman Dunn asked Mr. Rogers if, after Council had time to review the two new proposals, he would be willing to be the developer to work with them. Mr. Rogers explained that they have already spent approximately $200,000, and he wasn't sure how to overcome that at this stage in the game. There will have to be all new architectural fees, a new appraisal to do, etc. However, he would be willing to sit down and talk with them. He wished this input would have come forward six months ago. He then explained why there is no way that tax credits can be used on either one of these alternatives. He explained that the EMSDC plan is what all the different agencies (State Historic Preservation Office, and Park Service) would approve.

Councilman Dunn said that historical buildings are nice, but if it interferes with good development then we might have to lose it.

Councilman Dunn asked if Mr. Rogers could be reimbursed and the City advise HUD that we have found a better project that will save money. City Attorney Oast said that he would have to investigate reimbursing Mr. Rogers back. He did state, however, that there are restrictions on how federal money can be used.

Vice-Mayor Mumpower asked if there was any concern about the $97.5/sf rental rate for residential units. Mr. Shuford said that the rental rate for both the office space and residential is well within market for our downtown. Larger residential projects have waiting lists and there is very little vacancy in our downtown right now. After researching other parts of downtown and reviewing the numbers with a commercial realtor, he thinks the rent rates for both residential and commercial are fine.

Vice-Mayor Mumpower asked if this area is considered as the core area. Mr. Shuford responded that this is in an area that is in one of the more exciting and vibrant parts of downtown and certainly the effort that is going on to rejuvenate it through the private sector is starting to bring this area back.

Vice-Mayor Mumpower asked if there are any concerns that this has the potential to be seen as federally funded gentrification. He said that we have a rich history and a rich level of activity in that area, but we don't have a history of high-dollar format and this seems like it's high-dollar. Mr. Shuford said that it is always a struggle to figure out who is going to live in the units. We have finally gotten away from who can live in the unit to if they can afford the payments, then they can live in the unit. That is the appropriate way and how it should be. In this particular case, it is the lower end of our rental market rate housing in our downtown.

Councilman Newman said that substantially he thinks this is a good project. For him, voting to support investment and rehabilitating historic buildings in the downtown and to support an infill building on an empty parking lot is easy. But for him, voting for a large subdivision in a mature wooded area is hard. He does think the project will go a long way towards addressing the blighted condition of the neighborhood. His concern has been the scarcity of affordable housing as part of the project. While he realizes that simply addressing the blighted nature of the neighborhood is very valuable in its own right, he is concerned about the overall gentrification that is occurring in the community and in downtown. He lives in a neighborhood now that 10 years ago was considered an unsafe area. Today it is very hard for people to be able to buy a home there. It can happen very fast. He would not support the project if he felt that the affordability issue could be changed significantly for the better, but after talking with the developers and other people who are involved in this project, he thinks that there are significant physical constraints on the ability to do that. We are dealing with historic buildings and it is expensive to renovate old buildings. Even on the infill building where one might think it might be easier to design more affordable units into it, simply by including small units rather than a smaller number of larger units, the cost of the space is there and there are significant constraints on that as well. He is convinced that the developers would like to include more affordable units if it were more physically possible to do that with this project. Regarding the process, he thinks there has been a bad process. In many ways over the last decade there has almost been too much discussion and not enough action going on in terms of substantive revitalization of this area. And then in the last year, there has been a lot more action and not enough community input which is unfortunate. He doesn't want to legitimize a bad process but he also has concerns from a process standpoint about not moving forward. The City has invested a lot of money over many years to revitalize this area. The blighted nature of the Block adds significant costs to our community in a very real sense in terms of the costs that we need to invest in policing of this area and the lost economic opportunities if the area was more productive and vibrant. The City Council has voted to postpone this issue twice to get more input and bring people together and he is concerned if we continue to postpone it, the project could collapse under its own weight. Some people say that the market force will continue to renovate this area and he commends the people who have gone out of their way and been the pioneers by investing in the neighborhood. But, the City has made it a priority to invest in the renovation of this area, EMSDC has purchased buildings, and the Church has purchased buildings, so the reality is that most of the important buildings in this neighborhood are now owned by these entities and if they can't more forward with some kind of renovation then we know that this neighborhood will remain in a blighted condition. For those reasons, he is supportive of moving forward with the project. His remaining concerns deal with the community representation on the Board of the EMSDC and also concerns about retaining the existing businesses that are in the community. He is very concerned when he hears business people who have operated in this area say that they fear they will be left out once the renovations happen. It's not necessary the issue that we are voting on tonight, but those two concerns about board representation and supporting existing businesses will have to be addressed for him to provide any other future support of EMSDC's work in this area. He said that in future phases of the development of the neighborhood he would like to see a very significant component of affordable housing so that we don't have gentrification of this neighborhood. Therefore, he moved that City Council approve a budget amendment, in the amount of $1,140,000, to recognize receipt of a Section 108 Guaranteed Loan and an Economic Development Initiative (EDI) grant from the U.S. Dept. of Housing and Urban Development and expenditure of the proceeds on the redevelopment of South Pack Square. This motion was seconded by Councilman Davis.

Councilman Davis said that he agrees with Councilman Newman. There is a part of him that is almost sick to second the motion because of the process that has gone on. This has been going on for a long period of time and he thinks that in spite of the ill handling of the public involvement early on in this, EMSDC has managed to get a very good developer to the table. They have also managed to bring with them the Enterprise Real Estate which is another good plus for the second or third phases of this project. As a business person, he feels like the

22

business community and the private investors have been left out of the process which they should have been considered early on. But, we also have at this point gotten a lot of money at the table and some good plans and, quite frankly, if this falls in, he doesn't see the private sector coming down and spending a lot of money to take this forward to the degree that we have the opportunity to do so now. If we go back through Mr. Murphy's plans, we will be re-inventing the wheel at a late stage, so he is comfortable with moving forward with this now.

Mayor Worley said the one thing he has heard unanimity on is that everybody is for the redevelopment of the Block. We all recognize that the process was not the process that we would desire to see a project like this move forward. The process seemed to pick up a little bit once things surfaced in the fall. There were some meetings in the fall and early winter and even kicked into higher gear over the last week, which is very late in the overall scheme of things. City Council has postponed a decision on this issue at least twice. We have done so each time with some trepidations about what that might mean for the viability of the project in terms of potential or rising interest rates, etc. Today we have received alternatives. They are very preliminary, at best, and they come in very late in the process. There is a wide range of guesswork in the cost and feasibility of those and there is a pretty wide difference of opinion in terms of the feasibility of renovating vs. demolishing at least one component of it. The choice that we are left with is to either approve the EMSDC development or turn it down. If we turn it down, he thinks it will be because of flaws in the process and perhaps the potential for the new alternatives. He doesn't think we can effectively postpone this. If we don't reach a decision tonight, whether we officially turn it down, we will have turned it down. Turning it down at this point will leave us with some very real unknowns in alternatives that are as yet un-designed. They are sketches and concepts but no design or full blown architectural study. It would leave us with unconfirmed costs. Also if we turn it down, we need to consider the $200,000 that has already been spent so far. It is a hard choice. He is convinced that when you weigh the alternatives – where we are at this point in time and the prospects for the future - the only logical choice you can come to is to approve the EMSDC project and move forward. He was very concerned about the process and one of the conditions he would insist on would be that the board representation be changed with EMSDC to be sure that there is full community representation and that process be monitored very closely to be sure that there is full community participation in future decisions relating to the Block. Sometimes you have the participation and a lot of disagreement, but we must have that participation to the fullest extent going forward. He has a lot of confidence in Mr. Rogers, his past experience and his proven track record. When he looks at the alternatives, the pro forma and cost per square foot, he has to rely on those people who have expertise in those areas. He did note that on the figures that Mr. Shuford provided Council on the square footage cost that most of the others who were contacted gave a range and the EMSDC cost per square foot falls within that range, although at the low end. When he weighs all of those things, he comes to the conclusion that we do need to approve this and move on and see some redevelopment occur on the Block.

Councilwoman Jones said that she brought up a lot of issues around organizational capacity a month ago and the EMSCD is on a path to tighten up a lot of the problems that she identified at first glance. She commended the EMSDC Board for working so hard on that. No matter how the vote goes today, that will send them on a road that will make them stronger. She appreciates the optimism of Councilwoman Bellamy but it's important to her to say that she is aware of the things that we are going to lose if we don't approve the project. Money on the table has been identified. She hasn't had problems with David Rogers from the beginning and he has been very helpful and she thinks he would do a great job. We will lose Enterprise Real Estate and that is a huge resource to this community. We will not get the tax credits back. We might have a chance at the EDI. She felt the process does matter. But she does believe that as strong as Councilman Newman's arguments are, that if we have a shot at some of that intent for affordability and to plan out the plan, then she has to vote no for going forward. She understands what we will be giving up and its lose to our community. It is in the community's hands, and she will hold hands with you, to try to see what we can salvage to go forward. This is the hardest vote she has ever cast.

Councilman Dunn said this is one of his hardest decisions as well. To say that we must move on due to the money and studies that have already been presented, when he has heard better ideas, even though they are late, bothers him. He thinks it is a way of rationalization that he can't condone. There was a comment about this being a historical vote. He doesn't think it will change the history of Asheville. Market forces are in place. The Block is coming back. He grew up here and he's seen what it used to be like. This isn't a black or white issue and not one neighborhood against another. To him it involves common sense. When he sees information from staff that says we have this Section 108 money and worse case scenario is that we can pay it back, he felt we are not good stewards with this taxpayer money. It should be dealt with in a very conscientious way. He doesn't see that it is. The Board has worked hard on this but he still has problem with what has gone on in the past. The process has been flawed. Sometimes the best deal you can make is one you walk away from. It troubles him that we are going to lose something big but he sees a re-birth of ideas. He doesn't think this is a lost cause. He can't support something that there are too many uncertainties. He can't believe the pro forma is as good as it is. To say that we are going to use taxpayers money to have a 20% vacancy rate for nine years shows that we are not good stewards of taxpayer's money. That money could be used for other things. He will vote against this. He hoped to reconstitute this Board and move forward in a new direction.

Vice-Mayor Mumpower felt we have a failed planning process. He does think that we have a federally-funded gentrification effort. With that said, he does think a lot of hard work has gone into it with a lot of good minds and well intended people. We have all made our share of errors. When we look at our guiding document, the South Pack Square Redevelopment Plan under goals and objectives, he believes three goals have not been met: No. 4 – To stimulate and nurture small business development and job creation primarily for, but not limited to, the African American Community (he doesn't think this project will do that); No. 5 – to increase property values in the area while at the same time working to ensure the long term affordability of commercial space for small businesses and the long term affordability of housing for low and moderate income residents (he thinks this clearly doesn't do that); and No. 7 – to plan and implement development that is sensitive and responsive to the needs of the people who have traditionally inhabited and conducted business in the area (he doesn't believe this plan does that). Therefore, he will not vote for it.

Councilwoman Bellamy said that when this first came before Council she was optimistic in the future of it. At the last meeting Council had comments from individuals talking about Dr. Martin Luther King's vision, dreams, and goals for our community and for African Americans. Tonight, for her, she feels like we missed it again. This is a hard decision. She has had to ask tough questions. She hates to think that she is letting people down or stopping progress. But she has to stand for what is right. She believes by supporting this project she wouldn't be doing that. She would be legitimizing a process that is exclusive. She'd be saying it's okay to change forms and it is okay not to talk to everyone at the table. She can't do that. She thinks that looking at things as though they could be, even though they are not, isn't a bad thing. She thinks that to add another six months to this process and having everyone at the table isn't a bad thing. She won't support the motion. She will offer other motions moving forward to see some changes.

The motion made by Councilman Newman and seconded by Councilman Davis failed on a 3-4 vote, with Mayor Worley, Councilman Davis and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilwoman Bellamy, Councilman Dunn and Councilwoman Jones voting "no."

After a brief discussion initiated by Councilwoman Bellamy, it was the consensus of City Council to have staff prepare a report at a worksession on what they are doing regarding a renegotiated contract with EMSDC and then give staff further direction.

V. NEW BUSINESS:

A. RESOLUTION NO. 04-52 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Mumpower said that this is the consideration of appointing alternate members to the Board of Adjustment.

The terms of Headlee Howard (Alternate) and Patricia Grant (Alternate) expired on January 21, 2004. In addition, there is a vacancy left by Steven Sizemore (Alternate) until January 21, 2005.

At City Council's worksession on January 20, 2004, City Council instructed the City Clerk to re-advertise for these vacancies.

On February 17, 2004, it was the consensus of City Council to instruct the City Clerk to arrange interviews for John Kiser, Jane Mathews, Lee McElrath, Michael Anders and David Brown. John Kiser has moved out of the City and would not attend the interview.

Jane Mathews received 3 votes; Lee McElrath received 7 votes, Michael Anders received 7 votes, and David Brown received 4 votes. Therefore, Lee McElrath and Michael Anders were appointed as Alternate members to the Board of Adjustment to each serve a three year term respectively, terms to expire January 21, 2007, or until their successors have been appointed. In addition, David Brown was approved as an Alternate member to serve the unexpired term of Mr. Sizemore, term to expire January 21, 2005, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 150

B. RESOLUTION NO. 04-53 - RESOLUTION APPOINTING MEMBERS TO THE FILM COMMISSION

Vice-Mayor Mumpower said that Ray Sanow has resigned as a member of the Asheville Film Commission, thus leaving a vacancy on the Commission until November 1, 2006. In addition, Gail Wurthner has resigned from the Commission, thus leaving another unexpired term until November 1, 2004.

At City Council's worksession on February 17, 2004, City Council instructed the City Clerk to arrange interviews for Lillian Alexander, Matthew Marquis, David Schulman, Jim Lawrence and Jon Menick. Mr. Menick had a prior commitment and could not be able to attend the interview.

It was the consensus of Council to appoint Jim Lawrence as a member to the Asheville Film Commission, to serve the unexpired term of Mr. Sanow, term to expire November 1, 2006, or until his successor has been appointed. In addition, David Schulman was appointed as a member to the Asheville Film Commission, to serve the unexpired term of Ms. Wurthner, term to expire November 1, 2004, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 151

VI. OTHER BUSINESS:

Asheville Community Resource Center

Upon inquiry of Councilwoman Bellamy, Mayor Worley said that City Council has received correspondence about the Asheville Community Resource Center and the Asheville Free School losing their lease at 63 N. Lexington Avenue. He advised Council that the landlord is terminating their leases and the City of Asheville, regretfully, has no ability or authority to do anything regarding that.

Claims

The following claims were received by the City of Asheville during the period of January 30-February 13, 2004: Cheryl Singles (Water), Jim Lowe (Water), CP&L (Water), Mark Morales (Water) and Janet McPherson (Fire).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English was opposed to the City's public access television station.

Mr. Don Yelton presented City Council with information off of the URTV's (public access television station) website which one day read "You can make a show about anything that you want, and no one can legally censor it unless it breaks federal laws." He then presented Council with a copy of the information off the website the following day that has that language deleted. He expressed his concern about this station and material that would be shown on it.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:04 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

26

Tuesday – March 9, 2004 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson
Absent:	None

PLEDGE OF ALLEGIANCE

Ms. Ann Deweese, retiree from the U.S. Army Air Corp, led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 24, 2004

B. RESOLUTION NO. 04-54 - RESOLUTION AMENDING THE 2004 SCHEDULED CITY COUNCIL MEETINGS TO CANCEL THE MARCH 30, 2004, CITY COUNCIL WORKSESSION

RESOLUTION BOOK NO. 28 – PAGE 152

C. RESOLUTION NO. 04-55 - RESOLUTION ACCEPTING MYRA PLACE AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept Myra Place in Maple Grove Subdivision off East Starnes Cove Road in west Asheville as a City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Myra Place is a developer-constructed street with an average paved width of 20 feet. The street is approximately 0.09 miles in length and ends with a cul-de-sac. Engineering Department staff inspected this street finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Myra Place will be added to the official Powell Bill list. A two-year warranty, from the date of City Council's acceptance, will be required by the developer to cover major failures in the roadway.

Staff requests City Council adopt the resolution accepting Myra Place as a City maintained street.

RESOLUTION BOOK NO. 28 – PAGE 153

D. RESOLUTION NO. 04-56 - RESOLUTION SETTING A PUBLIC HEARING ON APRIL 13, 2004, TO CONSIDER ADOPTION OF AN ORDINANCE DIRECTING THE DWELLING LOCATED AT 86 CRAYTON ROAD BE DEMOLISHED

Summary: The consideration of a resolution setting a public hearing on April 13, 2004, to consider adoption of an ordinance ordering demolition of 86 Crayton Road.

The dwelling at 86 Crayton Road is a small wooden dwelling containing approximately 450 square feet with missing windows, doors and a porch that is caving in upon itself. The property owner, D.P.S. Properties, a North Carolina General Partnership, has failed and refused to demolish the dwelling in compliance with the Order entered by the Code Enforcement Officer (CEO).

A Complaint and Notice of Hearing was issued on the 17th day of December 2002. A hearing was held on January 8, 2003. Following the hearing, a Findings of Fact and Order was entered and served on the owner. The owner agreed to demolish the dwelling by July 1, 2003, but failed to do so. To date, no corrective action has been taken by the owner and the dwelling continues to remain a safety hazard, at times open and accessible to the public and unfit for human habitation.

The Housing Code requires adoption of an Ordinance ordering a dwelling demolished before the CEO may proceed with demolition. The fair market value of the dwelling according to the Buncombe County Tax Records is $13,600; the estimated cost to make the dwelling compliant with the Code is from $15,000-$20,000. Affordable housing agencies were notified. Staff plans to utilize Community Development Block Grant funds for demolition.

Advantages of the demolition include:

- Improve the appearance of the neighborhood (remove blight)
- Prevent vagrants and vandals from occupying the dwelling
- Prevent neighborhood children from playing in the dwelling and reduce the risk of injury
- Remove the safety and fire hazard

Disadvantages of Demolition include:

- Demolition of a dwelling that has potential for rehabilitation
- Utilizes public funds to eliminate a private nuisance

City staff recommends adoption of the resolution setting a public hearing on April 13, 2004, to consider an ordinance ordering that the property located at 86 Crayton Road be demolished.

RESOLUTION BOOK NO. 28 – PAGE 154

E. RESOLUTION NO. 04-57 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH HOBSON CONSTRUCTION CO. INC. FOR THE PROJECT KNOWN AS 2002 ANNEXATION AREAS SEWER SYSTEM IMPROVEMENTS

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Hobson Construction Company, Inc., in the amount of $110,700, for the 2002 Annexation Areas Sewer System Improvements Project.

This project consists of the installation of approximately 870 linear feet of eight-inch diameter sanitary sewer line and related appurtenances.

The Engineering Department received and publicly opened three bids on Thursday, February 5, 2004, at 2:30 p.m. After a thorough review of the bid documents by the Engineering Department and the Office of Minority Affairs, Hobson Construction Company, Inc., was found to be the lowest responsible bidder with a total bid of $110,700.

The project will be financed with monies from Capital Improvements Fund.

Hobson Construction Company, Inc., has performed several projects of this nature in the past in a satisfactory manner.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

The advantages and disadvantages of adopting a resolution authorizing the City Manager to execute this contract are as follows:

- The execution of this contract will allow the City to proceed with meeting the requirements for sanitary sewer system improvements, as established in the 2002 Annexation Areas Plan of Services;
- The bid amount of $110,700 for the construction of the 2002 Annexation Areas Sewer System Improvements Project is equitable, as compared to recent construction projects of the same nature;
- The only foreseeable disadvantage of adopting a resolution authorizing the City Manager to execute this contract is the temporary land disturbance along the proposed sanitary sewer construction corridor.

Staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with Hobson Construction Company, Inc., in the amount of $110,700, for the 2002 Annexation Areas Sewer System Improvements Project.

RESOLUTION BOOK NO. 28 – PAGE 156

F. RESOLUTION NO. 04-58 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH APAC-ATLANTIC, INC., FOR THE PROJECT KNOWN AS CONTRACTED PAVING 2003-04

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with APAC-Atlantic, Inc., Asheville Division, in the amount of $300,025.25, for the project known as Contracted Paving 2003-2004.

The City annually allocates monies to rehabilitate city streets that are in need of repair as listed on the Institute for Transportation, Research and Education (ITRE) report. City Engineering and Public Works staff assessed several streets listed on the ITRE report and chose seventeen streets to be resurfaced based upon their condition and the staff members opinion of probable cost to resurface.

The Engineering Department developed construction plans, documents and specifications for resurfacing Country Club Lane, Herron Avenue, North View Street, Quarry

Road, Vineyard Place, Lucky Lane, Fernbrook Place, Pine Meadows Road, Pine Meadows Drive, Hillcrest Road, Oak Hill Road, Eastview Avenue, Peace Street, Digges Road, Redfern Street, Balsam Avenue, and Clayton Street.

The project was advertised on January 4, 2004. The Engineering Department received bids on Thursday, February 5, 2004. Only one bid was received at this bid opening. The project was re-advertised on February 15, 2004. The Engineering Department held a second bid opening on Tuesday, February 24, 2004. One bid was received and opened. The single bid received was from APAC-Atlantic, Inc., Asheville Division in the amount of $300,025.25.

Money for this resurfacing (paving) contract is currently budgeted in the Public Works Department's operating budget.

The construction time for this project is identified as 120 calendar days in the contract documents. The contractor will be required to pay the sum of $250.00 as liquidated damages for each and every calendar day that he shall be in default after the time stipulated in the contract.

The advantages and disadvantages of adopting this resolution are as follows:

- The execution of this contract will allow the City to proceed with rehabilitation of paving surfaces on several City streets that have been identified as needing repair, thus providing a new riding surface for the convenience of all riders;
- Based upon the engineer's estimate for this project of $305,582.00, staff believes the bid submitted by APAC is reasonable. Furthermore, the bid was deemed responsive pursuant the analyses performed by the Office of Minority Affairs.
- The only foreseeable disadvantage of adopting a resolution authorizing the City Manager to execute this contract is the temporary inconvenience to City residents that reside within or in the adjacent areas where construction is to take place.

City staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with APAC-Atlantic, Inc., Asheville Division in the amount of $ 300,025.25 for the project known as Contracted Paving 2003-2004.

RESOLUTION BOOK NO. 28 – PAGE 157

G. ORDINANCE NO. 3091 – SECOND READING OF AN ORDINANCE GRANTING A FRANCHISE TO DUKENET COMMUNICATIONS, LLC, PURSUANT TO THE CITY'S TELECOMMUNICATIONS ORDINANCE

Summary: The first reading of this ordinance was on February 24, 2004. Because this is a franchise, it requires two separate readings.

ORDINANCE BOOK NO. 21 – PAGE [illegible] 60

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

30

A. PUBLIC HEARING RELATIVE TO A CONDITIONAL USE PERMIT REQUEST FOR PROPERTY LOCATED ON COURTLAND AVENUE (FLYNN HOMES) FOR A GROUP HOME DEVELOPMENT OF RESIDENTIAL BUILDINGS AND LIMITED OFFICE

ORDINANCE NO. 3095 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON COURTLAND AVENUE (FLYNN HOMES)

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:07 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of the issuance of a conditional use permit for property located on Courtland Avenue and Houston Street (Flynn Homes) for a group home development of residential buildings and limited office.

The applicant, Flynn Christian Home, is requesting a Conditional Use Permit for a 3.82 acre parcel to allow for the operation of a group home in a RS-8 Residential Single Family High Density District (Attachment to City Exhibit 3 – Block Aerial). The group home will consist of three separate buildings, along with nine required off-street parking spaces, bicycle racks, sidewalks, and landscaping as required by the Unified Development Ordinance (UDO). As a result of discussions with the neighborhood and City staff, the following are changes to the site plan (City Exhibit 4 – Alternate Site Plan). The site plan addresses in part one of the issues that had to do with driveways. Originally the site plan had one large 24-foot wide drive that led to a single large parking area. The revision shows two separate driveways. We are, however, looking at providing three separate driveways at the request of the neighborhood to help the residences appear to be more single-family in style. Also, the parking areas will be separated. There will be individual parking areas behind the buildings with their own individual drive, pursuant to the City's Traffic Engineer. Another site plan revision, still being worked out, deals with the landscape buffer requirements. There is concern from some of the residents about the unnatural appearance of the buffer but still need screening. The neighborhood wants something that blends with the existing wooded lot and with the existing neighborhood. Staff is willing to contemplate an alternative compliance that will help create the screen necessary but group and mass the plants in a more natural configuration.

The group home itself will consist of three separate buildings. The first building is described as an administrative building with limited office space and three residential units for full-time, live-in staff (Building A in City Exhibit 4). The other two buildings are reserved for residents of the group home with the first of the two additional buildings housing up to 8 residents while retaining the lower level as a common area/kitchen space. The second residential building will house up to 16 residents with a common living room on the first floor. The two resident buildings will share the kitchen and larger gathering area in Building A, operating together as a single unit. This single unit, when combined with the individual residences of the full time staff, will total 4 dwelling units. All three buildings will be modular two story construction on block foundations and will be single family in style and operation.

In addition to the 3 residential structures, the preliminary concept plan (Attachment to City Exhibit 3 – Preliminary Concept Plan) showed 14 off-street parking spaces to be provided behind the buildings and screened from view with existing vegetation. This vegetation will be supplemented as required by the landscape ordinance to meet the 15' type 'A' landscape buffer standards. The project also requires sidewalk along all road frontage, bicycle parking, parking lot landscaping, street trees, and architectural standards to ensure the compatibility with adjacent homes in the area. This permit will also restrict the number of beds for the two resident buildings not to exceed 24 in total.

The project site is located within the City limits and is surrounded on three sides by single family homes all zoned RS-8 while the western property line borders unzoned right-of-way for Highways19/23/70. The subject property is a through lot with frontage on both Courtland Avenue and Houston Street with access for the home to be located off of Courtland Avenue. The three proposed structures and parking area are concentrated on the most topographically accommodating portion of the site with the areas of more extreme topography to be undisturbed.

As part of the special requirements applied to group homes as a conditional use in the RS-8 zoning districts per Ordinance No. 3052, the project must meet several conditions for group homes. Staff's review of this project finds that the proposed use does meet all the group development standards as well as the seven conditional use standards. The following are the standards for group homes:

a. Separation requirement: Group homes containing more than eight residents shall be separated from other group homes in RS-8 by a distance of 600 feet as measured from the closest property line of each property containing a group home.
There is well over 600 feet of separation between the proposed site and the next nearest group home (City Exhibit 5 – Digital Survey of the Properties within the 600 foot radius)

b. Parking shall be located in the rear and shall be screened with vegetation from adjacent single family uses. The vegetative screening shall consist of the planting required for a Type A buffer or its equivalent as determined through the alternative landscape compliance process.
Parking is located in the rear and will be screened from view through preservation of existing vegetation (City Exhibit 4), additional landscaping as required for a Type A buffer, and existing topography.

c. It is the intent of these standards to ensure that group home structures resemble other residential structures in the neighborhoods where they are to be located. Pursuant to this intent, a group home structure shall be architecturally compatible with residential structures in the area in which it is to be constructed. Architectural compatibility shall be determined based upon compliance with the following standards:

32

The structure shall be oriented on the lot in a manner similar to the residential structures on both sides of the street on the block on which it is to be constructed.
The proposed structures are oriented to the street in a manner very similar to those residences on Courtland Ave. Homes located on the north side of Courtland are oriented towards Courtland Place.

In the RS-8 district, the structure shall have a single front entrance and any other entrances as required under various codes shall be located on the side(s) or rear of the structure.
All three proposed modular structures will be altered to have a single front entrance with other entrances located to the sides or rear.

The height of the structure shall be no more than four feet taller than the height of the tallest residential structure located on the side of the street on the block on which the proposed use is to be constructed.
The proposed structures are two-story and will not be more than four feet taller than the height of the tallest residential structure located on the same side of the street.

The roof design, pitch and materials proposed for the structure shall be similar to the roof design, pitch and materials of the residential structures on both sides of the street on the block on which it is to be constructed.
The roof design, pitch and materials proposed will be similar to those of the existing residential structures on the block.

A front porch shall be provided on the proposed structure if a majority of the residential structures on both sides of the street on the block on which the new structure is proposed have front porches.
Front porches are proposed for all three structures to reflect those of the majority of the homes on the block and in the neighborhood.

The front yard depth for the proposed structure shall be not less than the average front yard depth for the residential structures on the same side of the street on the block on which the new construction is proposed.
The front yard depth is not greater than the average front yard depth for the residential structures on the same side of the block.

In RS-8 districts, the floor area of the group home structure shall not be more than 150% larger than the average floor area of single family residential structures in the same block.
The proposed structures have an approximate floor area of 1,500 s.f. which does not appear to be more than 150% larger than the average on the block.

d. It is the intent of this section that group home uses will be located in areas where employment, goods, and services can readily be reached by a variety of means of transportation. Transit, a sidewalk network, and/or close proximity to employment, goods, and services shall be required for approval of a conditional use permit for a group home unless the intended residents of the group home do not require this service.
Although this stretch of Courtland Avenue is not presently served by sidewalks, the proposed location is in a neighborhood that has an extensive sidewalk network and is in close proximity to employment centers, goods, and services. In addition to being able to utilize the sidewalk network, public transit is available nearby with a bus stop located near the intersection of Courtland and Montford Avenue with short bus rides to other major employment areas in the City.

e. The group home structure(s) and the site on which it is located shall be maintained in accordance with standards established by applicable local and state regulations, including, but not limited to, the City of Asheville Minimum Housing Code. The City Council may require the submittal and implementation of a specific maintenance plan in order to ensure proper maintenance of the property in accordance with this provision. **The proposed structures will meet the City of Asheville minimum housing code regulations and will be within standards of development practice set forth by the City of Asheville and other governmental units.**

At their February 16, 2004, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the conditional use permit and made a positive recommendation that the project be forwarded to City Council stipulating the condition that a revised site plan addressing minor site plan changes be submitted prior to final approval. If approved by City Council, this project must return to TRC for a more detailed review. Review by the Planning and Zoning Commission is not required for this application.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.
The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety. In addition, the proposed development meets the definition of a group home as defined in Ordinance No. 3052(g): "Group home means a residential home provided by an agency, organization or individual for persons who need sheltered living conditions for rehabilitation, but not including mentally ill persons who are dangerous to others as defined in N.C. Gen. Stat. sec.122C-3(11)b (or its successor)." Residents of the home have gone through treatment, are not charged with any crime, and are not considered a threat to the public.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
The three proposed structures and their parking areas have been sited in the most buildable portion of the site where existing grades don't exceed 3% in order to minimize grading and other land disturbing. The remainder of the 3.82 acre site's topography forms a ravine with side slopes ranging from approximately 15-75% grades. The side slopes are stable with existing natural vegetation to be preserved along with the vegetation around the periphery of the property to help buffer neighboring properties.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
Historically, the Flynn Christian Home has operated without incident in the Montford neighborhood for over 40 years. The property has been well maintained and has not had an adverse impact on property values in their current location

34

where property values have increased dramatically in the last decade. The proposed residential structures are to be single family style structures intended to blend in with the surrounding properties and are not expected to injure property values of adjoining or abutting properties.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located. **The surrounding properties are made up of single family homes and duplexes of various sizes and architectural styles. The proposed homes are to be single family in style, varying somewhat in architectural form from one another, helping them to blend into the character of the existing eclectic neighborhood (City Exhibits 6, 7 and 8). The applicant is exploring options with City Staff, the City's Historic Resources Commission Director, and the neighborhood on additional facade and material alterations to further enhance the structures along with minor site changes to reduce the coverage of the parking area. In addition, the proposed group home meets the architectural standards necessary for group homes in an RS-8 zoning district.**

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City. **The Asheville City Development Plan 2025 describes the need to accommodate and encourage infill housing for a larger proportion of the region's population in areas where existing infrastructure can support new development. This is further supported by City Council's adoption of 'Smart Growth Definition and Policies' in 2000. In addition, this proposal is supported by the City of Asheville's Consolidated Housing and Community Development Plan 2000-2005 which calls for the need to develop affordable housing for low income people with special needs, including those individuals who are recovering from substance abuse.**

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities. **The proposed development is located near transportation facilities and other utilities appear adequate. The project area is located within walking distance of downtown, near major road facilities, interstate connections and very near the route 11 bus line that serves Montford. Preliminary review by other utility providers has not revealed any problems for serving the development.**

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard. **The proposed development will not substantially increase the number of cars operating on Courtland Avenue or Houston Street. Most residents of the Flynn Christian Home will be using alternative modes of transportation and off-street parking will be limited to 9 parking spaces for all four residential units. Courtland Avenue and Houston Street are both somewhat narrow and winding; however, the City of Asheville's Traffic Engineer has examined the roads and does not expect the vehicular traffic from the proposed development to significantly impact traffic on either street.**

Approval of this project will allow for the continued operation and expansion of a highly successful, non-profit group home that has provided an extremely valuable service to the larger Asheville community. In addition to supporting this service, the proposed development will meet City of Asheville Smart Growth and other land use goals by encouraging infill development while providing for an alternative housing option for a protected class of citizens in a supportive and well connected neighborhood.

Pros:

1. Allows for the relocation and expansion of a valuable group home in the same neighborhood in which it has operated for over 40 years.
2. Provides valuable housing option for a protected class of citizens.
3. Allows for the development of an appropriate infill project where existing infrastructure can be utilized.
4. Home will be located in excellent proximity to employment, services, goods, and transportation options.
5. Additional sidewalk will be provided in neighborhood.
6. Master Plan will ensure the preservation of open space and much of the existing vegetation.

Cons:

1. The current design of the homes may not match the historic character of the surrounding community.
2. Lose potential for single family home subdivision similar to existing development in the area.

City staff recommends approval of the project with the condition that the applicant meet all the outstanding TRC conditions.

Mr. Harry Giezentanner, Chairman of the Board of Flynn Christian Homes, said that including himself there are two general contractors on the Board. The Board has created a building committee that includes both contractors to develop and build this project. The committee will oversee the development and be responsible for all payables with regard to the project. We will obtain competitive bids for each part of the development. No board member will personally gain any financial consideration for the entire project. He explained that the Flynn Home has been located in the Montford community for 42 years and has always been a good neighbor. The buildings they propose to construct will be assets to the community and the City. They mailed out 63 invitations for their neighborhood meeting and only six members of the community attended. After discussing the plan, there were concerns as to how their project would fit into the neighborhood. They propose to make the buildings totally different in appearance and will build separate driveways from the streets to the parking in the rear. In addition, they had added a buffer along the rear portion of the lot to shield the view of Houston Street. The property is not in the historical district, but they intend to follow some of the guidelines of the Historic Resources Commission (HRC). All handrails and porch details will follow their guidelines. They will ask for assistance from the HRC Director to implement as many of the guidelines as affordable for their project. A concern of a neighbor is the curb-service drug dealing activity on the lower end of Courtland and Houston. He assured Council that with the help and cooperation of the Asheville Police Department they will eliminate this activity at this location. He said this is an excellent location for our home and it is located on a bus route. Being a builder and developer of affordable homes in Asheville, he assured Council that this site is not suitable for single-family homes. With the demand for buildable lots in the City to develop, if this was the case, this land would have long been gone. (Applicant Exhibits 1 and 2 – Photos of Adjoining Homes)

Upon inquiry of Councilman Newman, Mr. Giezentanner said the site is not appropriate for single-family homes because less than ¾ of the 3.8 acres is buildable due to the topography.

The following individuals spoke in favor of a conditional use permit for several reasons, some being, but are not limited to: they have been in existence for 42 years and they haven't

36

received any negative press; they have funds to build a nice facility; construction will go quickly because they will be using modular construction; they will blend into the neighborhood; people will be in that area whether the homes are there or not; personal testimonies of how the Flynn Home helps people; existing property is always clean; no disruptions from residents at Flynn Home; the Flynn Home residents are good neighbors and are part of the solutions, not the problems; and problems in the neighborhood were worse before Flynn Homes was built:

Mr. John Gustafson, General Contractor and Board member of Flynn Christian Homes
Mr. Alan Ditmore, Leicester resident
Mr. David Nesbitt, former Flynn Home resident
Mr. Bobby Miller, former Flynn Home resident
Mr. Keith Levy, 28 Woodlawn Avenue
Mr. Shawn Miller, former Flynn Home resident
Mr. Fred English, Haw Creek resident
Mr. Grant Millin, Oteen resident
Mr. Michael Robbins, Manager of Flynn Christian Homes
Mr. Gerald Green, 150 Cumberland Avenue

The following individuals spoke against issuance of a conditional use permit for several reasons, some being, but are not limited to: the area is already infested with drug sellers and drug users and if the Flynn Home is trying to help people, they shouldn't put them so close to the illegal activity; drug activity is coming from Hillcrest and Klondyke right though that area; Courtland Avenue is a narrow road; back in March of 2003, a Mountain Xpress article quoted Executive Director Laurie Tollman saying that "we do not admit sex or violent offenders", however, a search of the N.C. Sex Offender & Public Protection Registry revealed that a sexual offender's address was "182 Cumberlin Ave., Asheville, N.C. (the existing Flynn Home address); safety of area residents is a major concern if the Flynn Home allows registered sex offenders to live there; the project does not fit into the residential character of the neighborhood; petition containing 79 names circulated which reads ""We do not agree with this rehabilitation facility, group home, building larger-scale modular homes in our community that we are working everyday to rise from its existing challenges;" homes and vehicles are being broken into; William Randolph Disciplinary School, a detox and recovery home on Pearson Drive, Klondyke Apartments and Hillcrest Apartments are already located in area; fear for safety of 39 single people living on Courtland Avenue, Houston Street and Courtland Place; density is too high in that area already; safety for people in the neighborhood from those people who are kicked out of the Flynn Home for alcohol, drug abuse or mental illness; concern there is no staff living in the resident buildings which will be like a frat house; odd that they are building a $700,000 project to increase their bed size by only 8; residents of area would prefer a 4-bedroom home built; this is more of a facility than a group home; moving people from a home into a treatment-like facility is not an enhancement; crime in area will increase; safety of children in the two elementary schools in the area; existing lack of timely response when calls are made to the Police Department; the project will increase traffic on the lower end of Courtland Avenue; need for a red light at intersection of Montford Avenue and Courtland Avenue; need for sidewalks starting on Houston, Courtland and Pearson Drive; loud boom-boxes are heard in cars already; marketability of homes will decrease; need for traffic control on Courtland Avenue; prostitution in area; the Flynn Home's property was purchased at a much lower price than other property in the area; there is no such thing as an unbuildable lot; this is a business moving into a residential neighborhood; what are qualifications of the staff to deal with the residents that have substance abuse problems; screening concerns; and one of the structures doesn't have a kitchen so it's not a home:

Mr. Clarence Benton, 184 Courtland Place
Mr. Brendan Merithew, 103 Houston Street (Neighborhood Exhibits 1 and 2)
Mr. Rod Phillips, 125 Courtland Avenue
Ms. Marita Bennett, 196 Courtland Place (Neighborhood Exhibit 3)

Recent resident in Montford
Mr. Bryan Kenrich, resident on Houston Street (Neighborhood Exhibit 4)
Resident on Houston Street
Ms. Heather Smith, 10 Houston Street
Mr. Barry Trahan, resident on Courtland Place
Resident at 68 Courtland Avenue
Ms. Nora Valentine, 131 Courtland Avenue
Ms. Lauri Nichols, 146 Courtland Avenue
Ms. Marsha Shutz, 51 Houston Street
Mr. Barry Nichols, 146 Courtland Avenue
Ms. Kathryn Temple, area resident

Ms. Laurie Tollman, Executive Director of Flynn Christian Fellowship Homes, said the definition of a group home defined in the N. C. Gen. Statutes is "Group home means a residential home provided by an agency, organization or individual for persons who need sheltered living conditions for rehabilitation, but not including mentally ill persons who are dangerous to others." They do not admit persons who would be considered dangerous to others. Regarding the convicted sex offender who is registered living at their current address, she explained how that was an extenuating circumstance. She reviewed the details with Council on how the registered sex offender was allowed to live at their facility. That person is no longer at their facility. She then explained how she reviews each applicant on a case-by-case basis. Since that issue has come up, their Admission Policy (Applicant Exhibit 3) has been amended to deny admission to anyone who has a sexual offense conviction on their criminal record. If that case comes up in the future, they will not be allowed to live in their facility.

Upon inquiry of Councilman Dunn, Ms. Tollman explained the application and interview process of how people are referred to the Flynn Home. She said that they would not admit anyone who would be potentially dangerous, like a violent sex offender. If someone said they had been convicted or had charges pending, she personally would not feel comfortable in admitting them. However, she looks at each individual person on a case-by-case basis as far as the type of criminal activity.

There was a brief discussion on what type of offenses a person would be kicked out or denied admission.

Upon inquiry of Councilwoman Jones, Ms. Tollman said that they have a zero drug and alcohol tolerance policy. They conduct random drug and alcohol tests on a monthly basis. If anyone tests positive, they are immediately discharged. If someone comes into the home with alcohol on their breath, they are tested.

Councilwoman Bellamy asked what are some of the other instances where someone would be evicted. Ms. Tollman said if someone is not working and doesn't pay their rent, if they engage in disruptive behavior (which is often disrespect to staff), non-compliant with the rules, if they come in late for curfew, constantly arguing with staff about the rules, and other instances set out in the Admissions Policy (Applicant Exhibit 3).

Upon inquiry of Councilman Davis, Ms. Tollman said that there will be a staff person living in one of the two buildings assigned for resident quarters. However, there will be staff on the premises 24 hours a day.

Councilman Davis felt the admission of the sex offender to the Flynn Home seemed like it was an arbitrary decision on the part of the Executive Director. Ms. Tollman replied that she would not do that again, even if there are extenuating circumstances. She would abide strictly by the Admission Policy.

Discussion, initiated by Councilman Dunn, centered around the admission of people that have mental illnesses. Ms. Tollman said that if their primary diagnosis is substance abuse they can be admitted. If mental illness is their primary diagnosis, they will not be admitted because their facility is not equipped to handle that.

Upon inquiry of Councilman Newman, Ms. Tollman said the average length of stay in the Flynn Home is 3-4 months, but they can stay up to two years.

When Councilman Davis inquired who approves admission, Ms. Tollman said that she and her manager review the applications and conduct the interviews.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tuch said that she talked to Lieutenant Benson, patrolling officer for this neighborhood, and asked for a call history over the past year. She said that there were no disruptive instances reported from the Home within that last year. She then called the crime analysis division that can research further back. There were a variety of calls – a couple disruptive calls, one of which was a resident of Flynn Home was being harassed on someone on the street. There also were calls about intoxicated individuals on the premises, reported by the Home itself. Also, some EMS calls. In the course of 6 years, there were only 3 calls for intoxicated people and 3 calls for disruptive.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tollman said that approximately 20 people have been kicked out for rule violations. She said that they currently house about 9 or 10 residents. She also said that she would feel comfortable staying there herself.

Mayor Worley closed the public hearing at 6:56 p.m.

Upon inquiry of Councilman Newman about the building designs, Ms. Tuch said that the HRC Director has already been consulted and the applicant has agreed to build, where appropriate, to HRC standards even though they are not required to do so.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tuch explained how the block was determined to come up with the average square feet of the homes (City Exhibit 9).

When Vice-Mayor Mumpower asked about sidewalk construction plans, Ms. Tuch said that this particular site will be required sidewalks from the edge of the third building forward, along their frontage on Courtland Avenue. The City's Traffic Engineer has granted them "a fee in lieu of" for the remainder of the area since it is not part of where the buildings are fronting. She was not familiar with any other sidewalk improvements for the remainder of Courtland Avenue.

Upon inquiry of Vice-Mayor Mumpower, Field Services Coordinator Ed Vess said that this property has been discussed if anyone approaches him looking for that size of City-owned land. This property was a landfill area. There have been some test borings done and there is organic material in there. The Flynn Home is aware of those problems. The property can be built on, but it will be a little more expensive.

When Vice-Mayor Mumpower asked if they could expand on this site, Ms. Tuch said they could not expand under this permit. She said they could come back in the future and try to amend the permit but they would have go through the entire conditional use permit process again.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tuch said that our existing guidelines do not limit the number of buildings that can be considered a group home. She said that one of the reasons the Flynn Home is taking the approach they are about having separate buildings is to try to prevent the construction of a large institutional-like looking building.

Councilman Newman asked if there are other group homes in Asheville similar to this. Ms. Tuch said that she is not aware of any but sometimes it's difficult to discern group homes from other structures. She said the Planning Department does not keep records of where group homes are located.

Upon inquiry of Councilwoman Bellamy, Mr. Giezentanner said that the existing structure will be put on the market for sale. He said the Board assures that the Admissions Policy will be followed.

When Councilman Davis asked if there were any plans to add staff, Mr. Giezentanner said that he was not aware of any additional staff to be hired.

Upon inquiry of Councilwoman Jones, Ms. Tollman said they would be open to explore a staff person to reside in each of the residential buildings.

Ms. Tollman responded to Councilman Dunn on why the Flynn Home was not interested in building a large 3-4 bedroom home to house the additional people.

Regarding a question from Councilwoman Jones about traffic calming on Courtland Avenue, Ms. Tuch said that the City's Traffic Engineer is not concerned about the increase of traffic. However, regarding traffic calming, the City would have to weigh that street against the other streets in the City.

Councilwoman Bellamy asked if it would be possible to limit right turns out of the development. Ms. Tuch said that this project will have to return to TRC for final approval and if these are Council's concerns, we can incorporate that into the conditions to be examined by the Traffic Engineer.

Upon inquiry of Councilman Dunn regarding other facilities in the area, Ms. Tuch said that there is the Asheville-Buncombe Community Christian Ministry on Cumberland (not a group home); a counseling treatment facility on or near Pearson; and a battered women and children shelter on the far end of Hillside Street.

Responding to Councilwoman Bellamy, Ms. Tollman explained that after City Council denied their request for a conditional use permit at another location a lady called and said there was some property in Montford that they might be interested in investigating. She said they have not bought the property yet.

Councilman Newman said that he lives off Courtland Avenue and would never do anything that he thought would be a genuine safety problem. He believed the testimony that the Flynn Home has an effective history of taking responsibility of doing business in our community. He used to live closer to the Flynn Home on Montford Avenue and didn't even know the house was a group home showing that they have operated very harmoniously in our community. People have made a convincing case that we have problems with drug activity in this neighborhood, but the Flynn Home doesn't have anything to do with that or that it would make that situation worse. He walks in this area very frequently and feels that having development on this site will be a positive thing in terms of addressing drug dealing or other kinds of criminal activity in that area. The area is now isolated and having development will contribute to the safety of the street and larger neighborhood. He thinks that the project does fit in pretty well with the neighborhood. As the City looks at addressing homelessness in our community, organizations like the Flynn Home fill a very important part of work we will have to do to address the problem of homelessness and related conditions. As a neighborhood resident and as a City Council member who thinks the Flynn Home has followed the standards for a good project, he moved to approve the conditional use permit subject to (1) the applicant meeting all outstanding TRC conditions; and (2) that the

40

Flynn Home be prohibited from having on their property the presence of any clients who has a conviction of some sort of sexual offense on their record. This motion was seconded by Councilwoman Jones.

City Attorney Oast reminded Council that this is not a referendum on the Flynn Home or the work they do, although the work they do is relevant to Council's consideration. If it is important to Council that the Flynn Home be the entity that operates this group home, the fact that the City owns the property gives us an opportunity to deed restrict it and make the conditions even more binding than the conditional use permit.

Councilwoman Jones asked if Councilman Newman would be consider amending his motion to include the following additional conditions: (1) that for each building that has living quarters that there be staff presence in the buildings; and (2) that our Engineering staff work with the developer to look at some speed bumps in those problematic areas.

Councilman Newman agreed with the two additional conditions suggested by Councilwoman Jones.

Councilwoman Bellamy asked for a condition that the Traffic Engineer look at the site plan to see if it is feasible to limit right turns from the development.

City Attorney Oast suggested that since issues have been raised issues about traffic and traffic calming measures, perhaps the condition should be that the Traffic Engineer consider additional traffic calming measures during the technical review process, to include limiting right turns out of the development and speed bumps.

Councilman Dunn said that the first condition of the conditional use permit is that the development will not endanger public heath or safety. If the conditional use permit passes and we start having problems with health and safety, does the City have any recourse? City Attorney Oast suggested that Council direct him to make the conditional use permit part of the deed to the Flynn Home (or whoever is the entity that owns it) and that gives the City more enforceability. However, even if the language is not incorporated in the deed, it is in the conditional use permit and we can invoke proceedings to revoke the permit if a condition is violated. Councilman Dunn suggested that the conditional use permit be incorporated as part of the deed.

Councilman Davis is familiar with the Flynn Home and it's good work for the community. He was concerned that the neighborhood has voiced a lot of concern over illegal activity in the area, but the Flynn Home has nothing to do with that. He would be supporting the conditional use permit.

Councilwoman Bellamy said that Council needs to address the issues at are occurring in the neighborhood outside of the Flynn Home, e.g., traffic congestion, street maintenance, etc.

Councilwoman Newman felt the City should institute some process of when a group home is created in our community that they have to fill out some type of permit so we know where the group homes are. They can fit in great, but we don't want one or two neighborhoods to disproportionately have to bear the weight of these types of facilities. Councilwoman Bellamy said her only concern about that was the listing of addresses for domestic violence shelters.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tollman said that a staff member in both buildings would not have a lot of impact to their organization.

Councilman Dunn asked if the neighborhood finds that the Flynn Home is out of compliance with the standards of the conditional use permit, can they bring suit against the City.

City Attorney Oast said that normally the City gets complaints and then they investigate them. If appropriate, the City then takes Code enforcement action. It would be possible for nearby property owners to take action on their own to get the City to take action or could sue the operator of the property directly.

Vice-Mayor Mumpower said that this project does appear to meet UDO requirements. The most compelling argument was the issue of a group home(s) vs. a group facility. The developer has made a good effort to make it the three homes work in the neighborhood but that is a large footprint. He felt this neighborhood does not have adequate police protection. In addition, Asheville does not adequately fight our drug problems in the City. But, he doesn't hear that Flynn Home has a high probability to make things worse. There is even the possibility that having more "eyeballs" on the community makes the community safer.

Councilman Newman and Councilwoman Jones each agreed to include in their original motion (and second) to approve the conditional use permit subject to the following conditions: (1) the applicant meeting all outstanding TRC conditions; (2) that the Flynn Home be prohibited from having on their property the presence of any clients who has a conviction of some sort of sexual offense on their record; (3) that for each building that has living quarters that there be staff presence in the buildings; and (4) the Traffic Engineer consider additional traffic calming measures during the technical review process, to include limiting right turns out of the development and speed bumps (noting this would be an evaluation by staff with the final decision being made according to technical criteria).

Councilman Dunn moved to amend the original motion to direct the City Attorney to incorporate the conditions of the conditional use permit into the deed to the Flynn Home (or whoever is the entity that owns it). This motion was seconded by Vice-Mayor Mumpower and carried on a 6-1 vote, with Mayor Worley voting "no."

The amended motion carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 84

At 7:47 p.m., Mayor Worley announced a short break.

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3094 –ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR A PROPOSED 55 LOT SUBDIVISION LOCATED ON SAND HILL ROAD (HABITAT FOR HUMANITY)

Mayor Worley said that the public hearing and adoption of this ordinance was held on February 24, 2004. At the City Attorney's request, this ordinance is being brought back for approval of the wording of the order only.

City Attorney Oast said that this is the consideration of the form of the Conditional Use Permit for subdivision on Sand Hill Road.

On February 24, 2004, City Council, on second reading, voted to issue a conditional use permit for a 55-lot subdivision off of Sand Hill Road as part of a conditional use rezoning of the property. Issuance of the permit has been approved, but because the number of lots was reduced and some conditions added, changes to the site plan were necessary and Council wanted to review it in connection with approving the final form of the order.

If Council is satisfied with the language of the order, the appropriate motion would be to approve the form of the order.

Urban Planner Carter Pettibone said that following Council's first reading on the issue of the approval of the Conditional Use Permit for the Habitat for Humanity subdivision on Sand Hill Road, the applicant has revised the proposed site plan to comply with conditions as set by Council. Included in the revisions to the plan are:

-Reduction of total lots from 59 to 55 (City Exhibit 7)
-Reduction in the number and increase in the size of lots located closest to the Captain's Drive development
-Reduction in the number and increase in the size of lots located along the western edge of the subdivision's main street closest to Hominy Creek.
-The pedestrian access to the Buncombe County Park land has been widened to 20 feet wide
-The addition of a pedestrian access to off-site open space between the development and Hominy Creek.

While the applicant has satisfied a number of Council's conditions, in order for the revised site plan to comply with the conditions set by Council in its approval the applicant will need to revise the final site plan:

- The buffer between the development and Captain's Drive is supplemented to a 'D' type buffer as described in the UDO (plan indicates 'C' type buffer).
- Final location and amount of off-site open space is to be determined prior to final administrative approval of the subject plat and the issuance of any construction permits.

Mr. Pettibone also said that in a letter dated March 4, 2005, Mr. Martin Lewis, for Fletcher Partners, Inc., said that they would "donate property adjacent to the subdivision to Habitat for Humanity which should be sufficient to meet the open space and recreational needs of the children and other residents of the subdivision. The property to be donated to Habitat is in the area located west of the proposed subdivision and adjacent to Hominy Creek. The property we will donate will be between one and five acres and should be sufficient to provide for the open space and recreational needs of the subdivision's residents." (City Exhibit 8)

Upon inquiry of Councilman Davis, Mr. Pettibone explained the differences of a 'C' type buffer vs. a 'D' type buffer.

When Councilman Davis asked who would take care of open space, Mr. Lew Kraus, Executive Director of Habitat from Humanity, said that it's Habitat's wish and intent to maintain ownership and maintenance of all common area in the subdivision.

In response to Councilman Dunn, Mr. Kraus said that it was his understanding that homeowners associations are required when the homeowners themselves have common property that they are attending to, however, at this point Habitat will undertake the cost of the maintaining all the common areas.

In response to Councilman Newman, Mr. Kraus said that the additional acreage that Fletcher Partners is donating an open field area and not wooded.

City Attorney Oast said that the site plan will be incorporated into the conditional use permit.

City Attorney Oast asked Council if they wanted included in the conditional use permit that Habitat would retain responsibility for maintenance of the common areas in the buffer. Mayor

Worley's inclination was not to include that in the conditional use permit. He explained that it is good that Habitat will do that, but in the future the neighborhood may develop to the extent that Habitat deems it reasonable to create the homeowners association and deed that property over. He wouldn't want that to inhibit that kind of future action.

Vice-Mayor Mumpower said that there have been some real improvements from the beginning, however, he didn't feel that conditions 3 and 4 have been met. He has concerns about the potential for substantial injury to the property values of the adjoining property owners and he does not feel that the development is in harmony with the scale, bulk, coverage, density and character of the neighborhood.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3094. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 77

V. NEW BUSINESS:

A. RESOLUTION NO. 04-59 - RESOLUTION OF CONSIDERATION IDENTIFYING AREAS WITH POTENTIAL FOR FUTURE ANNEXATION

Urban Planner Carter Pettibone said that this is the consideration of a Resolution of Consideration identifying areas with potential for future annexation.

State law provides that a Resolution of Consideration may be adopted by cities as a preliminary step in the annexation process. The Resolution of Consideration serves the purpose of providing citizens with advance notice that certain areas in proximity to the city may, within the reasonably near future, be subject to annexation. After being in effect for a least 1 year, the Resolution of Consideration also has the benefit of reducing the time period required between adoption of the annexation ordinance and the effective date of that ordinance from a minimum of 1 year to a minimum of 70 days. Each Resolution of Consideration is effective for 2 years, and since the City's first was adopted on April 9, 2002, it is now time to consider the next resolution.

The map staff has prepared in connection with this Resolution of Consideration includes areas previously identified by the last Resolution as well as areas within the proposed Joint Planning Area (JPA). These are areas with the potential for urbanization, such as the areas along major thoroughfares, areas within the City's extraterritorial jurisdiction, areas with existing infrastructure or areas where utility extensions are feasible and other areas with potential for urban development.

The map includes many areas that may not experience urban development in the near future, because the boundaries are drawn to be expansive enough so that any possible near term (1-5 years) annexation areas will be within the boundaries.

Advantages:

- Gives residents and property owners within the area advance notice of possible annexation.
- Allows time period between passage of annexation ordinance and effective annexation date to be shortened to a minimum of 70 days.
- Revised area includes the area identified as the proposed JPA.
- The City can still conduct smaller, incremental annexations within the area.

Disadvantage:

- The possibility of annexing some parts of the area may not be realized for a number of years.

City staff recommends that the Resolution of Consideration be adopted.

Upon inquiry of Councilman Newman, Mr. Pettibone explained how the map was developed stating that it is an expansion of the 2002 map. He said that to correspond to the JPA, they looked at a mile and tried to include all the areas within a mile, trying to use streams, topography and streets.

Upon inquiry of Councilman Davis, City Manager Westbrook explained that the General Assembly developed this process in 1989 because people kept asking about future annexation plans. The process was based on the areas that are urbanized and areas the city might think that in a long period of time they might consider annexation. It was more to make the public aware of what future plans may be. He explained this is a broad look into the future.

Councilman Davis felt it was very striking to see the small number of people that the City has annexed over a long period of time compared to larger cities. This is an equity and educational tool for the residents living beside the City now.

Upon inquiry of Councilman Dunn, Mr. Shuford explained the area is large because we don't know what five years will bring. There are areas around Asheville that are growing rapidly. The areas outlined are the ones identified in the extraterritorial jurisdiction expansion, areas that will probably urbanize, and areas covered by the JPA.

Mr. Fred English, Haw Creek resident, said he was annexed in 1960 and his area still has no sidewalks.

Ms. Betty Williams, Asheville resident, was opposed to annexation because of the impact it would be on affordable housing.

Mr. Alan Ditmore, Leicester resident, felt the pros of annexation is the increase of tax base and the cons of annexation is the expansion of zoning.

Councilman Newman was concerned that people may misinterpret this map and pointed out that only a very small percentage of the land will probably be annexed.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 04-59. This motion was seconded by Councilwoman Jones.

Councilman Dunn felt that a healthy county economy is good for the City. The more money the County has they will spend it in the City. He felt we need to look at other sources to improve our tax base, e.g., room tax, merging City services with Buncombe County, fixing the Water Agreement, etc.

Vice-Mayor Mumpower felt in terms of the procedural process this is a fair tool. However, annexation is forced participation without representation. He felt this is a particularly vulnerable time to adhere to the City's policy of annexing manufacturing industries. He personally felt we have room to grow and improve within our own borders.

Councilman Newman felt the whole issue of annexation is basically a fair way to pay for and finance the infrastructure that is critical to the City of Asheville and also critical to the economy of Buncombe County and western North Carolina. Right now, the residents and business that are located in the City of Asheville have a very unfair, disproportionate percentage of the taxes put on them to pay for the infrastructure that is used by people living all around the City and outside of Buncombe County as well.

Councilwoman Jones felt it would be irresponsible to not adopt such a plan if we have the ability to let people know and to not share this information with residents and developers is unconscionable.

The motion made by Councilman Davis and seconded by Councilwoman Jones carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no." .

RESOLUTION BOOK NO. 28 – PAGE 158

VI. OTHER BUSINESS:

Councilwoman Bellamy updated City Council on some meetings of the Eagle-Market Streets Development Corporation and invited City Council and the public to a community forum on Monday, March 22, 2004, at 6:00 p.m. at the YMI Cultural Center to share ideas for the Eagle-Market Street area.

Vice-Mayor Mumpower thanked City staff for the new City Council dais in the Council Chamber.

Vice-Mayor Mumpower recognized the principal at T.C. Roberson for making tentative directions toward drug screening in that school. He has shown a lot of courage and leadership in taking this step.

Vice-Mayor Mumpower announced a vacancy on the Asheville-Buncombe Historic Resources Commission. He encouraged people from all walks of life to apply for our boards and help City Council make Asheville a better place

The following claims were received by the City of Asheville during the period of February 14-26, 2004: Brian Tribble (Water), BellSouth (Water), Susan Gilliam (Police), James Cain (Water), Pam Holcombe (Water), Ann Weidie (Parking Services), Anna Axelsson (Sanitation) and Brunk Auctions (Water). These claims have been referred to Asheville Claims Corporation for investigation.

The following claims were received by the City during the period of February 27-March 4: Katherine Manouzi (Police), Jeremy Stafford (Water), Elizabeth Baldwin (Streets), Robin Roemisch (Streets), Allen O'Donnell (Sanitation), Victor Solesbee (Streets), Cherokee & Terrace Roads (Sanitation), Nadine Woods (Police), Mary Lynn Linder (Water), Cecil Mitchell (Sanitation) and Mark Domby (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English commented on the Christians for the Sanctity of Marriage rally that has held at the City-County Plaza on March 6, 2004.

Mr. Howard McGlohon, President of the South Pack Square Association, presented and reviewed with City Council the minutes of their March 4, 2004, meeting. The next meeting of the Association will be held on March 18, 2004, to approve alternative design redevelopment plans for the Eagle-Market Streets area.

Brother Christopher Schemata spoke about the need to encourage the homeless to unite to come up with ways to eliminate homelessness.

Mr. Alan Ditmore, Leicester resident, suggested Ms. Valerie Collins as Asheville's new police chief.

CLOSED SESSION:

At 9:05 p.m., Councilman Newman moved to go into closed session to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Frances C. Briggs, et al., Carolina Power & Light Company and the City of Asheville. The statutory authorization is contained in G.S. 154-311 (11) (a) (3). This motion was seconded by Councilman Dunn and carried unanimously.

At 9:50 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:50 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 16, 2004 - 3:00 p.m.

Worksession

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson
Absent:	None

CONSENT:

Grant from N.C. Emergency Management

Summary: The consideration of a budget amendment, in the amount of $21,739, to receive grant money from the U.S. Dept. of Justice (DOJ), sub-granted through the N.C. Division of Emergency Management, for procurement of emergency response and preparedness equipment for Asheville Fire and Rescue Department.

The City of Asheville Fire and Rescue Department requested $21,739 from the NC Division of Emergency Management for equipment to better prepare the City for a hazardous materials or terrorism incident. Staff was successful in obtaining those funds. Twenty-three North Carolina cities received the $21,739 grant. The City of Asheville received the grant in order to purchase a fire suppression and decontamination device that uses compressed air, water and foam.

Pros: (1) This unit is available at no cost to the City of Asheville; (2) No matching funds are required; (3) This unit will significantly enhance our ability to effectively manage car fires in our parking decks with the use of a quick response vehicle (QRV) as well as efficiently deal with brush and trash fires; (4) Currently, to provide fire service within the approximate 20 parking structures that are in the city, we park our large fire engines and must pull hand lines to reach vehicle and trash fires within the structures. This unit would allow us to drive directly to the fire in approximately 13 (or 65%) of those parking structures with a vehicle and minimize our response time and thus minimize damage from car and trash fires in those structures; (5) The unit that we recommend purchasing uses new technology to provide the effectiveness of 2,000 gallons of water with only 100 gallons of water (20:1 ratio) and foam. This allows for a relatively small fire unit that can be placed on a pick up type vehicle and operate efficiently and in tight, restricted areas; (6) When extinguishing woods and brush fires that are off the road, we use a brush truck vehicle with 150 gallons of water. This unit will offer 13 times that amount of fire extinguishing power due to the technological use of compressed air and foam; (7) The unit can also be used to decontaminate people and equipment as needed. This can be very effective in hazardous materials situations; (8) This unit is planned to be placed into service operating out of the downtown fire station, so that it is centrally located; (9) Cost of operating this unit on a QRV is significantly less than the cost of operating a full size fire engine; and (10) The unit is environmentally responsible.

Cons: (1) When we purchase our next pick up truck, it will need to be of sufficient size and strength to accommodate this unit. However, this additional cost is offset by a savings in costs to operate in this method versus cost of operating a full size fire engine or ladder truck; and (2) We will incur full replacement cost of the unit when it has served it's useful life. We would project the life cycle of this unit to be 10+ years.

City staff recommends City Council approve the budget amendment to receive grant money from the NC Division of Emergency Management.

Contract with NC DOT for Operation of Black Mountain Routes and Associated Budget Amendment

Summary: The consideration of (1) a resolution authorizing the Mayor to enter into a funding agreement with the N.C. Dept. of Transportation (NC DOT) for the provision of transit services to the Town of Black Mountain; (2) a resolution authorizing the Mayor to enter into an agreement with Buncombe County and the Town of Weaverville to provide transit services to the Town of Weaverville; and (3) an associated budget amendment, in the amount of $433,294.

The Asheville Transit System has received funding for the operation of a route to Black Mountain through a contract signed by the Mayor last year. The unexpended funds have allowed some operation into this year. The City will receive these funds again this year enabling it to continue these routes through June 30, 2004, as well as to pass through funding to Mountain Mobility for the operation of their route in Black Mountain through the same date. There are no City funds in any of these operations, and the City is specifically exempted from funding any of these operations in the contract from the NC DOT for these routes.

The Asheville Transit system also received operational assistance in excess of the amount originally budgeted for Fiscal Year 2004.

Mountain Mobility will also fund the operation of a route to Weaverville, using federal Job Funds received by the state and granted to Mountain Mobility. The Town of Weaverville will also contribute $10,000 to the operation. There will be no City money involved in the operation of this route. The funding is sufficient to operate through October of 2004. This will allow the route to be tested, and if warranted, an application made to the state for continued funding through Fiscal Year 2005.

The budget amendment represents state funding of all Black Mountain operations, funds from Mountain Mobility for Weaverville Route, and an increase in state operating funding over the budgeted amount.

The benefit to the City of Asheville is:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville

There are no disadvantages to the City of Asheville.

City staff recommends City Council to authorize (1) a resolution authorizing the Mayor to enter into a funding agreement with the N.C. Dept. of Transportation (NC DOT) for the provision of transit services to the Town of Black Mountain; (2) a resolution authorizing the Mayor to enter into an agreement with Buncombe County and the Town of Weaverville to provide transit services to the Town of Weaverville; and (3) an associated budget amendment, in the amount of $433,294.

N.C. Dept. of Environment & Natural Resources Agreement and Budget Amendment to Allocate Grant for Compressed Natural Gas Fueling Station

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Environment and Natural Resources (NCDENR) for a mobile source emissions grant to construct a pilot compressed natural gas (CNG) fueling station; and (2) an associated budget amendment, in the amount of $455,000.

Almost a decade ago, North Carolina committed to funding the construction of rapid fill compressed natural gas fueling stations along the Interstate 40 corridor. The construction of such a station in Asheville will complete this vision and accommodate CNG fuel needs from the Atlantic Coast to Knoxville, Tennessee (and further West).

On November 14, 2000, City Council authorized city staff to apply for a grant to construct a fast-fill CNG fueling station and provided $100,000 to defray 'incremental' costs of CNG-powered vehicles.

In June 2003, the City received notification from the NCDENR (Mobile Source Emissions Reduction Grant) awarding the City a total of $400,000. Of the 400,000, $300,000 will be used for constructing a CNG fueling station on City property for fleet and public use. The additional $100,000 will be to fund the incremental price increase for the purchase of CNG-powered vehicles, which cost about 20% more than conventional vehicles, for the City and its key partners (Mission St. Joseph's and Buncombe County).

The City's cash match is $55,000, which includes $35,000 for a public-access card reader system (which will also be used by fleet) and a $20,000 contingency for concrete, security, fencing, etc. This cash match will have to be appropriated from fund balance.

- Advantages
    - CNG fueling station will complete North Carolina's CNG station master plan
    - Public access for CNG-powered vehicles
    - City's cash contribution is only 13.75%
    - Staff (and partners) will gain valuable experience regarding high-pressure fuel systems.
    - Staff will gain experience in alternative fuel technologies
    - City (and partners) are taking a leadership role regarding CNG, alternative fuel vehicle technologies and emissions reductions

- Challenges
    - Cash match of $55,000
    - Higher (incremental) costs of vehicles (about 20%)
    - Requires additional training for maintenance staff
    - Public access to CNG fueling system

Staff recommends the adoption of (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Environment and Natural Resources (NCDENR) for a mobile source emissions grant to construct a pilot compressed natural gas (CNG) fueling station and funding for the incremental cost of purchasing CNG vehicles; and (2) an associated budget amendment, in the amount of $455,000.

Councilwoman Bellamy thanked former Councilman Chuck Cloninger for his hard work on this matter.

Property Transfer to the Health Adventure

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with The Health Adventure to transfer 1.14 acres of City-owned property located at the corner of Catawba and Broadway in exchange for a .89 acre greenway easement and construction of a greenway across their property.

For the past several months, City staff has met with representatives from The Health Adventure to discuss the transfer of 1.14 acres of property located at the corner of Catawba and

Broadway known as the "Leaf Pile." This property was formerly part of the Penick Property, which was donated to the City several years ago. During these discussions, staff expressed the need for the continuation of the Reed Creek Greenway to occur through this property and across The Health Adventure property to connect to the Glenn Creek Greenway on Weaver Boulevard. The final determination in regard to this transfer includes The Health Adventure granting an easement representing .89 acres adjacent to Broadway Avenue. In addition, the Health Adventure has agreed to pay for and construct the greenway across this property from the comer of Catawba to the intersection of Broadway and Weaver Boulevard. The greenway will be constructed to the standards established by the Greenway Master Plan with final approval of the design by the Greenway Commission and City staff. In addition, The Health Adventure will work with the Public Works Department to continue the use of the "Leaf Pile" until actual construction occurs for the proposed Health Adventure facility. City staff wishes to ensure that the property remain for public use as much as possible, and the City will work with The Health Adventure to ensure that the property is open to the general public as feasible. In addition, if for some reason The Health Adventure fails to build their facility on this site and they wish to resell the property, the 1.14 acres should revert back to the City of Asheville to remain as public space. City staff will be working with representatives of The Health Adventure to develop and agreement that will incorporate all of the above issues.

Upside:

- The City of Asheville will be able to continue development of the greenway from Catawba to the entrance at Weaver Boulevard at no cost to tax payers.
- Greenway design and construction will be approved by the Greenway Commission and City staff.
- The City retains property in the future if The Health Adventure wishes to resell the property.
- The City and The Health Adventure will work together on design elements on and around the Greenway.

Downside:

- The City will lose the use of the "Leaf Pile" for public use.
- Some restrictions may occur with the use of the former property by the public due to accessibility issues with The Health Adventure operations.

The Parks and Recreation Department recommends that the Mayor enter into an agreement with The Health Adventure for the transfer of 1.14 acres of City property in exchange for a greenway easement of .89 acres and the construction of a greenway on Reed Creek.

Vice-Mayor Mumpower asked this not be placed on the Consent Agenda at the next formal meeting.

Municipal Agreement with the N.C. Dept. Of Transportation for Passenger Rail Facility

Summary: At the February 17, 2004, Council meeting, this item was tabled until Council had the opportunity to gather more information including more discussion with N.C. Dept. of Transportation (NC DOT) officials.

Efforts to arrange a meeting between members of Council and NC DOT before March 16 were not successful. However, the date of Friday, April 30 has been established for that meeting. The item will brought back up for formal Council action on May 11, the first formal meeting following the April 30 visit to Raleigh.

Application for Grant from US Dept. of Homeland Security

Summary: The consideration of a resolution authorizing the Fire and Rescue Department to apply for Federal funds available from the U.S. Department of Homeland Security (DHS), sub-granted through the Federal Emergency Management Agency's (FEMA) Fiscal Year 2005 Assistance to Firefighter's Grant Program, for procurement of computers for fire apparatus, portable radios (walkie-talkies) and two portable radio repeaters.

The City of Asheville Fire and Rescue Department, with endorsement of the Asheville City Council in March 2003, requested $122,205 from the U.S. Department of Homeland Security to replace 44 of the department's self contained breathing apparatus (air packs) and 24 of the department's VHF portable radios (walkie-talkies). The Federal grant was for 70% of the costs with the city to match 30%, or $52,373. Staff was successful in obtaining those Federal funds. We again have an opportunity to apply for the grant program in order to fund laptop computers for fire apparatus, portable radios for firefighters and two portable repeaters.

The computers and walkie-talkies will be used daily by firefighters and are used on virtually every emergency that occurs within the city. The portable repeaters will be used often. Computers are used though the city's existing Geographical Information Systems (GIS) database to provide street, water line, hydrant, building, pre-incident plans, aerial photography, resource listings and other information to firefighters on a daily basis when responding to and managing emergencies. Additional walkie-talkies would allow each firefighter "seat" to have a portable radio. Currently, only the fire officer and fire engineer on each apparatus have portable radios. This would improve firefighter safety. The two vehicle repeaters would allow firefighters to better communicate in dense or "heavy" buildings, such as the hospitals, the malls, etc.

Staff desires to apply for grant in the amount of $141,300. Seventy percent ($98,910) will be Federal dollars and 30% ($42,390) will be the City's match. The City's match will come from Fund Balance.

PROS:

- The computer equipment would allow the Asheville Fire and Rescue Department to take advantage of the information and technology that is available to us and allow us to apply it virtually every day. We have field-tested a laptop already for two months and it works great in the field.
- The portable radios would increase firefighter safety on emergency scenes.
- The portable repeaters would allow firefighters to communicate in locations where the current system is very limited such as the hospital, mall and other "heavy" buildings.
- If the grant is approved, 70% of the funds, would be supplied by the Federal Government.

CONS:

- In order to maintain the same level of service, computer equipment and radio equipment would have to be replaced by the city when it is worn out. Live expectancy would be approximately five (5) years.
- If the grant is approved, the city would have to contribute 30% of the funds for the project.

City staff recommends City Council approve the resolution authorizing staff to apply for the 2004 Assistance to Firefighters Grant from the U.S. Department of Homeland Security.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

52

DOWNTOWN SOCIAL ISSUES TASK FORCE

Mr. Pat Whalen said that the Downtown Social Issues Task Force is recommending that a joint City County Task Force be appointed to develop a Ten-Year Plan to End Homelessness.

The Downtown Social Issues Task Force has been working over the last year on developing recommendations on a number of issues affecting downtown: graffiti, homelessness, panhandling and public drunkenness. The Task Force split into committees and one committee, called the Conditions committee, sought solutions to the causes of some of these entrenched problems.

This committee examined issues related to homeless youth, discharge planning (when persons are discharged from the jail, foster care, hospital, treatment centers) and chronic homelessness. Several themes emerged from their research. The chronic homeless population is being continually revolved through service agencies, which ends up being quite costly. These services include City police, County Detention Center, the courts, County EMS, and Mission Hospitals. It has been estimated that, over a 2-year period a small group of people in our downtown cost the City, County and the hospital system over a half million dollars. There are programs that have worked in other cities, that place hard to serve individuals in permanent housing with supportive services, and there has been a cost savings since these individuals are no longer moving through the justice and hospital systems. It is clear that both the City and the County have a stake in changing this pattern of service-usage in our community.

Not only are the chronic homeless of concern, but homeless youth and discharge practices are of concern as well. The Task Force is aware that the current services are working well for a large number of the homeless, and need continued support. With coming changes in the mental health system though, it is anticipated that problems could worsen. After assessment of the issues, it became clear that to make a significant impact a comprehensive plan for homelessness is needed with the buy-in of both County and City agencies as well as the business community and service providers. Similar planning is under development at the State level.

Mr. Bill Byrne, member of the Downtown Social Issues Task Force, presented City Council with the details of their recommendation and summarized the following recommendations:

1. The City of Asheville and the County of Buncombe develop a Ten-Year Plan to End Homelessness that includes initial priority on the chronic homeless population, the sub-population most visibly present in the downtown area.

2. Leadership roles and positions within the steering committee be defined and;

3. Funds for staff time be allocated so that the plan can be carried out and written in a timely manner.

City staff is estimating that it will cost up to $10,000 to hire someone to write the plan. This cost, however, can be built into this years' HOME allocation, and would not require funding directly from the City.

A joint resolution forming the City County Task Force, with a list of suggested Task Force members will be presented to Council in the near future. City Council and the Buncombe County Commissioners will be asked to appoint members.

The Task Force is planning on presenting this recommendation to the Buncombe County Board of Commissioners in April.

Advantages:
- A ten-year plan will fit in well with HUD's growing concern for seeing cities deal with the issue of chronic homelessness. The City's Community Development Division is expecting a requirement for a ten-year plan to end chronic homelessness to be imposed in the next few years.
- New HUD funding for homelessness is expected to favor or even to be restricted to those communities that have a ten-year plan.
- A broad task force that includes stakeholders from the business community, local governments, as well as the service providers is necessary build consensus for a plan dealing with complex issues.
- With plan implementation, there are potential cost savings for the City and the County due to decreased demands on high cost services (Police, EMS, Detention Center).

Disadvantage:
- Funding for writing the plan could cost up to $10,000, but these monies could come from HOME funds and not general funds.

City staff recommends support of the recommendations that a joint City County Task Force be appointed to develop a Ten-Year Plan to End Homelessness.

Vice-Mayor Mumpower asked for hard data on how the successful models have been operating, e.g. Indianapolis, Indiana, including the upsides and downsides of the models.

Discussion surrounded how this plan can dovetail with other agencies and other plans.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

PACK SQUARE CONSERVANCY UPDATE

Ms. Carol King, Chair of the Pack Square Conservancy, said the Pack Square Conservancy is requesting consideration of plan revisions to Pack Square Conservancy Plan and approval of allowing the Conservancy to manage naming rights for the park features.

The Pack Square Conservancy (PSC) recently held a design charette to receive and respond to public input concerning redesign of the middle section of the Pack Square Renaissance project. This was necessitated by the withdrawal of the Grove Park Inn's proposed building at this site. City Council has previously received a copy of the recommended plan by the PSC. This plan substitutes a smaller building for the large mixed-use structure proposed by Grove Park Inn (GPI).

As our experience with GPI indicates, there are currently existing development constraints at this site that complicate certain types of large-scale development. These constraints include the expense of underground parking and the need for expensive relocation of existing utilities (estimated by professional contractors at approximately $450,000).

The PSC is also requesting the ability to manage naming rights for park features as a fund-raising/marketing tool. City Council has previously been provided a copy of the naming rights policy by the PSC.

In addition, the designer has also designed into the park a very innovative recycling program called "integrated stormwater collection system."

Additionally, please note that Engineering staff will present a redesign for College Street for your consideration in April. This redesign will complement the PSC project but was identified as a public safety and capital project need (and was under design & development) prior to the PSC plan.

Plan Approval:
Pros:

- Public acceptance of the new design
- Allows fundraising for the park to continue without public controversy and for park development to continue on schedule
- Maintains a building at the park edge as an urban design component and revenue source

Cons:

- Potential loss of a larger scale infill redevelopment opportunity and resultant public revenue

Naming Rights:
Pros:

- Allows opportunity for greater private fundraising for the park

Cons:

- None noted.

City staff recommends City Council consider plan revisions to Pack Square Conservancy Plan and consider approval of allowing the Conservancy to manage naming rights for the park features.

Vice-Mayor Mumpower initiated discussion about the City's cost of infrastructure in this plan, noting that we had a dedicated revenue stream to pay for the City's portion and that stream is now lost. Mr. Shuford could not attach monetary figures and felt we would know better when Engineering brings the redesign of College Street to Council in April. However, he felt there would not be a lot of major off-site costs directly associated with this project. He would try to give Council some ballpark figures before the formal meeting next week. He did point out however, that the Conservancy is offering the City a $6-7 Million private sector investment in our downtown park.

Discussion then surrounded the view corridor and making Spruce Street a two-way street.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

APPROVAL OF AIR QUALITY IMPROVEMENT INITIATIVE 2004

City Engineer Cathy Ball said that this is the consideration of a resolution authorizing adoption of the Air Quality Improvement Initiative 2004 as a tool to improve air quality in the City of Asheville

In December 2002, City Council adopted a resolution to enter into an Early Action Compact (EAC) along with Buncombe County and other local governments. The first step in the process was to develop a list of measures that can be taken by each of the local governments to reduce air pollution. In an effort to develop this list, EPA recommended that a group of stakeholders be created to make recommendations to local governments. City Council reviewed and approved the stakeholders in March 2003.

Due to the differences in size and economic base, it was agreed that each county would identify local control measures individually. This process allows greater stakeholder participation and allows each jurisdiction to evaluate local resources and determine if county-specific control measures can reasonably be implemented.

This group of stakeholders representing the City of Asheville and Buncombe County developed a list to City Council in June 2003. Since that time, no major changes in the measures has been made by the stakeholders.

Since the June 2003 update to City Council, the City has received information that indicates that our area will not be considered for non-attainment status in the next review largely due to the wet summer and fall we experienced in 2003 as well as some major changes that Progress Energy is making in their process at the Lake Julian site.

The stakeholders met to discuss this issue and recommend that the City approve this plan as an effort to improve air quality regardless of the threat of becoming non-attainment. The stakeholders indicated that they would like to see a more aggressive approach to improving air quality particularly in the area of educating the public of measures they can take to reduce pollutants.

Buncombe County along with the City of Asheville held a public meeting on January 8, 2004, to solicit input on the plan. The comments were good but many participants requested that the measures in the plan be mandatory as opposed to optional.

The Southern Environmental Law Center has indicated they will file suit against EPA if they allow communities to use the Early Action Compact as a method of avoiding non-attainment status. EPA has indicated they will not challenge this suit. This means that adopting an Early Action Compact may not allow communities to avoid the non-attainment designation. This area is not affected by this challenge because we would not be considered for non-attainment status for the reasons described above. For that reason many of the counties in the surrounding area have chosen not to adopt an air quality improvement plan.

Rather than passing this plan as an "Early Action Compact" Plan, staff recommends that we refer to it as an "Air Quality Improvement Initiative 2004" to avoid any possibility of being involved in the possible lawsuit mentioned above.

Most of the measures in the imitative do not cost money, they simply state that we will try to take measures that have been proven to reduce pollutants. The only initiative that cost money is developing and implementing an educational/public relations plan. The Engineering Department has requested $15,000 in the Fiscal Year 2004-05 budget to cover these expenses.

Staff recommends that City Council adopt the Plan under the title of Air Quality Improvement Initiative 2004 to improve air quality in the City.

Councilman Davis spoke highly of this plan and felt this may be a good opportunity to involve the Clean Air Trust Board.

Councilman Newman felt that the entire plan was important, but felt that Council should look at all the measures and then zero in on some parts of the plan that can make the most significant difference. If funding is going to be allocated, he wondered if it would be best to do it in-house or best to work through the Clean Air Trust Board.

Councilman Davis agreed with Councilman Newman and stated that we don't want to lose site that this started out as a regional initiative. We will continue to work with our neighbors. He agreed that we do need to isolate some points that we can work on locally and then work regionally on other issues.

At the suggestion of Councilwoman Bellamy, Mayor Worley appointed Councilman Davis as Chair, Vice-Mayor Mumpower and Councilman Brownie to a subcommittee to work on what initiatives the City of Asheville should first focus on. The subcommittee will also see how we can better work with the Clean Air Trust Board. The subcommittee was asked to report back to Council after they have had a chance to meet.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UPDATE ON HAYWOOD ROAD RECOMMENDED TRANSPORTATION IMPROVEMENTS

City Traffic Engineer Anthony Butzek said that this is the consideration of a resolution supporting the recommendations of the Haywood Road Traffic Study dated March 2004.

Improvements to Haywood Road, the "Main Street" of West Asheville, have long been identified as a critical desire of the residents of Asheville. This traffic study proposes modifications developed based upon public input and technical analysis, with the intent of improving the corridor's role as an urban commercial district while enhancing traffic flow. The modifications can be implemented almost entirely by restriping the pavement, at a very low cost.

Based upon years of input from citizens, businesses, and political leaders, and significant investment in community planning, the report requests the proposed modifications to Haywood Road be implemented by N.C. Dept. of Transportation (NC DOT) as part of the proposed resurfacing (currently scheduled for 2004). The proposed modifications would address a number of goals intended to support the viability of West Asheville's community business district, including improving facilities for pedestrians, bicyclists, transit users, and vehicles, and better providing and clearly marking on-street parking spaces. The modifications should clean up what can be a very confusing street on which to drive.

The corridor study proposes one through lane in each direction with turn lanes where appropriate and marked on-street parking. The proposal would eliminate the confusing pattern of lane-adds and lane-drops, as well as the existing condition of cars parking in a travel lane. The proposal would also relieve the bottleneck at the intersection of Haywood Road with Dorchester, State, and Majestic by removing Majestic from the traffic signal (this will also reduce Majestic's use as a cut-through). In summary, the proposal maintains current level of service for traffic while improving the corridor for businesses, pedestrians, bicyclists, and transit users.

Pros:

- Support of revitalization through improved environment for pedestrians, bicyclists, and transit users.
- Elimination of traffic bottleneck at Dorchester/State/Majestic.
- Expected reduction in crashes due to elimination of confusing lane adds and drops and elimination of parking in travel lanes.
- Implementation of a plan developed with significant community input.
- Minimal cost of implementation by coordinating with scheduled resurfacing.

Cons:

- NC DOT may not approve proposal due to reduction in number of lanes in certain areas and addition of some on-street parking.

- Minimal cost of installation includes minor traffic signal modifications at Dorchester/State/Majestic and installation of several concrete islands.
- City may need to accept maintenance responsibility in order to implement if NC DOT rejects proposal.

City staff requests City Council adopt a resolution supporting the recommendations of the Haywood Road Traffic Study (dated March 2004) and the forwarding of said resolution to the NC DOT.

Mr. Butzek answered various questions/comments from Council, some being, but are not limited to: what is the level of service of the corridor and will that change if recommendations are implemented; has the NC DOT representatives been involved in this process; will new parking spaces be metered; will two lanes improve traffic flow; will the intersections be improved; will there be a temptation for speeding; will there be problems for emergency vehicles; what is the standard width for lanes; and what is the sentiment of the community.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

Councilman Davis left the Council meeting due to a presentation he was going to make to the Buncombe County Commissioners.

OPERATIONAL RELOCATION ASSISTANCE POLICY AMENDMENT

Community Development Director Charlotte Caplan said that this is the consideration of a resolution adopting a revised Optional Relocation Assistance Policy.

When federal funds, such as Community Development Block Grant (CDBG) or HOME, are used in a project in which people are involuntarily displaced from their homes, there are strict regulations for providing adequate relocation assistance to the displaced households. CDBG funds can also be used "optionally" to provide assistance in cases not covered by these regulations. The City adopted such an optional policy in December 2000 in response to the closure of the Merrimon House. It provides for CDBG-assisted relocation when tenants are displaced by City housing code enforcement action.

Staff has found that the current the policy is not very effective in emergency situations because it requires Council approval for each case. We have also started to encounter cases of need not covered by the original policy.

A recent code enforcement case made us aware of the need to provide relocation assistance quickly in emergencies. The City's Housing Code Coordinator issued an immediate Notice to Vacate to a household consisting of an owner and tenants whose health and safety were at risk because the property lacked a sanitary sewer. The residents had minimal financial resources. Due to the urgency of the situation, staff authorized CDBG Emergency Relocation funding to enable the Affordable Housing Coalition to provide advice and financial aid. Without such assistance, the residents might have become homeless.

In addition, participants in the City's homeowner rehabilitation program are sometimes required to temporarily relocate during the rehabilitation process to protect their health and safety. This has presented problems for some applicants who cannot afford to pay for rent and moving costs in addition to their regular mortgage payment.

These cases are fairly unusual, averaging one or two a year, although, as with the Merrimon House, several households may be relocated in one case.

The revised relocation policy would allow staff to approve CDBG relocation assistance up to $2,000 per household, and would extend assistance to homeowners displaced by code enforcement action and to participants in the homeowner rehabilitation program. In every case there would have to be clear evidence of financial hardship. The number of cases is expected to increase to an average of 2-4 a year.

The Housing and Community Development Committee has reviewed the policy. The Committee was not unanimous in recommending it. Some members expressed the view that the HCD Committee should have a role in reviewing and approving optional relocation cases. An alternative revised policy to increase the HCD Committee's responsibilities has been drafted.

The advantages of adopting the revised policy as drafted are:

- Allows rapid response to emergency needs, preventing possible homelessness;
- Extends benefits to homeowners displaced by code enforcement action, as well as tenants;
- Allows low-income homeowners to participate in the FAIR program without fear of hardship if they have to relocate temporarily;
- Avoids involvement of Council Members in administrative decisions involving small expenditures;
- Avoids public discussion of cases, which may be embarrassing for the individuals involved; and
- Avoids setting a precedent for administrative (as opposed to advisory) action by the HCD Committee.

Disadvantages include:

- Removes cases from direct Council oversight; and
- By extending benefits to more people, marginally increases the possibility of abuse.

Staff recommends adoption of the Revised Optional Relocation Assistance Policy in which the City's Housing Code Coordinator and Community Development Director determine the relocation assistance is necessary to mitigate hardship (not the Housing & Community Development Committee).

Upon inquiry of Councilwoman Bellamy, Ms. Caplan said that if staff does make any allocations, that the Housing & Community Development Committee will be apprised.

There was a brief discussion on why the Housing & Community Development Committee was not unanimous in recommending the revised policy.

It was the consensus of Council to support the Revised Optional Relocation Assistance Policy in which the City's Housing Code Coordinator and Community Development Director determine the relocation assistance is necessary to mitigate hardship.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

At 4:50 p.m., Mayor Worley announced a short recess.

BANNER POLICY

Director of City Development Sasha Vrtunski said that this is the consideration of a resolution adopting a policy governing banners on lights poles in the City of Asheville.

Requests for placing banners on City light poles have been increasing over the past few years. City staff needs a policy to guide how this program should work.

The City of Asheville reserves the right to install its own banners for special events, holidays or other purposes. There are two categories of banners provided for in the policy for other participants:

- District Identification – Banners can be used to identify specific neighborhoods or business districts, which will also assist visitors with way finding. These banners may be displayed for up to a year, and are renewable.

- Co-Sponsored Events – Events that are co-sponsored by the City of Asheville may want to promote their event with banners for a month preceding the event date. Examples of such banners could be Bele Chere, the Greek Festival or Goombay.

Sponsorship is allowed on 20% of a banner to identify private businesses or individuals who have contributed funds towards supporting the banners. This sponsorship can appear on the banner itself or on a hang down piece that will be no greater than 20% of the banner area. The hang down option gives participants the ability to produce banners for multiple uses, while changing sponsorships.

The policy outlines standard size requirements for banners. The size of 30" x 60" is a standard size for city streets, as well as a standard manufacturing size. In the case of larger profile roads, such as Patton Avenue in West Asheville, a longer banner could be allowed.

Advantages:

- Individuals or groups will be able to put up banners recognizing business districts or neighborhoods of the city.
- Events co-sponsored by the City will be able to promote their event for a month prior to the event.
- Event Banners will reflect events that benefit the entire community.

Disadvantages:

- The policy does not allow for other types of banners to be put up, which may seem restrictive, but should prevent community division over the content of the banners.

City staff recommends the adoption of the policy governing banners on light poles in the City of Asheville.

Councilwoman Bellamy suggested no political banners be allowed. Ms. Vrtunski said that they couldn't prohibit those banners due to First Amendment rights. She did state, however, that they have not tried to legislate the sponsorship.

City Attorney Oast said that said that our recommendation is that we leave that sponsorship available to whoever wants to do it. We are comfortable the district identification and the co-sponsorship events categories of content for the sign. He doesn't think that the City can limit who buys the banners.

60

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

REVISION OF COUNCIL RULES REGARDING THE CONDUCT OF MEETINGS

City Attorney Bob Oast said that this is the consideration of amendments to Council Rules regarding the conduct of meetings.

One of Council's continuing concerns has been the length of council meetings and the conduct of public comment sessions, including public hearings. The public shares and frequently has expressed this concern. The law is clear that Council may establish rules for the conduct of its meetings and public hearings. In the conduct of some required public hearings and quasi-judicial hearings, due process is also a concern.

Most public hearings or public comment periods are concluded quickly, but there are some matters that require special attention, and the ability to establish special procedures. Accordingly, some revisions to Rule 7 are proposed to deal with general public address to the Council and a new Rule 7.5 is proposed to deal with special matters with respect to which, due to their nature or anticipated length, it may not be possible or desirable to conduct them within the framework of the normal rules.

The proposed revisions to Rule 7 establish general rules of decorum, applicable to all public comment, and recognize the Mayor's power, as the presiding officer, to control proceedings.

The proposed new Rule 7.5 establishes some procedures, such as the maximum time allotted and the manner of submitting documents that will apply to all public hearing/comment items. The proposed new rule also provides for the establishment of rules and procedures applicable to particular matters. These include: recognition of spokespersons, order of presentation, and rulings on relevance and repetition of information. Due process will be taken into consideration in establishing any special rules.

The following considerations should be recognized:

- There may be other proposed amendments that come out of Council's recently completed goal-setting process.
- There will need to be some break-in period for these rules, while the public and Council become accustomed to them.
- Staff will attempt to recognize those matters where special procedures may be appropriate, and will work with the affected citizens to establish appropriate special procedures in advance of hearings.
- Respect for any rules and procedures is essential to their effectiveness.

City Attorney Oast then reviewed the revisions as follows to Rule 7 and the entire new Rule 7.5:

7. PUBLIC ADDRESS TO THE COUNCIL

Citizens desiring to address the council shall be given the opportunity to do so as follows:

(a) Any individual or group who wishes to address the council may make a request to be on the agenda to the city clerk. The mayor and city manager shall determine when preparing the agenda for the meeting whether the matter will be placed on the agenda.

(b) Subject to the time limitations set forth in paragraph (c), below, the public shall be allowed to comment on matters under consideration by the council prior to a final vote on the matter by the council. Public comment shall generally be taken regarding such matters under consideration by the council during the formal~~"regular" 5:00 p.m.~~ meetings of the council as referenced in Rule 1. Public comment will not be taken during the "worksession" discussions of the council except in those instances where a final vote of the council is being taken during a worksession. In such instances, public comment shall be allowed in accordance with the time limits set forth hereinafter.

(c) Any person addressing the council shall be limited to a three minute presentation except that any group making a presentation to the council may have a single spokesperson who will be allowed ten minutes to address the council, provided that at least three other members of that group are present in the Chamber, and relinquish their opportunity to speak. The council will receive written information from any individuals or groups that cannot conclude their presentations within these time limitations.

(d) At each "regular" meeting ~~and each "worksession"~~ of the Council, under the "Informal discussion and public comment" section of the agenda, any group or person wishing to address the Council on any matter not previously considered during the meeting may do so. For matters coming before Council pursuant to this paragraph, and with respect to which the Council may not act, the following limitations apply:

(i) No more than three persons (one at a time) may address the Council, and no person may take longer than three minutes to complete a presentation.

(ii) In lieu of the limitation set forth in (i) above, a group may elect to designate a spokesperson who may take no longer than ten minutes to complete a presentation.

As used herein, "presentation" means all forms of address, including speaking, use of audio or video materials, and distribution of literature. For presentations that cannot be completed within the limitations of this paragraph, written comments or other information may be delivered to the Council through the City Clerk.

(e) Persons addressing the Council are expected to observe the decorum of the Chamber, to be respectful of the Council and the public, to refrain from the use of profanity or foul language, to refrain from personal attacks and commentary on political candidates.

(f)~~(e)~~ The mayor (or the vice mayor, in the absence of the mayor) shall be authorized to allow additional comments and time for comments as he or she may deem appropriate for the orderly conduct of business.

(g) Pursuant to Rule 9(b), the mayor or presiding officer may rule out of order any comments made under this part of the agenda if such comments are unruly, repetitive of information previously received by council on the same subject at the meeting then in session or at previous meetings. The mayor may also rule out of order any comments made during this part of the agenda that are vexatious or intended to harass, and is authorized to take reasonable and appropriate measures to ensure compliance with these rules.

7.5 SUPPLEMENTAL RULES AND PROCEDURES

A. The time limit applicable to public hearings or public comment periods on any agenda item shall be one hour. This time limit shall be exclusive of staff presentations and any structured Council debate. This time limit may be shortened or extended by the Mayor, with the concurrence of Council.

B. In addition to the rules set forth in Rule 7 and herein, the Mayor may, in consultation with the City Attorney and with the concurrence of Council, establish supplemental rules and procedures applicable to particular public hearings or public comment periods in order to facilitate the receipt of relevant information by Council, while affording appropriate due process. Without limitation, such rules and procedures may include:

1. The order of presentation;

2. The length of individual or group presentations;

3. Recognition of a primary spokesperson or representative to provide information or respond to a particular question.

4. The maximum time allotted for the public hearing.

5. Relevance of information and repetition of information previously received; and

6. Determining when new information has been presented.

C. The Mayor may, with the concurrence of Council, determine when sufficient information has been presented at any public hearing or public comment period, and is ready for action by Council.

D. Any documentary information that is to be used in a public hearing or public comment period shall be furnished in advance to the City Clerk in electronic format or 15 copies thereof. This rule may be waived for good cause.

E. In order to facilitate the efficient use of time, citizens are encouraged to coordinate their presentations with others who have similar positions, and to designate a spokesperson, where practicable, to speak for the group.

At the request of Councilwoman Bellamy, City Attorney Oast said that he would try to find another word instead of "vexatious" because some people may not know what that means.

At this time, Councilman Davis re-entered the meeting.

Councilwoman Bellamy suggested language be inserted that City Council does not discuss personnel issues.

Mayor Worley said that he would let the people know at the beginning of the public hearing how much time will be allowed for public input.

Vice-Mayor Mumpower suggested that either the phrase "Mayor or presiding officer" or "Mayor or Vice-Mayor" be used for consistency.

Discussion surrounded if all members of a group have to relinquish their opportunity to speak if they are not in agreement with their group spokesman. City Attorney Oast said that after listening to Council's concerns, he would try to address that in different language. In addition, he said that he would work with our Planning Department to try to come up with a process by which we can identify what we think will be a controversial public hearing item. We can try to get a special order to Council to be adopted at the worksession prior to the formal meeting and get that information out to the people who might wish to speak at the public hearing.

Discussion then occurred about the institution of a sign-up sheet procedure. Questions and comments surrounded when they would sign up, if City residents would be given preference, if there would be a close-out period of time for signing up, and who would be signing them up to speak.

Mayor Worley said that the length of Council meetings are not always driven by public hearings, but are driven by Council members themselves. He said ways to shorten meetings will be to take more control over public comments and to exercise more self-discipline in ourselves.

Discussion surrounded Councilwoman Bellamy's concern about the inconsistency of who gets "wanded" by our police officers prior to entering the City Council meetings and suggested a clear policy be adopted. City Manager Westbrook said that he provide Council with information on how police officers make a determination.

City Attorney Oast said that he would incorporate Council's comments into another draft amendment and place it on upcoming formal meeting.

Councilwoman Jones said that after this is adopted, she would like to find a way to see if the rule changes make a difference.

UPDATE ON THE JOINT PLANNING AREA

City Attorney Bob Oast said that following the initial presentation of our draft of the Joint Planning Area (JPA) Interlocal Agreement to Council on February 17, 2004, we had some discussion with County planning staff.

The following points were discussed:

County Planning Board Certification. Under State law, N.C.G.S. 153A-344, the County planning board must certify any proposed initial zoning ordinance to the Commissioners before the Commissioners can hold public hearings. The same law also provides that amendments must be referred to the County Planning Board and prescribes a minimum period of 30 days for the board to take action.

As to the question of initial adoption, the JPA Agreement may not provide that the planning directors' recommendations are automatically transmitted to the Board of Commissioners if the Planning Board does not act on them within a specified time. However, the Agreement can provide that if the Planning Board does not certify an ordinance to the Board of Commissioners within the specified time, then the City may terminate the Agreement. The other option would be to leave the time period for the County Planning Board's certification open-ended.

Review of Subdivision Plats. The City's draft JPA Agreement provided that one of the duties of the joint planning agency would be to review subdivision plats. The County wishes for this function to be performed by the County Planning Board. This was probably the most significant point of disagreement. With respect to this, several considerations are important: First, a subdivision is a powerful form of land use regulation; second, whatever agency administers subdivisions will have to follow the JPA regulations, which are adopted by both the City and County; and third, subdivision regulation can occur whether zoning exists or not - the County already administers subdivision regulations in the unzoned areas of the County.

One possible solution might be to provide for a two-step process whereby appeals from subdivision decisions in the JPA were reviewable by the joint planning agency, or by the governing boards.

There were some other issues regarding the functions of the joint planning agency, but they were primarily clarifications.

Enforcement. The proposed agreement provides for the City to request the County to take enforcement action within the JPA, and if no action is taken by the County, for the City to take the action and be reimbursed by the County. The County recognizes the importance of prompt and effective enforcement action within the JPA, but had some questions about this provision, and requested that it be reconsidered.

Some method needs to be available to enforce the JPA regulations, and to address situations where the entity charged with enforcement can be required to take appropriate action.

He said we are continuing to discuss the provisions of the Agreement with the County. When he has developed some revisions to the applicable provisions and reviewed them with the County, he will bring the Agreement back to Council for consideration and possible action. If agreement on particular language is not obtained, he will report that to Council as well.

It was the consensus of Council to have the City Attorney continue to update Council on the JPA and when appropriate, bring the agreement to Council for consideration and action.

STATE AND FEDERAL LEGISLATIVE AGENDAS

City Attorney Bob Oast said that last year's legislative session adjourned in late July. It was an unusually abbreviated regular, or "long", session; long sessions in recent years have usually gone into August or later. In fact, the 2003 "long" session may have been shorter than the 2002 short session, which was protracted because of the State's fiscal problems, and adjourned in December. The State's fiscal problems continued to be a big part of the legislature's agenda in 2003, and much of the general legislation adopted reflect that focus. Some items did affect municipalities, including Asheville.

LOCAL LEGISLATION

City legislative initiatives. The City of Asheville's package of legislative requests was modest, including 4 items. Those items were:

1. A blank bill for a funding source for the Civic Center.

2. A bill to reduce the terms of the Housing Authority members from 5 to 3 years.

3. A bill to authorize the City to require the posting of pre-towing notices on private parking lots.

4. A bill for a charter amendment to allow the City to limit contributions to candidates for City Council.

Of these, the only one introduced was the bill to require the posting of pre-towing notices. This bill passed as written, and is now a City ordinance. There were three "blank" bills introduced with no subject designated: two for local legislation for the City of Asheville and Buncombe County, and one for the City of Asheville only. The purpose of such bills is usually to "hold the place" for a substitute bill that contains substantive language. Presumably one of those bills was holding the place for a bill for a civic center funding source, but no substitute bill was ever introduced.

The other requested bills were not introduced either because they did not have the support of our delegation, or because they did not receive a unanimous vote from the Council, which caused our legislators some hesitation.

One item was initially approved for submission of a request, but was ultimately not transmitted to our delegation:

Authorization to use photographic equipment to enforce red light violations. This legislation has been adopted for several cities across the State, but is not yet general legislation. It enables cities to set up cameras at certain problem intersections, take a photograph of vehicles that run red lights, and use that photograph as the basis for imposing a civil penalty.

Other local legislation of note: A legislative item that the City had significant interest in was the bill to incorporate the Town of Mills River. We were concerned because of the size of the geographic area that the town would cover, and expressed that concern to the legislative commission that considers such requests, but we did not oppose the incorporation. The town was incorporated, and the effective date was June 24, 2003.

STATEWIDE / OTHER LEGISLATION OF NOTE

1. Budget / Finance. Local governments were successful in getting a commitment from the legislature not to disturb sources of local revenue, which caused such a big problem in 2002. This "hold harmless" commitment will continue through 2012.

2. Campaign Finance. Although the City's campaign finance reform bill was not introduced, a bill passed in the Senate that would permit larger cities (including Asheville) and counties (including Buncombe) to appropriate funds for grants to candidates for local elected officials. Because it passed one house, it is eligible for consideration in the 2004 session.

3. Economic Development.

    a. Local Government Project Development Financing. This would allow local governments to use the differentials in property tax revenues (developed versus undeveloped property) to pay for certain improvements to redeveloped land. This is similar to tax increment financing that is available in all but one other state in the country. This bill requires a constitutional amendment to become law, which will require a vote of the people. It will be on the ballot in the 2004 general election.

66

b. Interlocal Economic Development Cooperation. Authorizes two or more local governments to enter into an agreement to undertake infrastructure projects that will encourage business and industrial development.

4. Other Legislation. Other legislation of general interest to municipalities was introduced, and some of it passed. This legislation has broader application than just local government, e.g. ABC laws and environmental laws, and will not be summarized in this staff report. Information on these bills and laws is available by contacting my office. However, one such item was of interest to Asheville because of our particular operations:

> Skateboard Park Liability. This legislation enables local governments who operate facilities for skateboarding and similar activities to limit their liability for injuries, provided that the use of protective equipment at such facilities is required by ordinance. The City of Asheville adopted an ordinance effective at the Food Lion Skate Park.

LOCAL LEGISLATION FOR 2004. This year's session is a "short" session. Short sessions usually convene in May, and usually adjourn no later than July. The convening date for this year is May 10. The deadline for submission of local bills to Bill Drafting is May 19, which means that any requests from us must be in our legislators' hands a few days earlier. Also, local bills must be certified as non-controversial by the introducer, which limits what can be introduced.

The possibilities for the City's legislative requests include:

1. Technical Amendment to Civil Service Law to specify two-year term. Two years has always been the term for Civil Service Board members, but for some reason, the 1999 amendments to Civil Service law deleted it. I have already spoken with one member of our delegation about this, and amending it should not be a problem.

2. Film Industry Incentives. The State of North Carolina Economic Development Board appointed by Governor Easley and the 600 members of the North Carolina Economic Developers Association have made film incentives a priority for 2004. The direct and indirect benefits to the State from filmmaking are substantial both in tax revenue generation and new job creation. The competition from other states and other countries has made the need for incentives paramount if North Carolina intends to remain third in the nation in film production. Failure to take quick and appropriate legislative action will ensure that filmmakers will continue to choose venues outside of North Carolina. Film production has the unique opportunity to create new investments in the State within a short period of time. If appropriate incentives are passed the return on the investment can be immediate.

3. Planning. Special legislation (or support of general legislation) to provide the City with more options for meeting Council-established planning objectives, such as economic development and affordable housing. These may be more appropriate for the 2005 long session, but it is not too early to begin discussing them.

4. Alcoholic Beverage Control Board. Increase the Alcoholic Beverage Control Board membership from 3 members to 5 members.

OTHER LOCAL LEGISLATIVE EFFORTS. The Asheville Chamber of Commerce legislative task force has been meeting for several months, and has formulated an agenda for local legislative priorities that it proposes to support. The legislative task force also adopted agendas of State and federal priorities. Although more regional in scope, some of these items have potential effects for Asheville.

Upon inquiry of Councilman Dunn, Mayor Worley explained why legislative requests are sent to our legislators if they are not unanimously supported by City Council.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that we are exploring the possibility of asking for authority to set limits on how much towings can cost.

Councilman Newman said that there are a number of issues that the General Assembly is dealing with that are relevant to cities across the state. He would be interested in having an opportunity for Council to talk about some of those issues and see if we want to take a position on them one way or another. Some are unlikely to be resolved in the Short Session, but it's never too early to get ideas out there. Some items he would like discussion on is the issue regarding campaign finance reform that is specifically about giving local governments the authority to enact local campaign finance reform. That is relevant to Asheville. We have talked to them about the Water Authority and if we want resolution of that, it will take legislative action. In addition, there is the Civic Center financing. How some of the property tax exemptions for some of the non-profit retirement centers in our community need to be discussed. There are efforts at the state level to look at some of the state's transportation policies with the idea of giving local governments greater ability to decide how those dollars are spent and having more flexibility. He suggested a date by which Council can, as a group, resolve some issues so we can have our position on those items and our legislative agenda sent to our legislators.

Vice-Mayor Mumpower was very interested in exploring some of the items mentioned by Councilman Newman but was concerned that there may not be enough time with just one worksession in April.

City Attorney Oast said that the convening date is May 10 and the deadline for submission of local bills to Bill Drafting is May 19. He said that he would bring back the legislative agenda for Council review in mid-April, for adoption at the end of April.

FEDERAL INITIATIVES

Economic Development Director Mac Williams said that this is the federal budget process is underway for Fiscal Year 2005. An official city agenda is needed to ensure that important city projects are considered by legislators during the appropriations process.

Input has been solicited from members of City Council, city staff, as well as from the City of Asheville federal lobbyist, Ball-Janik, to help determine a prioritized list of projects for inclusion on the City's Fiscal Year 2005 official federal agenda.

Based on input received to date and on recommendations from Ball-Janik, the following are recommended as priorities for the Fiscal Year 2005 federal agenda:

Appropriations Requests:

Economic Development	- Renovation of Pack Square - $1.5 million
Transportation	- City Bus Fleet Replacement – 30 ft. bus - $290,000 - Asheville Riverway – PE and Design - $600,000
Homeland Security	- Digital Platform Upgrades for Police/Fire Comm. - $2.75 million
Public Health	- Water System Infrastructure Upgrades - $600,000

Non-Appropriations Requests:

Transit Issue	- Section 5307
S. 150	- Internet Tax Non-discrimination Act

Staff recommends City Council approve the above items as the priority items for the official Fiscal Year 2005 City of Asheville federal agenda.

Mr. Williams explained that Vice-Mayor Mumpower's issue regarding the Civic Center designation is not specifically noted, but it is an issue on the lobbyist's agenda should we pursue it for technical assistance.

Upon inquiry of Vice-Mayor Mumpower, Mr. Williams explained the Memorial Stadium effort was a staff presentation to the lobbyist. It was his understanding from the lobbyist that we had to go back through and pare down what we thought was important, given that there were 4-5 of those similarly related projects. He believed that they looked at the Memorial Stadium effort as a project that needed a little more support from other resources and perhaps a designation from an historic agency. Mayor Worley also noted that he talked with the lobbyist and one of the major concerns was there was no historic designation that would put it in a much better position to receive federal funding. Vice-Mayor Mumpower felt Congressman Taylor was going to pursue this effort and would be interested in hearing thoughts on what the lobbyist thinks we need to do as homework.

Councilwoman Jones felt that the City Council's federal legislative agenda should be agreed on by the entire body. Furthermore, perhaps Council needs to discuss what we, as a City, are going to ask our congressmen and our senators to do.

Information was shared about the appropriations and non-appropriation requests.

Upon inquiry of Vice-Mayor Mumpower regarding the $1.5 Million for the renovation of Pack Square, City Manager Westbrook said that the City will revise that amount down as the project develops in the near future. The appropriate request may not be that much, but if it is an issue we feel, with the private sector part, lines up well with the federal goals and priorities.

Vice-Mayor Mumpower felt some items on the federal agenda have real substance, but he saw some padding. As someone who spoke against hiring a lobbyist, he was not encouraged by what the City has gotten for our money.

Councilwoman Jones spoke in support of the high integrity and hard work our lobbyists are doing on Asheville's behalf.

City Engineer Cathy Ball responded to Councilman Newman's suggestion regarding traffic signalization funding.

There was a brief discussion, initiated by Vice-Mayor Mumpower, about grants or funding available for drug interdiction.

At 7:12 p.m., Mayor Worley announced a short recess.

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

MID-YEAR BUDGET ADJUSTMENTS

Mayor Worley said the Fiscal Year 2003-2004 Annual Budget Ordinance included an appropriation of $563,146 for the City to begin making financial contributions to the Social Security system on behalf of firefighters. This contribution, however, was contingent upon a majority of firefighters formally voting to participate in the system. On October 27, 2003, firefighters voted not to participate in Social Security. This leaves $563,146 in the budget that can theoretically be used for other priorities.

Recently, a few members of Council have expressed an interest in reallocating the Social Security appropriation to other projects (a list of possible projects as identified by Council is below, totaling $130,000). Before any decisions are made in this regard, he feels that it is necessary to remind Council that a large portion of the firefighters' Social Security budget was funded with a fund balance appropriation. Specifically, Social Security was funded in the following manner:

Funding Sources:	
Appropriated Fund Balance	$315,000
General Fund Revenue	$248,146
Total	$563,146

Since the fund balance is typically only used for emergencies, unforeseen mandates or other critical, unanticipated needs, and does not represent a permanent revenue source, the portion of the firefighters' Social Security appropriation that was supported by fund balance ($315,000) should not be reallocated to new programs, but allowed to revert back to the fund balance in order to provide a buffer for future uncertainties.

If a majority of Council wishes to use the remaining $248,146 of the firefighters' Social Security appropriation, which is supported by true general fund revenue, he recommended that it be allocated in a manner consistent with the priorities established in the Fiscal Year 2003-2004 budget. The following Council members explained why they felt their suggested adjustments had merit:

Terry Bellamy:

- Adding additional funds for our sidewalk fund. Engineering is currently looking at a reengineering plan to add more manpower, so additional funds would be needed. - No specified amount recommended (N/A)

- Develop a new plan for the South Pack Square district. Current plan is over ten years old and needs to be updated. If Council made it a priority, City Planning would respond. - N/A

- There is interest from the community in improving W.C. Reid Center. Some improvement over the next few years is provided for in the current CIP. Would like to see a master plan for improvements. - N/A

Joe Dunn:

- A portion should go to renovation of Hall Fletcher playground ($80,000). Does not see a great need to spend it all in the first place - $80,000

Holly Jones

- Requests a $25,000 grant to the WNC Veterans Memorial Association to support their Memorial effort on Pack Square - $25,000

70

Brownie Newman:

- Prefers not to make major budget amendments at this point, but supports idea to renovate the Hall Fletcher playground - N/A

Carl Mumpower:

- $50,000 to cover cost of two new Quick Response Vehicles (QRV) for fire department. - $50,000
- Consideration of ongoing funding for APD public housing and street level drug interdiction initiatives – most specifically compensation for loss of anticipated $132,131 due to the recent denial of a COPS Homeland Security Overtime Grant - $132,131
- Actively work to maintain fund balance at current levels. - N/A
- Gym equipment at fire/police station is in need of upgrade and improvement. Some near-term consideration of this expenditure might be worthy of further discussion. - N/A

Regarding Vice-Mayor Mumpower's request about the denial of a COPS grant, City Manager Westbrook explained that we budgeted for the work in the Housing Authority projects and then applied for the grant. Even though we did not get the grant, it won't stop the work we are doing in those areas. However, there are at least four activities that will have a significant impact on the Police Department's overtime budget (approximately $60,000) but we won't know that figure until we get close to June 30 and then if necessary, a budget amendment may be necessary. Vice-Mayor Mumpower then adjusted his suggested amount to $60,000 instead of $132,131, which covered the entire grant.

Discussion then surrounded each request and members of Council either spoke in support of the expenditure or why they did not feel the expenditure was appropriate at this time.

After discussion, the following directions were given to City staff:

- $93,000 of additional funds for our sidewalk program. Show of hands showed the adjustment would not be prepared. 3-4 vote with Councilwoman Bellamy, Councilwoman Jones and Councilman Dunn voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Newman voting "no."
- $80,000 for renovation of Hall Fletcher Playground. Show of hands showed the adjustment would be prepared. 4-3 vote with Councilwoman Bellamy, Councilwoman Jones, Councilman Dunn and Councilman Newman voting "yes" and Mayor Worley, Vice-Mayor Mumpower and Councilman Davis voting "no."
- $50,000 for two new QRV's for Fire Department. Show of hands showed the adjustment would be prepared by a unanimous vote.
- $25,000 for WNC Veterans Memorial Association for their memorial effort on Pack Square. Show of hands showed the adjustment would be prepared. 5-2 vote with Mayor Worley, Councilwoman Bellamy, Councilwoman Jones, Councilman Dunn and Councilman Newman voting "yes" and Vice-Mayor Mumpower and Councilman Davis voting "no."

Mayor Worley asked that the record show that City Council received this information and instructed the City Manager to place this item on the next formal City Council agenda.

BOARDS & COMMISSIONS

It was the consensus of City Council to arrange interviews for the following people for a vacancy on the Asheville-Buncombe Historic Resources Commission: Marsha Shortell and Diane Duermit.

CLOSED SESSION

At 8:12 p.m., Councilman Dunn moved to go into closed session for the following reason: To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Eugene Ellison and Howard McGlohon; Texas Roadhouse Holdings, LLC; Paul M. Young; Trustees of Biltmore Masonic Lodge; and City of Asheville. The statutory authorization is contained in G.S. 143-318.11(a)(3). The motion was seconded by Councilwoman Bellamy and carried unanimously.

At 8:34 p.m., Councilwoman Bellamy moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:34 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – March 23, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING APRIL 2004 AS "CHILD ABUSE PREVENTION MONTH"

Mayor Worley read the proclamation proclaiming April 2004, as "Child Abuse Prevention Month" in the City of Asheville. He presented the proclamation to Mr. Bill McGuire, who briefed City Council on some statistics of child abuse and some activities taking place during the month.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 9, 2004, AND THE WORKSESSION HELD ON MARCH 16, 2004

This matter was pulled off the Consent Agenda for discussion.

B. ORDINANCE NO. 3096 - BUDGET AMENDMENT TO RECEIVE GRANT MONEY FROM THE N.C. DIVISION OF EMERGENCY MANAGEMENT FOR PROCUREMENT OF EMERGENCY RESPONSE AND PREPAREDNESS EQUIPMENT FOR ASHEVILLE FIRE & RESCUE DEPARTMENT

Summary: The consideration of a budget amendment, in the amount of $21,739, to receive grant money from the U.S. Dept. of Justice (DOJ), sub-granted through the N.C. Division of Emergency Management, for procurement of emergency response and preparedness equipment for Asheville Fire and Rescue Department.

The City of Asheville Fire and Rescue Department requested $21,739 from the NC Division of Emergency Management for equipment to better prepare the City for a hazardous materials or terrorism incident. Staff was successful in obtaining those funds. Twenty-three North Carolina cities received the $21,739 grant. The City of Asheville received the grant in order to purchase a fire suppression and decontamination device that uses compressed air, water and foam.

Pros: (1) This unit is available at no cost to the City of Asheville; (2) No matching funds are required; (3) This unit will significantly enhance our ability to effectively manage car fires in our parking decks with the use of a quick response vehicle (QRV) as well as efficiently deal with brush and trash fires; (4) Currently, to provide fire service within the approximate 20 parking structures that are in the city, we park our large fire engines and must pull hand lines to reach vehicle and trash fires within the structures. This unit would allow us to drive directly to the fire in approximately 13 (or 65%) of those parking structures with a vehicle and minimize our response time and thus minimize damage from car and trash fires in those structures; (5) The unit that we recommend purchasing uses new technology to provide the effectiveness of 2,000 gallons of water with only 100 gallons of water (20:1 ratio) and foam. This allows for a relatively small fire unit that can be placed on a pick up type vehicle and operate efficiently and in tight, restricted areas; (6) When extinguishing woods and brush fires that are off the road, we use a brush truck vehicle with 150 gallons of water. This unit will offer 13 times that amount of fire extinguishing power due to the technological use of compressed air and foam; (7) The unit can also be used to decontaminate people and equipment as needed. This can be very effective in hazardous materials situations; (8) This unit is planned to be placed into service operating out of the downtown fire station, so that it is centrally located; (9) Cost of operating this unit on a QRV is significantly less than the cost of operating a full size fire engine; and (10) The unit is environmentally responsible.

Cons: (1) When we purchase our next pick up truck, it will need to be of sufficient size and strength to accommodate this unit. However, this additional cost is offset by a savings in costs to operate in this method versus cost of operating a full size fire engine or ladder truck; and (2) We will incur full replacement cost of the unit when it has served it's useful life. We would project the life cycle of this unit to be 10+ years.

City staff recommends City Council approve the budget amendment to receive grant money from the NC Division of Emergency Management.

ORDINANCE BOOK NO. 21 – PAGE 91

C. RESOLUTION NO. 04-60 – RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A FUNDING AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE PROVISION OF TRANSIT SERVICES TO THE TOWN OF BLACK MOUNTAIN

Summary: The consideration of (1) a resolution authorizing the Mayor to enter into a funding agreement with the N.C. Dept. of Transportation (NC DOT) for the provision of transit services to the Town of Black Mountain; (2) a resolution authorizing the Mayor to enter into an agreement with Buncombe County and the Town of Weaverville to provide transit services to the Town of Weaverville; and (3) an associated budget amendment, in the amount of $433,294.

The Asheville Transit System has received funding for the operation of a route to Black Mountain through a contract signed by the Mayor last year. The unexpended funds have allowed some operation into this year. The City will receive these funds again this year enabling it to continue these routes through June 30, 2004, as well as to pass through funding to Mountain Mobility for the operation of their route in Black Mountain through the same date. There are no City funds in any of these operations, and the City is specifically exempted from funding any of these operations in the contract from the NC DOT for these routes.

The Asheville Transit system also received operational assistance in excess of the amount originally budgeted for Fiscal Year 2004.

Mountain Mobility will also fund the operation of a route to Weaverville, using federal Job Funds received by the state and granted to Mountain Mobility. The Town of Weaverville will also contribute $10,000 to the operation. There will be no City money involved in the operation of this route. The funding is sufficient to operate through October of 2004. This will allow the route to be tested, and if warranted, an application made to the state for continued funding through Fiscal Year 2005.

The budget amendment represents state funding of all Black Mountain operations, funds from Mountain Mobility for Weaverville Route, and an increase in state operating funding over the budgeted amount.

The benefit to the City of Asheville is:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville

There are no disadvantages to the City of Asheville.

City staff recommends City Council to authorize (1) a resolution authorizing the Mayor to enter into a funding agreement with the N.C. Dept. of Transportation (NC DOT) for the provision of transit services to the Town of Black Mountain; (2) a resolution authorizing the Mayor to enter into an agreement with Buncombe County and the Town of Weaverville to provide transit services to the Town of Weaverville; and (3) an associated budget amendment, in the amount of $433,294.

D. RESOLUTION NO. 04-61 – RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY AND THE TOWN OF WEAVERVILLE TO PROVIDE TRANSIT SERVICES TO THE TOWN OF WEAVERVILLE

Summary: See Consent Agenda Item "C" above.

RESOLUTION BOOK NO. 28 – PAGE 161

E. ORDINANCE NO. 3097 – BUDGET AMENDMENT TO FUND TRANSIT ROUTES

Summary: See Consent Agenda Item "C" above.

ORDINANCE BOOK NO. 21 – PAGE 93

F. RESOLUTION NO. 04-62 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR A MOBILE SOURCE EMISSIONS GRANT TO CONSTRUCT A PILOT COMPRESSED NATURAL GAS FUELING STATION

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Environment and Natural Resources (NCDENR) for a mobile source emissions grant to construct a pilot compressed natural gas (CNG) fueling station; and (2) an associated budget amendment, in the amount of $455,000.

Almost a decade ago, North Carolina committed to funding the construction of rapid fill compressed natural gas fueling stations along the Interstate 40 corridor. The construction of such a station in Asheville will complete this vision and accommodate CNG fuel needs from the Atlantic Coast to Knoxville, Tennessee (and further West).

On November 14, 2000, City Council authorized city staff to apply for a grant to construct a fast-fill CNG fueling station and provided $100,000 to defray 'incremental' costs of CNG-powered vehicles.

In June 2003, the City received notification from the NCDENR (Mobile Source Emissions Reduction Grant) awarding the City a total of $400,000. Of the 400,000, $300,000 will be used for constructing a CNG fueling station on City property for fleet and public use. The additional $100,000 will be to fund the incremental price increase for the purchase of CNG-powered vehicles, which cost about 20% more than conventional vehicles, for the City and its key partners (Mission St. Joseph's and Buncombe County).

The City's cash match is $55,000, which includes $35,000 for a public-access card reader system (which will also be used by fleet) and a $20,000 contingency for concrete, security, fencing, etc. This cash match will have to be appropriated from fund balance.

- Advantages
  - CNG fueling station will complete North Carolina's CNG station master plan
  - Public access for CNG-powered vehicles
  - City's cash contribution is only 13.75%
  - Staff (and partners) will gain valuable experience regarding high-pressure fuel systems.
  - Staff will gain experience in alternative fuel technologies
  - City (and partners) are taking a leadership role regarding CNG, alternative fuel vehicle technologies and emissions reductions

- Challenges
  - Cash match of $55,000
  - Higher (incremental) costs of vehicles (about 20%)
  - Requires additional training for maintenance staff
  - Public access to CNG fueling system

Staff recommends the adoption of (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Environment and Natural Resources (NCDENR) for a mobile source emissions grant to construct a pilot compressed natural gas (CNG) fueling station and funding for the incremental cost of purchasing CNG vehicles; and (2) an associated budget amendment, in the amount of $455,000.

RESOLUTION BOOK NO. 28 – PAGE 162

G. ORDINANCE NO. 3098 – BUDGET AMENDMENT TO ALLOCATE A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR A COMPRESSED NATURAL GAS FUELING STATION

Summary: See Consent Agenda Item "F" above.

ORDINANCE BOOK NO. 21 – PAGE 95

H. RESOLUTION NO. 04-63 – RESOLUTION AUTHORIZING THE CITY TO APPLY FOR A GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY FOR COMPUTERS FOR FIRE APPARATUS, PORTABLE RADIOS AND TWO PORTABLE REPEATERS FOR THE FIRE AND RESCUE DEPARTMENT

Summary: The consideration of a resolution authorizing the Fire and Rescue Department to apply for Federal funds available from the U.S. Department of Homeland Security (DHS), sub-granted through the Federal Emergency Management Agency's (FEMA) Fiscal Year 2005 Assistance to Firefighter's Grant Program, for procurement of computers for fire apparatus, portable radios (walkie-talkies) and two portable radio repeaters.

The City of Asheville Fire and Rescue Department, with endorsement of the Asheville City Council in March 2003, requested $122,205 from the U.S. Department of Homeland Security to replace 44 of the department's self contained breathing apparatus (air packs) and 24 of the department's VHF portable radios (walkie-talkies). The Federal grant was for 70% of the costs with the city to match 30%, or $52,373. Staff was successful in obtaining those Federal funds. We again have an opportunity to apply for the grant program in order to fund laptop computers for fire apparatus, portable radios for firefighters and two portable repeaters.

The computers and walkie-talkies will be used daily by firefighters and are used on virtually every emergency that occurs within the city. The portable repeaters will be used often. Computers are used though the city's existing Geographical Information Systems (GIS) database to provide street, water line, hydrant, building, pre-incident plans, aerial photography, resource listings and other information to firefighters on a daily basis when responding to and managing emergencies. Additional walkie-talkies would allow each firefighter "seat" to have a portable radio. Currently, only the fire officer and fire engineer on each apparatus have portable radios. This would improve firefighter safety. The two vehicle repeaters would allow firefighters to better communicate in dense or "heavy" buildings, such as the hospitals, the malls, etc.

Staff desires to apply for grant in the amount of $141,300. Seventy percent ($98,910) will be Federal dollars and 30% ($42,390) will be the City's match. The City's match will come from Fund Balance.

PROS:

- The computer equipment would allow the Asheville Fire and Rescue Department to take advantage of the information and technology that is available to us and allow us to apply it virtually every day. We have field-tested a laptop already for two months and it works great in the field.
- The portable radios would increase firefighter safety on emergency scenes.
- The portable repeaters would allow firefighters to communicate in locations where the current system is very limited such as the hospital, mall and other "heavy" buildings.
- If the grant is approved, 70% of the funds, would be supplied by the Federal Government.

CONS:

- In order to maintain the same level of service, computer equipment and radio equipment would have to be replaced by the city when it is worn out. Live expectancy would be approximately five (5) years.
- If the grant is approved, the city would have to contribute 30% of the funds for the project.

City staff recommends City Council approve the resolution authorizing staff to apply for the 2004 Assistance to Firefighters Grant from the U.S. Department of Homeland Security.

RESOLUTION BOOK NO. 28 – PAGE 164

I. MOTION SUPPORTING THE RECOMMENDATIONS OF THE DOWNTOWN SOCIAL ISSUES TASK FORCE THAT A JOINT CITY-COUNTY TASK FORCE BE APPROVED TO DEVELOP A TEN-YEAR PLAN TO END HOMELESSNESS

J. RESOLUTION NO. 04-64 – RESOLUTION APPROVING AN AMENDMENT TO THE OPTIONAL RELOCATION POLICY

Summary: The consideration of a resolution adopting a revised Optional Relocation Assistance Policy.

When federal funds, such as Community Development Block Grant (CDBG) or HOME, are used in a project in which people are involuntarily displaced from their homes, there are strict regulations for providing adequate relocation assistance to the displaced households. CDBG funds can also be used "optionally" to provide assistance in cases not covered by these regulations. The City adopted such an optional policy in December 2000 in response to the closure of the Merrimon House. It provides for CDBG-assisted relocation when tenants are displaced by City housing code enforcement action.

Staff has found that the current the policy is not very effective in emergency situations because it requires Council approval for each case. We have also started to encounter cases of need not covered by the original policy.

A recent code enforcement case made us aware of the need to provide relocation assistance quickly in emergencies. The City's Housing Code Coordinator issued an immediate Notice to Vacate to a household consisting of an owner and tenants whose health and safety were at risk because the property lacked a sanitary sewer. The residents had minimal financial resources. Due to the urgency of the situation, staff authorized CDBG Emergency Relocation funding to enable the Affordable Housing Coalition to provide advice and financial aid. Without such assistance, the residents might have become homeless.

In addition, participants in the City's homeowner rehabilitation program are sometimes required to temporarily relocate during the rehabilitation process to protect their health and safety. This has presented problems for some applicants who cannot afford to pay for rent and moving costs in addition to their regular mortgage payment.

These cases are fairly unusual, averaging one or two a year, although, as with the Merrimon House, several households may be relocated in one case.

The revised relocation policy would allow staff to approve CDBG relocation assistance up to $2,000 per household, and would extend assistance to homeowners displaced by code enforcement action and to participants in the homeowner rehabilitation program. In every case there would have to be clear evidence of financial hardship. The number of cases is expected to increase to an average of 2-4 a year.

The advantages of adopting the revised policy as drafted are:

- Allows rapid response to emergency needs, preventing possible homelessness;
- Extends benefits to homeowners displaced by code enforcement action, as well as tenants;
- Allows low-income homeowners to participate in the FAIR program without fear of hardship if they have to relocate temporarily;
- Avoids involvement of Council Members in administrative decisions involving small expenditures;
- Avoids public discussion of cases, which may be embarrassing for the individuals involved; and
- Avoids setting a precedent for administrative (as opposed to advisory) action by the HCD Committee.

Disadvantages include:

- Removes cases from direct Council oversight; and
- By extending benefits to more people, marginally increases the possibility of abuse.

Staff recommends adoption of the Revised Optional Relocation Assistance Policy in which the City's Housing Code Coordinator and Community Development Director determine the relocation assistance is necessary to mitigate hardship (not the Housing & Community Development Committee).

RESOLUTION BOOK NO. 28 – PAGE 165

K. RESOLUTION NO. 04-65 – RESOLUTION APPROVING A POLICY GOVERNING BANNERS ON LIGHT POLES IN THE CITY OF ASHEVILLE

Summary: The consideration of a resolution adopting a policy governing banners on lights poles in the City of Asheville.

Requests for placing banners on City light poles have been increasing over the past few years. City staff needs a policy to guide how this program should work.

The City of Asheville reserves the right to install its own banners for special events, holidays or other purposes. There are two categories of banners provided for in the policy for other participants:

- District Identification – Banners can be used to identify specific neighborhoods or business districts, which will also assist visitors with way finding. These banners may be displayed for up to a year, and are renewable.

- Co-Sponsored Events – Events that are co-sponsored by the City of Asheville may want to promote their event with banners for a month preceding the event date. Examples of such banners could be Bele Chere, the Greek Festival or Goombay.

Sponsorship is allowed on 20% of a banner to identify private businesses or individuals who have contributed funds towards supporting the banners. This sponsorship can appear on the banner itself or on a hang down piece that will be no greater than 20% of the banner area. The hang down option gives participants the ability to produce banners for multiple uses, while changing sponsorships.

The policy outlines standard size requirements for banners. The size of 30" x 60" is a standard size for city streets, as well as a standard manufacturing size. In the case of larger profile roads, such as Patton Avenue in West Asheville, a longer banner could be allowed.

Advantages:

- Individuals or groups will be able to put up banners recognizing business districts or neighborhoods of the city.
- Events co-sponsored by the City will be able to promote their event for a month prior to the event.
- Event Banners will reflect events that benefit the entire community.

Disadvantages:

- The policy does not allow for other types of banners to be put up, which may seem restrictive, but should prevent community division over the content of the banners.

City staff recommends the adoption of the policy governing banners on light poles in the City of Asheville.

RESOLUTION BOOK NO. 28 – PAGE 167

L. MOTION APPROVING THE FISCAL YEAR 2005 FEDERAL AGENDA

Summary: The federal budget process is underway for Fiscal Year 2005. An official city agenda is needed to ensure that important city projects are considered by legislators during the appropriations process.

Input has been solicited from members of City Council, city staff, as well as from the City of Asheville federal lobbyist, Ball-Janik, to help determine a prioritized list of projects for inclusion on the City's Fiscal Year 2005 official federal agenda.

Based on input received to date and on recommendations from Ball-Janik, the following are recommended as priorities for the Fiscal Year 2005 federal agenda:

Appropriations Requests:

Economic Development	- Renovation of Pack Square - $1.5 million
Transportation	- City Bus Fleet Replacement – 30 ft. bus - $290,000 - Asheville Riverway – PE and Design - $600,000
Homeland Security	- Digital Platform Upgrades for Police/Fire Comm. - $2.75 million
Public Health	- Water System Infrastructure Upgrades - $600,000

Non-Appropriations Requests:

Transit Issue	- Section 5307
S. 150	- Internet Tax Non-discrimination Act

Staff recommends City Council approve the above items as the priority items for the official Fiscal Year 2005 City of Asheville federal agenda.

M. RESOLUTION NO. 04-66- - RESOLUTION AMENDING THE 2004 CITY COUNCIL MEETING SCHEDULE TO CANCEL THE APRIL 6, 2004, WORKSESSION

RESOLUTION BOOK NO. 28 – PAGE 168

N. MOTION SETTING PUBLIC HEARING ON THE CONSOLIDATED ACTION PLAN FOR 2004-05

Summary: The consideration of a motion setting a public hearing on April 13, 2004, to receive public input on the City's draft Consolidated Action Plan for 2004-05.

The Annual Consolidated Action Plan sets out the City's planned use of federal Community Development Block Grant (CDBG) and HOME funds for the next fiscal year. In compliance with HUD regulations, the following schedule is being followed for preparing the Plan:

2003	
November 10	Public Hearing (for Buncombe & Madison Counties)
November 12	Public Hearing (for Henderson & Transylvania Counties)
2004	
January 30	Deadline for applications
March 12	Consortium Board makes HOME funding recommendations
March 23	Housing & Community Development Committee makes CDBG recommendations
March 26	Draft Plan published for public comment
April 13	Asheville City Council: Public Hearing on draft plan
April 26	Deadline for citizen comments on draft plan
April 27	Asheville City Council approves Action Plan
May 12	Action Plan submitted to HUD

Approximately $3,800,000 will be available for allocation this year.

A full staff report, detailing the funding recommendations made by the City's Housing and Community Development Committee and the Asheville Regional Housing Consortium, will be submitted to Council before the hearing.

City staff recommends City Council set the public hearing for April 13, 2004.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Newman moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEM PULLED OFF CONSENT AGENDA FOR DISCUSSION

APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 9, 2004, AND THE WORKSESSION HELD ON MARCH 16, 2004

Councilwoman Jones moved to amend the minutes of the March 16, 2004, worksession to show that the funding for writing the 10-year plan to end homelessness would be monies coming from the HOME funds, not Community Development Block Grant funds; and to approve the minutes of the March 9, 2004, meeting. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

III. PUBLIC HEARINGS:

REQUEST FOR CONTINUANCE OF PUBLIC HEARING RELATIVE TO A CONDITIONAL USE PERMIT REQUEST FOR PROPERTY LOCATED OFF BRITT DRIVE FOR THE CONSTRUCTION OF A 100 UNIT APARTMENT COMPLEX IN AN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley said that there has been a request for a continuance of this public hearing.

Ms. Patsy Brison Meldrum, attorney representing Britt & Tilson Glass Company, one of the neighboring property owners to the proposed project, requests a continuance for three reasons. (1) The Technical Review Committee recommended approval of the project with conditions. One of the conditions is that Britt Drive be used as an access if legally permissible. If Britt Drive is not available for access, the City's Traffic Engineer requires that a traffic impact analysis be performed. Our firm has conducted a limited title search of the property proposed for the Foxwood Apartments development limited to determining whether or not access to Britt Drive was conveyed. We have found no such conveyance. In addition, the recorded subdivision plat for property, including our clients property, shows Britt Drive as a portion of that subdivision, but the subdivision does not include the property proposed for the Foxwood Apartments project. In addition, our clients, and other adjoining property owners, have installed the paved surface for Britt Drive and our records indicate that the City has not maintained Britt Drive. Therefore, it is our opinion that Britt Drive is not a public street and access is not available via Britt Drive. As of March 15, 2004, no determination by the City of Asheville has been made about the use of Britt Drive and no traffic impact analysis has been done for the project. On that basis, we are requesting a continuance of the public hearing until a determination can be made as to whether or not Britt Drive may be used for access and, if not, until a traffic impact analysis can be performed and reported to the City and available for review by adjoining property owners. Secondly, a portion of this project is located within the River District. Because there is a substantial change to the landscape for new construction over 5,000 square feet in size, the project would be classified as a "major works" which requires a formal review by the River District Design Review committee, which has not been done. Thirdly, she feels the continuance should be granted because of pre-hearing bias. In the staff report there are included proposed findings based upon evidence not yet before Council. Council has evidence that has been given before you before this hearing and that needs to be deleted from the record before the matter is considered.

Mr. Albert Sneed, attorney representing the property owner and developer, objected to a continuance. He explained that the developer didn't want access over Britt Drive. That was a suggestion by City staff. It was his understanding that the City Attorney has just determined that there is no public access over Britt Drive and that issue is no longer in question. There has never been a requirement for a traffic study. City staff's recommendation was that if Britt Drive was not available for access then a limited traffic study was required to determine whether or not the design of the entrance on Swannanoa River Road was proper. This project is able to provide 100 units of affordable housing because of a tax credit program. Since the application must be made shortly after April 1, he felt this is a ploy by the neighborhood to kill the project by asking for a continuance. The only thing in the River District is the entrance onto Swannanoa River Road and there are no building proposed in that District. Regarding the "pre-hearing bias," Mr. Sneed felt City staff was entitled to make recommendations to Council with the ultimate decision being made by City Council.

Planning & Development Director Scott Shuford said that the requirement that City staff is proposing for a traffic impact analysis is not to determine whether there is a capacity on Swannanoa River Road to handle the volume of traffic that will come from this project. It's an operational issue to determine what the best design for that single driveway would be in the event that Britt Drive was not available. We don't need the traffic impact analysis to determine whether the seven standards for a conditional use permit approval can be met. Regarding the River District, only a small portion of the property is located in the River District. It is located at the access drive with no structure in that District and consequently there is no need for River District design review.

City Attorney Oast said that Britt Drive is not publicly maintained beyond a certain point. The staff report does not require access via Britt Drive at this time. It may be that we later determine that it is available for public access, but that information is inconclusive at this time. He didn't think Council needed to make that conclusion in order for Council to make the decision tonight. In any event, it was his understanding that staff has made the determination that the project will work with a single access. Regarding the pre-hearing bias claim, he reminded Council that they are to make your decision on the basis of the information that has been provided to you at the public hearing. He didn't think the staff report with recommended findings rises to the level of pre-hearing bias.

Councilwoman Bellamy disclosed that she is the City Council liaison to the Housing Authority Board and has heard the presentation by the developer because there are project based Section 8 vouchers being given for this project. City Attorney Oast felt it was appropriate for Councilwoman Bellamy to disclose that fact, however, he did not feel that was a disqualifying conflict.

City Engineer Cathy Ball explained that initially looking at the plan they felt like because the number of units and because of the proximity to Swannanoa River and the possible flooding, they wanted to see two access points to the site. Our recommendation from the beginning was that the developer be able to acquire and be able to make access to Britt Drive. If that was not possible, (this project does not fall under the requirements of needing to complete a traffic impact analysis) then we need to do a limited study to make sure that there won't be issues if there is only one entrance into the site provided. There may be other ways to mitigate the problem of not having the other drive. An engineer can look at that entrance and make sure it can handle the capacity of all the vehicles that come in and out of there and make sure they can maneuver in and out. This is not a full-blown traffic impact analysis because we know Swannanoa River Road can handle the traffic. The engineer will look at that entrance and determine that if in certain conditions will traffic flow safety and can emergency services be provided to that facility. If it can't then are there other alternatives that would help accomplish the same thing, like is there another place on the property where another drive could be located.

Ms. Ball explained said that the City maintenance of Britt Drive ends prior to getting to this project, however, there is a platted right-of-way, and whether that right-of-way has limitations that would not allow this property owner to access it is a question that needs to be answered.

Councilman Dunn moved to not continue the public hearing to another date. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Ms. Meldrum asked that City Council re-order the public hearings and allow this public hearing to be heard first based on the number of people in attendance (in excess of 80). Based on no motion being made by Council to re-order the public hearings, the meeting continued.

ANNEXATION PUBLIC HEARINGS

Mr. Carter Pettibone, Urban Planner, explained that purpose of these hearings is for the City to explain the plan for extending City services to the proposed annexation areas, and to give all persons resident or owning property within the areas, and all residents of the City, the opportunity to be heard.

On January 13, 2004, the City Council adopted Resolutions of Intent beginning the annexation process for the following six areas referred to as the 2004 annexations: the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area. The Annexation Services Plan was approved on January 27, 2004, and a public information meeting was held on March 4, 2004. Approximately 30 persons affected by the proposed annexations attended this meeting. On April 13, 2004, City Council will consider adoption of the ordinances extending the corporate limits, with an effective date of the annexations being June 30, 2004.

Mr. Pettibone said that annexation is defined as an extension of the City's corporate limits. Annexation areas under the statutes must be developed to urban standards. Once annexed, the property owners and residents are entitled to City services and are subject to the City's taxes and ordinances. The authority for annexation comes under the N. C. General Statutes. North Carolina state law recognizes that the cities need to expand their boundaries to include this growth so that we don't end up in a situation where an increasingly relatively smaller number of citizens are financing the urban infrastructure used by a much larger population. The fact is that people living in close proximity to cities benefit from the cities, and state annexation law is designed to include these people in the costs and benefits of governing and servicing the City.

Mr. Pettibone explained the standards necessary to qualify areas for annexation – (1) at least 1/8 of the area's boundary must be adjacent to the current corporate limits; and (2) each area must meet at least one or more of four development tests - (a) population/density test; (b) subdivision test; (c) development test; or (d) nonresidential urban use test. The state also recognizes that certain areas within these annexation areas may be classified as non-urban areas and there are two qualifications that must be met.

He explained the City's annexation strategy has been to target areas (1) that are clearly developed and meet statutes, (2) include areas where water and sewer infrastructure have been extended, (3) improve the City's boundaries by eliminating pockets and clarifying boundaries; and (4) disburse the annexation areas geographically.

Mr. Pettibone then reviewed the various services (police protection, fire protection, solid waste collection, street maintenance, water distribution, and sewer collection) that would be provided to each of the annexed areas. He then reviewed the following financial plan:

Financial Impact:

Revenue: Total ad valorem property tax revenue - $254,055; Total state utility tax revenue - $22,742; Total local option sales tax - $91,799; Total Powell Bill allocation - $21,276; and Total fees, permits, licenses and charges for services - $38,845. Total revenue - $424,717.

Annual recurring expenditures: Police (one additional officer) - $35,000; Fire (rural fire department contracts expected to be in place for at least 5 years. Additionally, there is a general annual expenditure not associated with a particular area of $17,000 to reflect a portion of the cost for the hiring of a Deputy Fire Marshal. This position will be hired effective January 1, 2005) - $62,446; Solid waste - $13,827; Recycling - $3,922; and Street lighting - $101. Total recurring expenditures - $115,296.

Annual capital expenditures: Water lines - $135,020; Sewer lines - $31,200; Solid waste (cost equals potential economic loss compensation for private solid waste haulers) - $60,839; Rollout containers - $16,760; Street signs - $2,100; Street repair - $39,500; Sidewalks - $232,000. Total annual capital expenditure - $517,419.

A. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE HERITAGE BUSINESS PARK AREA

Mayor Worley opened the public hearing at 5:45 p.m.

Mr. Pettibone explained the Heritage Business Park area – This area contains commercial and vacant lots. This contains 11 lots totaling 13.58 acres. There is no estimated population. If the property is annexed, it would bring in $7,591 in annual property tax revenue.

Mr. Pettibone said that there are nine businesses in this proposed annexation area: Andy Oxy Company; Go Grocery Outlet (portion of property): Heritage Limited; James C. Greene Company; Land-of-Sky Regional Council; Leicester Carpet (portion of property); Mike Creasman, Certified Financial Planner; N.C. Division of Pollution Prevention; and Wilco.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:49 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on April 13, 2004.

B. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE HONEY DRIVE AREA

Mayor Worley opened the public hearing at 5:49 p.m.

Mr. Pettibone explained the Honey Drive area – This area contains single-family residential. This contains nine lots totaling 4.5 acres. There is an estimated population of 13. If the property is annexed, it would bring in $6,037 in annual property tax revenue.

Mr. Pettibone noted that initially the Annexation Services Plan did not include taking over a portion of Honey Drive for maintenance. We do plan to bring a small amendment to the Services Plan to Council to show that we will be taking over the portion of Honey Drive within the proposed annexation area for maintenance.

Mr. Wayne Marshall, Honey Drive resident, said that he was not opposed to being annexed and was surprised that they had not been annexed years ago. However, he questioned if the process would be good for Asheville given the amount of revenue it would create from the few properties being annexed. He compared the $82,000 cost of upgrading the water system improvements with the revenue that the few homes on Honey Drive would bring.

Mr. Fred English, Haw Creek resident, felt that the City should not be annexing until they provide services to current residents and also felt that there would be no affordable housing when rents have to be increased.

Mr. Dick Washam, Honey Drive resident, questioned where the $82,000 for water system improvements to their area would come from and how does the City justify putting newly annexed areas ahead of other areas in the City that have been waiting for water line improvements.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 5:58 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on April 13, 2004.

C. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE ENKA PARK AREA

Mayor Worley opened the public hearing at 5:59 p.m.

Mr. Pettibone explained the Enka Park area – This area contains single-family residential and industrial. This contains 89 lot totaling 30.27 acres. The estimated population is 170. If the property is annexed, it would bring in $39,257 in annual property tax revenue.

Smith Dray Line Company is the only business in this proposed annexation area.

Mr. C. V. Parker, Enka Village resident, said that this is annexation is 2/3 of Enka Village. He noted that this is the only remaining intact mill village in the State of North Carolina. They currently pay for water assessments, street lights, and sewer maintenance. But since the City is only annexing 2/3 of Enka Village, the City is taking over four streets and leaving two. He understands the other 1/3 of Enka Village does not meet the annexation standards, but the Enka Village residents will still have to be responsible for the other two streets' sewer maintenance, street lights, etc.

Upon inquiry of Councilman Davis, City Engineer Cathy Ball said that the water service in the area is maintained by the City of Asheville. The property owners are working with MSD to have their sewer lines taken into the MSD system for maintenance purposes. If the sewer lines are up to MSD standards and taken over by MSD, they will take over the entire line but the homes in the County will be considered outside the district and would be charged an additional $0.01 per CCF (100 cubic feet = 1 CCF) on their bill.

Upon inquiry of Councilman Davis, Planning and Development Director Scott Shuford responded about the other two streets. He believed that when the Biltmore Lake development went in, those properties were connected to the sewer and water system that was being installed for that project. Upon annexation into the City, we will be providing to the Enka Village residents street light service. He also said that the narrow streets are not dissimilar to other streets in the City. In addition, the City felt that the original sidewalks needed to be replaced so we have added $232,000 in our Annexation Services Plan to address that need.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:04 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on April 13, 2004.

D. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE ASHWOOD AREA

Mayor Worley opened the public hearing at 6:04 p.m.

Mr. Pettibone explained the Ashwood area – This area contains single-family residential and mobile homes. This contains 58 lots totaling 14.42 acres. The estimated population is 113. If the property is annexed, it would bring in $30,881 in annual property tax revenue.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:07 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on April 13, 2004.

E. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE HEATHBROOK AREA

Mayor Worley opened the public hearing at 6:08 p.m.

Mr. Pettibone explained the Heathbrook area – This area contains single-family residential. This contains 24 lots totaling 4.51 acres. The estimated population is 47. If the property is annexed, it would bring in $27,956 in annual property tax revenue.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:09 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on April 13, 2004.

G. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE SWEETEN CREEK ROAD AREA

Mayor Worley opened the public hearing at 6:09 p.m.

Mr. Pettibone explained the Sweeten Creek Road area – This area contains single-family residential, condominiums and multi-family residential, and commercial. This contains 190 lots totaling 74.86 acres. The estimated population is 545. If the property is annexed, it would bring in $140,303 in annual property tax revenue.

There are seven businesses in this proposed annexation area: Arden Garage and Towing; BellSouth; Crazy Dave's Fireworks World; Lane and W.M.C. Auto Group; The Oaks at Sweeten Creek; Papa's Grill and T & J Auto Service Center.

Upon inquiry of Councilman Newman, Mr. Pettibone said that this area meets the population test. It contains 7.3 persons per acre, which is well above the minimum of 2.3 persons per acre.

Ms. Janice Dotson, resident in Pensacola Heights, explained how the additional property taxes would be a hardship on the 12 units in Pensacola Heights.

Mr. Ralph Shindler, representing the Pensacola Heights Homeowners Association, said that his complex is made up of many retirees on fixed incomes and with the higher price of drugs, fuel, etc. they would not like to have increased property taxes. He felt that annexation is unfair. The City already has streets that need repair, and a Civic Center that needs renovation. It does not need any more problems associated with annexation. His area already has water, sewer and excellent police and fire protection so the City will not be offering them anything they don't already have.

Ms. Betsy Gardner felt this annexation process is moving too rapidly in that the short notice puts property owners at a disadvantage. It does not allow them proper time to research and prepare a rebuttal to the proposal. She felt it gives the impression of bulldozing annexation just to receive one more year of taxes. In addition, their area is marginally eligible for annexation due to the difference between the character of existing City land and the land proposed to be annexed. It may meet the letter but not the spirit of the annexation statutes.

Ms. Jeanette Senn, property owners, said that because Carrington Place has a Condominium Association, their roads and street lights are private and there is nowhere to house the green trash cans. They feel they are being taxes with no services being provided. Since the City does not have the proper equipment to pick up dumpsters, they would like to make sure that private carriers to have the right to contract with the City. In addition, she asked that the City look at their streets to see if they meet the criteria for maintenance and perhaps provide street lighting.

Upon inquiry of Councilman Dunn about the lack of sidewalks on Sweeten Creek Road, Mr. Pettibone said that the City requires sidewalks be constructed when developments are built within our jurisdiction.

City Attorney Oast said that N.C. Gen. Stat. sec. 160A-49 requires that the appropriate persons who handled those tasks make certain certifications regarding public notice provided for this hearing. Urban Planner Carter Pettibone and City Clerk Burleson have made the appropriate certifications. In addition, City Clerk Burleson has certified certain other ministerial facts regarding the availability of the Annexation Services Plan; the delivery of the statement of impact to Buncombe County; letters to volunteer fire departments and their responses; and letters to the solid waste providers and their responses. He asked that these certifications be entered into the record.

Mayor Worley closed the public hearing at 6:25 p.m.

Mayor Worley said that the ordinance to extend the corporate limits into this area would be considered by City Council on April 13, 2004.

H. PUBLIC HEARING TO CONSIDER THE REZONING OF 34.6 ACRES LOCATED AT SCHENCK PARKWAY FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3099 – ORDINANCE TO REZONE 34.6 ACRES LOCATED AT SCHENCK PARKWAY FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Worley opened the public hearing at 6:29 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to rezone 34.6 acres located at Schenck Parkway from RS-2 Residential Single-Family Low Density District to Commercial Industrial District. This public hearing was advertised on March 12 and 19, 2004.

Biltmore Farms Inc., (applicant) wishes to rezone the property in order to continue the business park development of the Biltmore Park Master Plan. The properties are located just outside the City limits in the extraterritorial jurisdiction area on the extension of Schenck Parkway. There is a mix of zoning districts in the area, with RS-2 and RS-8 to the east, RS 2 to the north, and CBD to the south and unzoned interstate right-of-way to the west. Land uses include primarily single-family residential to the east, a scenic corridor (Blue Ridge Parkway) to the north, vacant property to the south and I-26 to the west. The surrounding properties to the east and south are part of the Biltmore Park development and, in addition to being regulated by zoning, are subject to the provisions of Biltmore Park's master plan. The property is separated from the Blue Ridge Parkway roadway by a knob and topography that limits the visual impact of the development from that scenic corridor except from the Parkway's I-26 bridge crossing. Staff has identified no compatibility concerns that would not be mitigated by the Unified Development Ordinance's buffer requirements.

The 2025 Plan calls for the protection of scenic views and vistas and enhancement of the Blue Ridge Parkway viewshed. The subject property is separated from the Blue Ridge Parkway roadway by a knob that limits the visual impact of the development from that scenic corridor except from the Parkway's I-26 bridge crossing. The Plan also calls for the City to identify and zone areas appropriate for large-scale commercial uses where transportation and other infrastructure is available for such uses. This area has been planned and developed for uses permitted in the CI zoning district.

Pros

- Rezoning the property CI would allow the applicant the opportunity to continue the development plan for the Biltmore Park project.
- The rezoning is consistent with the intent and purpose of the Unified Development Ordinance (UDO) and goals of the City's smart growth policy and 2025 City Development Plan.
- Staff has identified no compatibility concerns that would not be mitigated by the buffering requirements of the UDO.

Cons

- Perception of commercial intrusion.
- Potential of development to affect Blue Ridge Parkway viewshed.

On March 18, 2004, the Planning and Zoning Commission voted unanimously (4-0) to recommend approval of this rezoning request. The only public comment received was from the applicant's representative, Greg Hildebrand, who was in support. We have received no informal objection to the request.

City staff recommends approval as well

The following residents were opposed to the rezoning for various reasons, some being but are not limited to: traffic study and noise abatement study should be performed before any decisions are made to rezone; desire to see the view preserved; 6-story corporate headquarters will not be compatible with the neighborhood; all uses in Commercial Industrial District are not compatible with the RS-2 adjoining neighborhood; noise already a concern in the area; safety for children from traffic near park and in the residential development is a concern; not enough buffering from site to residential property; view will be destroyed because of the significant grading and loss of trees; removal of trees will create a wetland for stormwater runoff from the development; request for mandatory 100' buffer (not 30'); residential properties will have to look at a parking lot; and air pollution:

Ms. Kay Whittington, resident on Dianthus Drive
Ms. Jackie Steward, resident on Dianthus Drive
Mr. Wyatt Stevens, resident on White Ash Drive
Mr. William McCann, resident of Red Cedar Lane

Mr. Rick Lutovsk, representing the Chamber of Commerce and Economic Development Commission, spoke in support of the rezoning in that it has the potential for job creation.

Mr. Yates Pharr, employee with Biltmore Park representing the property owner, explained that this land was unzoned until approximately two years ago when the City zoned it residential because it was in the extraterritorial jurisdiction area. They have always intended to use this land to be commercial and to continue their Master Plan in Biltmore Park. They intend to carry out the same type of Class A improvements that they have so far.

Councilwoman Bellamy asked if the developer would be willing to place a 100-foot buffer on the residential side. Mr. Pharr explained that when anyone is interested in looking at Biltmore Park there is an illustrative plan that is given that shows where the property was intended to be developed as commercial (he showed a similar plan). There is almost no difference in the development or the houses from the illustrative plan originally shown. The distance between the residential and where the planned usable area is at this time is anywhere from 200-300 feet as it is now. With the 30-foot buffer (Type-D buffer required), that would be added to the existing 200-300 feet boundary.

City Attorney Oast cautioned Council that they cannot consider specific development plans for any rezoning, in that any use permitted in the Commercial Industrial District is allowed. He said that Council can rezone some, all or none of the property, but Council cannot put conditions on it. The only buffering we can require is what is provided by the Unified Development Ordinance.

After a brief discussion about additional buffering, City Attorney Oast said the developer can work with the neighbors as to any additional buffering, but again, the only buffering Council can require is the Type D buffer that the UDO provides.

Mr. Shuford advised Council that any large scale project is subject to all City requirements and if the project is large enough it would be considered a Level III project. A Level III project will have to be approved by City Council which will give Council an opportunity to cover some concerns expressed tonight.

Councilwoman Bellamy urged the developers to meet with the neighbors regarding the buffering. Mr. Pharr said that he will be happy to listen and work with the neighborhood where they can.

Mayor Worley closed the public hearing at 7:08 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3099. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 20 - PAGE 97

At 7:25 p.m., Mayor Worley announced a short break.

H. PUBLIC HEARING RELATIVE TO A CONDITIONAL USE PERMIT REQUEST FOR PROPERTY LOCATED OFF BRITT DRIVE FOR THE CONSTRUCTION OF A 100 UNIT APARTMENT COMPLEX IN AN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3100 - ORDINANCE DENYING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED OFF BRITT DRIVE FOR THE CONSTRUCTION OF A 100 UNIT APARTMENT COMPLEX IN AN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 7:45 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit for property located off Britt Drive for the construction of a 100 unit apartment complex in an RM-16 Multi-Family High Density District.

Ms. Hamel said the project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes the existing zoning on the lot to create a sustainable high-density residential development within the City Limits. The site is also within .5 mile to 2-mile proximity of transit service, parks, potential employment centers, restaurants and shopping centers.

This project will make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2000-2005. The plan projected a need for 370 new affordable rental units each year within the City of Asheville. All units within this development will be affordable for households with less than 60% area median income and some will be affordable to households with as little as 30% area median income. Affordability will be assured for 30 years under the terms of the federal and state Low Income Housing Tax Credit programs.

In 2000 - Conditional use rezoning request from RM-16 to CB-II requested. The application never proceeded past the TRC level because the applicant could not provide the necessary site plan requirements.

On January 4, 2004, Tommy Ward with Gateway Companies submitted a conceptual master plan for the construction of a 100-unit multifamily development on approximately 9.59 acres with access proposed on Swannanoa River Road and Britt Drive (Attachment to City Exhibit 3 – Location Map). The property is zoned RM-16 and River District, which allows for a density of 16- units per acre. Based on the acreage, up to 153 units could be constructed. The developer is proposing 100 units, a density of approximately 11 units per acre.

Using a schematic grading plan (Attachment to City Exhibit 3), she said there are steep areas and changes in elevations when compared to the surrounding existing single-family residential dwellings. There are some significant changes in elevation where it's closest to Swannanoa River Road. There is an average of a 35-50' change in elevation and the development will sit below the residential properties. Another significant feature on the site is the location of Ross Creek (City Exhibit 4). A portion of the property is located in the floodway. Kenilworth Dam is located approximately 250 feet north of the site.

The project will consist of five buildings, housing 20 units each to include 30 – one bedroom units, 50 – two bedroom units and 20 – three bedroom units. (Attachment to City Exhibit 3 – Schematic Site Plan) They will be constructed in a 2-3 story split design (3 stories in the front, 2 stories in the back) with a maximum height of 40-feet. Amenities to the complex include: a 3,000 square foot community building, swimming pool and several play areas within the site. Open space, in excess of the standard City requirement, is shown in multiple locations throughout the development. A bus stop with shelter is also being proposed at the entrance of the development on Swannanoa River Road. Although transit service is currently unavailable to areas along Swannanoa River Road, the developer will work with the transit director in order to determine an appropriate level of service. Currently, a transit stop is available near the entrance to River Hills Shopping Center, approximately .5 miles from the site. Two other transit stops, located near the Asheville Mall on Tunnel Road, are within a mile of the site.

Due to the challenging topography and proposed location of the buildings, a large retaining wall will be constructed along portions of the eastern property boundary. The plan also shows several other retaining walls proposed around the northern edge of the parking lot and around portions of the building located on the west side of the property.

A 25-foot, type "C" vegetative buffer is required along the north, east and northwestern sides of the property where adjacent to Low-density residential uses (Attachment to City Exhibit 3 – Schematic Landscape Plan). A 15-foot, Type "A" vegetative buffer is required along the western side of the property (Britt Drive) where mainly low impact commercial uses exist. In addition to the required landscaping and in an effort to further mitigate the impact of the development to abutting residential uses, the developer has offered to install a privacy fence around the perimeter of the property where permitted.

On Thursday, December 11, 2003, and Wednesday, January 21, 2004, the developer, Tommy Ward, and the owner of the property, Thomas Wolfe, met with the Kenilworth residents to discuss the details of the project and to receive input on site design and landscaping from the neighborhood. At both meetings a number of concerns from the neighborhood were voiced including: traffic on Swannanoa River Road, flooding and liability concerns for Kenilworth Dam, site design, noise, access through Kenilworth Forest, emergency access to Foxwood apartments during times of congestion and flooding, stormwater and erosion control and the environmental impact to Ross Creek, sewer service issues, and construction concerns.

Some of the comments and concerns from the neighborhood could not be addressed due to the limited information required for a conceptual plan. However, following the Council approval process, detailed plans will be submitted to the Technical Review Committee (TRC) for review. This review will provide a level of detailed information that will enable staff to address many of the concerns by the neighborhood.

On Monday, February 16, 2004, the TRC reviewed the conceptual plans and voted to continue the project to the March 1, 2004, meeting to allow the developer time to address concerns from the neighborhood and comments outlined in the staff report including building location, schematic grading plans and potential locations of retaining walls. On Monday, March 1, 2004, the TRC reviewed the revised conceptual plans and made comments primarily identifying items that must be addressed in the submission of detailed plans following the Council approval process. The TRC members voted unanimously to recommend approval of the project subject to the conditions outlined in the staff report and the following additional conditions:

1. The site plan must identify walkways between buildings and parking areas.
2. Any retaining wall over 30" in height must have pedestrian guardrails installed.
3. The developer will work with affected property owners and MSD to reach a reasonable agreement on the relocation of sewer lines on the subject property.
4. If it is determined that Britt Drive cannot be used as a secondary access point, then a traffic impact study needs to be completed for the main entrance drive.
5. If it is determined that Britt Drive cannot be used as a secondary access point, then all of the buildings, including the clubhouse, must contain sprinkler systems.

The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety;

The proposed use of the property is a multi-family residential project. The property is appropriately zoned for the proposed use. Prior to the issuance of permits, the Technical Review Committee will review the final plans to insure technical standards set forth in the Unified Development Ordinance (UDO), the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety, are met. Kenilworth Dam is classified as a high-hazard dam, which reflects its potential for property damage in the event of failure, not its current condition. The dam is inspected yearly by the Department of Environmental and Natural Resources and examination of these inspection reports indicate the dam is in sound condition.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

Any development on the site must comply with all City standards in regards to clearing and grading, erosion control, and maximum slope. Grading of the site will be necessary to develop the property as proposed. The buildings will be located on the eastern side of the property in order to reduce construction within the floodplain, minimize land disturbance near Ross Creek and to provide a greater area for preservation of existing vegetation. A condition has been added to the project for the developer to work with staff and other local agencies to address water quality issues by means of appropriate wetland species, riparian buffers and use of other Best Management Practice tools.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

The applicant plans to present evidence that the proposed development will have minimal, if any, negative impact on values of abutting or adjoining properties.

In addition to the significant elevation differences between the project site and abutting residential properties, existing landscaping is expected to be preserved around the perimeter of the property; a privacy fence and a 25-foot landscape buffer will also be installed. The buildings will also be constructed with long lasting materials and designed in manner that will enhance the surrounding community.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

The existing zoning on the property is River District and RM-16. The applicant is proposing a density well below what is permitted on the lot. In addition to the landscape buffers that will be installed, the buildings are designed with features that will increase their compatibility with the character of the abutting neighborhood. Although larger than the buildings in the immediate neighborhood, the buildings are compatible with the development along Swannanoa River Road. The development should positively contribute to the character of this area.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth policies and affordable housing. The project utilizes the existing zoning on the lot to create a sustainable high-density residential development within the City Limits, and where infrastructure capable of handling this type of development exists. The site is also within .5 mile to 2-mile proximity of transit service, parks, potential employment centers, restaurants and shopping centers.

This project will also make a significant contribution to meeting the needs for affordable rental housing outlined in the Consolidated Strategic Housing and Community Development Plan 2000-2005. The plan projected a need for 370 new affordable rental units each year within the City of Asheville.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities;

94

Any development of the site would require technical approval from all applicable departments including representatives of the Water Resources, MSD, Engineering, Fire and Building Safety Departments. The conceptual plans for the development have been reviewed by the City's Technical Review Committee, which found that adequate services and facilities are available for the proposed development. The site is also within .5 mile to 2-mile proximity of transit service, parks, potential employment centers, restaurants and shopping centers. In addition, the developer is providing a bus stop with a shelter at the entrance of the project on Swannanoa River Road and has agreed to work with the Transit Director on determining an appropriate level of transit service to the site.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

Two access points are currently proposed for the project, one on Swannanoa River Road and one off of Britt Drive. The City's Traffic Engineer has determined that a Traffic Impact Analysis will only be required if it is found that access cannot be legally provided on Britt Drive.

Pros:

- The site is appropriately zoned for this type of development.
- The project makes a significant contribution to meeting the need for affordable rental housing in the City of Asheville.
- The project supports numerous goals and strategies outlined in the City's 2025 plan as it relates to smart growth, infill and sustainable development.
- The site is within close proximity to potential employment centers, shopping venues, and parks and recreational activities (Rec. Park, Azalea Park, future Riverside Parkway).
- Development of the site will necessitate an environmental clean up, eliminating any on-site hazardous materials.
- The conditional use permit will require the developer to work with staff on addressing water quality issues in order to protect the sensitive wetland environment surrounding Ross Creek.
- The buildings are located opposite Ross Creek and outside of the flood hazard area. This will assist in minimizing land disturbance near Ross Creek and potentially allow a greater area for the preservation of existing vegetation.

Cons

- Due to the existing topography on the site, extensive grading will be necessary to develop the property as proposed. This will require the construction of several large retaining walls on the site.
- The property is located approximately 250 feet downstream from Kenilworth Dam, which is classified as a high-hazard dam.
- Although a Traffic Impact Analysis is not required for this project, ingress and egress to the site may be difficult at times due to traffic on Swannanoa River Road.
- City transit does not currently provide service to Swannanoa River Road.

The TRC voted unanimously to recommend approval of the project subject to the conditions outlined in the staff report and the following additional conditions:

1. The site plan must identify walkways between buildings and parking areas.
2. Any retaining wall over 30" in height must have pedestrian guardrails installed.
3. The developer will work with affected property owners and MSD to reach a reasonable agreement on the relocation of sewer lines on the subject property.
4. If it is determined that Britt Drive cannot be used as a secondary access point, then a traffic impact study needs to be completed for the main entrance drive.

5. If it is determined that Britt Drive cannot be used as a secondary access point, then all of the buildings, including the clubhouse, must contain sprinkler systems.

Staff recommends approval of the conditional use permit with the conditions outlined by the TRC and the following added conditions:

- All site lighting shall be equipped with 90-degree cut-off fixtures and oriented away from the surrounding residential property.
- The portions of the retaining wall visible from Swannanoa River Road shall be designed to accommodate vegetation to visually screen the effects of its height.
- Privacy fencing shall be installed by the developer to screen and prevent access to and from the adjoining residential development to the extent possible.
- The developer shall work with city staff and other independent groups to address water quality issues in the design and monitoring of stormwater run-off infrastructure.

At Council's discretion, the Kenilworth Neighborhood has requested consideration of the following conditions:

- Light shields that block out 100% of potential light pollution.
- Full barrier protection from trespassing into the neighborhood and protection from our yards being used as cut through to the mall. This will also protect the Developer from cross trespassing from the neighborhood. A metal fence such as the one used by the Asheville Mall, if this does not work it could be topped with barbed wire.
- Landscaping that would provide maximum noise pollution and act also as a sight barrier while maintaining its natural context.
- A written plan of how to maintain all barriers, assurance that upkeep will be a priority, and updated contact information to report breaches in the barrier.
- Annual monitoring of Ross Creek by a qualified independent group or engineer much like was demanded by City Council for the Overlook Village project on Tunnel Road.
- Deeding to Kenilworth Forest Community Club, Inc. the strip of land between lot 109 and lot 1, as verbally promised by Mr. Ward at the first public neighborhood/developer meeting.
- Written assurance from Mr. Ward that he will not use blasting in construction of the project, as verbally stated as the first TRC meeting. Blasting could jeopardize the integrity of the dam.
- For the developer to meet all conditions to date and any others provided in the future by City Council and the neighborhood.

City Attorney Oast entered the City Exhibit 3 into the record. Ms. Patsy Brison Meldrum, attorney representing Britt & Tilson Glass Company, one of the neighboring property owners to the proposed project, objected to offering the staff report (City Exhibit 3) into the record because Council has evidence that has been given before this hearing and that needs to be deleted from the record. Therefore, she objected based on pre-hearing bias. Mayor Worley noted the objection and overruled it.

Mr. Albert Sneed, attorney for the developer and property owner, questioned Mr. Tom Ward, developer. Mr. Ward gave testimony about his company – Gateway Companies out of Florence, Alabama. They specialize in affordable housing. This project cost will be almost $90,000 per unit. He explained how they are in competition with other 152 other applications for tax credits, which would enable the project to the constructed. He explained that his company will own the property for 30 days, which is mandated by the State of North Carolina. Mr. Ward said they are willing to deed the right-of-way that leads up into the existing neighborhood to their homeowners association. They will not use that for foot traffic. The City has asked them to grant an easement for a water-loop, which they will do. He said the Asheville area has a medium income of $49.700. Twenty-five percent of the units would be leased to persons making 40% of that amount. The other remaining 75 units would be leased to persons making 60% of the area medium. There are no market rate units. They are building 10 handicapped units, which is 5 more than required, and also two additional hearing-impaired units. Using City Exhibit 3 (Schematic Grading Plan) Mr. Ward explained the elevation differences from White Pine Drive to the existing property. Mr. Ward said that there has been debris dumped on this site which will have to be removed and tested, at their cost. Based on his experience, this project is appropriate for this location because it's close proximity to jobs, e.g. the Asheville Mall, retail outlets and hospitals. Mr. Ward explained that there are 200 parking spaces (two spaces for each unit), however, the majority of the houses would only require one parking space due to the income levels. It was his opinion that this project would not endanger the public's health or safety.

Mr. Albert Sneed questioned Mr. Thomas Wolfe, officer of the company that owns this property. He said that they have a contract to sell the property to the Gateway Companies which contract was in place before the application was filed. He said that The Gateway Companies had the authority to file the application on this company's behalf Using photos (Applicant Exhibit 1), Mr. Wolfe showed the existing property which consists of left-over sewer pipe, construction debris, old tires, grown up weeds, bulldozer, warehouse, etc.

Mr. Albert Sneed questioned Mr. Elbert Taylor, Realtor and Appraiser. Mr. Taylor said he has been appraising property in Asheville since 1981 and has appraised approximately 5-6,000 residential properties in Asheville. He has been qualified as an expert witness in courts on various types of cases. He said that he was familiar with this property and the property on White Pine Drive and had in fact inspected them earlier in the day.

When Mr. Sneed asked Mr. Taylor if he had an opinion of whether or not this project will not have any impact on the property values adjacent to this project, Ms. Meldrum objected. Mayor Worley noted the objection and overruled it.

When Mr. Taylor said that he did have an opinion, Ms. Meldrum objected. Mayor Worley noted the objection and overruled it.

Mr. Taylor said that this project will have a neutral effect, no effect or will increase the value of the property on White Pine Drive. He bases that opinion on the studies he has seen on affordable housing as well as from his experience in this market. He said the elevation runs from 35-60 feet to the backyard of the properties on White Pine Drive and once they have no access from White Pine Drive, and the residents from this property cannot get to White Pine Drive this will actually be a benefit to the residents. Any affect to the property to the south and east of the property will be a benefit to all properties as well. It will clean up the area and it will also buffer on each side of the project.

Mr. Albert Sneed questioned Mr. Anthony Butzek, the City's Traffic Engineer. Mr. Butzek said he was a registered professional engineer, with a Batchelor degree and Masters degree in traffic engineering. He has studied traffic engineering for approximately 9 years and the City regularly relies on his expert opinions about traffic engineering matters. Mr. Butzek said that he has reviewed this project. The traffic count on Swannanoa River Road is approximately 12,000 per day. He said the estimate for development of a 100-unit complex would be 734 trips generated per day or 73 trips during the p.m. peak hour.

When Mr. Sneed asked Mr. Butzek if he had an opinion as to whether or not this project would have any serious impact or undue influence on traffic congestion, Ms. Meldrum objected. Mayor Worley noted the objection and overruled it.

Mr. Butzek said that he did not expect this project to have a significant impact on traffic congestion along Swannanoa River Road.

When Mr. Sneed asked Mr. Butzek if he had formed an opinion as to whether or not this proposed use will cause undue traffic congestion, Ms. Meldrum objected. Mayor Worley noted the objection and overruled it.

Mr. Butzek said that he has formed the opinion that he does not believe that this project will contribute to undue traffic congestion.

Upon inquiry of Mr. Sneed, Mr. Butzek said that it was his opinion that the project will not create a traffic hazard.

Mr. Butzek said that he requested the study for entrance on Swannanoa River Road. He explained that it is preferred that multiple access points be provided to better distribute traffic. Since this is a unique case and it appears that it may or may not be feasible to make that connection, if a single connection were to be made, given the size of the development and the concentration of the traffic all in one driveway on a fairly busy street, they wanted to be sure that that driveway was designed appropriately, including proper lanes and that if there were any potential problems that we could mitigate those in the design process. He explained this is a traffic impact study inasmuch as it is considering the operation of the driveway, but the development would not be expected to adversely impact on Swannanoa River Road. This is to simply to ensure that proper access is provided. For a two-lane road like Swannanoa River Road, assuming there needs to be turn-lanes where appropriate, 16,000 would be the maximum capacity. The current traffic count on Swannanoa River Road is 12,000 and with the additional 734 trips from this development the traffic count would be well below the maximum of 16,000.

Mr. Albert Sneed questioned Ms. Cathy Ball, the City's Engineer. Ms. Ball said that she has reviewed the reports provided from the State on the Kenilworth Dam. Her comments are based upon the State's reports. The report from the State inspection consisted of two pieces for 4 different years. Letters sent back to owners of the Dam stated that there was no immediate danger. Each letter had a report attached of the conditions of the Dam at the time the inspection was done. The letters indicated that there was no immediate threat but if the Dam did fail there would be danger to the public. In looking at a report that was completed, there was an indication of places where there was seepage in the Dam that tended to be normal wear on a dam of this age. She did not know if the Dam has been worked on or upfitted recently. Ms. Natalie Berry of her staff reported that she did look at the Dam and simply commented on seeing it. If the Dam is unsafe, the State of North Carolina requires the property owner to immediately repair it.

The following residents spoke against the issuance of the conditional use permit for various reasons, some being, but are not limited to: Flood Insurance Rate Map inaccurately portrays floodplain lines; in times of heavy rain and flood, emergency vehicles will not be able to reach residents at the entrance because the Swannanoa River Road is in the floodway; a no-rise engineering study needs to be performed since the floodway encroaches on a good portion of the property where the parking lot is to be located; City Engineer stated that a development on the property would increase the exposure of the Kenilworth Lake Commission and that the Dam failure could result in significant damage and possible loss of life; granting a conditional use permit may very well increase the City's liability for personal injury and property damage; without adequate safeguards to insure the integrity of the Dam the process should be stopped; it is highly likely that blasting will be required for grading and construction and it is a concern because the Dam was built in 1925; request for bond to be provided by the developer which would remain in place during construction and for one year after all construction is completed which would be sufficient to cover any damages to Kenilworth Lake Dam and surrounding properties and any personal injuries; request for bond that would not be released until the Kenilworth Lake Dam has been inspected by an independent engineer selected by the Kenilworth Forest Community Club and paid for by the developer; V-shaped retaining wall near the entrance to Foxwood is deceptive in plan view; in places, the 40 foot setback does not allow sufficient buffering and emergency access; there are massive retaining walls; steeply graded land, tall fencing, the UDO will be violated because in the River District grading is prohibited on a degree of 45 degrees or more and prohibits the removal of existing vegetation; there is a perimeter fence along areas that would not be under water in times of flood which will be a death trap to the residents, residents won't want to walk on Swannanoa River Road at night to go to and from their jobs, there were only 9 minimum wage jobs available on one day at the Asheville Mall; there are no parks within walking distance of this development; why are 200 parking spaces being built if they will not be needed; there is no grocery store in the area; there is no place for children to ride their bikes, who will be watching the developer's company during the 30 years they must retain ownership of the property; the property is better suited for a bird sanctuary; illegal dumping on site must be removed in presence of County officials and site must be tested; soil contaminants can result in serious health effects; an environmental impact study should be performed before disturbing the site; there are no sidewalks on Swannanoa River Road; development is bordered by massive retaining walls, the Dam and the Swannanoa River; foot traffic cannot be prevented through the Kenilworth neighborhood; failure of the Dam would be catastrophic; an earthquake is not impossible and that would damage the Dam; light from development will be bothersome, there will be additional noise from the development; the parking lot turning radius will not be wide enough; there needs to be a study to ensure that adjoining property owners values are not negatively impacted; the City has not factored in all the Super Wal-Mart or Target traffic on Swannanoa River Road; a lot of inconsistencies and carelessness from developer; disabled people should not live below the Dam in case of flooding; undue traffic congestion and traffic hazards because many tractor-trailer trucks load and unload materials along Britt Drive for business located there; Britt Drive is a private road; Britt and Tilson floods during rains; if Britt Drive is widened, Britt & Tilson Company will have to be reduced by 1/3 and that would force him to close down; and many tress will have to be cut down if there is going to be an entrance on Swannanoa River Road:

Mr. Mike Weizman, President of Kenilworth Forest Neighborhood (Neighborhood Exhibit 1 - Letter dated February 5, 2004 to Mr. Tom Ward; Neighborhood Exhibit 2 – Flood Insurance Rate Map; Neighborhood Exhibit 3 – Photo of Lake Kenilworth Dam Spillway During Flood; and Neighborhood Exhibit 4 – Map showing 500 Year and 100 Year flood lines)
Mr. Jimmy Boyd, resident on East Shore Drive (Neighborhood Exhibit 5 – "Foxwood Development Opposition Sign In" containing 62 signatures; Neighborhood Exhibit 6 – Photo of Dam in 1925; Neighborhood Exhibit 7 – Photo of Dam repair in 1992; Neighborhood Exhibit 8 – Photo of Possible Blasting Damage to Lake Kenilworth Dam; and Neighborhood Exhibit 9 – Comments by Jimmy Boyd)
Mr. Phillip Hawkins, resident on White Pine Drive (Neighborhood Exhibit 10 – Topography Concerns with the Proposed Foxwood Project; Neighborhood Exhibit 11 – Schematic Grading Plan, Sheet S-2, 3-10-04; and Neighborhood Exhibit 12 – Building 2 Elevation, Sheet 7, 3-10-04)
Ms. Leigh Heminger, resident on White Pine Drive and Vice-President of Kenilworth Forest
Mr. Peter Loewer
Ms. Kathy Toler, resident of Kenilworth Forest Community (Neighborhood Exhibit 13 – Photo of Illegal Dumping in Ross Creek Watershed; and Neighborhood Exhibit 14 – Photo of Lower Ross Creek Watershed Illegal Dump Site)
Ms. Claire Payne, resident on White Pine Drive
Mr. Eric Finstick, resident on White Pine Drive
Mr. William Mansfield, resident on White Pine Drive
Ms. Addison Martin, resident on East Shore Drive

Mr. Les Whittington, resident on East Shore Drive
Ms. Karen Flynn, resident on White Pine Drive
Mr. Frank Adams, resident on Forest Hill Drive
Ms. Kathy Sheldon; resident on White Pine Drive
Mr. Bill Britt Jr.; co-owner of Britt & Tilson Glass Company (Neighborhood Exhibit 15)
Mr. David Tilson, co-owner of Britt & Tilson Glass Company (Neighborhood Exhibit 15)

Ms. Meldrum cross-examined Mr. Butzek about traffic on Swannanoa River Road. Mr. Butzek said that he has not taken traffic counts on Swannanoa River Road because the N.C. Dept. of Transportation (NC DOT) takes those counts. He has reviewed the NC DOT published traffic counts for this meeting. He did not take into consideration any additional traffic impact from the Super Wal-Mart or the Target store because neither one of those would push it over the capacity limit that he estimated for the roadway. He did not examine any traffic accident reports for Swannanoa River Road. The road profiles for Swannanoa River Road are submitted in the final TRC plans. If a traffic study is required, then there would be a study of if a traffic light should be installed at the proposed entrance on Swannanoa River Road He said that in his opinion the site distance he from the new proposed entrance to the curb going towards Lowe's is adequate.

Ms. Meldrum cross-examined Ms. Ball regarding the Kenilworth Lake Dam (Attachment to City Exhibit 3 – E-Mail to Kim Hamel regarding Kenilworth Lake Dam). Ms Ball read the following portion of the e-mail: "A new development would increase their exposure." She explained that it is the Kenilworth Lake Commission's exposure that would increase. She said that the 500-year floodplain is not shown on the map provided by the developer, but the 500-year floodplain is close to the 100-year floodplain. Using Neighborhood Exhibit 2, she said that the proposed entrance on Swannanoa River Road is located within the 100- and 500-year floodplain line.

Ms. Meldrum cross-examined Mr. Taylor. Using the schematic grading plan (Attachment to City Exhibit 3), Mr. Taylor said that had not performed any appraisal reports on the single-family residents adjacent to the proposed property. He said that he has been appraising in Buncombe County since 1981 and it was his opinion that property values in Buncombe County have continued to increase no matter where the property is located. He has not done an appraisal on the impact of a 100-unit development on single-family homes.

Ms. Meldrum cross-examined Mr. Ward. He responded to questions regarding the elevations. He said that there is a sewer line that runs across the developer's property down to Swannanoa River Road and they are willing to work with the residents to provide them with an easement. They will relocate any utility lines necessary to construct the buildings. Using the schematic grading plan (Attachment to City Exhibit 3), Mr. Ward explained where the retaining walls will be located. Soil borings have not been performed yet nor do they know if any blasting will be required at this point. If blasting is required, their engineers will obtain the necessary permits. He did not have any power of attorney or other authority from the owner of the property to make this application; however, the owner of the property delivered the application to the City.

Upon inquiry of Councilwoman Bellamy, Mr. Ward explained the process for tax credits and why the conditional use permit is required before the application is submitted. He said that the State of North Carolina reviews their plans and because they are using tax credits. Each year they must re-verify everyone's income and they must also monitor and inspect the units. He explained some of the guidelines they must follow for tax credits.

Ms. Meldrum entered into evidence a letter dated March 23, 2004, on behalf of Kenilworth Forest Community Club Inc., requesting denial of the conditional use permit (Neighborhood Exhibit 16).

Mr. Sneed cross-examined Ms. Ball. She said that the entrance of the project is within the 100 and 500-year floodplain, but there are no buildings in the floodplain (Attachment to City Exhibit 3 – Schematic Grading Plan). She said that sections Swannanoa River Road go in and out of the 100-year floodplain areas (Neighborhood Exhibit 2). She said that she was asked to evaluate the reports provided by the N.C. Dept. of Environment & Natural Resources (Attachment to City Exhibit 3). In Ms. Ball's testimony that the Kenilworth Lake Commission's exposure would increase if there was a new development, Ms. Ball agreed that of Britt & Tilson Glass Company hired an additional employee, or if there were any more cars on Swannanoa River Road, the Kenilworth Lake Commission's exposure would also be increased.

Ms. Meldrum outlined to City Council why the application should be denied due to its failure to comply with condition use standards 1, 2, 3, 6 and 7. (Neighborhood Exhibits 15 and 16). If, however, City Council approves the conditional use permit, she requested (1) there be no access to the development via Britt Drive; (2) that the permit include all of the conditions set forth in the staff report (City Exhibit 3) from the Planning & Development Department as well as the conditional from the Kenilworth Forest neighborhoods; and (3) that a bond be provided by the developer which would remain in place during construction and for one year after all construction is completed. The bond should be sufficient to cover any damages to Britt & Tilson Glass Company's property, which may occur during construction for the project, including, but not limited, flooding and erosion damage and interruption of business. She felt that the application was void from the beginning because at the time of the application, it was not filed by the owner or agent specifically authorized by the owner to file such application.

Mr. Sneed explained that during every meeting with the City and the neighborhood Mr. Wolfe (owner) and Mr. Ward (developer) have attended, showing that they are both in agreement with the plans. He felt Council has a wonderful opportunity to have 100 units of low-moderate income housing. The neighborhood doesn't have evidence that the Dam is unsafe because it's their responsibility to fix it. The Dam is safe and the buildings are outside of the 500-year floodplain. They gave no evidence that property values would be substantially injured. Our appraiser said these units do not injure the value of adjacent property. The City's Engineer said that the standards regarding traffic have been met. A Traffic Impact Analysis is not required for this project and that only a traffic study of the entrance is required to make sure that the entrance is properly designed for curb, turning radius, fire trucks, entry into the traffic, etc. They have no problems with the traffic study of the entrance or with the staff conditions for the permit, but he did not agree with the posting of the bonds. He urged Council to approve the conditional use permit.

Mr. Wilton Davis said that part of his property runs from Swannanoa River Road up Ross Creek. He explained that they haven't tried to develop their property because of the topography and floodplain. His main concern is liability.

Upon inquiry of Vice-Mayor Mumpower, Ms. Hamel said that the project will have to come back through TRC and meet all regulations and City standards prior to the issuance of any permits.

In response to Councilwoman Bellamy, Ms. Hamel said that there is a condition that the lighting needed to minimize any lighting pollution to the above residential neighborhood. Mr. Shuford explained that the lights will have to conform with the City's lighting standards and that the lights will be shorter than the buildings. He said that there may be security lighting in the back, but it will be at a low level.

When Vice-Mayor Mumpower asked about the neighborhood/developer process, Ms. Hamel said that it was her opinion that the process worked well. She felt the developer was very open with the neighborhood and in fact, flip-flopped the buildings per the neighborhood request.

Upon inquiry of Vice-Mayor Mumpower, Ms. Ball said that prior to doing any blasting, the developer will need a permit from the Fire Department and the Fire Department has to be at the site when the blasting occurs. They will also need to do an inspection report of the Dam. That is not something the City regulates, but it would be in their best interest to do that to make sure they can prove whether or not any blasting they have done has caused damage to that structure. She said there are safe ways to blast close to a dam and provide for the safety of the dam. With appropriate measures and safeguards in place, she felt the blasting can be done safely.

Vice-Mayor Mumpower asked about Britt Drive being a City maintained road. Ms. Ball said the City of Asheville City Maintained Street Inventory (City Exhibit 5) shows 0.08 miles (422.4 feet) of Britt Drive as a City maintained street.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said there is no City standard to require second entrance. It was a suggestion by City staff to improve the traffic flow as well as emergency access. The Fire Marshal has a threshold when second entrances are required, but this project does not meet that threshold.

Upon inquiry of Councilman Newman, Mr. Butzek said that what is before Council is only a conceptual plan. Details such as the turning radius for fire trucks would be addressed in the final TRC review of the plans. He did say though that nothing he has seen in their plans would prohibit emergency access in any form.

Upon inquiry of Councilman Newman, Mr. Butzek said that he felt the project would be viable with only one access onto Swannanoa River Road, assuming that after the traffic study is complete, the developer is willing to implement any of the recommendations.

When Councilwoman Jones asked about the increased traffic from the Super Wal-Mart, Mr. Butzek said that you probably won't see a lot of increased traffic on this section of Swannanoa River Road.

Councilman Dunn asked if the Dam broke would it take the development with it. Ms. Ball replied that she felt it would.

Councilman Dunn said the Dam inspection reports (City Exhibit 3) indicate that the inspections are superficial. He felt that with the potential for loss of life and property, there should be an inspection on the internal part of the Dam. Ms. Ball explained that the inspections are limited to what they can physically see and based upon that they see no need for immediate attention. She said that the City has regulations

When Councilman Dunn asked if the City can be liable if the City issues the conditional use permit and the Dam fails, City Attorney Oast said that if a problem is detected with the Dam, the responsibility falls on the owners of the Dam to either fix it or dismantle the Dam and drain the lake.

Councilman Dunn asked if Council can require the Dam to be inspected. City Attorney Oast said that the Dam is not on the property that is under consideration here and the information in the record indicates the Dam is inspected regularly by the State officials who are in charge of that process. If Council wanted to have more engineering studies done, Council could require that, but he assumed the inspectors would look for the same things that the State inspectors look for.

Councilman Dunn asked if the conditional use permit was approved and after all site preparation was done, could an internal and external inspection be performed on the Dam before any more construction. City Attorney Oast said that Council can require inspections.

Upon inquiry of Councilman Davis, Ms. Ball explained that the City regulates the 100-year flood elevation, so the buildings could not be constructed within the 100-year elevation, unless they are one foot higher than that elevation. The City does not have regulations over the 500-year flood elevation. There may be some stipulations on the 500-year flood through the federal government and through the tax credits the developer is seeking.

Councilman Davis asked if consideration was given to the significant changes made in Chunns Cove and the downstream flow of that water, which eventually goes into Kenilworth Lake. Ms. Ball said that typically with the size of that lake, the type of impervious area above stream, and the water surface elevation, she felt the Lake could handle that amount of water, however, that has not been studied specifically.

Councilman Davis was concerned that if there was a flood on Swannanoa River Road, there would be no access for emergency vehicles. Mr. Britt said that he has not been able to get to his business about one time in the past nine years and had to wait about 1-1-1/2 days until the flooding subsided on Swannanoa River Road.

Upon inquiry of Councilman Davis about how much grading will be required to have the primary entrance on Swannanoa River Road, Ms. Ball said we don't have detailed plans, but they will be required to adhere to the regulations in our Standard Specifications and Details Manual.

Councilman Davis was concerned about the children using the Dam and creek as a playground. Mr. Ward said they proposed to build a fence along the creek area but they now have to take that out because they are not allowed to build a fence in a flood zone area. At this point they are talking about a heavily dense landscape buffer.

Upon inquiry of Councilwoman Jones, Ms. Ball said that the City would not build a new road in a 100-year floodplain.

When Councilwoman Jones asked if there are any environmental concerns, Ms. Ball said she doesn't know enough about that to have a professional opinion either way. What she has seen on the property appears to be construction debris, but she did not look at the soil.

Mayor Worley noted that any the soil borings would have to be tested and if there are any environmental hazards they would have to be cleaned up.

Upon inquiry of Councilman Newman, Ms. Hamel said that internal sidewalks will be located throughout the site and there will be required on Swannanoa River Road for the length of their property. Ms. Ball said that sidewalks on Swannanoa River Road are a high priority on the Pedestrian Thoroughfare Plan but there is no funding allocated for it. She said that a half-mile of sidewalks is approximately $100,000.

Councilman Newman was concerned that the developer testified that most people wouldn't have two cars, so why are 200 parking spaces being proposed. He wondered if that is a potential way to reduce the footprint of the project on the site. Ms. Hamel said that parking spaces are based on the number of bedrooms per unit. They are allowed a minimum of 120 parking spaces up to a maximum of 200 parking spaces. Mr. Ward said they would be willing to construct 1.5 parking spaces per unit.

Upon inquiry of Councilman Newman, Mr. Ward said that since he can only apply for the tax credits annually. If the project were not approved, he would not be able to make an application for at least one year.

Councilman Newman recognized the challenging site and wondered if there was discussion about building a road that had more contour of the property. Mr. Ward said until they get a fully engineered topography map, they don't know exactly what the grades are, but chances are they will probably have to angle the road at some point.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford said that the Urban Riverfront Master Plan, that City Council will be reviewing shortly, provides residential along the river as a high priority.

Upon inquiry of Councilwoman Bellamy, Ms. Ball explained the no-rise engineering study, which is required anytime work is done in a floodway.

When Councilwoman Bellamy asked about the retaining walls, Ms. Ball said that we do require slope stabilization. There has to be an engineer's report showing that the design for the retaining wall is safe and then after it is designed, there must be an engineer's report saying that it was built according to the plans.

Upon inquiry of Councilwoman Bellamy, Fire Chief Greg Grayson said that for residential properties the N.C. State Code allows up to 100 units without having a mandatory secondary access road. It is his understanding from his staff that this project will be fully protected with automatic fire sprinklers.

Upon inquiry of Councilwoman Bellamy, Ms. Ball said that City regulations require the project to have some type of facility on site to hold back a 10-year storm event.

Mayor Worley closed the public hearing at 10:51 p.m.

Vice-Mayor Mumpower moved to approve the conditional use permit for property located off Britt Drive for the construction of a 100 unit apartment complex in an RM-16 Multi-Family High Density District, subject to the following conditions: (1) The site plan must identify walkways between buildings and parking areas; (2) Any retaining wall over 30" in height must have pedestrian guardrails installed; (3) The developer will work with affected property owners and MSD to reach a reasonable agreement on the relocation of sewer lines on the subject property; (4) If it is determined that Britt Drive cannot be used as a secondary access point, then a traffic impact study needs to be completed for the main entrance drive; (5) If it is determined that Britt Drive cannot be used as a secondary access point, then all of the buildings, including the clubhouse, must contain sprinkler systems; (6) All site lighting shall be equipped with 90-degree cut-off fixtures and oriented away from the surrounding residential property; (7) The portions of the retaining wall visible from Swannanoa River Road shall be designed to accommodate vegetation to visually screen the effects of its height; (8) Privacy fencing shall be installed by the developer to screen and prevent access to and from the adjoining residential development to the extent possible; and (9) The developer shall work with city staff and other independent groups to address water quality issues in the design and monitoring of stormwater run-off infrastructure. This motion died for lack of a second.

Councilman Dunn said that water is an unknown factor and it cannot be contained. He felt affordable housing is very important but the safety of the future residents of the development is more important.

Councilman Newman felt the intensity of the footprint of the project and the intensity of the development is not reasonable compatible with significant natural and topographic features on the site. In addition, he felt the scale of the cuts into the site are genuinely out of scale.

Councilwoman Bellamy felt that the proposed use or development was not reasonably compatible with significant natural and topographic features on the site. She felt that with Kenilworth Dam so close, this was not the right location for this particular development.

Vice-Mayor Mumpower felt this was one of the worst displays of "Not In My Backyard" than he has seen on City Council. He felt City Council had an opportunity to step forward with affordable housing and feels the developer has met the requirements.

Councilman Davis felt it was not appropriate to build houses below a dam.

Councilman Dunn moved to deny the conditional use permit for property located off Britt Drive for the construction of a 100 unit apartment complex in an RM-16 Multi-Family High Density District. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Mayor Worley and Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 21 – PAGE 99

City Attorney Oast said that he would bring back the draft order for City Council wording approval at their next formal meeting on April 13, 2004.

At 11:06 p.m. and after a brief discussion on whether to continue with the rest of the agenda items or postpone them to another date due to the lateness of the hour, Councilwoman Jones moved to proceed with the remainder of the agenda tonight. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Mayor Worley, Councilwoman Jones, Councilman Dunn and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Davis.

At 11:10 p.m., Mayor Worley announced a short recess.

IV. UNFINISHED BUSINESS:

A. MOTION TO APPROVE THE PACK SQUARE CONSERVANCY PLAN AND ALLOW THE CONSERVANCY TO MANAGE NAMING RIGHTS FOR PARK FEATURES AS A FUND-RAISING/MARKETING TOOL

Ms. Carol King, Chair of the Pack Square Conservancy, said the Pack Square Conservancy is requesting consideration of plan revisions to Pack Square Conservancy Plan and approval of allowing the Conservancy to manage naming rights for the park features.

Ms. King briefly reviewed with Council the history of the project. The Pack Square Conservancy (PSC) recently held a design charette to receive and respond to public input concerning redesign of the middle section of the Pack Square Renaissance project. This was necessitated by the withdrawal of the Grove Park Inn's proposed building at this site. City Council has previously received a copy of the recommended plan by the PSC. This plan substitutes a smaller building for the large mixed-use structure proposed by Grove Park Inn (GPI).

As our experience with GPI indicates, there are currently existing development constraints at this site that complicate certain types of large-scale development. These constraints include the expense of underground parking and the need for expensive relocation of existing utilities (estimated by professional contractors at approximately $450,000).

Additionally, please note that Engineering staff will present a redesign for College Street for your consideration in April. This redesign will complement the PSC project but was identified as a public safety and capital project need (and was under design & development) prior to the PSC plan.

Plan Approval:
Pros:

- Public acceptance of the new design
- Allows fundraising for the park to continue without public controversy and for park development to continue on schedule
- Maintains a building at the park edge as an urban design component and revenue source

Cons:

- Potential loss of a larger scale infill redevelopment opportunity and resultant public revenue

Naming Rights:
Pros:

- Allows opportunity for greater private fundraising for the park

Cons:

- None noted.

City staff recommends City Council consider plan revisions to PSC Plan and consider approval of allowing the Conservancy to manage naming rights for the park features.

Ms. King requested approval of allowing the PSC Conservancy the ability to manage naming rights for park features as a fund-raising/marketing tool. She then reviewed with Council the PSC Donor Recognition Policy.

Mr. Fred Bonci, designer, briefly reviewed with City Council the PSC Plan and how the consensus items are woven into the Plan, e.g., of calming traffic, re-establishing a more regimented street grid within the area, a place for leisurely daily activities, a green space, a place for residents to enjoy themselves, a place to build civic provide, space that was flexible to accommodate not only everyday use but the tradition of festivals; a place for families; and a place of destination.

The following individuals spoke in support of the PSC Plan:

Mr. Joe Bly
Ms. Kim MacQueen, member of the Downtown Commission and Chair of the Asheville Downtown Association
Ms. Bill Byrne, member of the Downtown Commission
Mr. Herman Turk, General Manager of the Renaissance Hotel, Vice-Chair of the Buncombe County Tourism Development Authority and member of the Pack Square Conservancy Board
Ms. Becky Anderson, member of the Pack Square Conservancy Board and Director of Hand-Made in America
Mr. Glenn Bannerman
Mr. Craig Madison, President and CEO of the Grove Park Inn and Spa
Mr. James Geter, member of the Pack Square Conservancy Board and representative of the Eagle-Market Streets Development
Ms. Pam Myers, Director of the Asheville Art Museum

Mr. Brad Burns, Asheville resident, asked City Council to stipulate that the primary function of any group formed as an extension of City Council is to provide a public forum to be incorporated by Council. He asked Council to stipulate a minimal number of forums with plenty of public notification for public access before the process is concluded. He felt the Plan was pleasant but had no confidence that the PSC can navigate a community aesthetic. He asked a sub-committee be composed of local designers, visual & performing artists, sociologists, social workers and civil engineers to accommodate our community. He also spoke against the donor naming policy. He felt that at the southwest corner of Pack Place, near the Jackson Building, a feature conjoining the two areas of Pack Square and The Block so they will be considered equal.

Mr. Roger Smith, downtown property owner, said that he supported most of the Plan, however, did not support reducing College Street from 4 lanes to 2 lanes and diverting the free flow of traffic. He also felt we should not change the name of City/County Plaza.

Upon inquiry of Vice-Mayor Mumpower, Planning & Development Director Scott Shuford explained why College Street was made 4-lanes. He said that the City's Traffic Engineer has studied the reduction to 2-lanes and will be bring a presentation to Council in April.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford explained what design features the City would participate in and said the City has asked in their federal legislative request for $1.1 Million to be earmarked for this project.

Vice-Mayor Mumpower voiced concern that we had a dedicated revenue stream and the City taxpayers were not going to have carry the infrastructure costs of creating this nice park. Mr. Shuford explained the alternatives available to the City that would address costs concerns.

Vice-Mayor Mumpower said that this Council supported the goals of the Conservancy by taking that piece of property off the table, which property represented the dedicated revenue stream. When Vice-Mayor Mumpower asked if there has been any discussion with the Conservancy asking them to compensate the City for the loss of revenue, Mr. Shuford replied there has not been any discussion.

Councilman Dunn also expressed concern of infrastructure costs on City taxpayers.

Councilwoman Bellamy moved to approve the Pack Square Conservancy Plan and to allow the Conservancy to manage naming rights for park features as a fund-raising/marketing tool. This motion was seconded by Councilwoman Jones and carried unanimously.

V. NEW BUSINESS:

Due to the lateness of the hour, Vice-Mayor Mumpower moved to continue the remaining items on the agenda until another date. This motion was seconded by Councilwoman Bellamy. After a brief discussion, Councilwoman Bellamy withdrew her second. Said motion then died for lack of a second.

Councilwoman Bellamy then moved to consolidate New Business Items A-D and approve them with one motion. This motion was seconded by Councilwoman Jones.

Councilman Newman stated that these items were discussed in the March 16, 2004, worksession.

Vice-Mayor Mumpower felt that there too many issues and too much money being lumped together.

The motion made by Councilwoman Bellamy and seconded by Councilwoman Jones carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Davis voting "no."

Mayor Worley said that members of Council have been previously furnished with copies of the resolutions and budget adjustment they would not be read.

A. RESOLUTION NO. 04-67 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE HEALTH ADVENTURE TO TRANSFER 1.14 ACRES OF CITY-OWNED PROPERTY LOCATED AT THE CORNER OF CATAWBA AND BROADWAY IN EXCHANGE FOR AN .89 ACRE GREENWAY EASEMENT AND CONSTRUCTION OF A GREENWAY ACROSS THEIR PROPERTY

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with The Health Adventure to transfer 1.14 acres of City-owned property located at the corner of Catawba and Broadway in exchange for a .89 acre greenway easement and construction of a greenway across their property.

For the past several months, City staff has met with representatives from The Health Adventure to discuss the transfer of 1.14 acres of property located at the corner of Catawba and Broadway known as the "Leaf Pile." This property was formerly part of the Penick Property, which was donated to the City several years ago. During these discussions, staff expressed the need for the continuation of the Reed Creek Greenway to occur through this property and across The Health Adventure property to connect to the Glenn Creek Greenway on Weaver Boulevard. The final determination in regard to this transfer includes The Health Adventure granting an easement representing .89 acres adjacent to Broadway Avenue. In addition, the Health Adventure has agreed to pay for and construct the greenway across this property from the corner of Catawba to the intersection of Broadway and Weaver Boulevard. The greenway will be constructed to the standards established by the Greenway Master Plan with final approval of the design by the Greenway Commission and City staff. In addition, The Health Adventure will work with the Public Works Department to continue the use of the "Leaf Pile" until actual construction occurs for the proposed Health Adventure facility. City staff wishes to ensure that the property remain for public use as much as possible, and the City will work with The Health Adventure to ensure that the property is open to the general public as feasible. In addition, if for some reason The Health Adventure fails to build their facility on this site and they wish to resell the property, the 1.14 acres should revert back to the City of Asheville to remain as public space. City staff will be working with representatives of The Health Adventure to develop and agreement that will incorporate all of the above issues.

Upside:

- The City of Asheville will be able to continue development of the greenway from Catawba to the entrance at Weaver Boulevard at no cost to tax payers.
- Greenway design and construction will be approved by the Greenway Commission and City staff.
- The City retains property in the future if The Health Adventure wishes to resell the property.
- The City and The Health Adventure will work together on design elements on and around the Greenway.

Downside:

- The City will lose the use of the "Leaf Pile" for public use.
- Some restrictions may occur with the use of the former property by the public due to accessibility issues with The Health Adventure operations.

The Parks and Recreation Department recommends that the Mayor enter into an agreement with The Health Adventure for the transfer of 1.14 acres of City property in exchange for a greenway easement of .89 acres and the construction of a greenway on Reed Creek.

RESOLUTION BOOK NO. 28 – PAGE 169

B. RESOLUTION NO. 04-68 – RESOLUTION AUTHORIZING ADOPTION OF THE AIR QUALITY IMPROVEMENT INITIATIVE 2004 TO IMPROVE AIR QUALITY IN THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing adoption of the Air Quality Improvement Initiative 2004 as a tool to improve air quality in the City of Asheville

In December 2002, City Council adopted a resolution to enter into an Early Action Compact (EAC) along with Buncombe County and other local governments. The first step in the process was to develop a list of measures that can be taken by each of the local governments to reduce air pollution. In an effort to develop this list, EPA recommended that a group of stakeholders be created to make recommendations to local governments. City Council reviewed and approved the stakeholders in March 2003.

Due to the differences in size and economic base, it was agreed that each county would identify local control measures individually. This process allows greater stakeholder participation and allows each jurisdiction to evaluate local resources and determine if county-specific control measures can reasonably be implemented.

This group of stakeholders representing the City of Asheville and Buncombe County developed a list to City Council in June 2003. Since that time, no major changes in the measures has been made by the stakeholders.

Since the June 2003 update to City Council, the City has received information that indicates that our area will not be considered for non-attainment status in the next review largely due to the wet summer and fall we experienced in 2003 as well as some major changes that Progress Energy is making in their process at the Lake Julian site.

The stakeholders met to discuss this issue and recommend that the City approve this plan as an effort to improve air quality regardless of the threat of becoming non-attainment. The stakeholders indicated that they would like to see a more aggressive approach to improving air quality particularly in the area of educating the public of measures they can take to reduce pollutants.

Buncombe County along with the City of Asheville held a public meeting on January 8, 2004, to solicit input on the plan. The comments were good but many participants requested that the measures in the plan be mandatory as opposed to optional.

The Southern Environmental Law Center has indicated they will file suit against EPA if they allow communities to use the Early Action Compact as a method of avoiding non-attainment status. EPA has indicated they will not challenge this suit. This means that adopting an Early Action Compact may not allow communities to avoid the non-attainment designation. This area is not affected by this challenge because we would not be considered for non-attainment status for the reasons described above. For that reason many of the counties in the surrounding area have chosen not to adopt an air quality improvement plan.

Rather than passing this plan as an "Early Action Compact" Plan, staff recommends that we refer to it as an "Air Quality Improvement Initiative 2004" to avoid any possibility of being involved in the possible lawsuit mentioned above.

Most of the measures in the imitative do not cost money, they simply state that we will try to take measures that have been proven to reduce pollutants. The only initiative that cost money is developing and implementing an educational/public relations plan. The Engineering Department has requested $15,000 in the Fiscal Year 2004-05 budget to cover these expenses.

Staff recommends that City Council adopt the Plan under the title of Air Quality Improvement Initiative 2004 to improve air quality in the City.

RESOLUTION BOOK NO. 28 – PAGE 170

C. RESOLUTION NO. 04-69 – RESOLUTION SUPPORTING THE RECOMMENDATIONS OF THE HAYWOOD ROAD TRAFFIC STUDY (MARCH 2004)

Summary: The consideration of a resolution supporting the recommendations of the Haywood Road Traffic Study dated March 2004.

Improvements to Haywood Road, the "Main Street" of West Asheville, have long been identified as a critical desire of the residents of Asheville. This traffic study proposes modifications developed based upon public input and technical analysis, with the intent of improving the corridor's role as an urban commercial district while enhancing traffic flow. The modifications can be implemented almost entirely by restriping the pavement, at a very low cost.

Based upon years of input from citizens, businesses, and political leaders, and significant investment in community planning, the report requests the proposed modifications to Haywood Road be implemented by N.C. Dept. of Transportation (NC DOT) as part of the proposed resurfacing (currently scheduled for 2004). The proposed modifications would address a number of goals intended to support the viability of West Asheville's community business district, including improving facilities for pedestrians, bicyclists, transit users, and vehicles, and better providing and clearly marking on-street parking spaces. The modifications should clean up what can be a very confusing street on which to drive.

The corridor study proposes one through lane in each direction with turn lanes where appropriate and marked on-street parking. The proposal would eliminate the confusing pattern of lane-adds and lane-drops, as well as the existing condition of cars parking in a travel lane. The proposal would also relieve the bottleneck at the intersection of Haywood Road with Dorchester, State, and Majestic by removing Majestic from the traffic signal (this will also reduce Majestic's use as a cut-through). In summary, the proposal maintains current level of service for traffic while improving the corridor for businesses, pedestrians, bicyclists, and transit users.

Pros:

- Support of revitalization through improved environment for pedestrians, bicyclists, and transit users.
- Elimination of traffic bottleneck at Dorchester/State/Majestic.
- Expected reduction in crashes due to elimination of confusing lane adds and drops and elimination of parking in travel lanes.
- Implementation of a plan developed with significant community input.
- Minimal cost of implementation by coordinating with scheduled resurfacing.

Cons:

- NC DOT may not approve proposal due to reduction in number of lanes in certain areas and addition of some on-street parking.
- Minimal cost of installation includes minor traffic signal modifications at Dorchester/State/Majestic and installation of several concrete islands.

- City may need to accept maintenance responsibility in order to implement if NC DOT rejects proposal.

City staff requests City Council adopt a resolution supporting the recommendations of the Haywood Road Traffic Study (dated March 2004) and the forwarding of said resolution to the NC DOT.

RESOLUTION BOOK NO. 28 – PAGE 171

D. MOTION TO APPROVE BUDGET ADJUSTMENT ALLOCATING $80,000 FOR HALL FLETCHER PLAYGROUND, $50,000 FOR TWO QUICK RESPONSE VEHICLES FOR THE FIRE DEPARTMENT, AND $25,000 TO THE WNC VETERANS MEMORIAL ASSOCIATION TO SUPPORT THEIR MEMORIAL EFFORT ON PACK SQUARE

Summary: The consideration of a motion to approve a budget adjustment for expenditures previously not included in the adopted budget.

The Fiscal Year 2003-2004 Adopted Budget included funds to provide social security benefits to firefighters. The Fire Department, however, elected not to participate in social security, which freed up $563,146 in budgeted funds. City Council has recommended reusing a portion of these funds for the following expenditures:

1) $25,000 grant to the WNC Veterans Memorial Association
2) $50,000 for two new Quick Response Vehicles for the Fire Department
3) $80,000 to renovate the Hall Fletcher Playground

Pros: City Council is able to fund needs that could not initially be accommodated in the Adopted Budget.

Cons: The appropriation to the WNC Veterans Memorial Association is being made outside of the normal outside agency review process. Appropriations made outside of the normal budget process (fire vehicles, playground renovation) may not reflect overall citywide priorities.

City staff recommends City Council approve the budget adjustment for expenditures previously not included in the adopted budget.

E. RESOLUTION NO. 04-70 – RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COUNTY HISTORIC RESOURCES COMMISSION

Vice-Mayor Mumpower said that Angela Heitter has resigned as a member of the Asheville-Buncombe County Historic Resources Commission, thus leaving a vacancy until July 1, 2005. In addition, the term of Allen Roderick expires on July 1, 2004.

City Council's worksession on March 16, 2004, City Council instructed the City Clerk to arrange interviews for Marsha Shortell and Diane Duermit.

On March 23, 2004, City Council interviewed Marsha Shortell and Diane Duermit.

It was the unanimous decision of Council to appoint Diane Duermit as a member of the Asheville-Buncombe County Historic Resources Commission, to serve the unexpired term of Ms. Heitter, term to expire July 1, 2005, or until her successor has been appointed.

In addition, Mayor Worley moved to appoint Marsha Shortell to serve a three year term, term to begin July 1, 2004, and expire on July 1, 2007. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 172

VI. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of March 5-18, 2004: Faith Chapel (Police), Jose A. Lopez (Water), Bayshore Co. (Water) and Bob Arthur (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 12:27 a.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 13, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn (arrived in meeting at 6:07); Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr. (arrived in meeting at 6:21 p.m.); Assistant City Attorney Martha McGlohon (left meeting at 6:21 p.m.); and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Retired Air Force Veteran Ray Green led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Worley gave the invocation.

ADDITIONS TO AGENDA

At the City Manager's request, a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Earth Day 2004 festival to be held on Saturday, April 17, 2004, will be added under "Other Business".

I. PROCLAMATIONS:

II. CONSENT:

Mayor Worley said that Consent Agenda Item E will be removed from the Consent Agenda.

Councilwoman Bellamy asked that Consent Agenda Item C be removed from the Consent Agenda due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 23, 2004

B. RESOLUTION NO. 04- 71 - RESOLUTION DECLARING THE INTENT OF THE CITY TO REIMBURSE ITSELF FOR CAPITAL EXPENDITURES INCURRED IN CONNECTION WITH THE ACQUISITION AND CONSTRUCTION OF FIRE STATION NO. 6 FROM PROCEEDS OF A FINANCING

Summary: The consideration of a resolution declaring the intent of the City to reimburse itself for capital expenditures incurred in connection with the acquisition and construction of Fire Station Number 6 from proceeds of a financing.

City Council has previously directed staff to initiate action to acquire land and contract for the design and construction of a fire station in the vicinity of I-40 Exit 44. City Council has also previously adopted a budget authorizing expenditures for the project, with the supporting revenues to be provided from the proceeds of a Certificates of Participation (COPs) issue. The financing of the fire station will be combined with the financing of the Haywood Street Parking Deck and result in substantial savings in the cost of issuance for the two projects. The current project schedule calls for the COPs to be issued early in Calendar Year 2005. However, project expenses are presently being incurred. U.S. Treasury regulations require that, if the City intends to reimburse itself from the proceeds of a tax exempt financing for certain project expenses, which were paid prior to the closing date of the financing, it must adopt a resolution evidencing that intent. The resolution of intent may cover expenses paid by the City during the period beginning sixty days prior to adoption of the resolution of intent and ending on the day of issue of the financing. This resolution indicates the City's intent to reimburse itself accordingly.

PROS:
- Savings in cost of issuance for financing of the fire station and the parking deck;
- More efficient use of staff time in doing a single financing rather than two separate COPs (several hundred hours); and
- Potential lower interest rate for fire station by combining it with larger parking deck financing.

CONS:
- Potential for interest rates to increase during the approximately 90-day period between when a
  financing for the fire station would be ready to issue versus when the parking deck financing will be ready; and
- Slight reduction in liquidity of the City due to payment of project expenses prior to receiving the proceeds of the financing.

City staff recommends Council adopt the resolution declaring the intent of the City to reimburse itself for capital expenditures incurred in connection with the acquisition and construction of Fire Station Number 6 from proceeds of a financing.

RESOLUTION BOOK NO. 28 – PAGE 173

C. BUDGET AMENDMENT TO ACCEPT GRANT AND LOCAL MATCH FOR PREPARATION OF THE CLINGMAN/RIVERSIDE INDUSTRIAL NATIONAL REGISTER NOMINATION REPORT

This item was removed from the Consent Agenda due to a conflict of interest with Councilwoman Bellamy.

D. RESOLUTION NO. 04-72 - RESOLUTION SETTING A PUBLIC HEARING ON MAY 11, 2004, TO CONSIDER THE CLOSURE OF AN UNNAMED ALLEY OFF COMMERCE STREET, BEHIND ASHEVILLE SAVINGS

Summary: The consideration of a resolution of intent to close an unnamed alley off Commerce Street and setting a public hearing on May 11, 2004.

N. C. Gen. Stat. sec. 160A -299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close an unnamed alley off Commerce Street, the entry of which is located approximately 135 southwest of the intersection of Commerce and Church Streets. From Commerce Street, the alley proceeds southeasterly approximately 100 feet, then southwesterly approximately 150 feet to its intersection with Buncombe Street.

Public Works Department staff has researched and determined that this alley is not a City maintained street and is not the sole means of ingress and egress for any of the abutting properties. There are six lots that abut this unnamed alley. They are identified by PIN Nos. 9649.18-30-7001; 9648.06-39-6929; 9648.06-39-5988; 9648.06-39-5927; 9648.06-39-5867; and 9648.06-39-7227.

City staff recommends that City Council adopt the resolution setting a public hearing for May 11, 2004, to close an unopened unnamed alley off Commerce Street.

RESOLUTION BOOK NO. 28 – PAGE 175

E. RESOLUTION SETTING A PUBLIC HEARING ON MAY 11, 2004, TO CONSIDER ADOPTION OF AN ORDINANCE DIRECTING THE DWELLING LOCATED AT 451 KENILWORTH ROAD BE VACATED AND CLOSED

This item was removed from the Consent Agenda.

F. RESOLUTION NO. 04-73 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE FOR UPSET BIDS FOR A CONCEALED WIRELESS COMMUNICATION FACILITY AT 50 OREGON AVENUE

Summary: The consideration of a resolution authorizing the City Clerk to advertise for upset bids regarding an offer to license space for a concealed wireless communication facility at 50 Oregon Avenue.

City of Asheville has received a bid from Triton PCS Property Company, LLC (Triton) for the license of space at 50 Oregon Avenue, the site of Fire Station #3, for a concealed wireless communication facility at a beginning annual fee of $18,000.

50 Oregon Avenue is located at the Northeast corner of Oregon Avenue and Louisiana Avenue. It is zoned Institutional and has a total area of 0.86 acre. The lot is rectangular in shape and Fire Station #3 is located approximately in the center of the lot. The proposed license area is at the northwest (rear) corner of the building and comprises about 810± square feet.

Triton proposes to construct a cell phone tower designed as a flagpole, which will be lighted and the United States Flag will fly 24 hours per day. Antennas will be concealed within the flagpole. Ground equipment will be housed in a small building of a design and materials to match the fire station building. Triton will own, maintain and insure the tower. The tower will have space for two additional antennas and Triton will sublicense the tower spaces to other carriers. An additional building for each carrier of the same character as the first will be added within the license area at such time as the spaces are sublicensed. The proposal from Triton includes the following fee schedule:

Year	**Amount**
1	**$18,000**
2	**$22,500**
3	**$25,960**
4	**$27,000**
5	**$28,000**

The license fee during each renewal term will be increased by four percent (4%) per year compounded annually. Triton will post a cash security deposit in the amount of $5,000 to be held by the City for the duration of the License Agreement.

In addition to the above, Triton will construct a storage room addition for the exclusive use of the City (Asheville Fire Department) on the east side of the Fire Station; replace the City's existing 20 KW generator with a 40KW generator; and construct 3 additional parking spaces for the City's use.

Triton must obtain a Conditional Use Permit in accordance with the Unified Development Ordinance (UDO). Approval of this resolution will not affect consideration of the Conditional Use Permit.

The positive aspects of the proposed license agreement include:

1. Generates revenue for the City that is long term and increases annually.
2. Provides public benefit through better cell phone coverage for the Patton Avenue area.
3. Tower will be located on City owned property as encouraged by the UDO.
4. Promotes co-location of carriers as encouraged by the UDO.
5. Utilizes stealth technology and integrated design; antennas will be concealed within a flagpole tower to present a more esthetic appearance and the ground buildings will appear to be part of the fire station.
6. Licensee (Triton) will own the tower and be responsible for maintaining and insuring it.
7. Puts unused space to productive use.
8. Fire Department will get desired improvements at Fire Station #3.

The negative aspects of the proposed license agreement are:

1. Encumbers the property for up to 25 years, which could impact the disposition of the property should the City no longer need it for a fire station.
2. Would prevent expansion of the station into the licensed area should the need arise to expand.
3. Flagpole tower will be 100' tall and will extend above tree line.

Approval of the resolution will initiate the process for execution of the license agreement as prescribed in N.C.G.S. sec.160A-272 through the upset bid process provided in N.C.G.S. sec. 160A-269.

Planning & Development staff, Fire Department staff and Information Services staff recommend adoption of the resolution authorizing the City Clerk to advertise for upset bids regarding an offer to license space for a concealed wireless communication facility at 50 Oregon Avenue.

RESOLUTION BOOK NO. 28 – PAGE 176

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

ORDINANCE NO. 3101 - BUDGET AMENDMENT TO ACCEPT GRANT AND LOCAL MATCH FOR PREPARATION OF THE CLINGMAN/RIVERSIDE INDUSTRIAL NATIONAL REGISTER NOMINATION REPORT

Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Summary: The consideration of a budget amendment, in the amount of $3,380, to receive $2,000 in grant money from the North Carolina State Historic Preservation Office (NCSHPO) and $1,380, from a local match from outside source, for preparation of the Clingman/ Riverside Industrial National Register Nomination Report.

The Historic Resources Commission of Asheville & Buncombe County requested $2,000 from NCSHPO to prepare a national register nomination. Staff was successful in obtaining these funds. We received the grant funds for the preparation of a National Register Nomination Report for the Clingman/Riverside Industrial Historic District, which is on the North Carolina Study List. The District encompasses between 20-25 properties on approximately 2.5 acres. It will include only the historic industrial and commercial areas within the larger West End/Clingman Avenue Neighborhood (WECAN) and roughly follow the areas on a Study Area map. The local match of $1,380 was provided by property owners from the WECAN Community.

Pros:

- The local required match of $1,380 has been provided by the WECAN community.
- If the nomination is approved for listing on the National Register, no obligations or restrictions will be placed on the property.
- If listed on the National Register privately owned buildings in the district may be eligible for a 20% federal income investment tax credit, which is an incentive for the preservation of the structure.

Cons:

- National Register listing does not provide absolute protection from state or federal actions that may affect the property.

City staff recommends City Council approve the budget amendment to receive grant money from the NCSHPO and the local match from the WECAN sponsors.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3101. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 106

PUBLIC HEARING CONTINUANCE REQUEST

Mayor Worley said that on Monday, April 12, 2004, a letter was received from Mr. Craig Justus, requesting the public hearing to consider adoption of an ordinance ordering demolition of 86 Crayton Road be continued until the next City Council formal meeting. The letter stated that Mr. Justus would be in Raleigh on the public hearing date and his partner has a scheduling conflict. They have been recently asked to look into the merits of the City staff's claims concerning this property.

Vice-Mayor Mumpower moved to continue the public hearing to consider an ordinance ordering demolition of 86 Crayton Road until April 27, 2004. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING ON THE CITY'S CONSOLIDATED ACTION PLAN FOR 2004-05 ALLOCATING FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME FUNDS

RESOLUTION NO. 04-74 – RESOLUTION ADOPTING THE CITY'S CONSOLIDATED ACTION PLAN FOR 2004-05 ALLOCATING FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME FUNDS

Mayor Worley opened the public hearing at 5:13 p.m.

Councilwoman Jones moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

Community Development Director Charlotte Caplan said that this is the consideration of the City's Consolidated Action Plan for 2004/05, allocating federal Community Development Block Grant (CDBG) and HOME funds. This public hearing was advertised on April 2 and 9, 2004.

The City expects to have available $1,981,372 in CDBG funds and $2,038,859 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2004. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 35 projects. She reviewed a summary of the applications received and the funding section of the draft action plan.

If approved, the HOME and CDBG funding will assist 288 affordable housing units Consortium-wide. CDBG funds will also help replace nearly 2/3 mile of undersized water pipes in west Asheville, and provide 250 Asheville residents with employment or business training and over 3,000 residents with other needed services.

Notice of the public hearing and a summary of the draft plan were published on March 28, 2004. A 30-day public comment period is required by federal regulations. The final plan must be submitted to U.S. Dept. of Housing and Urban Development by May 15, 2004.

Advantages:

- Allocates $4,020,231 in compliance with federal rules and the City's Consolidated Strategic Housing & Community Development Plan
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee

Disadvantages

- Funding insufficient to meet all requests – some applicants are disappointed.

City staff, the Housing and Community Development Committee and the Asheville Regional Housing Consortium recommend approval of the draft Action Plan.

Mayor Worley closed the public hearing at 5:21 p.m.

Councilman Newman moved to adopt the Consolidated Action Plan. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 177

B. PUBLIC HEARING TO CONSIDER ADOPTION OF AN ORDINANCE DIRECTING THE DWELLING LOCATED AT 86 CRAYTON ROAD BE DEMOLISHED

This public hearing was continued to April 27, 2004.

C. **PUBLIC HEARING TO CONSIDER REZONING A PORTION OF 812 MERRIMON AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT**

ORDINANCE NO. 3102 - ORDINANCE TO REZONE A PORTION OF 812 MERRIMON AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT

Mayor Worley opened the public hearing at 5:21 p.m.

Urban Planner Carter Pettibone said that this is the consideration of an ordinance to rezone a portion of 812 Merrimon Avenue from RS-8 Residential Single-Family High Density District to Community Business II District. This public hearing was advertised on April 2 and 9, 2004.

This portion of property is located in the City limits west of Merrimon Avenue and East of Mt. Vernon Circle. Surrounding land uses and zoning include commercial uses to the north, east, and south zoned Community Business II (CB II) and a residence zoned RS-8 to the west.

The applicant (Gary Houser of Houser Investments) wishes to rezone this portion of the property, which is currently vacant, in order to add it to his already commercially-zoned property to the east, which contains a retail sales business. The purpose of the CB II District is to provide areas for medium to high-density business and service uses serving several residential neighborhoods.

The applicant is swapping a narrow, RS 8-zoned portion of his own property that connects with Mount Vernon Circle for the portion in question with the subject property owner.

Currently, a retail shoe sales business is located on the applicant's property. He would like to add this portion of his neighbor's property and rezone it in order to better access the rear of the property and building. If this portion of property were rezoned, the applicant would be required to use part of this portion to screen his commercial use and vehicular use area from the neighboring residential property.

Advantages (Pros):

- Better vehicular access to the rear of the site and building.
- No additional commercial access onto Mt. Vernon Circle.
- Once properties are swapped, the Houser CB II parcel will no longer have direct access onto a residential street (Mt. Vernon Circle).
- If rezoned and the applicant were to expand the vehicular use area, additional screening or buffering would be required against the neighboring residential property.

Disadvantages (Cons):

- Delivery and support vehicles accessing the rear of the site near residentially zoned property.

In consideration of the above, the adjoining zoning and land uses in the area surrounding the property, and its proximity to Merrimon Avenue, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance.

Staff recommends approval of the rezoning request. The Planning and Zoning Commission, at its March 3, 2004, meeting, voted unanimously to recommend approval of the rezoning request.

Mayor Worley closed the public hearing at 5:28 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No 3102. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE [illegible]

D. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF A .77 ACRE PARCEL ADJOINING PROPERTY AT 31 COLLEGE PLACE TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3103 - ORDINANCE TO ZONE A .77 ACRE PARCEL ADJOINING PROPERTY AT 31 COLLEGE PLACE TO CENTRAL BUSINESS DISTRICT

Mayor Worley opened the public hearing at 5:29 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone a .77 acre parcel adjoining property at 31 College Place to Central Business District. This public hearing was advertised on April 2 and 9, 2004.

The property is located within the City limits in the downtown area. The property was recently acquired from the State of North Carolina by 31 College Place LLC Surrounding land uses and zoning include highway and right-of-way areas to the north and east which are not zoned. To the west, the property is zoned Central Business District (CBD). To the south, the parcel is at the edge of the CBD area with residential uses, (RS-8) nearby too.

The applicant, Martin Lewis, wishes to zone the property to CBD and to develop uses permitted in this district. The Central business District zoning supports and reinforces the downtown as the urban center of Asheville and western North Carolina and encourages private investment to support this role it the community

Currently the property is vacant and has been used as NC Department of Transportation right-of-way for I-240. This property totaling .77 acre was recently combined with property already owned by 31 College Place LLC. The combined parcel totals 4.3 acres. The property and any future development will use existing driveways on College Place and College Street for access.

It is an unusual situation to have right-of-way property made available for private development. The Central Business District zoning application is appropriate for this parcel due to its relationship to other CBD zoned property and close proximity to the downtown area. CBD zoning allows for mixed use commercial and residential projects in support of the downtown area as the community center of Asheville and western North Carolina.

PROS: Property that was unavailable is now available for development. The property is well situated with access and infrastructure already in place.

CONS: The hillside residential area nearby may be impacted from I-240 and possible CBD uses.

The Planning and Zoning Commission, at its March 3, 2004, meeting, voted unanimously to recommend approval. City staff recommends approval of the rezoning request as well.

Mayor Worley closed the public hearing at 5:32 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3103. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 110

E. PUBLIC HEARING TO CONSIDER CONDITIONAL USE ZONING FOR PROPERTY LOCATED AT 15 LYNNDALE AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE, AND ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE CONVERSION OF TEMPORARY USE BUILDINGS FOR PERMANENT USE

ORDINANCE NO. 3104 - ORDINANCE REZONING PROPERTY LOCATED AT 15 LYNNDALE AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3105 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 15 LYNNDALE AVENUE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:25 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

Mayor Worley said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning & Development Director Scott Shuford submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Shuford said that this is the consideration of a request to rezone property located at 15 Lynndale Avenue from RM-8 Residential Multi-Family Medium Density District to Institutional District/Conditional Use and a request to issue a conditional use permit for the conversion of temporary use buildings for permanent use.

The applicant (West Asheville Baptist Church) has requested a rezoning of a total of .52 acres (two lots) of RM-8 property to Institutional (INST-CUZ) to allow for the extended maintenance of three separate temporary use structures as accessory uses to the main church facility. A temporary use permit was issued to the West Asheville Baptist Church in April 2002 to allow the temporary placement of three modular buildings to be used as classrooms while the expansion at the main facility was under construction. The church issued a letter to the City stating the buildings would be removed no later than July 2003. Since the buildings were to remain in place longer than 180 days, the applicant agreed to install landscape buffer as required by the ordinance. Due to the assurance of the temporary nature of the buildings, the Planning Department applied flexible development standards to allow for the reduction of a side setback and waiver of a rear setback that would normally be required for an accessory use to a place of worship in an RM-8 district. Under the current zoning, the use is a 'Use by Right, Subject to Special Requirements' which is not eligible for variance requests. As such, the structures would be non-conforming and could not be approved. Due to the institution's desire to keep the structures unchanged, the only course of action was to pursue a rezoning to an Institutional designation that would reduce the side setback requirement to a conforming level in addition to completing a recombination of the two lots in order to provide for an appropriate rear setback. The Church administration recognizes the temporary nature of the modular structures and wishes to extend the temporary use to a maximum of five years to accommodate the growing needs of their congregation.

The project site is located within the City Limits and is surrounded on two sides by Institutional zoning and uses. Due to the unusual configuration of the two lots combined, the other three sides of the lot are surrounded by residential zoning with single family uses and a non-conforming church parking lot. The two lots were, historically, single family uses with one of the existing homes being reused as an accessory use to the church facility. The other single family home was removed to allow for the placement of the three temporary structures to accommodate the West Asheville Baptist Church during their recent expansion.

The purpose of the RM-8 zoning district is to establish a diverse medium density multifamily and single family district in areas where public infrastructure is sufficient to support such densities. The Institutional zoning district is to reserve land for the development of major educational facilities, medical facilities, and other complementary and supporting uses such as health related developments, office developments and public services. Development standards for uses in this district are established to minimize conflict with adjacent land uses and as such allows for the development of high density multi-family, to serve as a potential buffer between other institutional uses and single family areas.

Pros:

1) Accommodates the growing needs of a local Place of Worship until a time when a more suitable alternative can be explored.
2) Allows for the continued use of community based functions.
3) Limited disturbance to the site is required.
4) Some site improvements will be installed.

Cons:

1) Loss of residential potential.
2) Project can be perceived as an encroachment into the neighborhood and could open the door for future encroachments.

3) Impact of temporary structures on adjacent property values is uncertain.
4) Project will require the recombination of two lots resulting in an undesirable configuration.

At their January 21, 2003, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the Conditional Use Rezoning request and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission, stipulating that the conditions outlined in the report be addressed prior to final review by the TRC.

The Planning and Zoning Commission reviewed the proposed plan on March 3, 2004, and after some discussion, tabled the hearing until the mid-month meeting. On March 18, 2004, a quorum of Planning and Zoning Commission members (4-0) voted to approve the Conditional Use Rezoning request to extend the maintenance of the temporary use structures for a maximum of five years.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.
The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
The project area is relatively flat and the proposed project will not require any additional grading or other ground disturbing activity other than minor site improvements.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
It is fairly well established that mobile/modular structures do not appreciate over time and can have a negative impact on adjacent property values. However, the existing structures are intended to be temporary in nature and it is difficult to determine whether these temporary structures would have the same impact to property values as permanent structures. Despite the temporary nature of the proposed use, concern over a potential negative impact to adjacent property values initiated the landscape buffer requirement in the original application. These buffers will be expanded and further enhanced to meet minimum buffer requirements per the UDO and staff feels that any concern over the impact on adjacent properties can be mitigated through the landscape and potential improvements to the appearance of the buildings.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The existing modular structures are well in scale with the library and larger church use. Similarly, the temporary structures are fairly compatible with the existing parking lot to the south of the site. In respect to the adjacent single family uses, height, bulk, or density do not appear to be exceeded but issues with harmony, character, and coverage could be considered. As mentioned earlier in the report, the appearance/character of the structures is to be mitigated through landscaping and other site improvements along with potential improvements to the buildings. Staff feels that these improvements along with the temporary nature of the structures addresses any concern over those issues.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
The Asheville City Development Plan 2025 does not appear to specifically address Places of Worship or other non-profit uses. However, there is one minor reference under the Land Use and Transportation section regarding W. Asheville and Haywood Rd. that reads, "Schools, Churches, and parks complement the retail and service uses located in close proximity to the residential uses. . ." This site is located on Lynndale Avenue. less than one block south of Haywood Rd, in proximity to the local library, church, and residential areas.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
This proposed development is within close proximity to transportation facilities and other utilities appear adequate. The project area is located near major road facilities, interstate connections and other service centers

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.
The proposed project will share the existing parking area with the larger Church facility located across the Lynndale Avenue, resulting in no real change to off-street parking or traffic flow. In addition, pedestrian connections will have to be improved and will tie into existing, clearly delineated crosswalks.

City staff, along with the Planning and Zoning Commission, recommends approval of the Conditional Use Rezoning request subject to the conditions of TRC being met and also with the condition that the temporary structures and use cease after a maximum of five years.

Mr. Marshall Roberts, member of the Property and Grounds Committee of West Asheville Baptist Church, spoke in support of the project and felt that through this project they can add community equity because not only does the Church use the modulars, but community organizations and clubs use them as well.

There being no request from the applicant for rebuttal, Mayor Worley closed the public hearing at 5:40 p.m.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3104 to conditionally rezone property Located at 15 Lynndale Avenue from RM-8 Residential Multi-Family Medium Density District to Institutional District/Conditional Use. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 112

After an inquiry from Councilwoman Bellamy regarding landscaping, there was a brief discussion about landscaping around the modulars that face the street side. Mr. Shuford suggested that if the conditional use permit is approved, that a condition be attached directing City staff to work with the West Asheville Baptist Church using the alternative compliance procedures to move some landscaping around to the street side.

Councilman Davis was concerned with the issuance of the conditional use permit as the modulars are a real intrusion into the residential neighborhood. He was pleased to see the Church growing, but felt that five years is too long for a temporary use and for something that is out of context with the neighborhood, even with the additional landscaping. Mr. Shuford responded that the Church is planning to build a permanent building as soon as they can raise funds.

Upon inquiry of Councilman Davis, Mr. Roberts said that the modulars will all be for adult education space.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3105 to issue a conditional use permit for property located at 15 Lynndale Avenue, subject to (1) the conditions of TRC being met; (2) that the temporary structures and use cease after a maximum of five years; and (3) City staff be directed to work with the West Asheville Baptist Church using the alternative compliance procedures to move some landscaping around to the street side. This motion was seconded by Councilwoman Bellamy.

Councilman Newman moved to amend the original motion to reflect that the temporary structures and use cease after a maximum of three years (not five years). This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Vice-Mayor Mumpower voting "no."

Vice-Mayor Mumpower voted against the amended motion because the Planning & Zoning Commission, City staff and the neighborhood didn't seem to think five years was a significant concern.

The original amended motion, to issue a conditional use permit for property located at 15 Lynndale Avenue, subject to (1) the conditions of TRC being met; (2) that the temporary structures and use cease after a maximum of three years; and (3) City staff be directed to work with the West Asheville Baptist Church using the alternative compliance procedures to move some landscaping around to the street side, carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 114

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 04-75 -RESOLUTION AMENDING THE ANNEXATION SERVICES PLAN

Urban Planner Carter Pettibone said that this is the consideration of a resolution amending the Annexation Services Plan for the 2004 Round Two Annexation Areas to reflect the City's intention of taking over a portion of another private street for public maintenance and correct a typographical error.

In adopting an annexation ordinance, the City has the authority to annex all or some of an area proposed for annexation, as long as that area qualifies for annexation. The City may also amend the services plan, as long as the requirements for providing service to the annexation areas continue to be met.

At the public hearing on March 23, 2004, City staff recommended that the City take over for maintenance the portion of Honey Drive that is within the Honey Drive Annexation Area. The Services Plan, as it is currently written, does not propose any street within the Honey Drive Annexation area to be taken over for public maintenance. The effects of this change are that it raises slightly the amount of projected annual Powell Bill revenue for the Honey Drive Area, total Powell Bill Revenue, and total revenues from the annexation areas. Additional costs are not expected since no street paving is required for the 0.24-mile segment and new street signs were already figured into the capital costs for the area. An amendment is also required for a typographical error on page 20 of the Services Plan.

These technical amendments allow the City to provide better municipal service for the annexation area and incorporate improved information for projected revenues into the Services Plan. The change does not increase the size of area under consideration nor add any additional property to the annexation area.

As long as the Annexation Services Plan does not show the annexation areas as qualifying under any additional statutory tests, no additional public hearing is required for this amendment to the Plan.

City staff recommends City Council adopt a resolution amending the Annexation Services Plan to include taking over the portion of Honey Drive within the Honey Drive Annexation Area for public maintenance and to correct the minor typographical error.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 04-75. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 178

B. ORDINANCE NO. 3106- ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE HERITAGE BUSINESS PARK AREA

Mayor Worley said that the public hearing on this matter was held on March 23, 2004.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Heritage Business Park area.

On January 13, 2004, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area. The Annexation Services Plan for all of these areas was approved on January 27, 2004, and the Plan was amended on April 13, 2004. A public information meeting was held on March 4, 2004. Public hearings on each of annexations were held by City Council on March 23, 2004. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Heritage Business Park area, with an effective date of June 30, 2004.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilman Newman moved for the adoption of Ordinance No. 3106. This motion was seconded by Councilwoman Bellamy and carried on a 5-1 vote with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 21 – PAGE 120

C. ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE HONEY DRIVE AREA

Mayor Worley said that the public hearing on this matter was held on March 23, 2004.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Honey Drive area.

On January 13, 2004, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area. The Annexation Services Plan for all of these areas was approved on January 27, 2004, and the Plan was amended on April 13, 2004. A public information meeting was held on March 4, 2004. Public hearings on each of annexations were held by City Council on March 23, 2004. Adoption of the annexation ordinances is the final step in the annexation process.

At the public hearing on March 23, 2004, City staff recommended that the City take over for maintenance the portion of Honey Drive that is within the Honey Drive Annexation Area. The Services Plan has been amended to reflect that change.

Mr. Pettibone said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Honey Drive area, with an effective date of June 30, 2004.

Upon inquiry of Councilwoman Jones, Mr. Pettibone said that there are three vacant parcels in this development, however, it appears that only one parcel is developable.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Mayor Worley moved for the adoption of an ordinance to extend the corporate limits of the City of Asheville to the Honey Drive area. This motion was seconded by Councilman Davis and failed on a 3-3 vote, with Mayor Worley, Councilwoman Bellamy and Councilman Davis voting "yes" and Vice-Mayor Mumpower, Councilwoman Jones and Councilman Newman voting "no."

City Attorney Oast said that the Annexation Services Plan will need to be amended to reflect the deletion of the Honey Drive area.

D. ORDINANCE NO. 3107 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE ENKA PARK AREA

Mayor Worley said that the public hearing on this matter was held on March 23, 2004.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Enka Park area.

On January 13, 2004, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area. The Annexation Services Plan for all of these areas was approved on January 27, 2004, and the Plan was amended on April 13, 2004. A public information meeting was held on March 4, 2004. Public hearings on each of annexations were held by City Council on March 23, 2004. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Enka Park area, with an effective date of June 30, 2004.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3107. This motion was seconded by Councilman Newman and carried on a 5-1 vote with Vice-Mayor Mumpower voting "no."

ORDINANCE BOOK NO. 21 – PAGE 123

E. ORDINANCE NO. 3108 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE ASHWOOD AREA

Mayor Worley said that the public hearing on this matter was held on March 23, 2004.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Ashwood area.

On January 13, 2004, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area. The Annexation Services Plan for all of these areas was approved on January 27, 2004, and the Plan was amended on April 13, 2004. A public information meeting was held on March 4, 2004. Public hearings on each of annexations were held by City Council on March 23, 2004. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Ashwood area, with an effective date of June 30, 2004.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

At 6:07 p.m., Councilman Dunn arrived at the meeting.

Councilwoman Jones moved for the adoption of Ordinance No. 3108. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 126

F. ORDINANCE NO. 3109 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE HEATHBROOK AREA

Mayor Worley said that the public hearing on this matter was held on March 23, 2004.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Heathbrook area.

On January 13, 2004, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area. The Annexation Services Plan for all of these areas was approved on January 27, 2004, and the Plan was amended on April 13, 2004. A public information meeting was held on March 4, 2004. Public hearings on each of annexations were held by City Council on March 23, 2004. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Heathbrook area, with an effective date of June 30, 2004.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Vice-Mayor Mumpower said there are good arguments in support of annexation and he recognizes the dilemma that we face on Council in that respect. The largest argument being the issue of fairness in that people who live near the City should help pay for the City. However, he will vote against the annexations largely on the basis of divisiveness. Forced annexation runs against the founding principles of the country and it creates a lot of ill will and a lot of repercussions that he was not sure serves the City well.

Councilman Newman moved for the adoption of Ordinance No. 3109. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote with Vice-Mayor Mumpower and Councilman Dunn voting "no."

ORDINANCE BOOK NO. 21 – PAGE 129

G. ORDINANCE NO. 3110 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE SWEETEN CREEK ROAD AREA

Mayor Worley said that the public hearing on this matter was held on March 23, 2004.

Urban Planner II Carter Pettibone said that this is the consideration of adopting an ordinance to extend the corporate limits of the City of Asheville to the Sweeten Creek Road area.

On January 13, 2004, City Council adopted Resolutions of Intent beginning the annexation process for the following six areas: the Heritage Business Park area, the Honey Drive area, the Enka Park area, the Ashwood area, the Heathbrook area, and the Sweeten Creek Road area. The Annexation Services Plan for all of these areas was approved on January 27, 2004, and the Plan was amended on April 13, 2004. A public information meeting was held on March 4, 2004. Public hearings on each of annexations were held by City Council on March 23, 2004. Adoption of the annexation ordinances is the final step in the annexation process.

Mr. Pettibone said that a metes and bounds description is attached to the ordinance. The annexation area does meet the requirements of General Statutes. It is the intent of the City to extend City services outlined in the Annexation Services Plan. On the effective date of the annexation, the City will have funds in sufficient amount to finance all capital expenditures. The effective date of this annexation is June 30, 2004.

Mr. Pettibone explained Council what is located on this site and what is located in the surrounding area.

Staff recommends adoption of annexation ordinance for the Sweeten Creek Road area, with an effective date of June 30, 2004.

Councilman Dunn was concerned that the Sweeten Creek Road area only meets 1 out of 4 development tests. Planning & Development Director Scott Shuford explained that it's possible for an annexation to meet 3 out of the 4 development tests and another annexation have a strong qualification under one single test. It is a strong possibility that the single test annexation would be more likely to withstand a challenge. He explained the annexation laws were set up to provide for 4 different ways (population density, subdivision, development and non-residential urban use) to qualify for annexation and if the area meets one test, that is sufficient.

Mayor Worley said that members of Council have previously been furnished with a copy of the ordinance and it will not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3110. This motion was seconded by Councilman Davis.

Councilman Newman said felt that annexation is an issue of fairness in how we pay for the infrastructure in our community and the issue of community planning in areas that are urbanizing. State law says that areas that become urban should belong to the cities that they are associated with and that makes good sense from a planning standpoint. The families and businesses that are inside the City limits now pay almost twice what people who live outside the City limits pay in taxes for our infrastructure, even though Asheville is the economic, cultural and commercial center of western North Carolina. The infrastructure that Asheville provides is critical to the economy of the larger area. The economic opportunities that we have in our area would not be possible without the infrastructure that we create in the City. The need to invest more in infrastructure in Asheville is beyond debate. We have huge infrastructure needs in Asheville and it would be irresponsible for us to not invest more in that infrastructure. It's not fair for us to have to further raise taxes on the families and businesses who are already in the City of Asheville. Our only other strategy is to pursue annexation policies so that some of the areas that have become truly urban can help pay for that infrastructure that we need to invest in in Asheville. We also need to create new revenue sources that take advantage of the fact that Asheville is the economic center of western North Carolina and a major tourist destination. Unfortunately for this Council, the state legislature has to approve giving this body the authority to use some of those other revenue options that would allow tourists and visitors and people who live outside the City to help pay for our infrastructure. We are trying to make a case for those other revenue options which will help us pay for infrastructure, without necessarily having to pursue annexation as our only tool that is available for us. Until we get that tool, annexation is the only strategy that we have to invest in our infrastructure, other than raising taxes further on the citizens and businesses in Asheville, which is unacceptable. It is my hope that we can work with the County Commissioners and our state legislators to develop some other options that will give us more funding to invest in infrastructure and perhaps allow us to not have to pursue such an aggressive annexation policy in the future.

Councilman Dunn agrees that we must work with our state legislators to get some other revenue options. He doesn't think the City has enough police officers and the street maintenance schedule is not adequate. Until the citizens of Asheville have the basic City services he will not support annexation.

The motion made by Councilwoman Jones and seconded by Councilman Davis carried on a 4-3 vote, with Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

Councilwoman Bellamy did not support this annexation because she felt the City could not accommodate some of the needs of the residents in this area, e.g. trash pick-up.

ORDINANCE BOOK NO. 21 – PAGE 132

H. ORDINANCE NO. 3100 – ORDINANCE DENYING THE CONDITIONAL USE PERMIT FOR PROPERTY LOCATED OFF BRITT DRIVE FOR THE CONSTRUCTION OF A 100 UNIT APARTMENT COMPLEX IN AN RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley said that the public hearing and adoption of this ordinance denying the conditional use permit (CUP) was held on March 23, 2004. At the City Attorney's request, this ordinance is being brought back for approval of the wording of the order only.

City Attorney Oast said that this is the consideration of the form of the ordinance denying the CUP for Foxwood Apartments on Swannanoa River Road.

At Council's March 23, 2004, meeting, a public hearing was held to consider whether to issue a conditional use permit for a 100 unit apartment complex on Swannanoa River Road. Council voted to deny the permit.

A conditional use proposal must satisfy all 7 standards listed in Sec. 7-16-2(d), together with any standards specific to the use, in order for a CUP to issue. Failure to meet any one of the criteria requires that the CUP be denied. The order denies the CUP on the grounds that the project will materially endanger the public safety (standard #1), and that it will be incompatible with natural topographic features on the site (standard #2). These were the standards that Council based its decision on.

If Council is satisfied with the order denying the CUP, then adoption of the ordinance is recommended.

Councilman Davis moved for the adoption of Ordinance No. 3100. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Mayor Worley voting "no."

ORDINANCE BOOK NO. 21 – PAGE 99

V. NEW BUSINESS:

A. ORDINANCE NO. 3111 - BUDGET AMENDMENT TO RECOGNIZE RECEIPT OF A SECTION 108 GUARANTEED LOAN AND AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FROM THE U.S. DEPT. OF HOUSING AND URBAN DEVELOPMENT AND EXPENDITURE OF THE PROCEEDS ON THE REDEVELOPMENT OF SOUTH PACK SQUARE

Planning & Development Director Scott Shuford said that this is the consideration of a budget amendment, in the amount of $1,140,000, to recognize receipt of a Section 108 Guaranteed Loan and an Economic Development Incentive Grant from the U.S. Dept. of Housing and Urban Development and expenditure of the proceeds on the redevelopment of South Pack Square.

The developer for the Eagle-Market Streets Development Corporation (EMSDC) project has submitted a letter that provides responses to a number of the concerns raised by City Council in its prior consideration and denial of the budget amendment. The budget amendment would accept and allocate $800,000 of U.S. Dept. of Housing & Urban Development (HUD) Section 108 loan funds and $340,000 of Economic Development Incentive (EDI) grant monies to an EMSDC project that would create over 8,000 square feet of additional retail and office space and 14 residential units.

132

Since Council's denial of the budget amendment that would have allocated federal monies to the previous project, four important things have happened. First, there has been a visioning session held involving a large number of people interested in the redevelopment of South Pack Square. This session resulted in the identification of a number of common issues and concerns, including:

- Greater affordability of residential, retail and office rents
- Preservation of the architectural character of The Block
- The need to keep the federal dollars invested in South Pack Square
- A desire for and commitment to greater inclusion of the various interests of the community in the decision-making process
- The need for timely redevelopment of The Block

Second, to address issues concerning proper oversight of public funds invested in the project, EMSDC has consented to its removal from direct participation in the project. EMSDC will still own the property, receive appropriate lease payments from the developer, and have an option to purchase the improvements to the property at a price that cash-flows any time between five and seven years after completion of the project. The developer will make a special effort to install restaurant equipment to help accommodate the relocation of the Ebony Grill to the site; this expense, along with the rent reductions described below, will increase the buy-back requirements for EMSDC but there will still be a positive cash flow, making buy-back feasible.

Third, the developer has committed to working with the City to remove the fence; the City will temporarily sublease the parking lot that will contain the new infill building and open it to public parking. This will allow the City to assume liability for the property while it is used for public parking. If the project moves forward, the developer will need to do some final environmental testing and does not want to have the property tied up with parking which would be difficult to work around. It is anticipated that within ten days the fence will be removed until actual construction activities start on the site, which is anticipated to be approximately 60 days.

Fourth, the developer has obtained additional financing through the federal New Markets Tax Credit program and has been able to make the following significant reductions in rents under its pro-forma.

- **Residential** – 20% of the residential units will be rented at 75% ($0.727 per square foot per month) of market rates. The remainder will be rented at market rates ($0.975 per square foot per month); this market rate will still be affordable to service workers, City employees, and other people that make up our local workforce. This is a greatly underserved group in our downtown housing market.
- **Retail/Office** – Market rates for retail and office space in this area of downtown are $12.50 per square foot per year. The developer will rent 80% of his retail space and 67% of his office space at 88% of market rates ($11.00 per square foot per year) and, additionally, he will rent the remaining 20% of retail space and 33% of office space at 64% of market rates ($8.00 per square foot per year).

Staff finds that the proposed revised project will be fully consistent with the South Pack Square Redevelopment Plan. In addition, the project appears to be consistent with all applicable financial review criteria necessary for the City to carry out its responsibility in monitoring the allocation of federal funds and in securing the consequent City financial interest in the project.

Pros:

- This project provides significantly greater rent affordability compared with the prior project that Council failed to fund; in particular, the $8 psf commercial/retail rent will be accessible for the type of neighborhood businesses that formerly flourished on The Block and the $0.727 psf residential rents are very affordable to singles or couples below 80% of AMI.

- Concerns about EMSDC oversight have been addressed.
- It appears that this project is more consistent with the community vision for South Pack Square redevelopment.
- A major redevelopment project for South Pack Square will be funded.

Con:

- The effort to accommodate the return of the Ebony Grill and the lower rents will result in a higher buy-back cost for EMSDC.

Staff recommends that the City Council approve the budget amendment resolution that allocates $800,000 of HUD Section 108 loan funds and $340,000 of EDI grant monies to the revised EMSDC project.

The following individuals spoke against City Council taking action at this meeting for several reasons, some being, but are not limited to: following Council's decision on February 24, 2004, public notice was given that Council would next take up this issue at the April 20 worksession; the April 20, 2004, worksession date was repeated by City representatives at subsequent community meetings and broadly distributed by local media; no public notice has been given of the tonight's hearing, only a press release that was printed in the paper on Good Friday; the South Pack Square Association, as directed, has met and formed a resolution on this project and they request the opportunity to present their work to Council at the April 20 worksession; and hearing this matter tonight will compromise the process which Council initiated: the South Pack Square Association has only been given a few days to look over the new proposal and they have several questions; what happened to the inclusive process City Council wanted to achieve; and who will be the owner of the improvements in 2009:

Mr. Gene Ellison
Mr. Jesse Plaster
Mr. Fred English
Ms. Amy Plaster
Mr. Jesse Ray
Mr. Walter Plaue

Mayor Worley responded to Mr. Ellison's comment about the February 24, 2004, meeting. He explained that is was Council's intent to put a general discussion of where do we go from here having turned that project down. This is not the same thing. This is a revamping of the proposal which has some critical time elements to it, and which necessitates it being on the agenda tonight. That is the reason why it is different from what we talked about and intended to have on the worksession agenda for April 20, 2004.

Upon inquiry of Mayor Worley regarding ownership of the improvements in 2009, Mr. David Rogers, developer, explained that they do not want to be the long-term owners of the property. In our 7-year lease, the tax credit investor has to own the property for at least five years to give the best change for EMSDC to be able to buy the improvements back. During that time period, EMSDC will have a capital campaign to enable them to buy the improvements back within 5-7 years. If EMSDC does not buy the property back, there is a provision in the lease that extends it to 99 years so we can find another buyer for the property.

Community Development Director Charlotte Caplan said that EMSDC will continue to own the freehold and have the option to buy back the improvements after 5-7 years. However, during the development phase, that will be handled by the highly-capable developer in the form of

134

historic acquisitions and by the Enterprise Real Estate Services. EMSDC realized they needed that additional expertise and City staff supports them in that decision.

Mr. Rogers explained the New Market Tax Credits Program, which was started by the federal government in 2002. He explained that the reason why they did not discuss the New Market tax credits for the first proposal is because the EMSDC project (with the Mt. Zion Church project) did not qualify for those tax credits. Two weeks ago he was asked by Mt. Zion Church to talk about moving ahead with just their project without the EMSDC project. In that meeting they explained to him what they wanted to do differently on their site. Once they told him that, their project immediately qualified for the New Market tax credits. With the Mt. Zion project qualifying for the tax credits, the EMSDC project would qualify as well. He then contacted the City and said there has been a change in what financing is available due to the Church's change in their project. They have been able to reduce a 7.5% loan down to a 4.25% loan, fixed rate for 7 years. He said that they are proceeding with the project on the Mt. Zion Church site regardless of what happens with the EMSDC project.

Mr. Rogers then responded to various questions/comments from Council regarding the role of the EMSDC in this project and how they anticipate the buy-back in 5-7 years.

Mr. Rogers explained how the community can participate in the jobs, training and minority contracting. He said they have already been taking applications from general contractors. In the advertisement they require the contractor to hold job fairs and take pricing from minority sub-contractors. They will abide by all U.S. Housing & Urban Development requirements.

Upon inquiry of Councilwoman Bellamy, Mr. James Geter, President of the EMSDC Board, said that the Board has agreed there needs to be additional representation on the Board. Their Vice-Chair is leading that effort in putting together an advisory council. The Board has also determined that there needs to be additional community seats available. They have passed out applications throughout the community at least three times searching for new Board members, but have received none back to date. The YMI Cultural Center will have a seat on the Board.

When Councilwoman Bellamy asked about the EMSDC's plan to buy back the improvements, Mr. Jeter said that they want to make sure that these properties stay in the community and they don't lose control of the properties. He said that the Board will begin capital campaigns soon after the development starts and develop a plan to raise a certain amount of money each year so that when the 5-7 year period comes they will be ready to buy the improvements back. They hope they don't have to borrow any money to buy the improvements back, but if they do, they will be in a better position.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that the City has a contract with the EMSDC, as they are the redevelopment agent for the South Pack Square area. The contract puts certain responsibilities on them to facilitate the development of the area in accordance with the South Pack Square Plan. He felt there are some provisions in the contract that are required by federal law that the City can't amend, but with respect to the things we can change, certainly we can do that.

Councilwoman Bellamy asked how the EMSDC is different from the City's relationship with the Housing Authority, Metropolitan Sewerage District Board, Alcoholic Beverage Control Board, Regional Water Authority, etc. City Attorney Oast said that the EMSDC is not a governmental entity but a corporation formed under the N. C. Corporation Laws. There is some misconception that they are an arm of the City, but they are not. They are only the City's redevelopment agent, not a redevelopment commission.

Mayor Worley said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3111. This motion was seconded by Councilwoman Jones.

Vice-Mayor Mumpower agreed with people who feel the Council has made an unfortunate step away from normal procedures to be making such a major step forward. He also agrees that Council is side-stepping portions of the South Pack Square Redevelopment Plan in that we are marginalizing EMSDC without any clear reform plan and he doesn't understand the logic in that. With that said, the African American community's historical connection to The Block is a key component of the development plan and that is going to be much more clearly preserved by this effort than if we let traditional piecemeal development occur there. EMSDC, as representatives of the African American community, will be in a position to guide things in that area and make use of the revenues that will have a much greater impact than if we let it just occur traditionally. There are cons to this process but the pros seem to clearly outweigh the cons.

Councilman Dunn was concerned about the process. The uncertainty of the availability of tax credits is unknown by the developer and the City. He doesn't like to feel pressured into voting because we are spending taxpayers' money. However, The Block will be developed anyway and voting in favor will help create that re-birth. In addition, he feels that every board Council works with should be reviewed in depth.

Councilwoman Jones studied very hard the issues which concerned Council on the earlier proposal and feels they have been addressed - there are commercial rents that are affordable, Ebony Grill is included in the plans, affordable housing, separate the Church project from EMSDC, and flush out the discussions with the EMSDC. The timing is not great, but it is not unfair. Councilwoman Bellamy worked very hard to hear a lot of different voices and made sure that their words have been heard. She asked the developer take initiative to have regular contact with the property owners and apprise them of anything that will disrupt their business and work in concert with that. She also asked City staff to look at the Urban Trail's role in that area. Also, she pointed out that this Council is committed to finding other dollars through a lobbyist to bring other amenities to South Pack Square.

Councilman Davis said that he supported the earlier project and feels that it is now in a better form. However, he felt Council should give all groups concerned the opportunity to report back to Council and didn't feel one more week to the April 20 worksession was asking too much.

Councilwoman Bellamy would like for Council to evaluate our relationship and partnership with the EMSDC. There may be a possibility that the City can make appointments to that Board. She wants the City to pursue what we can do to ensure that the level of participation that we really want, we can achieve. We need to make sure we have input into seeing the changes in the Board organization going forward.

Councilman Newman said that the Housing & Community Development Committee allocated $50,000 in Community Development Block Grant (CDBG) funds for overall redevelopment for South Pack Square without indicating exactly how that would be utilized or exactly what agency would receive those funds. Even though the project was not approved in February, the Council maintained its commitment to the revitalization of this area. That does provide us with an opportunity to remain in dialogue with all of the different people who are interested in South Pack Square and how best to use those funds to move the overall redevelopment effort forward and to remain in dialogue with EMSDC about what form of partnership the City would like to have with that organization. He also thanked Councilwoman Bellamy and Councilwoman Jones on their hard efforts to help move this forward.

Councilwoman Bellamy suggested a portion of the $50,000 of CDBG funds be allocated to the YMI Cultural Center for some incubator-type small businesses and/or a marketing plan being created to get more African-American businesses on The Block. She commended Mt. Zion Church for stepping up in their willingness to move ahead because they saw a need in our community and made holistic changes to their plan. She appreciated the developer working with the Ebony Bar and Grill, constructing affordable apartments, lowering office and commercial spaces, working with Mt. Zion Church to create a new Master Plan, and finding financing for the project. She also thanked the local bank for investing in this project. She hoped other issues identified will be addressed as well, e.g., parking, ventilation and electrical system of surrounding property owners, etc. She hoped that more people would be included in the process and asked the developer to openly communicate with the property owners. She also felt that the 1996 South Pack Square Redevelopment Plan needed to be revised.

Mayor Worley felt that City Council has followed their processes in that the item was placed on the agenda in the normal way with the normal notice. The City even went to the unusual step to issue a press release to try to be sure that the publicity got out there. Since February, there have been many public meetings in which Councilwoman Bellamy and Councilwoman Jones worked hard to make this a better project and he thanked them for their efforts. He said this issue has been before Council for over six months and since there have been changes in the companion project, which allowed for the change in some of the financing options, we have an opportunity to make a decision at this point.

The motion made by Vice-Mayor Mumpower and seconded by Councilwoman Jones carried on a 6-1 vote, with Councilman Davis voting "no."

ORDINANCE BOOK NO. 21 - PAGE 136

At 8:05 p.m., Mayor Worley announced a short break.

ADDITION TO THE NEW BUSINESS AGENDA

B. RESOLUTION NO. 04-76 – RESOLUTION AMENDING THE ANNEXATION SERVICES PLAN FOR 2004 ROUND TWO ANNEXATIONS

City Attorney Oast said the amended annexation services plan adopted earlier in the meeting will require another amendment to reflect the Honey Drive area was not annexed. The Annexation Services Plan, as amended, will continue to meet the requirements of N.C.G.S. 160A-47 with respect to all of the other 2004 annexation areas.

City Attorney Oast then read the following resolution: WHEREAS, pursuant to N.C.G.S. 160A-49(e), the City has the authority to amend the report required by N.C.G.S. 160A-47; and WHEREAS, the Asheville City Council has, pursuant to N.C.G.S. 160A-47, approved the Annexation Services Plan for the annexation in 2004 of the areas known as Heritage Business Park Area, Honey Drive Area, Enka Park Area, Ashwood Area, Heathbrook Area, and Sweeten Creek Road Area (Resolution Numbers 04-28, 04-29, 04-30, 04-31, 04-32, and 04-33; adopted January 13, 2004); and amended the Plan by resolution adopted April 13, 2004; and WHEREAS, City Council decided not to annex the Honey Drive Area and the Annexation Services Plan as adopted and amended, is in further need of revisions to reflect the fact that the Honey Drive Area was not annexed; and WHEREAS, the revision of the Annexation Services Plan to reflect that Honey Drive was not annexed will not negatively affect the City's ability to provide required services to the other areas as called for in the Annexation Services Plan and that the Annexation

Services Plan will continue to meet the requirements of N.C.G.S. 160A-47 as to those remaining area; and WHEREAS, amending the Plan to reflect the fact that the Honey Drive Area has not been annexed will not cause any of the remaining areas to qualify for annexation under any of the additional subsections of N.C.G.S. 160A-48 (c) and (d). NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT: (1) The Annexation Services Plan approved by the Asheville City Council on January 27, 2004, and amended on April 13, 2004, be further amended by revising said Plan to reflect the fact that the Honey Drive Area was not annexed; and (2) The Planning and Development Director is hereby directed to cause the amendments described herein to the Annexation Services Plan to be made to all official copies of the Annexation Services Plan, including the Plan on file in the Office of the City Clerk.

Councilwoman Jones moved to adopt Resolution No. 04-76. This motion was seconded by Councilwoman Bellamy and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no." Resolution Book 28-page 184

C. RESOLUTION NO. 04-77 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN MEMORANDUM OF UNDERSTANDING WITH THE CITY OF HENDERSONVILLE AND THE REGIONAL WATER AUTHORITY CONCERNING FUTURE WATER PLANT CONSTRUCTION AND EMERGENCY, TEMPORARY OR WHOLESALE BASIS CONTRACT WATER TREATMENT

Mayor Worley said that this is the consideration of a resolution approving a Memorandum of Understanding between the City of Asheville, the City of Hendersonville and the Regional Water Authority concerning future water plant construction and emergency, temporary or wholesale contract water treatment.

As you know, for an extended period of time the City Manager and the Mayor have been working with the City Manager and Mayor of Hendersonville on a joint draft Memorandum of Understanding to provide for regional cooperation and emergency, temporary or wholesale contract water to the City of Hendersonville. The Memorandum of Understanding is divided into two parts. Part One addresses regional cooperation at the point in time when the City of Hendersonville has to expand or build additional capacity at its water treatment plant. Simply stated, the agreement will call for a study to determine whether it is best for Hendersonville to expand their current plant, or to expand the Mills River Water Treatment Plant, which is newer and has access to the French Broad River. The second part of the agreement sets out that each party will supply the other with emergency, temporary and wholesale water, should the need occur. It sets the rate per 100 cf in advance, with provisions for adjustments based on documentation and increased costs.

Mayor Worley thinks this is a firm step toward further regional cooperation and provides for future areas of cooperation between the two largest water producers in the region.

Mayor Worley recommended that Council approve the Memorandum of Understanding and forward it to the Regional Water Authority for their approval on April 20, 2004.

Councilman Dunn, member of the Regional Water Authority, doesn't think it was a good precedent for a unilateral decision to be made with the City of Asheville and the City of Hendersonville. The Henderson County Commissioners, the Regional Water Authority members and City Council were not included in this process. Mayor Worley did a good job in addressing this important issue and he would support it, however, he was concerned about the lack of inclusiveness.

Mayor Worley explained that was basically done at the staff level. It was done in the same manner as the agreements with the Town of Black Mountain, Woodfin Water & Sewer District and Town of Weaverville. Nothing was different in this process.

Interim Water Resources Director David Hanks said that this was done as a result of a vulnerability assessment performed last year and brought before Council. It brought up the fact that we only had handshake agreements and nothing in writing if an emergency arose. He explained that Henderson County has expressed some concern and felt they should have been more of an active partner. However, they are not a supplier of water and that was what we were basically looking at – having agreements with people who produce water, just as our system does.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 04-77. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 185

D. RESOLUTION NO. 04-78 - RESOLUTION AMENDING CITY COUNCIL RULES REGARDING THE CONDUCT OF MEETINGS

City Attorney Oast said that this is the consideration of a resolution amending City Council Rules regarding the conduct of meetings.

One of Council's continuing concerns has been the length of council meetings and the conduct of public comment sessions, including public hearings. The public shares and frequently has expressed this concern. The law is clear that Council may establish rules for the conduct of its meetings and public hearings. In the conduct of some required public hearings and quasi-judicial hearings, due process is also a concern.

Most public hearings or public comment periods are concluded quickly, but there are some matters that require special attention, and the ability to establish special procedures. Accordingly, some revisions to Rule 7 are proposed to deal with general public address to the Council, and a new Rule 7.5 is proposed to deal with special matters with respect to which, due to their nature or anticipated length, it may not be possible or desirable to conduct them within the framework of the normal rules.

The proposed revisions to Rule 7 establish general rules of decorum, applicable to all public comment, and recognize the Mayor's power, as the presiding officer, to control proceedings.

The proposed new Rule 7.5 establishes some procedures, such as the maximum time allotted and the manner of submitting documents, that will apply to all public hearing/comment items. The proposed new rule also provides for the establishment of rules and procedures applicable to particular matters. These include: recognition of spokespersons, order of presentation, and rulings on relevance and repetition of information. Due process will be taken into consideration in establishing any special rules.

Considerations:

- There may be other proposed amendments that come out of Council's recently completed goal-setting process.

- There will need to be some break-in period for these rules, while the public and Council become accustomed to them.
- Staff will attempt to recognize those matters where special procedures may be appropriate, and will work with the affected citizens to establish appropriate special procedures in advance of hearings.
- Respect for any rules and procedures is essential to their effectiveness.

In response to comments made at the March 15, 2004, work session, the following revisions have been made to the proposed amendments to Council's rules:

1. Rule 7(c) – clarification of time limits applicable to groups and to individual members of that group.
2. Rule 7(e) – addition of a prohibition against discussion of City personnel matters.
3. Rule 7(g) – substitution of "rude, inappropriate" for "vexatious"; also added "any person or group of people."
4. Rule 7.5 B. – addition of subsection 7, allowing mayor to require use of speaker sign up sheets.
5. Rule 7.5 F. – addition of rule clarifying that vice-mayor or temporary chair has power to administer rules regarding public hearings and public comment in the absence of the mayor.

Considerations: The staff will endeavor to identify in advance those agenda items where "special orders" might be needed, and submit the special order for consideration at the work session prior to the meeting where the item is to be considered.

He reviewed with Council the following changes:

7. PUBLIC ADDRESS TO THE COUNCIL

Citizens desiring to address the council shall be given the opportunity to do so as follows:

(a) Any individual or group who wishes to address the council may make a request to be on the agenda to the city clerk. The mayor and city manager shall determine when preparing the agenda for the meeting whether the matter will be placed on the agenda.

(b) Subject to the time limitations set forth in paragraph (c), below, the public shall be allowed to comment on matters under consideration by the council prior to a final vote on the matter by the council. Public comment shall generally be taken regarding such matters under consideration by the council during the formal~~"regular" 5:00 p.m.~~ meetings of the council as referenced in Rule 1. Public comment will not be taken during the "worksession" discussions of the council except in those instances where a final vote of the council is being taken during a worksession. In such instances, public comment shall be allowed in accordance with the time limits set forth hereinafter.

(c) Any person addressing the council shall be limited to a three minute presentation except that any group making a presentation to the council may have a single spokesperson who will be allowed ten minutes to address the council, formal organizations such as neighborhood associations and public interest groups are encouraged to designate a single spokesperson to present that organization's position. No person who identifies himself or herself as a member of a group will be permitted to address the Council as an individual on the same agenda item. The council will receive written information from any individuals or groups that cannot conclude their presentations within these time limitations.

(d) At each "regular" meeting ~~and each "worksession"~~ of the Council, under the "Informal discussion and public comment" section of the agenda, any group or person wishing to address the Council on any matter not previously considered during the meeting may do so. For matters coming before Council pursuant to this paragraph, and with respect to which the Council may not act, the following limitations apply:

(i) No more than three persons (one at a time) may address the Council, and no person may take longer than three minutes to complete a presentation.

(ii) In lieu of the limitation set forth in (i) above, a group may elect to designate a spokesperson who may take no longer than ten minutes to complete a presentation.

As used herein, "presentation" means all forms of address, including speaking, use of audio or video materials, and distribution of literature. For presentations that cannot be completed within the limitations of this paragraph, written comments or other information may be delivered to the Council through the City Clerk.

(e) Persons addressing the Council are expected to observe the decorum of the Chamber, to be respectful of the Council and the public, to refrain from the use of profanity or foul language, to refrain from personal attacks and commentary on candidates for political office, and to refrain from making disclosures prohibited by the Personnel Privacy Act with respect to any City employee.

(f)~~(e)~~ The mayor ~~(or the vice mayor, in the absence of the mayor)~~ shall be authorized to allow additional comments and time for comments as he or she may deem appropriate for the orderly conduct of business.

(g) Pursuant to Rule 9(b), the mayor may rule out of order any comments made under this part of the agenda if such comments are unruly or repetitive of information previously received by council on the same subject at the meeting then in session or at previous meetings. The mayor may also rule out of order any comments made during this part of the agenda that are rude, inappropriate, or intended to harass any person or group of people, and is authorized to take reasonable and appropriate measures to ensure compliance with these rules.

7.5 SUPPLEMENTAL RULES AND PROCEDURES FOR PUBLIC HEARINGS AND PUBLIC COMMENT.

A. The time limit applicable to public hearings or public comment periods on any agenda item shall be one hour. This time limit shall be exclusive of staff presentations and any structured Council debate. This time limit may be shortened or extended by the ~~Mayor~~mayor, with the concurrence of Council.

B. In addition to the rules set forth in Rule 7 and herein, the ~~Mayor~~mayor may, in consultation with the City Attorney and with the concurrence of Council, establish supplemental rules and procedures applicable to particular public hearings or public comment periods in order to facilitate the receipt of relevant information by Council, while affording appropriate due process. Without limitation, such rules and procedures may include:

1. The order of presentation;
2. The length of individual or group presentations;
3. Recognition of a primary spokesperson or representative to provide information or respond to a particular question.
4. The maximum time allotted for the public hearing.
5. Relevance of information and repetition of information previously received; and

6. Determining when new information has been presented.

7. Requiring speakers to sign up in advance.

C. The ~~Mayor~~mayor may, with the concurrence of Council, determine when sufficient information has been presented at any public hearing or public comment period, and is ready for action by Council.

D. Any documentary information that is to be used in a public hearing or public comment period shall be furnished in advance to the City Clerk in electronic format or 15 copies thereof. This rule may be waived for good cause.

E. In order to facilitate the efficient use of time, citizens are encouraged to coordinate their presentations with others who have similar positions, and to designate a spokesperson, where practicable, to speak for the group.

F. In the absence of the mayor, and subject to compliance with N.C G.S 160A-70, the vice-mayor temporary chairman shall be authorized to administer the provisions of this rule and Rule 7.

If Council approves of the amendments as revised, adoption of the resolution is recommended.

Discussion occurred regarding whether Council needed a definition of group, what constitutes a group, how groups are recognized, and how it is determined who gets to speak if they are associated with a group.

Councilwoman Jones also noted that City Council will need to do their part to expedite the meetings as well. She felt that Council is as much of the time problem as the public.

Upon inquiry of Mr. Fred English, Mayor Worley said a sign-up sheet would be instituted if there were a particularly contentious issue.

When Councilwoman Jones suggested the rules be placed at the Council Chamber door, City Attorney Oast said that he will also put the rules in bullet-point format and suggest the

Planning & Development Department send them out with their public hearing notices, in addition to posting it on the website in the general area of the electronic agenda.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-78. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 186

VI. OTHER BUSINESS:

RESOLUTION NO. 04-79 – RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE EARTH DAY FESTIVAL

Mr. Paul Clarke, Festival Coordinator, said that this is the consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Earth Day 2004 festival to be held on Saturday, April 17, 2004.

Earth Day 2004, scheduled for April 17, is a celebration committed to raising awareness of the environment and what every person can do to help maintain and improve our world. They have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their event and allow for consumption at the event.

The Asheville Parks and Recreation Department recommends approval of the resolution authorizing the possession of malt beverages and/or unfortified wine at the Earth Day 2004 event at the specific location and time noted in the resolution.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Councilman Newman moved for the adoption of Resolution No.04-79. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilwoman Bellamy voting "no".

RESOLUTION BOOK NO. 28 – PAGE 190

COMMENTS BY VICE-MAYOR MUMPOWER

On behalf of the Memorial Stadium Task Force, Vice-Mayor Mumpower thanked Buncombe County and the City of Hendersonville for approving resolutions that support our effort to restore our regional memorial to our war dead at Memorial Stadium.

Vice-Mayor Mumpower also thanked people who participated in the first and very successful For Our Kids Day at Lee Walker Heights.

CLAIMS

The following claims were received by the City of Asheville during the period of March 19-Apri 1, 2004: Roxanne Williams (Streets), Robert West (Streets), Helen C. Whitten (Water), Virginia Avenue (Inspections) and Pershing Road (Inspections).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English felt the City of Asheville did not need the public access television station.

Mr. Mike Fryar spoke against annexation and how he felt people don't receive any services after being brought into the City.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:18 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT:

Provisions for Possession and Consumption of Malt Beverages and/or Unfortified Wine at Various Events

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: Sunset Stampede, Mountain Sports Festival, The Asheville Independent Restaurants' Taste of Asheville, Asheville's 4th of July Celebration, Bele Chere 2004, Asheville Goombay Festival, Sisters on Stage, Annual Brewgrass Festival, Asheville Greek Festival, World of Ice Festival, October Harvest Festival, Hardlox Café Jewish Food Festival, Asheville Downtown Association events, The Asheville Assault Home Games, Asheville Splash Home Games, and Asheville Grizzlies Home Games.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- The Sunset Stampede, scheduled for May 1, is a run and event that will raise funds for Big Brothers/Big Sisters.

- The Mountain Sports Festival, scheduled for May 7-9, is an event to draw attention to the vast opportunity for Asheville as a destination for adventure sports.

- The Asheville Independent Restaurants' Taste of Asheville, scheduled May 22, is an event to promote the many independently owned restaurants in the Asheville area.

- Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area.

- For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the downtown area. This year the request is being made for July 23-24, 2004. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

- The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 27-29. The 2004 Goombay Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

- Sisters on Stage is an event to raise funds for Helpmate, an organization committed to assisting battered women. This year's event is scheduled on September 4.

- For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist. This year's event is scheduled for September 18.

- The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 24-26. The 2004 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

- The World of Ice, scheduled for October 10, is an event showcasing the regions best Ice Carvers and restaurants in downtown Asheville.

- The Grove Arcade's Harvest Festival, scheduled for October 16, is an event to promote downtown as a shopping destination.

- The Hardlox Café Jewish Food Festival, scheduled for October 17, is a celebration of Jewish cuisine and heritage.

- For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville events to bring both the public and visitors to the downtown area. These events include: *Moonlight Over Downtown and four Downtown After Five activities.* The Asheville Downtown Association has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

- The Asheville Assault, Splash, and Grizzlies are all semi-professional sports teams that seek to serve alcohol at their home games throughout the summer.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Financing the Purchase of One Fire Pumper, One Side-Loader Garbage Truck and 5,330 Roll Carts

Summary: The consideration of a resolution authorizing the installment financing of the purchase of one fire pumper, one side-loader garbage truck and 5,330 associated roll carts.

The City of Asheville Capital Improvement Plan 2003/04 to 2008/09 includes authorization in Fiscal Year 2003/04 for the installment purchase of a fire pumper, one side-loader garbage truck and associated roll carts.

The Finance Department sought proposals from fourteen firms to finance the purchase of the above listed equipment. Proposals were received from ten firms, the best of which was submitted by RBC Centura Bank, - - 2.35% for four years eleven months.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and RBC Centura Bank for the purchase of the fire pumper, side-loader garbage truck and 5,330 roll carts and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

Pros: Provides funding of capital expenditures at very favorable interest rates.
RFP solicitations for financing proposals fosters competition which results in lower rates for this and future financings by the City.
Financing capital purchases spreads the cost of acquisition over several years of the useful life of the asset.
Paying for capital purchases with the proceeds of a financing, as opposed to paying for the purchase by using the City's currently-available cash balances, slightly increases the currently available funds that could be used for other purposes.

Cons: Financing the purchase slightly increases the lifetime cost of the acquisition due to the payment of interest on the amount financed.

City staff recommends City Council adopt the resolution authorizing the installment financing of the purchase of one fire pumper, one side-loader garbage truck and 5,330 associated roll carts.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

UPDATE ON COLLEGE STREET PLAN BETWEEN SPRUCE STREET AND CHARLOTTE STREET

Traffic Engineer Anthony Butzek said that this is the description of conceptual plans prepared for implementing a boulevard treatment on College Street between Spruce and Charlotte Streets.

College Street, which once served as US 70, is a wide four-lane undivided street with on-street parallel parking. The proposed design consists of one through lane in each direction, a median with left-turn bays, bicycle lanes, added parking through use of angle parking, and a roundabout at the intersection with Valley and Oak Streets. Changes would be implemented with planned resurfacing to minimize costs.

The proposed plan was analyzed with existing peak-hour traffic counts plus 10% growth, and operates well within capacity with this traffic projection. The capacity of the corridor as a whole remains constant, because the same number of lanes is provided at Charlotte Street, which is the corridor's capacity constraint. Potential future traffic volumes for the underutilized group of parcels north of College Street were analyzed as well, and the corridor would continue to operate within capacity.

By virtue of the proposed roundabout, the proposed plan cuts the travel time between Spruce and Charlotte Streets by about 10 seconds in each direction from existing conditions. Compared to a two-lane cross-section with a traffic signal, the roundabout saves about 20 seconds travel time in each direction. The roundabout improves future level of service (LOS) from LOS E (peak) to LOS D, and LOS D (off-peak) to LOS C.

The two-lane divided cross-section will correct the unsafe crosswalks that currently exist by 1) providing a safe refuge island; and 2) eliminating the multiple jeopardy situation that occurs today. Multiple jeopardy is when a car in one lane stops for a pedestrian, blocking the view of the car in the other lane. This is the reason for most of the pedestrians being struck. This design will eliminate the need for Sheriffs to continue to serve as crossing guards. This design is much less costly than other safety-improvement techniques, such as signals or actuated crossings, which would cost $50-100,000 per crosswalk.

The two-lane divided cross-section will increase speed limit compliance, which is currently problematic in this corridor, while reducing enforcement needs.

The provision of bicycle lanes is consistent with the Asheville Greenways Master Plan, which recommends an on-street greenway in this corridor.

The parking count is increased by 14 spaces on the south side of College Street, which will offset the potential loss of 6 on-street spaces to Pack Square, 16 on-street spaces to the two-way conversion of College Street and Patton Avenue, and 3 on-street spaces on the north side of College Street due to safety considerations.

This plan is consistent with the Pack Square Plan and the City Plan, providing a gateway boulevard with extensive aesthetic opportunities for the primary eastern access to downtown.

The materials cost of this project is estimated at $75,000 - $80,000. City crews could perform the construction. Consultant fees of $15,000 would produce construction drawings for the roundabout. Estimated $5,000 to remove traffic signal at Oak/Valley Street (compared to $10,000 to install needed upgrades) will save $4,000-5,000 annually in signal operation and maintenance costs. Aesthetic enhancements would be additional.

He explained there are costs of doing nothing: (1) continued use of Buncombe County Sheriff's Department as crossing guards; (2) $10,000 traffic signal upgrades; (3) $4-5,000 annual signal maintenance; and (4) the opportunity cost is tremendous.

The next steps will be a public meeting and final design.

Pros:
- Improved traffic flow and reduced travel time
- Reduction in most traffic crashes
- Improved pedestrian safety
- Provision of bicycle lanes
- Increase in on-street parking spaces
- Improved speed limit compliance through design; reduced enforcement
- Consistent with approved plans (Pack Square, Greenways, City Plan 2025)
- Creation of attractive downtown gateway corridor
- Cost is less than alternative measures to improve safety
- Minimize cost by scheduling with resurfacing

Cons:
- Negative perception by some of reduced number of lanes
- It is possible that the angle parking might generate some low-severity crashes
- Cost is moderate

He reviewed with Council the history of the area and showed Council a proposed design outlining the specifics, which included: design speed is 20 miles per hour; two-lane median-divided; parallel parking on north, angle parking on south; striped bicycle lanes; safe pedestrian crossings; roundabout at Valley/Oak Streets; and all lanes maintained at College and Charlotte.

Mr. Butzek then explained a traffic comparison, which analyzed traffic, travel times and speed for the existing conditions in 2004, a 2-lane road with a roundabout in 2014 and a 2-lane road with no roundabout in 2014.

He explained the design allows for future expansion as follows: extends eastbound left-turn lane at Charlotte Street from 160 feet to 210 feet; allows future addition of 2nd eastbound left-turn lane at Charlotte Street; and effectively increases capacity of the corridor by 25% by easing constraint (College Street and Charlotte Street).

Some project amenities include: better traffic flow; increase street network capacity; speed limit compliance through design; improved pedestrian safety; and relief for Buncombe County Sheriff's Department acting as crossing guards. He then showed Council a traffic simulation of the area.

The design is consistent with the Pack Square Renaissance Plan, the Greenway Master Plan and the Asheville City 2025 Plan.

Project drawbacks include: a hazard associated with backing out of angle parking spaces; and the negative perception by some of reduced number of lanes.

Mr. Butzek responded to various questions/comments from Council, some being, but are not limited to: is Asheville read for a roundabout; what is the experience of the roundabout on Weaver Boulevard; where will the bike lanes be located; are the lanes wide enough for emergency vehicles; what are the different Level of Services; would a traffic light be safer in lieu of a roundabout; have there been any plans for the inside of the roundabout since it will be a gateway into the core of Asheville; are there any plans for the intersection of College and Charlotte Streets; and are there any plans for that portion of US 70 coming out of the Tunnel towards downtown leading into Asheville.

Councilman Dunn expressed concern about cutting the 4-lanes down to 2-lanes. He felt the area will continue to be congested and there will be more opportunity for accidents with people trying to back out of the angled parking spaces.

Upon inquiry of Councilman Dunn, City Engineer Cathy Ball said that Buncombe County government is aware of the problems on College Street. At one time they had even suggested traffic signals placed by the Courthouse. She said that a charette was held at which time Buncombe County was very involved in the process for the conceptual plan. Since that original charette, the plan has been revised and it will be sent to Buncombe County for comment. City Manager Westbrook also pointed out that this design was a direct result of the problems Buncombe County was experiencing on College Street with pedestrians and at that time they were very much in favor of it.

Vice-Mayor Mumpower felt it was very important to educate the community about roundabouts. Mr. Butzek said that he will be taking this concept to a public meeting and asked Council for other suggestions about community input.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that there are advantages and disadvantages for pedestrians with roundabouts. Vision-impaired pedestrians may have a problem crossing, but others may be able to cross easier because of the slow speed.

Councilman Davis asked if staff was aware of problems associated with roundabouts and if any cities reverted back to the 2-lane streets. Mr. Butzek replied that he was aware that several roundabouts reverted back to 2-lane streets, however, it wasn't because people didn't want them, it was because they were small and there wasn't enough right-of-way for larger vehicles.

It was the consensus of Council to direct staff to proceed with the project.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Clarification of Intent of Hillside Regulations Concerning Non-Residential Uses

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) for clarification of intent of hillside regulations concerning non-residential uses.

This code amendment is a general "housekeeping" type amendment intended to clarify the intent of the hillside regulations concerning nonresidential uses. Hillside regulations address density and grading requirements for steep slope areas above a certain elevation. The current wording of the hillside regulations implies that these requirements only apply to residential uses. Since other uses, including commercial, institutional, and office uses, can occur in hillside situations, this change allows the grading requirements to apply to those types of uses.

The amendment has been routed to the Coalition of Asheville Neighborhoods, CREIA, and the Council of Independent Business Owners for review and comment.

Pro – Hillside regulations will be able to be applied to nonresidential situations in a manner consistent with how they are applied to residential situations, allowing the ordinance purposes to be met in a more effective fashion. This appears to be consistent with Council's direction at the recent goal-setting meeting.

Con – Applying hillside regulations to nonresidential situations may make it more difficult for nonresidential uses to be established in hillside situations.

The Planning and Zoning Commission recommended approval of this code amendment on April 7, 2004, by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Revision of Dimensional Requirements in Urban Village District

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) for certain revisions of the dimensional requirements in the Urban Village District.

This code amendment is a general "housekeeping" type amendment intended to revise certain dimensional requirements for the urban village zoning district. With the adoption of the 2025 Plan, it became apparent that several areas identified for urban village locations did not meet the 10-acre minimum acreage requirement. This amendment would reduce the minimum acreage requirement to five acres. Additionally, there are several areas of site design inconsistency between the Neighborhood Corridor District and the Urban Village District; this amendment would resolve those inconsistencies.

The amendment has been routed to the Coalition of Asheville Neighborhoods, CREIA, and Council of Independent Business Owners for review and comment.

Pros –

- The 2025 Plan and the UDO will be in greater compliance.
- The Urban Village District would be able to be applied to a larger number of properties (a potential con), allowing it to be used in a greater variety of circumstances.
- There would be greater design consistency between the Neighborhood Corridor District and the Urban Village District.

Con –
- The Urban Village district would be able to be applied to a larger number of properties (a potential pro).

The Planning and Zoning Commission recommended approval of this code amendment on April 7, 2004, by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Mr. Shuford responded to Councilman Davis' comments regarding Planned Unit Developments. He said he would provide Council with a report Council on the Planned Unit Developments and the Urban Village areas in the near future.

Revisions to the Flexible Development Standards

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) for revisions to the flexible development standards.

This code amendment is a general "housekeeping" type amendment intended to clarify the requirements for flexible development standards. This code section has been very useful in streamlining the development review process and we are interested in making sure the requirements are as clear as possible, including the addition of corner side setbacks to the standards.

The amendment has been routed to the Coalition of Asheville Neighborhoods, CREIA, and the Council of Independent Business Owners for review and comment.

Pros – The amendment will be easier to use and the staff interpretation allowing corner side setbacks will be added.
Con – None noted.

The Planning and Zoning Commission recommended approval of this code amendment on April 7, 2004, by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

A brief discussion was held regarding an appeal to the Board of Adjustment.

After discussion by Council, it was the consensus to place these public hearings on the appropriate formal City Council agenda.

Upon inquiry of Councilwoman Jones about the attendance of Planning & Zoning Commission members, Planning & Zoning Commission liaison Councilman Davis said that mid-month meetings are not commonly attended. He did state that most meetings are well attended, however, he would discuss attendance with Chair Fisher. Mr. Shuford also stated that there has been good attendance at the Joint Planning Area, meetings which have been outside of the Planning & Zoning regular and mid-month meetings. He said that with the new members recently appointed, they have needed to rescheduled their work load to accommodate the Planning & Zoning meetings.

PETITION FOR ZONING STUDY FOR ST. DUNSTAN'S AREA

Planning & Development Director Scott Shuford said that this is the consideration of a request from property owners for a zoning study for a portion of the St. Dunstan's neighborhood located off Biltmore Avenue south of the hospital.

Section 7-7-2 of the Unified Development Ordinance (UDO) provides property owners with a method to petition Council to authorize a zoning study for property not entirely owned by them. The code requires that a certain percentage (51%) of property owners join the request and, in this case, the percentage has been reached. The petition process does not require Council to ask staff to undertake the zoning study; it only requires that Council consider the request.

The area is described on a map labeled Map #1. In the staff's opinion, the request area does not contain all relevant property that should be examined in a zoning study, so if Council directs that we analyze the zoning of this neighborhood, we recommend that the area be expanded to that illustrated on a map labeled Map #2 for a more consistent pattern of study.

The request is prompted by the underlying zoning of the neighborhood, RS-8, that corresponds well with the existing setbacks for most lots and with the lot sizes of the smaller properties in the neighborhood. However, there is concern that existing larger lots could be further subdivided to create additional smaller lots under the existing zoning; this has in fact happened on a couple of occasions. The petitioners would prefer a zoning designation of RS-4, even though that zoning district would create some nonconformities with setbacks and lot sizes. Not all property owners in the study area are in support of the zoning change.

Pro – The zoning study would enable the issue about the appropriate zoning of this neighborhood to be decided by City Council.
Con – The study will consume limited staff resources that could be devoted to other projects.

City staff recommends that if City Council determines that a zoning study of the St. Dunstan's area is to be conducted, that the area be expanded to that illustrated on Map #2.

Upon inquiry of Mayor Worley about Planning staff's workload, Mr. Shuford said that they are getting closer to finishing the Brevard Road zoning study and they will shuffle their workload if Council chooses. He did not think it would be a monumental undertaking.

Discussion surrounded the reason for the request for a zoning study by the neighborhood.

Councilman Davis said that this neighborhood has been trying for a long time to get this type of study done.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the May 11, 2004, formal City Council agenda.

AMENDMENT TO PACK PLACE EDUCATION, ARTS & SCIENCE CENTER LEASE

City Attorney Bob Oast said that this is the consideration of a resolution renewing the lease of Pack Place Education, Arts & Science Center.

In the early 1980's, the City acquired property on Pack Square formerly occupied by the Pack Memorial Library and the Plaza Theaters. In addition to the land, there are several easements and party wall agreements that are part of the package of real estate interests that comprise this property. In 1988, the City leased the property to the Pack Place Education, Arts & Science Center, Inc., a non-profit corporation (herein "Pack Place Inc."). Pursuant to that lease, and through a combination of public and private financing, Pack Place Inc. renovated the old library and constructed new facilities on the old theater property and adjacent land. The City and

Pack Place Inc. are co-owners of the improvements made pursuant to the lease. The Pack Place Education, Arts & Science Center opened in late 1991, and has been in operation ever since.

The initial term of the lease was for 9 years, 364 days (one day less than the 10 year threshold that requires that the lease be treated as a sale). The City began negotiations with Pack Place Inc. for renewal of the lease in 1998, but these were not concluded, and personnel changes in the City and Pack Place Inc. organizations further delayed completion of them. Pack Place Inc. has continued to occupy and operate Pack Place Center, and we have negotiated a new/renewal lease that is presented for Council's consideration.

The essential terms and conditions of the renewal lease are summarized below.

Term. Recommended for 9 years 364 days so that it may be handled as a lease rather than a sale of the property. The law regarding disposition of City-owned property has changed such that it may be possible to lease for a longer term to a qualified organization, subject to certain conditions. Council and Pack Place Inc. may wish to consider this for the future.

Rental. Lease payments are $10.00 per year. However, Pack Place Inc. is responsible for all costs of operation and maintenance of the facility, and for paying the debt on its share of the cost of improvements. Pack Place Inc. is responsible for making and insuring any improvements, and for making any repairs.

Insurance. As noted, Pack Place Inc. is responsible for insuring Pack Place Center against property damage. Pack Place, Inc. also provides general liability insurance for the premises, and indemnifies the City.

Subletting. Pack Place Inc. sublets the Pack Place Center premises to several major tenants, including the Art Museum, Health Adventure, Pack Place Performing Arts, and the Colburn Mineral Museum. The lease permits subletting to major tenants (defined as one occupying 2000 or more square feet for 6 months or longer), subject to the City's written consent. However, no written consent is required for subleases to major tenants that already occupy a portion of the premises. This permits Pack Place Inc. to organize its internal space among existing tenants according to their needs without seeking the City's consent.

Historical interpretive display. Because the property is located in the City's National Register Historic district and federal funds were used in this development / rehabilitation, there is a requirement that a display describing the history of Pack Square be maintained in a prominent location on the premises. Issues regarding the size, location and form of this display were the main reasons that negotiations were not concluded in 1998. We have now, however, decided upon language that will permit reconfiguration and relocation of the display, in a way that takes advantage of advance in technology, while still adding to the requirement to maintain the display. This has been discussed with and approved by the State Historic Preservation Office.

Considerations: The Pack Place Center has been and continues to be one of the centerpieces of Asheville's revitalizing downtown. The existence of Pack Place Center has been a catalyst for much of what has happened in this area, bringing people to downtown, and which supports the local businesses such as coffee shops or restaurants.

If The City decides not to enter into this new lease, it must pay for its share of the jointly-owned improvements, which could be a substantial cost, computed pursuant to a provision in the old lease. Additionally, alternate arrangements for the operation of the facility would have to be made.

If Council desires to continue the current arrangement for operation of Pack Place Center, adoption of the resolution is recommended.

Mr. Edward Hay, President of Pack Place Education, Arts & Science Center Board responded to various questions/comments from Council, some being, but are not limited to: is there a role of the YMI Cultural Center in this lease; will the parties still work together in subletting the mutual space; and what is the current debt service.

Mr. Hay responded to Councilman Dunn on the cash flow of Pack Place.

Upon inquiry of Vice-Mayor Mumpower, City Manager Westbrook said that he would provide Council with a report regarding the financing of Pack Place.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

LEGISLATIVE AGENDA FOR THE 2004 SESSION OF THE N.C. GENERAL ASSEMBLY

City Attorney Bob Oast said this is the consideration of a resolution endorsing legislative requests for the 2004 session of N. C. General Assembly.

Following discussion on March 16, 2004, Council directed the preparation of two items of legislation affecting the City

1. Increase in ABC board membership from 3 to 5. The City of Asheville, pursuant to special legislation adopted in 1947, administers alcoholic beverage control through a local board of three persons, appointed by the Mayor and Council. Council desires to increase the board membership to 5. This legislation provides for the appointment of 2 additional members. These appointments are to be made by the Mayor and Council, as the current 3 appointments are. Initial terms will be 1 year for one appointment, and 2 years for the other, with subsequent terms to be three years. The current board members will continue to serve their appointed terms, and are not affected by this change. The requested legislation also makes a clarifying change regarding the filling of vacancies on the board, to conform to Council's practice.

2. Establishing two year terms for Civil Service Board members. The terms of the Civil Service Board members has always been two years. However, during the course of extensive amendments to the law in 1999, the provision for two year terms was inadvertently deleted. This proposed amendment puts it back in.

3. Statement of Support for Film Industry Incentives. The resolution contains a general statement of support for legislative action to create or expand financial and other incentives for the film industry. As we become aware of specific legislation on this subject, we will bring it to Council's attention.

Considerations: Because this is a short session for the legislature, bills introduced must be certified as "non-controversial."

The Civil Service Board term limit has been discussed with representatives of affected employees, and should not be a problem. The City Attorney has made no such inquiry with respect to the ABC board membership. There are other issues currently affecting the ABC board and its operations, and those issues may affect whether this bill can be certified non-controversial.

If Council approves of submitted these requests to our local legislative delegation, adoption of the resolution is recommended.

Upon inquiry of Councilwoman Jones, City Attorney Oast explained what the legislature concerns controversial and why.

When Councilman Newman suggested other ideas be submitted to our legislature in the form of an addendum to our legislative agenda, City Attorney Oast explained that we are already accumulating items for the next Session, including some requests that were not submitted last year because they were not voted on unanimously by City Council.

Upon inquiry of Councilman Newman, Mayor Worley explained how the policy goals for the N.C. League of Municipalities are accumulated and get circulated prior to adoption.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

CLOSED SESSION

At 4:38 p.m. Councilman Dunn moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Frances C. Briggs; Myrna R. Hendrix; Rose Investments; Travis M. Bach; Haywood Plott and wife Ruth Plott; Howard W. Meece and wife Doris B Meece; Mary Ann Hicklin Quarngesser; Allyn Family Real Estate Limited Partnership; Thantex Specialties, Inc.; Hubbell Realty Development Corp.; Alliance-Carolina Tool & Mold Corporation; Medical Action Industries, Inc.; Cutler-Hammer, Inc.; Eaton Corporation; Carolina Power & Light Company; and City of Asheville. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in G.S. 143-318.11(a)(4). This motion was seconded by Councilwoman Jones and carried unanimously.

At 5:40 p.m., Councilman Dunn moved to go out of closed session. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 5:40 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – April 27, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Worley led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Mumpower gave the invocation.

A. PROCLAMATION PROCLAIMING MAY, 2004, AS "MOTORCYCLE AWARENESS MONTH"

Vice-Mayor Mumpower read the proclamation proclaiming May, 2004, as "Motorcycle Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Eldon Moore, who briefed City Council on some activities taking place during the month.

B. RECOGNITION OF THE ASHEVILLE ALTITUDE

Mayor Worley read a Certificate of Recognition to the Asheville Altitude in winning the National Basketball Development League Delta Airlines Post-Season Classic Championship Game on Saturday, April 24, 2004. He presented the Certificate to Altitude Team President Alfred White and Asheville Altitude Coach Joey Meyer who thanked City Council for their support.

Councilwoman Bellamy thanked Mayor Worley and former Councilman Edward Hay for their work in bringing the Asheville Altitude to the Asheville Civic Center.

II. CONSENT AGENDA:

Councilwoman Bellamy asked that Consent Agenda Item H be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 13, 2004, AND THE WORKSESSION HELD ON APRIL 20, 2004

B. RESOLUTION NO. 04-80 - RESOLUTION AUTHORIZING THE INSTALLMENT FINANCING OF THE PURCHASE OF ONE FIRE PUMPER, ONE SIDE-LOADER GARBAGE TRUCK AND 5,330 ASSOCIATED ROLL CARTS

Summary: The consideration of a resolution authorizing the installment financing of the purchase of one fire pumper, one side-loader garbage truck and 5,330 associated roll carts.

The City of Asheville Capital Improvement Plan 2003/04 to 2008/09 includes authorization in Fiscal Year 2003/04 for the installment purchase of a fire pumper, one side-loader garbage truck and associated roll carts.

The Finance Department sought proposals from fourteen firms to finance the purchase of the above listed equipment. Proposals were received from ten firms, the best of which was submitted by RBC Centura Bank, - - 2.35% for four years eleven months.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and RBC Centura Bank for the purchase of the fire pumper, side-loader garbage truck and 5,330 roll carts and authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents.

Pros: Provides funding of capital expenditures at very favorable interest rates.
RFP solicitations for financing proposals fosters competition which results in lower rates for this and future financings by the City.
Financing capital purchases spreads the cost of acquisition over several years of the useful life of the asset.
Paying for capital purchases with the proceeds of a financing, as opposed to paying for the purchase by using the City's currently-available cash balances, slightly increases the currently available funds that could be used for other purposes.

Cons: Financing the purchase slightly increases the lifetime cost of the acquisition due to the payment of interest on the amount financed.

City staff recommends City Council adopt the resolution authorizing the installment financing of the purchase of one fire pumper, one side-loader garbage truck and 5,330 associated roll carts.

RESOLUTION BOOK NO. 28 – PAGE 192

C. RESOLUTION NO. 04-81 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A LEASE AGREEMENT FOR THE PACK PLACE EDUCATION, ARTS & SCIENCE CENTER

Summary: The consideration of a resolution renewing the lease of Pack Place Education, Arts & Science Center.

In the early 1980's, the City acquired property on Pack Square formerly occupied by the Pack Memorial Library and the Plaza Theaters. In addition to the land, there are several easements and party wall agreements that are part of the package of real estate interests that comprise this property. In 1988, the City leased the property to the Pack Place Education, Arts & Science Center, Inc., a non-profit corporation (herein "Pack Place Inc."). Pursuant to that lease, and through a combination of public and private financing, Pack Place Inc. renovated the old library and constructed new facilities on the old theater property and adjacent land. The City and Pack Place Inc. are co-owners of the improvements made pursuant to the lease. The Pack Place Education, Arts & Science Center opened in late 1991, and has been in operation ever since.

The initial term of the lease was for 9 years, 364 days (one day less than the 10 year threshold that requires that the lease be treated as a sale). The City began negotiations with Pack Place Inc. for renewal of the lease in 1998, but these were not concluded, and personnel changes in the City and Pack Place Inc. organizations further delayed completion of them. Pack Place Inc. has continued to occupy and operate Pack Place Center, and we have negotiated a new/renewal lease that is presented for Council's consideration.

The essential terms and conditions of the renewal lease are summarized below.

Term. Recommended for 9 years 364 days so that it may be handled as a lease rather than a sale of the property. The law regarding disposition of City-owned property has changed such that it may be possible to lease for a longer term to a qualified organization, subject to certain conditions. Council and Pack Place Inc. may wish to consider this for the future.

Rental. Lease payments are $10.00 per year. However, Pack Place Inc. is responsible for all costs of operation and maintenance of the facility, and for paying the debt on its share of the cost of improvements. Pack Place Inc. is responsible for making and insuring any improvements, and for making any repairs.

Insurance. As noted, Pack Place Inc. is responsible for insuring Pack Place Center against property damage. Pack Place, Inc. also provides general liability insurance for the premises, and indemnifies the City.

Subletting. Pack Place Inc. sublets the Pack Place Center premises to several major tenants, including the Art Museum, Health Adventure, Pack Place Performing Arts, and the Colburn Mineral Museum. The lease permits subletting to major tenants (defined as one occupying 2000 or more square feet for 6 months or longer), subject to the City's written consent. However, no written consent is required for subleases to major tenants that already occupy a portion of the premises. This permits Pack Place Inc. to organize its internal space among existing tenants according to their needs without seeking the City's consent.

Historical interpretive display. Because the property is located in the City's National Register Historic district and federal funds were used in this development / rehabilitation, there is a requirement that a display describing the history of Pack Square be maintained in a prominent location on the premises. Issues regarding the size, location and form of this display were the main reasons that negotiations were not concluded in 1998. We have now, however, decided upon language that will permit reconfiguration and relocation of the display, in a way that takes advantage of advance in technology, while still adding to the requirement to maintain the display. This has been discussed with and approved by the State Historic Preservation Office.

Considerations: The Pack Place Center has been and continues to be one of the centerpieces of Asheville's revitalizing downtown. The existence of Pack Place Center has been a catalyst for much of what has happened in this area, bringing people to downtown, and which supports the local businesses such as coffee shops or restaurants.

If The City decides not to enter into this new lease, it must pay for its share of the jointly-owned improvements, which could be a substantial cost, computed pursuant to a provision in the old lease. Additionally, alternate arrangements for the operation of the facility would have to be made.

If Council desires to continue the current arrangement for operation of Pack Place Center, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 28 – PAGE 194

D. RESOLUTION NO. 04-82 - RESOLUTION ENDORSING LEGISLATIVE REQUESTS FOR THE 2004 SESSION OF THE N.C. GENERAL ASSEMBLY

Summary: The consideration of a resolution endorsing legislative requests for the 2004 session of N. C. General Assembly.

Following discussion on March 16, 2004, Council directed the preparation of two items of legislation affecting the City

1. Increase in ABC board membership from 3 to 5. The City of Asheville, pursuant to special legislation adopted in 1947, administers alcoholic beverage control through a local board of three persons, appointed by the Mayor and Council. Council desires to increase the board membership to 5. The proposed legislation provides for the appointment of 2 additional members. These appointments are to be made by the Mayor and Council, as the current 3 appointments are. Initial terms will be 1 year for one appointment, and 2 years for the other, with subsequent terms to be three years. The current board members will continue to serve their appointed terms, and are not affected by this change. The requested legislation also makes a clarifying change regarding the filling of vacancies on the board, to conform to Council's practice.

2. Establishing two year terms for Civil Service Board members. The terms of the Civil Service Board members has always been two years. However, during the course of extensive amendments to the law in 1999, the provision for two year terms was inadvertently deleted. This proposed amendment puts it back in.

3. Statement of Support for Film Industry Incentives. The resolution contains a general statement of support for legislative action to create or expand financial and other incentives for the film industry. As we become aware of specific legislation on this subject, we will bring it to Council's attention.

Considerations: Because this is a short session for the legislature, bills introduced must be certified as "non-controversial."

The Civil Service Board term limit has been discussed with representatives of affected employees, and should not be a problem. The City Attorney has made no such inquiry with respect to the ABC board membership. There are other issues currently affecting the ABC board and its operations, and those issues may affect whether this bill can be certified non-controversial.

If Council approves of submitted these requests to our local legislative delegation, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 28 – PAGE 196

E. RESOLUTION NO. 04-83 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH TRITON PCS PROPERTY COMPANY, LLC, FOR A CONCEALED WIRELESS COMMUNICATION FACILITY LOCATED AT 50 OREGON AVENUE

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with Triton PCS Property Company, LLC (Triton) for a concealed wireless communication facility at 50 Oregon Avenue.

On April 13, 2004, the City Council directed the City Clerk to advertise for upset bids regarding a proposal from Triton for a concealed wireless communication facility at 50 Oregon Avenue. The advertisement ran in the Asheville Citizen-Times on April 16, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the proposal from Triton was not upset.

Triton proposes to construct a cell phone tower designed as a flagpole which will be lighted and the United States Flag will fly 24 hours per day. Antennas will be concealed within the flagpole. Ground equipment will be housed in a small building of a design and materials to match the fire station building. Triton will own, maintain and insure the tower. The tower will have space for two additional antennas and Triton will sublicense the tower spaces to other carriers. An additional building for each carrier of the same character as the first will be added within the license area at such time as the spaces are sublicensed. The proposal from Triton includes the following fee schedule:

Year	**Amount**
1	**$18,000**
2	**$22,500**
3	**$25,960**
4	**$27,000**
5	**$28,000**

The license fee during each renewal term will be increased by four percent (4%) per year compounded annually. Triton will post a cash security deposit in the amount of $5,000 to be held by the City for the duration of the License Agreement.

In addition to the above, Triton will construct a storage room addition for the exclusive use of the City (Asheville Fire Department) on the East side of the Fire Station; replace the City's existing 20 KW generator with a 40KW generator; and construct 3 additional parking spaces for the City's use.

Triton must obtain a Conditional Use Permit in accordance with the Unified Development Ordinance (UDO). Approval of this resolution will not affect consideration of the Conditional Use Permit.

The positive aspects of the proposed license agreement include:

1. Generates revenue for the City that is long term and increases annually.
2. Provides public benefit through better cell phone coverage for the Patton Avenue area.
3. Tower will be located on City owned property as encouraged by the UDO.
4. Promotes co-location of carriers as encouraged by the UDO.
5. Utilizes stealth technology and integrated design; antennas will be concealed within a flagpole tower to present a more esthetic appearance and the ground buildings will appear to be part of the fire station.
6. Licensee (Triton) will own the tower and be responsible for maintaining and insuring it.
7. Puts unused space to productive use.
8. Fire Department will get desired improvements at Fire Station #3.

The negative aspects of the proposed license agreement are:

1. Encumbers the property for up to 25 years, which could impact the disposition of the property should the City no longer need it for a fire station.
2. Would prevent expansion of the station into the licensed area should the need arise to expand.
3. Flagpole tower will be 100' tall and will extend above tree line.

Approval of the resolution will authorize the City Manager to execute the License Agreement.

Planning & Development staff, Fire Department staff and Information Services staff recommend adoption of the resolution authorizing the City Manager to execute a License Agreement with Triton PCS Property Company, LLC (Triton) for a concealed wireless communication facility at 50 Oregon Avenue.

RESOLUTION NO. 04-96 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE GROVE ARCADE'S HARVEST FESTIVAL

RESOLUTION NO. 04-97 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE HARDLOX CAFÉ JEWISH FOOD FESTIVAL

RESOLUTION NO. 04-98 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE DOWNTOWN ASSOCIATION EVENTS

RESOLUTION NO. 04-99 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE ASSAULT HOME GAMES

RESOLUTION NO. 04-100 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE SPLASH HOME GAMES

RESOLUTION NO. 04-101 - RESOLUTION ALLOWING FOR THE PROVISIONS FOR POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE GRIZZLIES HOME GAMES

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: Sunset Stampede, Mountain Sports Festival, The Asheville Independent Restaurants' Taste of Asheville, Asheville's 4th of July Celebration, Bele Chere 2004, Asheville Goombay Festival, Sisters on Stage, Annual Brewgrass Festival, Asheville Greek Festival, World of Ice Festival, October Harvest Festival, Hardlox Café Jewish Food Festival, Asheville Downtown Association events, The Asheville Assault Home Games, Asheville Splash Home Games, and Asheville Grizzlies Home Games.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- The Sunset Stampede, scheduled for May 1, is a run and event that will raise funds for Big Brothers/Big Sisters.

- The Mountain Sports Festival, scheduled for May 7-9, is an event to draw attention to the vast opportunity for Asheville as a destination for adventure sports.

- The Asheville Independent Restaurants' Taste of Asheville, scheduled May 22, is an event to promote the many independently owned restaurants in the Asheville area.

- Asheville Parks and Recreation produces the 4th of July Celebration and Fireworks spectacular as a community celebration and to attract visitors to the downtown area.

- For many years, the Bele Chere Board in cooperation with the Asheville Parks and Recreation Department has produced Bele Chere to bring both the public and visitors to the downtown area. This year the request is being made for July 23-24, 2004. The Bele Chere Board and Asheville Parks and Recreation has requested permission to allow possession and consumption of beer and wine during this event as they have been allowed in the past.

- The Asheville Goombay Festival is a unique celebration of African heritage and traditions. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held August 27-29. The 2004 Goombay Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

- Sisters on Stage is an event to raise funds for Helpmate, an organization committed to assisting battered women. This year's event is scheduled on September 4.

- For several years, the Annual Brewgrass Festival has served as a unique celebration of the art of brewing beer in the spirit of Oktoberfest with a Smokey Mountain twist. This year's event is scheduled for September 18.

- The Asheville Greek Festival is a unique celebration of Greek heritage and traditions at City/County Plaza. The Festival is co-sponsored by the Asheville Parks and Recreation Department and will be held September 24-26. The 2004 Greek Festival has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

- The World of Ice, scheduled for October 10, is an event showcasing the regions best Ice Carvers and restaurants in downtown Asheville.

- The Grove Arcade's Harvest Festival, scheduled for October 16, is an event to promote downtown as a shopping destination.

- The Hardlox Café Jewish Food Festival, scheduled for October 17, is a celebration of Jewish cuisine and heritage.

- For many years, the Asheville Downtown Association has co-sponsored with the City of Asheville events to bring both the public and visitors to the downtown area. These events include: *Moonlight Over Downtown* and four *Downtown After Five* *activities*. The Asheville Downtown Association has requested permission to allow possession and consumption of beer and wine during these events as they have been allowed in the past.

- The Asheville Assault, Splash, and Grizzlies are all semi-professional sports teams that seek to serve alcohol at their home games throughout the summer.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Councilwoman Jones moved for the adoption of the resolutions. This motion was seconded by Councilman Dunn and carried on a 6-1 vote with Vice-Mayor Bellamy voting "no."

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ADOPTION OF AN ORDINANCE DIRECTING THE DWELLING LOCATED AT 86 CRAYTON ROAD BE DEMOLISHED

Mayor Worley said that this public hearing was scheduled for April 13, 2004, and at the owner's request, was postponed until this date.

On April 27, 2004, a letter was received from Mr. Craig Justus, attorney for the owner, D.P.S. Properties, requesting the public hearing be continued until July 13, 2004 because the property is under contract to be sold with a closing date of June 22, 2004.

Councilman Dunn moved to continue this public hearing until July 13, 2004, without further advertisement. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 59 ARLINGTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE/CONDITIONAL USE, AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO CONVERT A RESIDENTIAL USE TO OFFICE USE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Cast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:22 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of a request to rezone property located at 59 Arlington Street from RS-8 Residential Single-Family High Density District to Office District/Conditional Use and a request to issue a conditional use permit to convert a residential use to office use.

She said that the subject property is located within the City limits on the corner of Arlington Street and Furman Avenue, exactly one block east of Charlotte Street near the I-240 Interchange and Central Business District zoning district (City Exhibit 3 – Location Map). Surrounding land uses are all zoned RS-8 with a non-conforming grandfathered Office use to the west, a non-conforming duplex to the north, a 'Use by Right Subject to Special Requirements' daycare use and single family use to the east, along with some additional single family use to the south. The applicant wishes to rezone the property in order to renovate and convert the existing vacant single family home into limited office use. The conditional use component of this project will be a site Master Plan showing the proposed off-street parking, currently accessed off of Furman Avenue which connects to the off-street parking for the grandfathered office use on the west side of the subject property. It is the applicant's intention to demolish the existing detached garage and improve the off-street parking provided including handicap accessibility and a potential shared parking arrangement with the adjacent office use. In addition, sidewalks, street trees, landscaping and other site improvements are proposed to bring the site into compliance while maintaining the appearance of a single family home. This application is being presented in conjunction with the rezoning requests for 51 and 53 Arlington Street to result in a continuous strip of office use from Charlotte Street to Furman Avenue on the north side of the street.

The blocks that include Arlington, Furman, Reed, Broad, and Chestnut Streets were zoned R-4 prior to the wide scale zoning changes that occurred in 1997. At that time, the R-4 zoning designation allowed limited office use and multi-family. This, combined with the streets close proximity to downtown, residential neighborhoods, and major vehicular corridors, encouraged the renovation of many of the larger homes into higher density or non-residential uses, changing the face of the once predominantly single family neighborhood. More recent development is incorporating some of the characteristics of older, more traditional urban development characterized by interconnected street systems, sidewalks, single family and small scale multi-family residential uses, small commercial and office uses easily accessible to residential areas, and less parking that relies upon the accessibility of different uses to reduce the dependence upon the automobile for making all trips. There are no specific land use goals for this area but Charlotte Street is targeted for future mixed-use development.

The purpose of the RS-8 zoning district is to establish a high density single family district in areas where public infrastructure is sufficient to support such densities. The purpose of the Office zoning district is to provide small scale office uses (or a mixture of office and residential use) adjacent to residential uses and to serve as a transition as residential areas convert to other uses or between residential and commercial areas (City Exhibit 3 – Land Uses & Zoning Map).

At their February 16, 2004, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the conditional use rezoning request and made a positive recommendation with conditions that the project be forwarded to the Planning and Zoning Commission.

At their March 3, 2004, meeting the Asheville Planning & Zoning Commission reviewed the request and on a 4-3 vote, voted not to recommend the approval of the conditional use rezoning citing concerns over traffic, encroachment, and potential loss of residential character. The applicant has chosen to appeal this decision to the City Council.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards have not been met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.
The project must meet the technical standards set forth in the UDO and there appear to be some significant challenges to meeting the off-street requirements resulting in parking encroachments and necessitating on-street parking (City Exhibit 3 – Site Plan). In addition, the limited site area will make meeting the landscape buffers difficult resulting in Alternative Compliance that could result in a reduced benefit to the public (City Exhibit 3 – Site Photos).

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
The proposed parking area must be increased to accommodate the off-street parking requirement and will result in significant land disturbing activity relative to the lot size. Due to site limitations, landscape buffers will have to be reduced through Alternative Compliance.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
The existing single family home's appearance will only be altered in relation to the renovation and improvements, however, the parking improvements will result in the loss of a "backyard" which will be difficult to buffer against due to site limitations. In addition, the increase in activity associated with an office use could be perceived as a nuisance and the value of adjacent properties could be negatively affected.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.
The single family home will not be removed and will continue to be in scale, bulk, coverage, density and character with the neighborhood. However, the parking area is not typical of the neighborhood and will not be in coverage or scale. In addition, The change of use could affect the harmony of the adjacent residential uses.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
The proposed application is difficult to support through official plans adopted by the City when the Asheville City Development Plan 2025 specifically calls for an initiative to strengthen and enhance neighborhood viability through the encouragement of compatible development that preserves architectural diversity and protects neighborhoods from inappropriate non-residential encroachment.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
This proposed development is within close proximity to transportation facilities and other utilities appear adequate. The project area is located near major road facilities, interstate connections and other service centers. The proposed project will not require a change in water or sewer service and preliminary review by other service providers has not revealed any problems for future service to the development.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.
The proposed Master Plan shows off-street parking that does not comply and will require the balance of parking to be made up on-street. This combined the with off-street parking being accessed off the more residential Furman Avenue has the potential for increasing traffic congestion and hazards. In addition, the office use has the potential for increasing traffic in an already heavily trafficked neighborhood.

After a period of stagnation and deterioration that began in the 1960's, older neighborhoods close to urban areas began to experience a rejuvenation as people recognized the value of living in walkable neighborhoods close to services and a mix of activities. On both sides of Charlotte Street are residential areas with a mix of single family and multifamily uses. Office uses complement the retail and service uses located in close proximity to the residential uses but should not be allowed to encroach into the residential areas when the result is the loss of valuable residential properties and loss of community character. 59 Arlington has been historically a single family home and contains no unusual features that would prohibit easy, cost-effective residential renovation.

Approval of this conditional use rezoning request would allow for the further deterioration of the viable single family neighborhood and would perpetuate the problems initiated by the severing of some of Asheville's oldest and most viable neighborhoods by the construction of I-240. Despite some positive aspects to a change of use, in consideration of the above seven standards and the adjacent zoning and land uses in the area surrounding site, the proposed zoning change does not appear to be consistent with the intent and purpose of the UDO and other official plans and policies adopted by the City.

Pros:
1. Allows for the redevelopment of a vacant piece of property.

2. Provides for office use in an area easily accessible to residential and commercial services.
3. Provides for office use that is easily served by alternative transportation that lessens the need for vehicular traffic.
4. Conditional use component preserves the character and integrity of the single family home.
5. Office use can serve as a transition between single family uses and higher intensity commercial use.
6. Improves pedestrian amenities by installation of sidewalk and handicap ramps on Furman Avenue

Cons:

1. Allows for increased encroachment of the Office zoning district and further deterioration of a viable residential neighborhood.
2. Reduced potential for residential use (Office zoning does not preclude residential use but a residential component is not part of this application).
3. Project will require some site work to include additional off-street parking, handicap accessibility, and required landscaping that will significantly alter the appearance of the rear of the property.
4. Project could potentially increase traffic (pedestrian and vehicular) to the neighborhood during the day, and leave an unoccupied zone during the night reducing the viability of the residential community.

City staff, along with the Planning & Zoning Commission, do not recommend approval of the conditional use rezoning request to rezone property from RS-8 to Office/Conditional Use.

Mr. Bob Deutsch, attorney for the applicant, presented City Council with responses to the seven conditional use standards (Applicant Exhibit 1). Using a map (Applicant Exhibit 2), Mr. Deutsch felt that the City staff used an arbitrary zoning line to draw the zoning district lines and this property should have been zoned Office District. He pointed out the existing office uses in the surrounding area including the house next door at 53 Arlington Street and the day care center immediately across the street from this property. He said the block almost has no single-family homes. He said that an agreement has been reached with Ms. Stephanie Citron (owner of 53 Arlington Street) for a joint turn-around easement where their properties meet so the vehicles would not have to back out onto Arlington Street. The City's Traffic Engineer has approved the traffic pattern and felt there is no problem with congested on-street parking and in fact, this will be a traffic-calming measure. He said that surrounding and adjacent property owners support this conditional use rezoning and they do not think it will reduce their property values. He felt this type of mixed use development is exactly what the official City Plans call for (Applicant Exhibit 1). He felt this is a buffer/transition area and urged City Council to support the conditional use zoning request.

Ms. Jaan Ferree, owner of 59 Arlington Street, said that she is asking for a conditional use rezoning in order for her to build her office in the house. She showed Council photographs of the general neighborhood, her front and back yard; the adjoining house (which has an office use in it) at 53 Arlington Street; and other offices located on Arlington Street and on the other side of Furman Avenue (Applicant Exhibit 3). Offices have not hurt the quality of the neighborhood in this area. She felt that paving her backyard will not injure the way the area looks as seen in her photos in Applicant Exhibit 3). She reviewed with Council where the turn-around easement would be with her neighbor (Applicant Exhibit 4). She said that the City's Traffic Engineer, Mr. Anthony Butzek, has no problem with the parking and feels that the parking is adequate (Applicant Exhibit 5). To further address the parking concerns, she presented Council with a report she accumulated from March 24-April 24, 2004, which showed the parking patterns at various times of day on Arlington Street and Furman Avenue (Applicant Exhibit 6). She said the report shows that there is very little parking now so she could get three parking spaces in her backyard and three parking spaces in the front or side. She presented Council with letters from Town & Country Realty of Asheville Inc. (Applicant Exhibit 7) and Appalachian Realty Associates (Applicant Exhibit 8), which stated that they don't think the rezoning would decrease property values. She then presented Council with a letter from Nancy Kern (Applicant Exhibit 9), who owns the property behind the subject property and who is also a realtor, that shows support of her rezoning. She said that Mr. Sylvester, who testified at the Planning & Zoning Commission but could not be at this meeting, who supported her rezoning and didn't feel the property values would be decreased. She felt the area has a wonderful balance of office and residential She said we would like to have a light office on that property and according to the zoning she could put a quadraplex on that site. She wants to keep the way it is but if she has to turn it into apartments, it would have to be torn up. With apartments it would require more parking and have a larger impact on the community. She felt the neighbors are emotional about this request because of erroneous information originally sent out by City staff (Applicant Exhibit 10), which stated she was going to construct 12 additional apartments on the property. The erroneous information has since been corrected (Applicant Exhibit 11) but she feels that many of the neighbors still feel she is constructing the 12 apartments. She also presented City Council with a letter from Drew C. Nichols, a neighbor who had signed the protest petition, asking that his name be withdrawn from the petition after understanding what she was proposing (Applicant Exhibit 12). When she first approached the Planning & Development Department about her rezoning request, they suggested she contact the people adjacent to her and the next office zoning go in together because her rezoning alone could be considered spot zoning. They suggested she make application for a conditional use rezoning/permit and the other property owners make application for only a rezoning, because they do not intend to change the use of their properties. The owner at 53 Arlington Street is grandfathered in as an office use and the owners at 51 Arlington Street will keep their property as a single-family residence. She urged Council to grant her request to use her property for light office.

Upon inquiry of Councilman Dunn, Ms. Ferree said that she is a consultant and most of what she does she goes on site. She presently has an office in her home but to do circumstances, she would now like to move it out of her home and onto this property.

The following individuals spoke in favor of issuing the conditional use zoning for various reasons, some being, but are not limited to: the change of zoning to Office will not harm the value of adjoining property owners; support for an office than apartments; there are numerous apartments in the area and this property would be better suited for a small office; there is no parking problem on Arlington Street; property will be well maintained as an office use; if apartments were built, that would add parking on the street; there are 4 offices at 53 Arlington Street in which the psychologists park in the back and the clients in the front with no problem; easement for turnaround will benefit both properties; and there is a good mix of residential and office in the area:

Ms. Betsy Reiser, owner of Appalachian Realty and 23 and 35 Arlington Street
Mr. Larry Williamson, owner of 51 Arlington Street
Ms. Dale Smith, owner of the Lots of Love Child Care across the street from 59 Arlington Street
Ms. Stephanie Citron, owner of 53 Arlington Street
Mr. Langdon Ammon, owner of apartment building on Furman Avenue
Mr. Dennis Ponder, co-owner of 17 Arlington Street

Mr. Deutsch felt it would be appropriate to zone the remaining properties on the north side of Arlington Street to Office District. As presented earlier (Applicant Exhibit 1), Mr. Deutsch said that the conditional use zoning complies with the Smart Growth Plan, Economic

Development Plan, Smart Growth Initiatives Notes, Smart Growth Land and Transportation Notes, and 2025 Plan. He urged Council to vote in favor of the conditional use zoning.

The following individuals spoke against issuing the conditional use zoning for various reasons, some being, but are not limited to: the neighborhood is not reacting to misinformation; the use does not provide an essential service to the area; encroachment into the neighborhood will injure the value of the neighborhood's character and quality of life; change in use is not in harmony with the rest of the neighborhood; in order to meeting the parking requirements, the backyard will have to be paved which will create an eyesore along Furman Avenue; this property is 112 feet from an Office District; Furman Avenue is a residential street; rezoning is not compatible with the 2025 Plan; possible demolition of structures and construct of large office building; project will increase traffic to neighborhood and will endanger children loading and unloading at the day care center across the street; possibility of more than one office on property; dangerous intersection at Arlington Street and Furman Avenue; parking vehicles make up a congested area; property values in the area will be decreased; remaining residential on other side of Arlington Street might be forced to ask for rezoning to business in the future; precedent might be set if we allow people to pave their backyards and reduce the amount of porous surface; more business encroachment in the area will mean fewer people and possibly an increase in crime because people do not live in the homes; parking congestion currently exists on Furman Avenue and Arlington Street; need to keep remaining housing stock; and the balance of the neighborhood will be disrupted by office zoning:

Mr. Mark Allison, owner of 127 Furman Avenue (Neighborhood Exhibit 1)
Ms. Joan Morris, resident of 70 Arlington Street (Neighborhood Exhibit 2)
Mr. John Holland, resident at 3 Oak Park Road
Mr. Dean Nanney, resident at 79 Furman Avenue (Neighborhood Exhibit 3 – CD disc)
Ms. Janet Hart, resident at the corner of Furman Avenue and Baird Street (Neighborhood Exhibit 4)
Resident at 65 Furman Avenue
Ms. Abby Holland, resident at 3 Oak Park Road

Ms. Ferree said that she doesn't want to change the house and that is why she is asking for a conditional use zoning and permit in order for her to have a light office use. She doesn't want to have to convert the house into apartments, but if she is not rezoned, she will have to build apartments, which will result in more parking and traffic congestion on that corner.

Upon inquiry of Mayor Worley, Ms. Ferree said that she will only have one office in the house.

After hearing no further rebuttal, Mayor Worley closed the public hearing at 6:45 p.m.

Upon inquiry of Councilwoman Bellamy, Ms. Tuch was not able to respond regarding the reasons for the no parking signs but said the parking in the area was typical for residential streets in Asheville.

Upon inquiry of Vice-Mayor Mumpower, Ms. Tuch said that 15 people signed the protest petition and reviewed her analysis of said petition (City Exhibit 4). City Attorney Oast explained the law regarding protest petitions and said that it's not the number of people that sign the petition but the amount of the area of the property they own.

Councilwoman Jones asked if staff had a sense of the breakdown of office space and RS-8 space available in the City. Ms. Tuch said that she did try to make a determination, but all she could surmise was that available office space downtown is self-sustaining.

Mr. Deutsch pointed out that the City's Economic Development Plan notes the lack of office space as a weakness and there is an increased demand for smaller office spaces. In addition, the Plan calls for commercial rehabilitation.

Councilman Dunn felt that small office spaces are important and he did feel that there is a shortage of that in the City.

Councilwoman Bellamy was concerned if Council makes their determination solely on the request for 59 Arlington Street and not the other two rezoning applications, it might be considered spot zoning. City Attorney Oast said that only a court of law can determine whether something is spot zoning or not. However, given the uses that are directly adjacent to the property, he was not sure that rezoning this property to permit an office use by condition would be spot zoning.

Councilman Davis explained his concern about the parking situation, especially if the office use next door is working at maximum capacity with only one maneuvering space in the back.

Upon inquiry of Councilman Dunn about Ms. Ferree turning the house into apartments, Ms. Tuch said that the property is zoned RS-8 Single-Family and does not allow apartments. There are conditional use permits for duplexes, triplexes and quadraplexes, but the size of the lot also prohibits a certain density and the size of that lot will only support one unit.

Mr. Deutsch presented Council with a photo (Applicant Exhibit 13), which showed that the backyard of 59 Arlington Street adjoins parking lots.

Upon inquiry of Councilman Newman, Ms. Tuch explained what the alternative compliance might look like if the permit were approved.

In response to Councilman Newman, Ms. Tuch said that one of the conditions in the permit, if approved, would be that that home could not be altered.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast said that Council can limit the number of offices that exist within the structure.

Vice-Mayor Mumpower moved to deny the conditional use rezoning for property located at 59 Arlington Street from RS-8 Residential Single-Family High Density District to Office District/Conditional Use. This motion was seconded by Councilwoman Bellamy.

Vice-Mayor Mumpower felt the applicant failed to meet condition no. 5 in respect to encroachment into the neighborhood, and condition no. 7 regarding the traffic and parking impact.

Councilman Dunn felt the parking concern is not valid because in Asheville people park everywhere. He felt this was no bigger safety issue than other streets. If the house was converted into a duplex, that would result in more traffic and additional parking. He did not think the office use would decrease property values and did feel the zoning line was arbitrarily drawn.

The motion to deny carried on a 4-3 vote, with Mayor Worley, Vice-Mayor Mumpower, Councilwoman Bellamy and Councilwoman Jones voting "yes" and Councilman Davis, Councilman Dunn and Councilman Newman voting "no."

C. PUBLIC HEARING TO CONSIDER THE REZONING OF 53 ARLINGTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT

At the request of Mr. Bob Deutsch, Vice-Mayor Mumpower moved to continue the public hearings to consider the rezonings of 53 Arlington Street and 51 Arlington Street to June 8, 2004, without further advertisement. This motion was seconded by Councilwoman Jones and carried unanimously.

D. PUBLIC HEARING TO CONSIDER THE REZONING OF 51 ARLINGTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT

At the request of Mr. Bob Deutsch, Vice-Mayor Mumpower moved to continue the public hearings to consider the rezonings of 53 Arlington Street and 51 Arlington Street to June 8, 2004, without further advertisement. This motion was seconded by Councilwoman Jones and carried unanimously.

E. PUBLIC HEARING TO CONSIDER A MODIFICATION OF THE CONDITIONAL USE PERMIT CONDITION REQUIRING A TRAFFIC CALMING/ INTERSECTION IMPROVEMENT MITIGATION FEE OF $500 PER UNIT FOR APPELDOORN CONDOMINIUMS LOCATED AT 200 BROOKLYN ROAD

Mayor Worley said that earlier today a letter was received from Mr. Rod Hubbard requesting the public hearing be continued until May 11, 2004, due to a family emergency.

Vice-Mayor Mumpower moved to continue this public hearing until May 11, 2004, without further advertisement. This motion was seconded by Councilman Dunn and carried unanimously.

F. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 19 DORCHESTER AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL USE, AND THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE CONSTRUCTION OF A PARKING LOT

ORDINANCE NO. 3112 - ORDINANCE REZONING PROPERTY AT 19 DORCHESTER AVENUE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3113 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED 19 DORCHESTER AVENUE FOR THE CONSTRUCTION OF A PARKING LOT

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 7:15 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

Mayor Worley said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of a request to rezone property located at 19 Dorchester Avenue from RM-8 Residential Multi-Family Medium Density District to Community Business II District/Conditional Use and a request to issue a conditional use permit for the construction of a parking lot (City Exhibit 3 – Location Map).

She said that the applicant (Trinity United Methodist Church) has requested a rezoning of .47 acres of RM-8 property to be rezoned to Community Business II/Conditional Use in order to construct a 25-space parking lot to be utilized by Trinity United Methodist Church. The proposed development is located at 19 Dorchester Avenue. The lot also has frontage on Balm Grove Avenue directly across the street from the church.

Trinity United Methodist Church is located on the corner of Haywood Road and Balm Grove Avenue, directly across the street from the subject parcel. The property is split zoned CB-II and RM-8. Places of Worship are permitted in an RM-8 district as a Use By Right Subject to Special Requirements. However, because the proposed parking lot is on a remote parcel other than on the lot where the main facility exists and because commercial parking lots are not permitted uses in an RM-8 zoning district, the applicant has no other option than to pursue a rezoning request to a district that would permit the use. The proposed zoning to CB II-CUZ would permit a stand-alone parking lot provided the plan meets the design and landscape standards set forth in the Unified Development Ordinance (UDO).

The parking lot will be constructed to allow one-way traffic with ingress from Balm Grove Avenue and egress onto Dorchester Avenue. Based on the number of seats in the sanctuary the church is permitted a minimum of 50 parking spaces up to a maximum of 134 parking spaces. The church currently has 82 parking spaces on its primary parcel. If this request is approved the church would be well within the amount of spaces permitted by the ordinance.

A 20-foot landscape buffer will be installed along the north property line where adjacent to residential uses. In addition to several existing large deciduous trees, street trees and buffer shrubs will be provided along the east and west sides of the property (City Exhibit 3 – Site Plan). Along the southern property line where adjacent to an existing commercial parking lot, a five-foot landscape strip will be installed. In addition, parking lot landscaping will be provided throughout the site to provide a mature tree canopy that will assist in reducing heat generated by the paved surface.

The Community Business II zoning designation was intended to establish areas of medium- to high-density business and service uses along minor and major thoroughfare streets that would serve the surrounding residential neighborhoods. Community Business II districts should be designed in a manner that is sensitive to a significant pedestrian population while providing safe and adequate vehicular access. To encourage the use of shared and remote parking and other methods of transportation, a 20% reduction in parking is permitted. In this district, buildings may be constructed up to 45,000 s.f. and may be one or several stories tall. Parking is to be placed at the side or rear of the structure.

At their March 15, 2004, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the conditional use rezoning request and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission subject to the conditions outlined in the TRC Staff Report and the following condition: The design of required buffering and removal of the existing retaining wall is to be determined after redesigning the parking area and consultation with neighboring property owners.

At their April 7, 2004, meeting, the Planning and Zoning Commission reviewed this request and made a favorable recommendation to approve it subject to the conditions outlined in the staff report and with one additional condition that the concrete retaining wall shall be removed and no similar wall shall be erected to replace it.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1) That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project area is relatively flat. Grading of the site will be necessary to comply with stormwater and erosion control requirements. In complying with these standards the unattractive retaining wall structure, which is along portions of the northern property line, will be removed. In addition to the 20-foot landscape buffer requirement, earth berming and/or screening may be utilized to assist in mitigating any negative impacts the parking lot may have on adjoining residential uses. Parking lot landscaping will also be provided to provide a mature tree canopy and assist in reducing heat that radiates from paved surfaces.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The parking lot will be restricted for church use only, with activity occurring only 2-3 days a week. Landscaped berms and/or screening will serve to mitigate the impacts of the proposed development to adjoining residential uses. In addition, the adjoining residential properties to the north of the site will have improved conditions with the removal of an unattractive retaining wall that borders the property line.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

   Places of Worship are permitted in an RM-8 district as a Use by Right Subject to Special Requirements. Had this lot been contiguous with the church it would have been a

174

permitted use. Additionally, the use of the property will not involve the construction of any building or result in significant grading of the site. Landscape buffers and parking lot landscaping will be installed along with the preservation of several existing large trees at the entrance and exit of the site.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The City's 2025 plan does not address Places of Worship or the expansion of such facilities when located in a residential district. The Unified Development Ordinance, however, permits Places of Worship as a Use By Subject to Special Requirements in residential districts provided they meet the required design standards. The City's 2025 plan places emphasis on encouraging the use of other modes of transportation, (i.e. transit bus service, carpooling, vanpooling, etc.), rather than promoting full dependency on the automobile. Shared and remote parking is also encouraged by utilizing existing infrastructure, which reduces the need for non-residential encroachments into neighborhoods and reduces the need for additional impervious surfaces.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

Transit Service is available at multiple locations along Haywood Road. _In addition, the proposed development was reviewed by the City's Technical Review Committee that includes representatives of the Water Resources Department, Fire Department, Engineering Department, Public Works Department, and Public Works Department.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

No increase in traffic is expected on Balm Grove Avenue. Due to egress from the proposed parking lot, a slight increase in traffic may be noticed on Dorchester Avenue. However, with the installation of recent traffic-calming measures on Dorchester Avenue and because the road is serviced by a traffic signal, impacts should be minimal to none. In addition to the required sidewalks on Dorchester Avenue and Balm Grove Avenue, the applicant will be required to improve pedestrian connections by tying into delineated crosswalks leading to the church.

Pros:
1. The development will improve conditions on a vacant lot by providing stormwater management to control run-off on the site.
2. An unattractive retaining wall, adjacent to residential properties, will be removed.
3. The installation of landscaping will improve the appearance of the lot and provide a mature tree canopy to assist in reducing heat generated by the proposed parking lot and abutting commercial lot.
4. Any potential increase in traffic on Dorchester Avenue will be limited to 2-3 days a week since the parking lot will be restricted for church use only.

Cons:
1. The proposed project does not appear to support the goals of smart growth or compatible infill development.
2. The development will result in the loss of valuable multi-family residential property.
3. The development could set a precedent for the encroachment of other non-residential uses into the neighborhood.

4. Underutilized parking lots from neighboring businesses could provide shared and remote parking opportunities reducing the need for additional parking.

Staff feels that a careful balance is necessary in cases where non-residential uses are permitted in neighborhoods to ensure that the integrity of the neighborhood remains, yet allows for the growth of essential non-residential elements that contribute to the neighborhood. Since Places of Worship are permitted as a Use By Right Subject to Special Requirements in the RM-8 district and because the church does not exceed it maximum number of parking spaces permitted we believe that balance can be achieved with the approval of this request. We have found that all seven standards have been met, and that any potential impact by the proposed development will be mitigated by appropriate measures required by the Unified Development Ordinance.

Staff recommends approval with the following conditions: (1) All conditions by the Technical Review Committee be met; (2) Site lighting is to be provided meeting the Use by Right Subject to Special Requirements for Places of Worship standards; additionally, any such lighting shall be equipped with 90-degree cutoff fixtures and be directed away from residential areas; (3) Developer shall meet with neighboring property owners in developing the design of required landscape buffers; (4) The applicant shall pursue shared and/or remote parking with neighboring businesses; and (5) The concrete retaining wall shall be removed and no similar wall shall be erected to replace it.

Mr. Dennis Ponder, representing Trinity United Methodist Church, said that they have met with the community and as a result there have been 3-4 design changes that resulted in a better design. He explained the site plan design and felt the parking lot will be a positive addition to the neighborhood. He urged City Council to support the conditional use rezoning and permit.

Hearing no further rebuttal, Mayor Worley closed the public hearing at 7:29 p.m.

Upon inquiry of Vice-Mayor Mumpower, Mr. Ponder said that the property was acquired by the Church approximately two years ago.

Councilman Dunn moved for the adoption of Ordinance No. 3112 to rezone property located at 19 Dorchester Avenue from RM-8 Residential Multi-Family Medium Density District to Community Business II District/Conditional Use. This motion was seconded by Vice-Mayor Mumpower.

Councilman Newman felt this is a good parking lot design, however, he felt Asheville has very little multi-family land available for development and therefore, he could not support the conditional use zoning.

Councilman Davis also felt this is a good parking lot design and it meets the desires of the Haywood Road Corridor Plan.

The original motion to approve the conditional use zoning carried on a 6-1 vote, Councilman Newman voting "no."

ORDINANCE BOOK NO. 21 - PAGE 134

Councilman Dunn moved for the adoption of Ordinance No. 3113 to issue a conditional use permit for the construction of a parking lot, subject to the following conditions: (1) All conditions by the Technical Review Committee be met; (2) Site lighting is to be provided meeting the Use by Right Subject to Special Requirements for Places of Worship standards; additionally, any such lighting shall be equipped with 90-degree cutoff fixtures and be directed away from residential areas; (3) Developer shall meet with neighboring property owners in developing the design of required landscape buffers; (4) The applicant shall pursue shared and/or remote parking with neighboring businesses; and (5) The concrete retaining wall shall be removed and no similar wall shall be erected to replace it. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 141

G. PUBLIC HEARING TO CONSIDER THE REZONING OF TWO LOTS LOCATED ON HAWKINS LANE FROM COMMUNITY BUSINESS II DISTRICT TO INSTITUTIONAL DISTRICT

ORDINANCE NO. 3114 - ORDINANCE REZONING TWO LOTS LOCATED ON HAWKINS LANE FROM COMMUNITY BUSINESS II DISTRICT TO INSTITUTIONAL DISTRICT

Mayor Worley opened the public hearing at 7:32 p.m.

Urban Planner Carter Pettibone said that this is the consideration of rezoning two lots located on Hawkins Lane from Community Business II District to Institutional District. This public hearing was advertised on April 16 and 23, 2004

The property is located within the City limits on the west side of Hawkins Lane south of Hazel Mill Road. Surrounding land uses and zoning include residential to the north zoned RM8, commercial uses zoned Highway Business (HB) to the east and south and vacant property zoned Community Business II to the west.

The applicant, Temple Baptist Church, wishes to rezone the properties in order to utilize them for uses permitted in the Institutional District. The purpose of the Institutional District is to address the needs of major institutional uses and minimize conflict with adjacent uses.

Currently, the property is used for recreational purposes and includes a number of ball fields. The owner, Temple Baptist Church whose main facility is located approximately 400 feet to south along Hawkins Lane, plans to expand the recreational facilities on the site. The Church believes it is not able to develop the property according to the requirements of the Community Business II District, especially as they relate to the requirements for buildings to be located along the street and parking to be located behind and/or to the side of the building.

Rezoning the properties would allow the Church the opportunity to further develop the property for uses permitted in the Institutional District. It would provide the property a zoning district that is similar in intensity to what it is currently. As such, it would maintain a transition between the high intensity commercial uses to the south and east and the residential properties to the north.

In terms of building location and parking, a rezoning would allow the applicant more flexibility in where to locate them on the site. A rezoning to Institutional District would also eliminate a great number of potentially adverse and high traffic generating uses from locating on the site and accessing Hawkins Lane.

Advantages (Pros)
- More flexibility for building and parking location on site.
- A number of potentially adverse and traffic generating uses eliminated from consideration.
- Transition between neighboring commercial and residential zoning districts to remain.

Disadvantages (Cons)

- An "island" of Community Business II zoning remains where its properties do not have direct access onto a public street.

In consideration of the above and the adjoining zoning and land uses, the proposed zoning change appears to be consistent with the intent and purpose of the UDO.

The Planning and Zoning Commission, at its April 7, 2004, meeting, voted 5-0 to recommend approval. Staff recommends approval of the rezoning request as well.

Mr. Gary Davis, engineer for Temple Baptist Church on this project, briefly reviewed with Council this history of the project and asked for City Council's support in the rezoning change.

Mayor Worley closed the public hearing at 7:38 p.m.

Upon inquiry of Vice-Mayor Mumpower, Mr. Pettibone said that he only received one phone call from a neighbor regarding the buffering requirement, which he explained.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3114. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 147

H. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REVISE CERTAIN DIMENSIONAL REQUIREMENTS IN THE URBAN VILLAGE DISTRICT

ORDINANCE NO. 3115 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO REVISE CERTAIN DIMENSIONAL REQUIREMENTS IN THE URBAN VILLAGE DISTRICT

Mayor Worley opened the public hearing at 7:40 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) for certain revisions of the dimensional requirements in the Urban Village District. This public hearing was advertised on April 16 and 23, 2004.

This code amendment is a general "housekeeping" type amendment intended to revise certain dimensional requirements for the urban village zoning district. With the adoption of the 2025 Plan, it became apparent that several areas identified for urban village locations did not meet the 10-acre minimum acreage requirement. This amendment would reduce the minimum acreage requirement to five acres. Additionally, there are several areas of site design inconsistency between the Neighborhood Corridor District and the Urban Village District; this amendment would resolve those inconsistencies.

The amendment has been routed to the Coalition of Asheville Neighborhoods, CREIA, and Council of Independent Business Owners for review and comment.

Pros –

- The 2025 Plan and the UDO will be in greater compliance.

- The Urban Village District would be able to be applied to a larger number of properties (a potential con), allowing it to be used in a greater variety of circumstances.
- There would be greater design consistency between the Neighborhood Corridor District and the Urban Village District.

Con –

- The Urban Village district would be able to be applied to a larger number of properties (a potential pro).

The Planning and Zoning Commission recommended approval of this code amendment on April 7, 2004, by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 7:41 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3115. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 149

IV. UNFINISHED BUSINESS:

A. RESOLUTION REGARDING ANNEXATION SERVICES PLAN FOR THE LONG SHOALS ANNEXATION AREA

Mayor Worley announced that this item will not be considered at this meeting.

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Board/Commission Vacancies

Vice-Mayor Mumpower announced vacancies on the Civil Service Board and the Downtown Commission. He encouraged interested residents to apply by calling the City Clerk's Office.

For Our Kids

Vice-Mayor Mumpower thanked Ms. Daisha Merritt and Mars Hill College; Chris Young and the staff from Office Environments; and the residents from Lee Walker Heights for their participation in the For Our Kids Program.

Claims

The following claims were received by the City of Asheville during the period of April 2-22, 2004: Leda Neale (Police), Brian Blackwell (Streets), Tommy Hill (Streets), Jane Williams (Water) and David Lee Welch (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English spoke in opposition of public access television. He did not feel that the City is proceeding in the right direction, especially if they consider rail service. He suggested the City rename Amboy Road to Bob Pressley Boulevard, in memory of Mr. Pressley who gave so much to the Asheville community.

Mr. Randy Bray was concerned that City Council would allow the consumption of malt beverages and/or unfortified wine at events, especially since Asheville has so much to offer.

Brother Christopher Schemata spoke about the homeless problems in Asheville.

Mr. Joseph Smith hoped City Council will continue to investigate the problems associated with the Alcoholic Beverage Control Board.

Councilwoman Bellamy praised Mountain Housing Opportunities for receiving the highest score in the State on their Griffin project. This project will bring 50 units in downtown Asheville of which 15 are specifically for people who were homeless.

Councilwoman Jones commended the Asheville Police Department on how they handled the unwelcomed visit by people preaching hate and desecrating the flag. She also commended the communities of faith and how they responded with love and not judgment.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:58 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 11, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Councilman Dunn led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Bellamy gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 8-15, 2004, AS "STRIVE NOT TO DRIVE WEEK"

Mayor Worley read the proclamation proclaiming the week of May 8-15, 2004, as "Strive Not To Drive Week" in the City of Asheville. He presented the proclamation to Ms. Terri Zimmerman March, Buncombe County's Health Promotion Program Coordinator, and Ms. Linda Giltz, with the Land-of-Sky Regional Council, who briefed City Council on some activities taking place during the week.

Ms. Giltz then presented a Golden Wheel Award to Transit Services Director Bruce Black and to former Chairman of the Asheville Transit Commission Ron Lambe who have made a difference over the year regarding transit.

II. CONSENT AGENDA:

Councilman Dunn asked that Consent Agenda H be removed from the Consent Agenda due to his conflict of interest.

Councilwoman Bellamy asked that Consent Agenda I be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 27, 2004

B. RESOLUTION NO. 04-102 - RESOLUTION ACCEPTING SWEET SPIRE RIDGE IN REYNOLDS MOUNTAIN SUBDIVISION AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept Sweet Spire Ridge in Reynolds Mountain Subdivision as a City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Sweet Spire Ridge is a developer constructed street that has an average paved width of 20 feet and a length of 0.16 miles. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Sweet Spire Ridge will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council adopt a resolution to accept Sweet Spire Ridge in Reynolds Mountain Subdivision as a City maintained street.

RESOLUTION BOOK NO. 28 – PAGE 243

C. RESOLUTION NO. 04-103 - RESOLUTION ACCEPTING VANDERBILT PARK DRIVE OFF HENDERSONVILLE ROAD AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept Vanderbilt Park Drive off Hendersonville Road as a City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Vanderbilt Park Drive is a developer constructed street that has an average paved width of 20 feet and a length of 0.25 miles. Engineering Department staff has reviewed the density tests and inspection reports and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Vanderbilt Park Drive will be added to the official Powell Bill list A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway. The first section of the roadway from Hendersonville Road to the entrance to the old Biltmore School is exempt for this warranty because it was constructed prior to this development.

City staff recommends City Council adopt the resolution to accept Vanderbilt Park Drive off Hendersonville Road as a City maintained street.

RESOLUTION BOOK NO. 28 – PAGE 244

D. RESOLUTION NO. 04-104 - RESOLUTION SETTING A PUBLIC HEARING ON JUNE 8, 2004, TO CONSIDER CLOSING A PORTION OF REED STREET

RESOLUTION BOOK NO. 28 – PAGE 245

E. RESOLUTION NO. 04-105 - RESOLUTION AUTHORIZING THE MAYOR TO RENEW THE JOINT COOPERATION AGREEMENT WITH THE ASHEVILLE REGIONAL HOUSING CONSORTIUM

Summary: The consideration of a resolution authorizing the Mayor to renew the Joint Cooperation Agreement with the Asheville Regional Housing Consortium.

The City of Asheville entered into a Joint Cooperation Agreement with twelve governmental units within Region B on March 31, 1992, and formed the Asheville Regional Housing Consortium.

182

The U.S. Dept. of Housing & Urban Development (HUD) regulations require execution of a new Cooperation Agreement for the Asheville Regional Housing Consortium to continue receiving entitlement allocations under the HOME grant program.

On March 9, 2004, the City sent a letter to HUD stating its intent to participate again as a consortium in the HOME program, and also stating it will submit to HUD prior to June 30, 2004, all other required documents for participation, including a new Cooperation Agreement and authorizing resolutions from member governmental units.

The Cooperation Agreement states in Section 14: "The Lead Entity and the Cooperating Units agree to remain in the Consortium at least through September 30, 2007. Thereafter, each party shall continue to participate in the Consortium to the extent required by HUD regulations or other applicable law."

Since formation of the Consortium in 1992, the region has received entitlement allocations totaling $14,787,335. The City of Asheville has received $5,326,515 for its affordable housing programs and administrative costs as Lead Entity since the beginning of the program.

Pro: Allow the City to continue to operate as Lead Entity of the Consortium and to receive an annual entitlement of HOME Program funds from HUD,

Con: Rejection of the resolution will jeopardize the Consortium's standing with HUD and may terminate future entitlement funding through the HOME Program.

Community Development staff recommends adoption of the resolution authorizing the Mayor to renew the Joint Cooperation Agreement with the Asheville Regional Housing Consortium.

RESOLUTION BOOK NO. 28 – PAGE 246

F. RESOLUTION NO. 04-106 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR SIDEWALKS ON LONG SHOALS ROAD

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N.C. Dept. of Transportation (NCDOT) for the installation of concrete sidewalk along NC 146 (Long Shoals Road) from Hendersonville Road to the corporate limits of the City of Asheville, excluding bridges.

NCDOT is currently in the process of widening NC 146 (Long Shoals Road). As part of this project we have requested that sidewalk be installed along the section of roadway adjacent to the construction within the cooperate limits.

The agreement will require NCDOT to pay 60% of the cost and the City of Asheville to pay 40% of the costs. The cost of the sidewalk is estimated at $288,134. The City's portion of that cost will be $115,254. This payment is not due to NCDOT until the project is complete which is estimated to be Fiscal Year 2006.

As part of this agreement the City will be responsible for maintaining the sidewalk which is standard operating procedure for all sidewalks on State maintained roadways.

The benefit of having the sidewalk installed by NCDOT is that we are only required to pay 40% of the cost of the sidewalk as opposed to 100%. Additionally, the cost to construct the sidewalk is cheaper because it is being constructed at the same time as the road is being widened.

The only negative consequence of the project is that the City has to pay $115,254 for the sidewalk installation and cost associated with maintaining the sidewalk.

The consideration of a resolution authorizing the City Manager to sign a municipal agreement with NCDOT for the installation of concrete sidewalk along NC 146 from Hendersonville Road to the corporate limits of the City of Asheville, excluding bridges.

RESOLUTION BOOK NO. 28 – PAGE 247

G. RESOLUTION NO. 04-107 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT AMENDMENT WITH GREEN LIGHT ELECTRIC INC. FOR TRAFFIC SIGNAL MAINTENANCE

Summary: The consideration of a resolution authorizing the City Manager to amend the existing agreement with Green Light Electric, Inc., to continue preventative maintenance of traffic control devices through December 31, 2004, in the amount of $72,000.

In April 2001, the Public Works and Engineering staff undertook the project of reengineering the Division of Traffic Operations, given the fact that two signals technicians resigned and the impending retirement of the traffic signal supervisor. City staff determined that preventative maintenance activities could, and should be, contracted to the private sector.

It was further determined that a minimum staff level of two signal technicians, whose pay scale and classification would more closely emulate the N. C. Dept. of Transportation technicians with similar responsibilities, would be maintained to insure emergency response and guarantee that timely repairs were enacted. Their primary responsibility, beyond emergency response, is to maintain and update signal system data and functions of coordination and timing.

Bids were solicited to determine actual costs for a comprehensive preventative signal maintenance program by the private sector. Green Light Electric, Inc.'s bid was the lowest, with the 2nd lowest bidder approximately 67% higher.

The overall cost savings from the reengineering idea, along with the improved services mentioned above, is approximately $40,000 per year.

Pros:
- Preventative maintenance of traffic signals is necessary to ensure public safety.
- Green Light Electric, Inc.'s fees are very competitive.

Cons:
- There is some cost associated with traffic signal maintenance.

Staff requests that City Council approve a resolution authorizing the City Manager to enter into an agreement with Green Light Electric, Inc. for preventative maintenance of traffic control devices.

RESOLUTION BOOK NO. 28 – PAGE 248

H. RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO CONVEY AN EASEMENT OVER A PORTION OF CITY-OWNED PROPERTY ON KENILWORTH ROAD TO DR. JOSEPH DUNN FOR A PRIVATE RESIDENTIAL SEWER LINE

This item was removed from the Consent Agenda due to a conflict of interest.

I. **RESOLUTIONS MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE PINK BALL FESTIVAL ON JUNE 19, 2004, AND THE PINK RIBBON CELEBRATION ON SEPTEMBER 16, 2004**

This item was removed from the Consent Agenda due to a conflict of interest.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA

RESOLUTION NO. 04-108 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO CONVEY AN EASEMENT OVER A PORTION OF CITY-OWNED PROPERTY ON KENILWORTH ROAD TO DR. JOSEPH DUNN FOR A PRIVATE RESIDENTIAL SEWER LINE

Councilwoman Jones moved to excuse Councilman Dunn from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Newman and carried unanimously.

Summary: The consideration of a resolution authorizing the City to convey an easement over a portion of City-owned property on Kenilworth Road to Dr. Joseph Dunn for a private residential sewer line.

The City owns property (PIN 9648.16-84-1232) located on Kenilworth Road. The property is known as the Harvest House Community Center. A portion of the property near the rear line is wooded and steep and is crossed by a sewer main. The intended use for that portion of the property is for green space.

Dr. Joseph Dunn owns property on Lakewood Drive, which backs up to the City's property on Kenilworth Road. Dr. Dunn is building a house on his property. Due to the topography and the location of the sewer main, the most direct and efficient route to provide sewer to the new house is across a portion of the City's property. The requested easement would be solely for the purpose of installing and maintaining the sewer line and would not restrict the use of the easement area for green space, which is the proposed use of that portion of the property. The portion of land encumbered by the permanent easement comprises approximately 656 square feet

A Comparative Market Analysis was prepared by Derek S. Weekly, Realtor and his opinion letter dated April 28, 2004, indicated a land value for the easement area of $446. The easement value is calculated at 50% of the land value rendering an easement value of $223.

The advantages of conveying the easement are:

1. The easement will enable Dr. Dunn to proceed with construction of a new home on his property which will increase the tax base, generate economic activity, further smart growth objectives of urban densification and provide needed housing.
2. The easement will provide the most practical and efficient access to the public sewer.

The disadvantage is the land within the easement area (656 sq. ft.) cannot be built upon nor planted with large trees; however that is mitigated by the fact that the encumbrance is on a portion of the property that is unsuitable for construction and is covered with natural vegetation.

Approval of the resolution will authorize conveyance of the easement to Dr. Joseph Dunn for the purpose of a private residential sewer line.

Planning & Development staff and Parks & Recreation staff recommend adoption of the resolution authorizing the City to convey an easement over a portion of City-owned property in Kenilworth to Dr. Joseph Dunn.

Councilwoman Jones moved for the adoption of Resolution No. 04-108. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE ~~250~~ 249

RESOLUTION NO. 04-109 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE PINK BALL FESTIVAL ON JUNE 19, 2004

RESOLUTION NO. 04-110 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE PINK RIBBON CELEBRATION FESTIVAL ON SEPTEMBER 16, 2004

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the following events: The Pink Ball benefiting the Asheville Area Arts Council, and the Pink Ribbon Celebration.

The below listed groups have requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at these events.

- The Pink Ball, scheduled for Saturday, June 19, 2004, raises funds to benefit the Asheville Area Arts Council, a community arts organization dedicated to developing cultural resources, city and audience development, fund raising, and grant allocations.

- The Pink Ribbon Celebration, scheduled for September 16, 2004, is an event to raise funds for the American Cancer Society in conjunction with the Grape Escape wine bar.

The Asheville Parks and Recreation Department recommends approval of the resolutions to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned events at specific locations and times noted in the resolutions.

Vice-Mayor Mumpower moved for the adoption of Resolution Nos. 04-109 and 04-110. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilwoman Bellamy voting "no.".

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 673 SAND HILL ROAD FOR THE CONSTRUCTION OF 12 ADDITIONAL APARTMENTS IN AN RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT

This item has been removed from the agenda for consideration.

B. PUBLIC HEARING TO CONSIDER CLOSING AN UNNAMED ALLEY OFF COMMERCE STREET

RESOLUTION NO. 04-111 - RESOLUTION CLOSING AN UNNAMED ALLEY OFF COMMERCE STREET

Mayor Worley opened the public hearing at 5:17 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to close an unnamed alley off Commerce Street. This public hearing was advertised on April 16, 23, 30 and May 7, 2004.

N. C. Gen. Stat. sec. 160A -299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville close an unnamed alley off Commerce Street, the entry of which is located approximately 135 southwest of the intersection of Commerce and Church Streets. From Commerce Street, the alley proceeds southeasterly approximately 100 feet, then southwesterly approximately 150 feet to its intersection with Buncombe Street.

Public Works Department staff has researched and determined that this alley is not a City maintained street and is not the sole means of ingress and egress for any of the abutting properties. There are six lots that abut this unnamed alley. They are identified by PIN Nos. 9649.18-30-7001; 9648.06-39-6929; 9648.06-39-5988; 9648.06-39-5927; 9648.06-39-5867; and 9648.06-39-7227.

City staff recommends that City Council adopt the resolution to close an unopened unnamed alley off Commerce Street.

Mayor Worley closed the public hearing at 5:20 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 04-111. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE ~~255~~ 254

C. PUBLIC HEARING TO CONSIDER A MODIFICATION OF THE CONDITIONAL USE PERMIT CONDITION REQUIRING A TRAFFIC CALMING/ INTERSECTION IMPROVEMENT MITIGATION FEE OF $500 PER UNIT FOR APPELDOORN CONDOMINIUMS LOCATED AT 200 BROOKLYN ROAD

ORDINANCE NO. 3116 - ORDINANCE MODIFYING THE CONDITIONAL USE PERMIT CONDITION REQUIRING A TRAFFIC CALMING/ INTERSECTION IMPROVEMENT MITIGATION FEE OF $500 PER UNIT FOR APPELDOORN CONDOMINIUMS LOCATED AT 200 BROOKLYN ROAD

Mayor Worley said this public hearing was originally scheduled for April 27, 2004, and continued until this date pursuant to the applicant's request.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of an amended conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:21 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning & Development Director Scott Shuford submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Shuford said that this is the consideration of a modification of the conditional use permit condition requiring a traffic calming/intersection improvement mitigation fee of $500 per unit for Appeldoorn Condominiums (formerly Appledorn) located at 200 Brooklyn Road. This public hearing was advertised on April 16 and 23, 2004.

On August 13, 2002, the City Council approved a conditional use permit and rezoning to allow the 168 unit Appeldoorn condominium project to be constructed in the Shiloh neighborhood. Since the project would increase traffic in the neighborhood, staff recommended, and Council approved, a condition that the developer set aside $500/unit for traffic calming and intersection improvements; this totaled $84,000 for the entire project. Subsequently, at the developer's request, staff agreed to collect the $84,000 at the time of occupancy rather than at permit issuance.

The developer has submitted a letter requesting that Council rescind the conditional use permit condition that establishes the $84,000 exaction. He notes the increased cost of construction materials as the rationale for his request.

Staff agrees that there has certainly been a steep "spike" in the cost of many types of construction materials. Staff also notes that the developer is further limited financially by another condition that mandates his pricing to be within the housing affordability guidelines of the City; as noted in the table below, his pricing is generally well below the maximum that low income households could afford at today's interest rates. However, staff must point out that the project does create a traffic impact on the Shiloh neighborhood. If Council is inclined to rescind this condition, staff feels some alternative funding arrangement needs to be identified to implement

188

the necessary traffic mitigation measures. This could be accomplished in a number of ways, including:

- Allowing the developer a higher "cap" for his proposed housing sales, giving him more revenue to pay the fee (this, of course, affects affordability and may not mesh well with either the developer's marketing or with market realities).
- Substituting City Affordable Housing Trust Fund monies for the mitigation exaction. (NOTE: The loss of the Foxwood project has freed up $125,000 in Trust Fund money, some of which can be allocated to this project if Council wishes to deviate from its current policies regarding the use of these funds for this unique case – please note that this would be a grant not a loan.)

This project is an important component of the City's overall affordable housing effort. The City's Consolidated Strategic Housing and Community Development Plan for 2000-2005 identified a need for 160 new affordable units for homeownership each year within the City of Asheville, where "affordable" means within the purchasing power of households with less than 80% of area median income adjusted for family size. Since 2000, production of such units has been less than 50 units a year. Meanwhile median house prices are increasing at 5-7% a year, while median income has increased about 2.5% a year, putting the existing housing stock increasingly out of range for first-time homebuyers. Undeveloped parcels of land suitable for developments of significant scale (10 units or more) are increasingly hard to find within the City limits.

Sales Price Information for Low Income (80% Annual Median Income) Persons Adjusted for Family Size

Unit Size	Appeldoorn Initial Sales Price Range*	Upper Limit of Affordable Sale Price**
One Bedroom	$69,900 – 74,900	$85,745
Two Bedrooms	$89,900 – 109,900	$102,929
Three Bedrooms	$114,900 – 119,900	$118,924

* From price list provided by developer
** Assumes a 7% fixed interest rate and a 30 year mortgage

Cost of housing is one element of our affordable housing effort, but community support for affordable housing is another element. Mitigating the impacts of development is a key method of building community support for affordable housing projects (and for denser development, in general). Staff feels that if the developer is relieved of this requirement, the public should fund the improvements.

Pro:
- Supports a critical large-scale affordable housing project that essentially meets a one year affordable housing production goal by itself.

Cons:
- Creates a situation where mitigation costs are borne by the local taxpayer.
- Would be an exception to Council's stated policy that Trust Fund monies are to be loans, not grants.

Should City Council choose to grant this request, staff recommends the substitution of the following additional conditions, as well as providing the traffic calming/intersection improvement mitigation funding through an allocation from the Housing Trust Fund:

- The units shall have an initial sales price range as stated by the developer:

- One Bedroom –$69,900 – 74,900
- Two Bedroom – $89,900 – 109,900
- Three Bedroom - $114,900 – 119,900

- The developer shall ensure that at least 20% of the units will be sold to income-qualified buyers under 80% AMI (adjusted for family size).

Mr. Rod Hubbard, developer, said that he has been working two years to create an affordable home ownership development. However, due to substantial increases in material costs, he is over $1.5 Million over budget. He does realize that some of the increase his responsibility. He asked that City Council delete the condition on his conditional use permit that requires him to pay for a traffic calming/intersection improvement mitigation fee of $500 per unit. He is not saying that traffic calming issues do not need to be addressed in the community; however, he is asking City Council to take that financial burden away from him and the City to contribute to the development by addressing those issues. If Council decides to relieve him of the $84,000 but the City will not contribute, then he would pay because they are necessary for the community. He then showed City Council the exterior of the building (Applicant Exhibit 1). He said they changed the design of the building dramatically to incorporate a stone entranceway, independent balconies, increased ceiling heights, etc. They have spent more money on the aesthetics and the design of the building. They feel the community will be proud of this development. He has been able to maintain their pricing system and five weeks ago they started their pre-sales. With very limited advertising, they have sold over 50% of Phase I, $3.5 Million worth of real estate and 68% of that is to first homebuyers. In the next five years, he will be generating over $1 Million in property taxes. He then passed out some information (Applicant Exhibit 2) about the development.

The following residents spoke about the need for traffic calming measures in the Shiloh Community that will be created by this project, for several reasons, some being, but are not limited to: streets in the Shiloh community are narrow; developer should be required to pay for the traffic calming measures and not ask to be relieved of that condition because most developers anticipate additional construction costs; $500 per unit is not too much to pay for the safety of our children and the Shiloh neighborhood; the developer should be giving something back to the community; since the developer is a for-profit company, he should pay for the improvements himself; the taxpayers of Asheville are already over-burdened and should not have to pay for the traffic calming improvements; if project generates $1 Million in property taxes, how much will go directly back into the Shiloh community; Shiloh Community Task Force should have been informed of this request prior to being brought before City Council; Shiloh is the only historic African American neighborhood in Asheville and should be revitalized in the best interest of the entire community; traffic calming is needed in the area for the children; and the intersection of Brooklyn Road and West Chapel Road is a dangerous intersection:

Ms. Norma Baynes, representing the Shiloh Community Association
Mr. Fred English
Ms. Michael Tracy, resident in the Shiloh community
Ms. Johnnie Walker, resident on High Meadow Road
Ms. Judy Williamson, resident on Wyatt Avenue
Mr. Clyde Maurice Washington, resident on Brooklyn Road

Upon inquiry of Councilman Davis, Mr. Shuford said that the $84,000 figure is for intersection improvements and traffic calming in the area, which would be caused by the development. The Shiloh area suffers from a number of intersections with limited site distance, etc., and a good bit of that money will be for those improvements. It certainly is not sufficient to fix all the problems in the neighborhood, but we feel if we work with the neighborhood through our normal traffic calming process and with the Shiloh Task Force we can identify the correct places to apply this amount of money. He felt that $84,000 is a reasonable amount of money, given the extent of the work necessary to be done.

Using a map (City Exhibit 4), Mr. Anthony Butzek, the City's Traffic Engineer, said that they have looked preliminarily at which streets the $84,000 would go for traffic calming or intersection improvements. They have identified London Road, West Chapel Road and Brooklyn Road.

When Councilwoman Bellamy asked about the process to identify the improvements, Mr. Butzek said that anytime a traffic calming project is started, we give the community significant input in what kind of project they would like to see. Our job is primarily to offer recommendations and assistance and let the community take that information and determine what they would like to see. The entire process will take approximately 6 months to a year before implementation and he hoped the Shiloh Task Force will be involved in that process. If the Shiloh community feels that other streets should be included for traffic calming, he would explain that the City has criteria (traffic volume and traffic speeds) that they utilize for determining when a street qualifies for traffic calming. The City would suggest that the streets that meet those criteria be included.

Upon inquiry of Councilwoman Bellamy, using a map (City Exhibit 5), Mr. Shuford explained how and why City staff is suggesting the traffic calming/intersection improvement mitigation funding be through an allocation from the Housing Trust Fund.

Councilman Newman asked if there was any flexibility in the use of the $84,000 to address pedestrian traffic issues if the community would prefer that. Mr. Shuford responded that to leave the door open for the neighborhood to decide, if Council amends the conditional use permit, they should put that flexibility into whatever direction is given.

At the request of Councilman Dunn, Mr. Shuford explained how the Housing Trust Fund works and that it's a Fund that builds each year. This year we had approximately $730,000 in the Housing Trust Fund - $600,000 allocated and $130,000 of funds, which have been returned by the development community - for-profit and non-profit. He felt that if this project had made an application to the Housing Trust Fund, it would have scored very high because of the affordability range and the scale of the project.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek explained why he felt the traffic mitigation is more of a quality of life issue and safety in the Shiloh community and not a level of service issue.

When Vice-Mayor Mumpower asked how many neighborhoods in Asheville have similar traffic problems, Mr. Butzek felt that most neighborhoods have at least one street with traffic problems, but that would, of course, depend on how you define the size of neighborhoods. The traffic problems in the Shiloh community have existed a significant period of time. He does expect a noticeable traffic impact in the neighborhood with this project being built out.

Upon inquiry of Vice-Mayor Mumpower, Mr. Butzek said that $50,000 is dedicated for traffic calming on an annual basis.

Hearing no rebuttal, Mayor Worley closed the public hearing at 6:07 p.m.

Vice-Mayor Mumpower moved to modify the conditional use permit condition located at 200 Brooklyn Road to delete the condition requiring a traffic calming/intersection improvement mitigation fee of $500 per unit for Appeldoorn Condominiums and substitute conditions in lieu thereof that (1) as well as providing the traffic calming/intersection improvement mitigation funding through an allocation from the Housing Trust Fund in the amount of $84,000; (2) that the units shall have an initial sales price range as stated by the developer: One Bedroom –$69,900 – 74,900; Two Bedroom – $89,900 – 109,900; and Three Bedroom - $114,900 – 119,900; and (3) the developer shall ensure that at least 20% of the units will be sold to income-qualified buyers under 80% AMI (adjusted for family size). This motion was seconded by Councilwoman Bellamy.

After discussion about allowing flexibility of multi-modal transportation, Vice-Mayor Mumpower moved that the conditional use permit issued for Appeldoorn Condominiums on August 13, 2002, be modified as follows: (1) to remove the condition that the developer be responsible for providing for traffic calming improvements, and that the City provide for those traffic calming improvements up to the amount that the developer had originally been required to provide; (2) that the units shall have an initial sales price range as stated by the developer: One Bedroom –$69,900 – 74,900; Two Bedroom – $89,900 – 109,900; and Three Bedroom - $114,900 – 119,900; and (3) the developer shall ensure that at least 20% of the units will be sold to income-qualified buyers under 80% AMI (adjusted for family size). This amended motion was accepted and seconded by Councilwoman Bellamy.

Councilman Newman addressed his question about the flexibility in the $84,000. He felt if staff and the neighborhood feel like they are sure that the money will be well spent on traffic calming, then he would be happy for it to be for intersection improvements. He feels that the $500 per unit amount might have been an arbitrary number, but we need to keep our commitment to the neighborhood. But, considering the scale of this development in this neighborhood we might need to be doing some additional things so that the neighborhood has the infrastructure in place to support this new development and the new people living in that development have a good quality of life. He would appreciate staff working with the Task Force to hear if there is a compelling need for the City to do more on sidewalks or other kinds of infrastructure to make sure that we can support the new density that is going to be going in there.

Councilwoman Jones clarified some justice issues, which were raised.

The amended motion made by Vice-Mayor Mumpower and seconded by Councilwoman Bellamy carried unanimously.

City Attorney Oast said that he would prepare an ordinance amending the conditional use permit and bring it back to City Council for wording approval at their May 25, 2004, formal meeting on the Consent Agenda.

ORDINANCE BOOK NO. 21 – PAGE 154

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CLARIFY THE INTENT OF HILLSIDE REGULATIONS CONCERNING NON-RESIDENTIAL USES

ORDINANCE NO. 3117 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO CLARIFY THE INTENT OF HILLSIDE REGULATIONS CONCERNING NON-RESIDENTIAL USES

Mayor Worley opened the public hearing at 6:17 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) to clarify the intent of hillside regulations concerning non-residential uses. This public hearing was advertised on April 30 and May 7, 2004.

This code amendment is a general "housekeeping" type amendment intended to clarify the intent of the hillside regulations concerning nonresidential uses. Hillside regulations address density and grading requirements for steep slope areas above a certain elevation. The current wording of the hillside regulations implies that these requirements only apply to residential uses. Since other uses, including commercial, institutional, and office uses, can occur in hillside situations, this change allows the grading requirements to apply to those types of uses.

The amendment has been routed to the Coalition of Asheville Neighborhoods, CREIA, and the Council of Independent Business Owners for review and comment.

Pro – Hillside regulations will be able to be applied to nonresidential situations in a manner consistent with how they are applied to residential situations, allowing the ordinance purposes to be met in a more effective fashion. This appears to be consistent with Council's direction at the recent goal-setting meeting.

Con – Applying hillside regulations to nonresidential situations may make it more difficult for nonresidential uses to be established in hillside situations.

The Planning and Zoning Commission recommended approval of this code amendment on April 7, 2004, by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 6:22 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3117. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 156

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CLARIFY THE REQUIREMENTS FOR FLEXIBLE DEVELOPMENT STANDARDS

ORDINANCE NO. 3118 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO CLARIFY THE REQUIREMENTS FOR FLEXIBLE DEVELOPMENT STANDARDS

Mayor Worley opened the public hearing at 6:23 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending the Unified Development Ordinance to clarify the requirements for flexible development standards. This public hearing was advertised on April 30 and May 7, 2004.

This code amendment is a general "housekeeping" type amendment intended to clarify the requirements for flexible development standards. This code section has been very useful in streamlining the development review process and we are interested in making sure the requirements are as clear as possible, including the addition of corner side setbacks to the standards.

The amendment has been routed to the Coalition of Asheville Neighborhoods, CREIA, and the Council of Independent Business Owners for review and comment.

Pro – The amendment will be easier to use and the staff interpretation allowing corner side setbacks will be added.
Con – None noted.

The Planning and Zoning Commission recommended approval of this code amendment on April 7, 2004, by a vote of 5-0. City staff recommends approval of the proposed code amendment as well.

Mayor Worley closed the public hearing at 6:25 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3118. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 158

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 04-112 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR A PASSENGER RAIL FACILITY

Economic Development Director Mac Williams said that this is the consideration of a resolution authorizing the City Manager to enter into a municipal agreement with the N. C. Dept. of Transportation (NC DOT) for 10% of funding for acquisition of the site for the proposed passenger rail station.

As preparation for eventual passenger rail service to Asheville, the NC DOT Rail Division is in the process of securing the site for the proposed Asheville station in Biltmore Village. Property appraisals and estimates of related costs have been completed and a project budget for this site acquisition phase has been developed. Before the State can go forward with the actual purchase, by requirement, the NC DOT and the City of Asheville must first enter into a municipal agreement outlining the roles, responsibilities, and costs each agency will incur for this phase of the project. The municipal agreement requires the City provide 10% of the project cost.

The project cost for this phase was initially estimated at $1,418,830 but had recently been updated and revised downward to $1,083,830. Thus, the required City match, initially (not to exceed) $141,883, may be revised downward to $108,383. However, in later discussion with DOT officials, they have asked that the original project estimate and 10% match continue to be the working numbers. DOT is still in negotiations and the project cost may be adjusted again up or down. While City funds are not needed immediately, the City commitment for the funding, via the municipal agreement, is requested immediately for the project to move forward. Actual funding would be contingent upon a future appropriation from City Council. An appropriation of $141, 883 is currently included in the proposed Fiscal Year 2004-05 budget.

In addition, it is envisioned that an inter-modal City transit hub could be co-located with the passenger rail station. In order to access federal funding for that portion of the facility, it is necessary to conduct a Transit Study for the Biltmore location. The study is intended to assess the suitability of the proposed location for the transit system. It will quantify transit needs. Additionally, the study will explore facility size, number of bays, etc. and explore how transit would tie in with rail as well as assess the suitability of the location for transit, in light of the needs and plans in the southern part of the city. The estimated cost for the Transit Study was $12,000 of which the City's share was $9,600. The NC DOT Rail and Transit Divisions felt the study was a priority and needed immediate funding. At its 2/24/04 formal meeting, Council approved funding for the transit study.

Mr. Williams reported on Council's visit on April 30, 2004, to Raleigh in which they visited the NC DOT Rail Division Chief and the Assistant Secretary for Transportation for Transit.

The positive impact(s) to the implementation of the recommendation include:

- Purchase of an economic development site for 10% of cost
- Demolition of existing site in preparation for construction at 10% of cost
- Potential to develop rail station at fraction of cost
- Potential to place something else prepped on site if rail does not materialize
- Small area plan for area with high potential for continued and future development
- Information concerning cost and feasibility of locating a transit sub-station at Rail Station

The negative impact(s) to the implementation of the recommendations include:

- Expenditure of city funds needed to create asset
- Possibility that this location is not optimal for transit sub-station

City staff recommends approval of the resolution authorizing the City Manager to enter into the municipal agreement.

Mr. Fred English felt that the City of Asheville does not need rail transportation.

Ms. Judith Calvert Ray, Chair of the WNC Rail Corridor Committee Chair, recognized five individuals representing the towns of Marion, Black Mountain, Old Fort, Morganton and Valdese, which are the stops from the route from Salisbury to Asheville. The Committee has submitted to Council a resolution in support of the City funding to develop a multi-modal transportation center to serve Asheville and western North Carolina. She spoke about the importance of rail service to our area.

The Honorable Everett Clark, Mayor of the Town of Marion and also Vice-Chair of the WNC Local Government Caucus, spoke in support of the passenger rail service to WNC.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 04-112. This motion was seconded by Councilwoman Bellamy.

Councilman Newman explained his reasons for his support for the rail service. He felt it has potential to be a significant regional economic development opportunity for Asheville and WNC. It's not so much about people from Asheville taking the train to Raleigh, but it offers people from all across North Carolina and all across the Country to come to Asheville. This will be a beautiful route through the mountains. He said that all forms of transportation receive public funding and none of the forms of our transportation infrastructure pay for themselves. It seems like even if the rail service never does get restored, which he hoped it will, the development of the transit center in Biltmore Village will be good for the Asheville taxpayers.

Councilman Dunn felt that the density and ridership projections are in error, but he does agree that the plan for the future to gain access to the right-of-way is important. However, his future support for additional funding will not be there for passenger rail service. He felt rail service would not help air quality unless you remove a significant number of people from the highways. For heavy rail service to work, you need a density of 5-7 million people per square mile and we are talking about 2.2 million in 26 counties. He agreed that stations along the route will have an economic benefit, but that will happen anyway, even without the subsidy. He would support the resolution because in the future the right-of-way will be needed, but he felt the State of North Carolina will be making a major mistake just for people to be able to ride a train to Raleigh.

Councilman Dunn said he was not optimist about passenger rail coming to Asheville in the near future, but he does see a need to secure the right-of-way. We may need the land for our multi-modal transit center, depending on the outcome of the study. He, too, will be hesitant to speak in favor of future efforts in this matter.

Vice-Mayor Mumpower said that his concern is that there is a lot of misinformation about heavy rail, one of which is the subsidies for heavy rail across the country. From information received, the impact on I-240 of this recreational rail effort will be minimal. There are significant concerns about how reliable the federal dollars will be and for us to dedicate too far into the process without a little more reliability is a concern. Our density in North Carolina does not match density that is typically required for even reasonable success with a heavy rail system. From different sources of information, he has found that Europe, which is cited as a model of rail excellence, has increasingly gotten away from rail and is considering America the model with privately owned vehicles. We need to proceed with caution. According to DOT, this rail services is about 10 years out and that is a long time. The 90% is still tax money. We don't have a recreational rail service crisis in North Carolina, but we have other crises that "shout louder" than rail service. He does like trains, but he has a hard time in going forward with tremendous enthusiasm. The two pros he sees however, is (1) we need to keep our options open and buy the property and not build anything on it; and (2) supporting our neighbors is also a positive thing.

Councilwoman Jones supported the motion with enthusiasm. She received encouraging data from her visit to Raleigh about the passenger rail service breaking even by covering its operating costs. She was also encouraged to see how well NC DOT was using its small slice of money and still producing. She is convinced that there will be more economic development and it will have a regional impact.

Mayor Worley pointed out that it is Council's decision is whether or not to invest 10% of the cost of acquiring property that will be available for our use for future rail service, if it comes. The decision to bring rail service to Asheville is the State's decision. He would support rail service coming to Asheville because he felt it would be very beneficial to Asheville and its citizens and also to the region.

The motion made by Councilman Newman and seconded by Councilwoman Bellamy carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 257 256

V. NEW BUSINESS:

A. ZONING STUDY OF THE ST. DUNSTAN'S AREA

Planning & Development Director Scott Shuford said that this is the consideration of a request from property owners for a zoning study for a portion of the St. Dunstan's neighborhood located off Biltmore Avenue south of the hospital.

Section 7-7-2 of the Unified Development Ordinance (UDO) provides property owners with a method to petition Council to authorize a zoning study for property not entirely owned by them. The code requires that a certain percentage (51%) of property owners join the request and, in this case, the percentage has been reached. The petition process does not require Council to ask staff to undertake the zoning study; it only requires that Council consider the request.

The area is described on a map labeled Map #1. In the staff's opinion, the request area does not contain all relevant property that should be examined in a zoning study, so if Council directs that we analyze the zoning of this neighborhood, we recommend that the area be expanded to that illustrated on a map labeled Map #2.

The request is prompted by the underlying zoning of the neighborhood, RS-8, that corresponds well with the existing setbacks for most lots and with the lot sizes of the smaller properties in the neighborhood. However, there is concern that existing larger lots could be further subdivided to create additional smaller lots under the existing zoning; this has in fact happened on a couple of occasions. The petitioners would prefer a zoning designation of RS-4, even though that zoning district would create some nonconformities with setbacks and lot sizes. Map #1 indicates the properties whose owners are in support and those opposed to the zoning change.

Pro – The zoning study would enable the issue about the appropriate zoning of this neighborhood to be decided by City Council.
Con – The study will consume limited staff resources that could be devoted to other projects.

City staff recommends that if City Council determines that a zoning study of the St. Dunstan's area is to be conducted, that the area be expanded to that illustrated on Map #2.

Upon inquiry of Vice-Mayor Mumpower, it will not be a major staff effort to study the larger area but it will consume time on the Planning & Zoning Commission's agenda along with time on the City Council's agenda.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford suggested that if Council directs a zoning study be performed that it be with the understanding that if are any properties that will be split zoned in the area that the entire parcel be include the study area.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford said that one of the issues that staff has identified has been the fact that there will be setback problems created going from an RS-8 to and RS-4 district. Our preliminary analysis of the study is that about half of the people who want the study will find that their setbacks will be made non-conforming by what they have asked for. But, by the same token, this may be an opportunity for some education of the neighborhood regarding the consequences of their proposal. There may be a way for staff to come up with a creative idea that might address the needs of those opposed to it in order for them to get appropriate use of their property and at the same time address some of the concerns being raised by the neighborhood.

Vice-Mayor Mumpower asked how consistent would this be with the trends in our 2025 Plan. Mr. Shuford said the Plan includes policies and strategies that address further densification in many cases in corridor areas of the City and in appropriate neighborhoods. But it also contains language that addresses the need to make sure existing neighborhoods remain stable. He felt you can make an argument using the 2025 Plan both for and against of what is being proposed.

Mr. Shuford responded to Vice-Mayor Mumpower by saying that given the Planning & Development Department's workload, their enthusiasm on conducting the study would be margin.

Councilman Davis said that historically, there have been zoning problems in that neighborhood and if we deal with those issues in a piecemeal fashion, it will probably take more time and resources. Mr. Shuford said that he has had several requests for staff to initiate a study and now the neighborhood has gotten sufficient support to at least study a portion of the area. He said it may well be good to address this issue head-on and have Council make a decision, which may be timesaving in the long run.

Upon inquiry of Vice-Mayor Mumpower, Mr. Shuford said that not counting the time spent in public meetings or going to a neighborhood meeting, he felt it would be about 20-40 hours worth of staff time to complete the study. Roughly it would be a weeks worth of work for one person.

Councilwoman Bellamy moved to direct staff to conduct an expanded zoning study of the St. Dunstan's area with the understanding that if staff has left off a part of the property through the designation of the boundaries that staff would expand that to include the entire property. This motion was seconded by Councilman Davis.

Councilman Newman felt there will be some very significant development issues in our City that will take a lot of staff time. When he looks at all the growth and development challenges facing Asheville right now that are on the front burner, it will take a lot of leadership from our Planning Department staff. With no lack of sympathy for the concerns of the neighborhood, he would prefer to have the Planning Department focus their resources on those priorities issues for Council right now.

Councilwoman Bellamy said that the study would take only one week and it will point out what is happening in that community and with community input, what could happen in that community.

Vice-Mayor Mumpower felt we may be getting in the middle of a neighborhood issue in terms of who wants to do what with their neighborhood and he has hesitancies in funding that kind of effort.

Mayor Worley expressed concerns of the study as well, most importantly the creation of substantial nonconformities within the neighborhood.

The motion made by Councilwoman Bellamy and seconded by Councilman Davis failed on a 3-4 vote, with Councilwoman Bellamy, Councilman Davis and Councilwoman Jones voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilman Dunn and Councilman Newman voting "no."

VI. OTHER BUSINESS:

Claims

The following claims were received by the City of Asheville during the period of April 23-May 6, 2004: Sharon Stevens (Water), Chris Johnson (Streets), Gwendolyn Walker (Streets), Michele Souma (Police) and Asheville High School (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English comments on why the City of Asheville should not allow public access television.

At 7:12 p.m., Mayor Worley left the meeting.

Ms. Jan Howard questioned the item on the consent agenda regarding the City's ability to convey an easement to Councilman Dunn over a portion of City-owned property on Kenilworth Road.

Mr. Joseph Smith presented City Council with information about his employment records at the ABC Agency. Basically Mr. Smith felt that since City Council appointed the ABC Board that they would hear his side of the story and help him get his job back.

Mr. Mike Fryar expressed concern about the recent annexation of his property on Smoky Park Highway, about the zoning laws in the extra-territorial jurisdiction area, and about the need for more police officers in the City.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:20 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 18, 2004 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Jan B. Davis

CONSENT AGENDA:

Ten-Year Plan to End Homelessness Appointments

Summary: The consideration of a resolution to create a City-County Task Force to develop a Ten-Year Plan to End Homelessness and appointment of suggested Steering Committee members.

On March 23, City Council approved the formation of a joint City-County Steering Committee to develop a Ten-Year Plan to End Homelessness. The Downtown Social Issues Task Force stated at that time that they would come back to Council with a suggested list of appointees. Staff and Task Force members have worked to develop a list of suggested appointees that will represent the agencies critical to the writing and implementation of the Plan.

The Task Force will be presenting their recommendation and list of appointees to the Buncombe County Commissioners at their June 1, 2004, meeting. It is hoped that the Steering Committee will start meeting early in June.

Advantages:

- Key agencies from the County, the City and the private sector will be represented on the Steering Committee to oversee the preparation of the Ten Year Plan to End Homelessness. Investment of these agencies is critical to the implementation and success of the resulting plan.

Disadvantages:

- None noted

City staff recommends the adoption a resolution to create a City-County Task Force to develop a Ten-Year Plan to End Homelessness and appointment of suggested Steering Committee members.

Councilwoman Jones felt the Steering Committee was a little too heavy on the provider end and would like to narrow the service providers a bit and add some stakeholders with corporate clout. She suggested Council identify someone with visibility from the business world to chair or co-chair the initiative.

Discussion surrounded the size of the Steering Committee and the reasons behind the suggested members, who suggested the members, and the pattern of change in the mental health area.

Ms. Caplan said that the plan will come back to Council in draft form from the Steering Committee.

Vice-Mayor Mumpower personally had apprehensions about the realism of this effort, but would be comfortable with "putting eyes on it" and exploring possibilities, but with the understanding that any plan developed City Council will vote on it in a visible fashion.

It was the consensus of City Council to add three additional people from the corporate section (business representatives). Ms. Caplan invited City Council suggestions for those three positions.

Contract Renewal with Ball-Janik

Summary: The consideration of a resolution authorizing the City Manager to renew the contract with Ball-Janik, LLP, for the provision of federal representation services.

The City of Asheville entered into the initial contract with Ball-Janik in April 2003 for a 12-month period. In doing so, it was suggested at that time to consider the approach of engaging federal representation for at least three years but using annual contracts. The initial contract called for monthly payments of $5,000 "inclusive" of out-of-pocket expenses. The renewal contract is the same except that Ball-Janik is now asking for out-of-pocket expenses to be "exclusive" of the $5,000 monthly fee. Ball-Janik is proposing that out-of-pocket expenses would not exceed $5,000 annually.

The current Fiscal Year 2004-05 City budget proposal includes adequate funding for this proposed contract.

Support statement:
- Representation services enhance positioning of and advocacy for City agenda items by our own elected representatives as well as other Members of Congress and their staffs who also have influence over decisions affecting City agenda items.

Challenge statement:
- Representative Taylor, in particular, as a member of the House Appropriations Committee, is uniquely positioned to respond to City funding requests without the need for City funding of professional representation services.

Staff recommends approval of the resolution authorizing the City Manager to renew the contract with Ball-Janik, LLP, for the provision of federal representation services.

When Councilman Dunn asked if there have been any monies obtained for the City that we can directly attribute to our consultant's involvement, Mr. Williams said that there have been two specific funding earmarks for projects. One for $300,000 for a new transit bus and the other is $2,000,000 for traffic signal upgrades.

Upon inquiry of Councilman Dunn, Mr. Williams said that to date the City has paid Ball-Janik $5,000 for 12 months, for a total of $60,000.

Mr. Williams said that monies obtained for the City that can be indirectly attributed to Ball-Janik's involvement include: (1) they lobbied for inclusion of language in the reauthorization of the federal transportation bill known as TEA-21 which extends flexibility to Asheville and the Asheville Transit System to use federal transit funds for operational assistance. Without this legislative fix, the Asheville Transit System would lose approximately $800,000 in federal funding that it now receives for operational assistance. This effort has been ongoing as Congress continues to debate the reauthorization of TEA-21. (2) they supported two additional earmarks that made their way into Omnibus spending bill – a $1 million earmark to NC DOT for the WNC Passenger Rail Initiative which will be distributed to transit systems throughout the state for buses and bus facilities.

Mr. Williams also promote the City's priorities to the Congressional delegation staff, subcommittee, committee staff and the delegation members on a regular, sustained and on-going basis. Given the time pressures placed on the members of the Congressional delegation, considerable behind-the-scenes work takes place at the staff level and our lobbyists work hard to maintain and build strong relationships with delegation and committee staff. In doing so, they are able to gain access to these staff at critical points in the legislative process and to remind them of the City's funding priorities.

Mayor Worley explained Ball-Janik's support during a trip to Washington. He felt they are instrumental in keeping Asheville's funding priorities in the forefront.

Community Meeting – June 29, 2004 – North Asheville Community Center

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

TRANSPORTATION ENHANCEMENT GRANT APPLICATIONS

Mr. Dan Baechtold, MPO Coordinator, said that this is the consideration of a (1) resolution authorizing the City Manager to apply for grants from the N.C. Dept. of Transportation (NCDOT), through the Transportation Enhancement Program, for New Haw Creek Road Sidewalk Improvements - Phase II, and for the French Broad Greenway Trail along Riverside Drive; and (2) resolution for City sponsorship of grant applications from Pack Square Conservancy and Mountain Housing Opportunities.

Every two years, the NCDOT puts out a call for applications for transportation enhancement funds. These are federal funds for projects in specific categories such as pedestrian and bicycle improvements, streetscape improvements, beautification, and water quality improvements. If a project is awarded through the state selection process, costs are reimbursed at a rate of eighty percent (80%). The local match is twenty percent (20%).

Any public or private agency may apply for these funds, but each application must have a local government agency as the sponsor. In past years, the City of Asheville has received enhancements funds for projects such as the Urban Trail and the Weaver Boulevard Greenway. In 2002, the City received a grant for sidewalk improvements on New Haw Creek Road. Also in 2002, the City sponsored applications from the Pack Square Conservancy and Mountain Housing Opportunities. All three of these projects were partially funded in 2002. Construction will begin on these projects this year.

This year, the City of Asheville has prepared two applications: 1) Phase II of sidewalk improvements on New Haw Creek Road. 2) French Broad Greenway Trail on the Progress Energy site located along Riverside Drive. If awarded, the City of Asheville will provide the local match of twenty percent (20%) for both of these projects. If both projects are funded, the total City of Asheville match required would be $43,000.

In addition to the application from the City of Asheville, both the Pack Square Conservancy and Mountain Housing Opportunities are applying for additional funding. The City of Asheville would be the local government sponsor for these applications. The City is not responsible for the local match for these two projects. The match will be provided by the applying agency. For these applications, the City of Asheville will be responsible for maintenance of any improvements that fall within public right of way, and may provide staff support for project implementation.

202

The NCDOT will review applications and award Enhancements Grants in the Fall of 2004. Listed below are summaries of the four grant applications presented for approval.

1. New Haw Creek Road Sidewalk Improvements – Phase II
   City of Asheville Match: $ 25,000
   Enhancement Funds Requested: $ 229,200
   Total Project Cost: $ 354,200 (Total project cost with other match sources)

   Project Description: The proposed project entails construction of sidewalk, curb, gutter and storm drainage along the south side of New Haw Creek Road from Arco Road west to the end of the NCDOT right-of-way. This project is adjacent to a Phase I project partially funded by a 2002 Enhancement Grant.

2. French Broad Greenway Trail on Progress Energy Site – Riverside Industrial District
   City of Asheville Match: $ 18,000
   Enhancements Funds Requested: $ 72,000
   Total Project Cost $ 90,000

   Project Description: This greenway path project will complete another portion of the French Broad River Greenway that will be the primary north-south bicycle and pedestrian route in the City of Asheville. This 700 linear foot bike path segment will eventually be united with other greenway routes along the French Broad River and throughout the City of Asheville. Progress Energy currently owns the property that will be conveyed to the City of Asheville in 2004. The project site is bounded by Riverside Drive to the East and the French Broad River on the west. The property is comprised of existing Jean Webb Park and an undeveloped parcel that will be developed as a municipal park in the future.

3. Pack Square Streetscape Improvements – Phase II and III
   City of Asheville Match: None
   Match by Pack Square Conservancy: $ 69,949
   Enhancements Funds Requested: $ 279,796
   Total Project Cost: $ 349,745

   Project Description:

   Phase II – Intersection of Biltmore Avenue and Patton Avenue to the west of Pack Square. Improvements include realigning the current on-street parking from diagonal to parallel spaces in an effort to make the intersection safer. Work will be comprised of new crosswalks located at the corners, sidewalks, curbing, and asphalt paving.

   Phase III – Spruce Street, bisecting the center of the new park. This 155-linear foot segment of street will be resurfaced with decorative pavers to indicate it as a special route and encourage slower speeds by vehicular traffic. The pavers will also allow the space to be used as a pedestrian plaza during special events in the park. Other improvements include new curbs, sidewalks, and ADA ramps to work with the new layout and increase safety.

4. Clingman Avenue Streetscape and Greenway – Phase II
   City of Asheville Match: None
   Match by Mountain Housing Opportunities (and other sources): $ 57,780
   Enhancement Funds Requested: $ 231,120
   Total Project Cost: $ 288,900

Project Description: This project proposes a continuation of streetscape improvements along the Clingman Avenue and Haywood Road Corridor. This project includes the design and construction of a single-lane, traffic circle at the intersection of Haywood Road and Roberts Street, which will include sidewalks and pedestrian crossings. A second component of this project includes the design and layout of a greenway on the southern side of the West Asheville RiverLink Bridge over to Haywood Road. The greenway will include barriers separating pedestrians from vehicular traffic movement. Along with the greenway, the pedestrian area will feature benches, a sun shelter and safe crosswalks. The West Asheville RiverLink Bridge, one of three crossings over the French Broad River serving west Asheville has been traditionally the favorable route for pedestrian and bicycle transit commuters to and from downtown. These changes will enhance the existing corridor and reinforce its identity as Asheville's gateway to the riverfront and West Asheville. The proposal will create a safer intersection solution at Haywood Road and Roberts Street and provide over 1,000 feet of on-road greenway into west Asheville.

CONSIDERATIONS:

- If awarded, these grants will bring in federal funds to complete transportation projects in the City of Asheville.
- A local cash match of 20% is required on all of the projects. The City of Asheville would only be responsible for the cash match on two of the projects.
- This is a competitive process across the State of North Carolina. If the money is not awarded to local projects, it will be spent on enhancements in other Counties.
- Staff time will be required to manage and implement the projects.
- City of Asheville will assume maintenance responsibilities for the improvements that are installed. In the case of Pack Square improvements, however, the Conservancy is taking steps to provide for long-term maintenance.

City staff recommends City Council (1) approve a resolution authorizing the City Manager to apply to the State of North Carolina for grant applications for New Haw Creek Road Sidewalk Improvements – Phase II, and for the French Broad Greenway Trail; and (2) approve a resolution designating the City of Asheville as the local government sponsor for grant applications for Pack Square Streetscape Improvements – Phase II and III, and Clingman Avenue Streetscape and Greenway – Phase II.

Upon inquiry of Councilman Newman, Mr. Baechtold explained how the funding for our division is decided, which limits the number and size of projects the City of Asheville can apply for. Parks & Recreation Director Irby Brinson also explained how the City of Asheville decides which projects move forward. He said that the projects have to be built to NC DOT specifications so they could not submit the Reed Creek Greenway as one of the projects, due to the topography around the Creek.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place these items on the next formal City Council agenda.

UPDATE ON THE JOINT PLANNING AREA

City Attorney Bob Oast updated City Council on the progress of City staff discussions with the Buncombe County staff regarding the Joint Planning Area (JPA), and the joint meetings between the City's Planning and Zoning Commission and the Buncombe County Planning Board, also regarding the JPA.

2009

Legal Issues. Back in February, the City Attorney prepared a draft of an interlocal agreement for the implementation of the JPA designation and ordinance adoption. This draft was based on discussions with Council and among the City and County staffs.

The County staff has reviewed the draft agreement and noted a few procedural and other issues that will need to be addressed. These were covered in my March 17, 2004, report to Council. One of the issues was transmitting the JPA ordinances from the planning agencies of the City and County to the governing boards. The draft JPA interlocal agreement provided for recommendations to be forwarded from the City and County planning commissions to the Council and Commissioners within a certain time period, or it would be forwarded automatically. Under State law applicable to counties; however, the County planning board must certify the ordinance to the Commissioners before the Commissioners can act on it. There is no parallel requirement for cities.

Largely for this reason, efforts have been refocused on working with the two planning boards to arrive at some agreement as to the ordinance to be forwarded to the governing bodies. The City and County staffs and planning commissions have continued to meet with this end in mind, but have failed to come to agreement yet on some issues that are important to both the City and the County. It is fair to say that those meetings have been – of necessity – detail-oriented discussions, and that they have taken considerable time, involving review of multiple drafts.

Planning & Development Director Scott Shuford said that the City Planning and Engineering staff continue to meet periodically with County staff and with both the City and County planning boards. The planning boards are meeting jointly at least once a month. They are methodically going through the draft JPA ordinance, making progress in both understanding its provisions and in making adjustments to it for both practicality and to meet certain basic policy goals (such as the JPA ordinance should generally not be more strict than the Unified Development Ordinance (UDO)).

City staff continues to hold firm on a few critical issues in our discussions with both the County staff and planning boards. These issues are listed below. Mr. Shuford will keep Council apprised of anything that appears to be moving us off these key issues.

- Large-scale development needs a heightened level of review to ensure that its infrastructure impacts are mitigated (including traffic impact analysis), that it generally fits the community character of the area where it is proposed to be located, and that its environmental impacts are addressed.

- Policy-related matters, such as Board of Adjustment (BOA) makeup, procedures for amending the zoning map and text, initial size and future expandability of the JPA, etc. must be consistent with earlier policy-level agreements between the Council and Commission.

- Infrastructure standards must be sufficient to ensure appropriate durability and function consistent with anticipated ultimate City responsibility for this infrastructure, with building and life-safety codes, with existing and anticipated future federal mandates, and with City Fire Insurance Service Office (ISO) ratings.

City staff is starting to see the need for a few additions to the JPA to provide greater flexibility for those property owners wanting to do higher quality development. We may shortly be broaching the idea of including opportunities for conservation subdivisions (where overall development is concentrated in a relatively small portion or portions of the property, allowing the remainder of the site to be undisturbed) and a City UDO overlay zone (where a developer could request review under the provisions of the UDO rather than the JPA code).

Assuming that our differences with the County can be worked out, we will come to Council with a revised draft of the JPA interlocal agreement that reflects a new timetable for adoption and implementation, and addresses the other procedural issues that have been identified. At that time, the ordinances should be ready for transmittal to the governing boards. In essence, then, the planning boards are already deep into one of the phases of initial adoption that are outlined in the draft interlocal agreement. Accordingly, at least one of the steps outlined in the draft interlocal agreement for initial adoption of the JPA will have been completed, and it may be possible to remove it from the agreement.

Discussion surrounded a possible deadline of bring the interlocal agreement to the County Commissioners and City Council. City Attorney Oast explained that City Council deals with zoning every week, but it is a different concept for the Commissioners. Mr. Shuford felt that the meetings have been constructive and there has been no foot-dragging.

Vice-Mayor Mumpower wondered, since there are some key issues still pending, if it would be beneficial to bring those key issues to the Council to provide some policy support. He understands that the City is taking the lead role and being creative, positive and proactive, but suggested if a compromise can't be reached within a reasonable period of time (perhaps 30-60 days) that staff report back to Council for additional policy discussion.

Councilman Newman felt that as long as staff feels the meetings are productive, he would not be in favor of giving staff a different direction. However, if there is an impasse, then he felt a discussion on how to proceed would be warranted.

Councilman Dunn wanted to make sure that we don't bog ourselves down with too many regulations, some of which are already covered by various other Codes, e.g. State Building Code.

Mr. Shuford assured Council that if they feel they need additional policy direction they will bring the issues back to Council.

At 4:20 p.m., Mayor Worley announced a short break.

CITY COUNCIL'S STRATEGIC OPERATING PLAN

Mayor Worley said that this is the result of Council's retreat and planning sessions over the past several months culminating into the development of Council's vision and Strategic Plan. He said there was great Council participation in that process.

There was discussion on the various goals, objectives and tasks, which included fine-tuning, additions, corrections, suggestions, etc. which were noted by City staff for revision prior to the next formal meeting.

Vice-Mayor Mumpower said that he would be voting against the Plan. He pointed out that when you look at specific content that is in the Plan, to sign off on it requires that we all support things that we don't necessarily agree with. Council as a whole has decided that we are willing to compromise or bend in certain areas in order to have a collective voice, which takes the City forward. He is not sure that that approach serves us or that we will honor it. He is hard-pressed to understand to what good place this document is going to take us. He recognizes the work that people have put into it, but he sees an effort to pull us together on paper that has not been supported in action and will not be supported from this point forth. He felt this document is about building a bigger government and it dances around services and emphasizes some good things and some not good things. He personally would like to see Council have a strategic plan, but he thinks it should be one that emphases what we really do – core services (things that people can't do for themselves), and not these other activities that may have value but, to him, just expand the cities government. An example is the discussion we have had about drug interdiction and public safety. He feels this document goes around those core services and not having an emphasis on those at all. He did emphasized that this is not personal and he does not feel bad toward any Council member because we disagree. But, he does feel it's a responsibility for all of Council to voice their philosophical position and then let the process move forward by a vote, which the majority then takes it forward.

Councilman Newman questioned what, in the Plan, is inappropriate for the City to deal with or outside the realm of what is Council's job is to do.

Councilman Dunn agreed that the document is not perfect and will always be subject to change. However, he does think the document contains basic thoughts and good ideas. He did stress that there will never been a united voice on every issue.

Mayor Worley echoed Councilman Dunn's thoughts. He also felt it goes chart a good future for Asheville.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

BOARD/COMMISSION VACANCIES

It was the consensus of City Council to direct the City Clerk to prepare the proper paperwork for an appointment to the Civil Service Board.

It was the consensus of City Council to postpone taking action on the Downtown Commission vacancy until June 15, 2004, in order to give the Commission an opportunity to make a recommendation.

It was the consensus of City Council to direct the City Clerk to arrange interviews for two vacancies on the URTV Inc. Board of Directors.

MISCELLANEOUS

After a brief discussion, it was the consensus of City Council to have the City Attorney bring to them the draft management agreement on URTV in order for Council to give input and direction, prior to any negotiations with the URTV Inc. Board of Directors.

CLOSED SESSION

At 5:40 p.m., Councilman Dunn moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Carolina Power & Light Company, City of Asheville, Lamar Outdoor Advertising, and Morris Communications d/b/a Fairway Outdoor Advertising. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate. The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a)(5). This motion was seconded by Councilwoman Jones and carried unanimously.

At 7:18 p.m., Vice-Mayor Mumpower moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:18 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – May 25, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Veteran from the U.S. Marine Corp Danny Roberts led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF CITY OF ASHEVILLE RESERVISTS

On behalf of City Council, Mayor Worley recognized Darrell McCurry and Brian Freelan, employees with the Asheville Police Department who have recently returned from military service in the 211th Military Police Company.

B. PROCLAMATION PROCLAIMING THE WEEK OF JUNE 5-12, 2004, AS "NATIONAL NEIGHBORWORKS WEEK"

Councilman Davis read the proclamation proclaiming June 5-12, 2004, as "National NeighborWorks Week" in the City of Asheville. He presented the proclamation to Mr. William Sewell, Interim Executive Director of Neighborhood Housing Services, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

At the request of Mayor Worley, Councilwoman Bellamy moved to continue Consent Agenda E until the Consent Agenda on June 8, 2004. This motion was seconded by Councilman Davis and carried unanimously.

Councilwoman Bellamy asked that Consent Agenda Item H be removed from the Consent Agenda due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 11, 2004, AND THE WORKSESSION HELD ON MAY 18, 2004

Councilman Davis asked that the May 18, 2004, minutes be amended to delete his presence at the meeting.

B. RESOLUTION NO. 04-113 - RESOLUTION ADOPTING A JOINT RESOLUTION WITH BUNCOMBE COUNTY TO CREATE A CITY-COUNTY TASK FORCE TO DEVELOP A 10-YEAR PLAN TO END HOMELESSNESS AND STEERING COMMITTEE MEMBERS

Summary: The consideration of a resolution to create a City-County Task Force to develop a Ten-Year Plan to End Homelessness and appointment of suggested Steering Committee members.

On March 23, City Council approved the formation of a joint City-County Steering Committee to develop a Ten-Year Plan to End Homelessness. The Downtown Social Issues Task Force stated at that time that they would come back to Council with a suggested list of appointees. Staff and Task Force members have worked to develop a list of suggested appointees that will represent the agencies critical to the writing and implementation of the Plan.

The Task Force will be presenting their recommendation and list of appointees to the Buncombe County Commissioners at their June 1, 2004, meeting. It is hoped that the Steering Committee will start meeting early in June.

Advantages:

- Key agencies from the County, the City and the private sector will be represented on the Steering Committee to oversee the preparation of the Ten Year Plan to End Homelessness. Investment of these agencies is critical to the implementation and success of the resulting plan.

Disadvantages:

- None noted

City staff recommends the adoption a resolution to create a City-County Task Force to develop a Ten-Year Plan to End Homelessness and appointment of suggested Steering Committee members.

RESOLUTION BOOK NO. 28 – PAGE 258

C. MOTION SETTING A PUBLIC HEARING ON JUNE 8, 2004, TO CONSIDER ADOPTION OF THE FISCAL YEAR 2004-05 ANNUAL OPERATING BUDGET

D. RESOLUTION NO. 04-114 – RESOLUTION AMENDING THE 2004 SCHEDULED CITY COUNCIL MEETINGS TO INCLUDE A COMMUNITY MEETING ON JUNE 29, 2004, AT THE NORTH ASHEVILLE COMMUNITY CENTER

RESOLUTION BOOK NO. 28 – PAGE 259

E. APPROVE FORM OF ORDINANCE NO. 3116 – ORDINANCE AMENDING THE CONDITIONAL USE PERMIT OF APPELDOORN CONDOMINIUMS LOCATED AT 200 BROOKLYN ROAD

This matter was continued until the Consent Agenda on June 8, 2004.

F. RESOLUTION NO. 04-115 - RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Summary: The term of Sophie Dixon, as a member of the Civil Service Board, expired on May 21, 2004.

It is the consensus of City Council to reappoint Ms. Dixon, as a member of the Civil Service Board, to serve an additional two-year term. Her term will expire May 21, 2006, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 260

G. RESOLUTION NO. 04-116 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY TO THE N.C. DEPT. OF TRANSPORTATION FOR GRANTS FOR (1) NEW HAW CREEK ROAD SIDEWALK IMPROVEMENTS – PHASE II; AND FRENCH BROAD GREENWAY TRAIL IN THE RIVERSIDE INDUSTRIAL DISTRICT

Mr. Dan Baechtold, MPO Coordinator, said that this is the consideration of a (1) resolution authorizing the City Manager to apply for grants from the N.C. Dept. of Transportation (NCDOT), through the Transportation Enhancement Program, for New Haw Creek Road Sidewalk Improvements - Phase II, and for the French Broad Greenway Trail along Riverside Drive; and (2) resolution for City sponsorship of grant applications from Pack Square Conservancy and Mountain Housing Opportunities.

Every two years, the NCDOT puts out a call for applications for transportation enhancement funds. These are federal funds for projects in specific categories such as pedestrian and bicycle improvements, streetscape improvements, beautification, and water quality improvements. If a project is awarded through the state selection process, costs are reimbursed at a rate of eighty percent (80%). The local match is twenty percent (20%).

Any public or private agency may apply for these funds, but each application must have a local government agency as the sponsor. In past years, the City of Asheville has received enhancements funds for projects such as the Urban Trail and the Weaver Boulevard Greenway. In 2002, the City received a grant for sidewalk improvements on New Haw Creek Road. Also in 2002, the City sponsored applications from the Pack Square Conservancy and Mountain Housing Opportunities. All three of these projects were partially funded in 2002. Construction will begin on these projects this year.

This year, the City of Asheville has prepared two applications: 1) Phase II of sidewalk improvements on New Haw Creek Road. 2) French Broad Greenway Trail on the Progress Energy site located along Riverside Drive. If awarded, the City of Asheville will provide the local match of twenty percent (20%) for both of these projects. If both projects are funded, the total City of Asheville match required would be $43,000.

In addition to the application from the City of Asheville, both the Pack Square Conservancy and Mountain Housing Opportunities are applying for additional funding. The City of Asheville would be the local government sponsor for these applications. The City is not responsible for the local match for these two projects. The match will be provided by the applying agency. For these applications, the City of Asheville will be responsible for maintenance of any improvements that fall within public right of way, and may provide staff support for project implementation.

The NCDOT will review applications and award Enhancements Grants in the Fall of 2004. Listed below are summaries of the four grant applications presented for approval.

1. New Haw Creek Road Sidewalk Improvements – Phase II
   City of Asheville Match: $ 25,000
   Enhancement Funds Requested: $ 229,200
   Total Project Cost: $ 354,200 (Total project cost with other match sources)

   Project Description: The proposed project entails construction of sidewalk, curb, gutter and storm drainage along the south side of New Haw Creek Road from Arco Road west to the end of the NCDOT right-of-way. This project is adjacent to a Phase I project partially funded by a 2002 Enhancement Grant.

2. French Broad Greenway Trail on Progress Energy Site – Riverside Industrial District
City of Asheville Match: $ 18,000
Enhancements Funds Requested: $ 72,000
Total Project Cost $ 90,000

Project Description: This greenway path project will complete another portion of the French Broad River Greenway that will be the primary north-south bicycle and pedestrian route in the City of Asheville. This 700 linear foot bike path segment will eventually be united with other greenway routes along the French Broad River and throughout the City of Asheville. Progress Energy currently owns the property that will be conveyed to the City of Asheville in 2004. The project site is bounded by Riverside Drive to the East and the French Broad River on the west. The property is comprised of existing Jean Webb Park and an undeveloped parcel that will be developed as a municipal park in the future.

3. Pack Square Streetscape Improvements – Phase II and III
City of Asheville Match: None
Match by Pack Square Conservancy: $ 69,949
Enhancements Funds Requested: $ 279,796
Total Project Cost: $ 349,745

Project Description:

Phase II – Intersection of Biltmore Avenue and Patton Avenue to the west of Pack Square. Improvements include realigning the current on-street parking from diagonal to parallel spaces in an effort to make the intersection safer. Work will be comprised of new crosswalks located at the corners, sidewalks, curbing, and asphalt paving.

Phase III – Spruce Street, bisecting the center of the new park. This 155-linear foot segment of street will be resurfaced with decorative pavers to indicate it as a special route and encourage slower speeds by vehicular traffic. The pavers will also allow the space to be used as a pedestrian plaza during special events in the park. Other improvements include new curbs, sidewalks, and ADA ramps to work with the new layout and increase safety.

4. Clingman Avenue Streetscape and Greenway – Phase II
City of Asheville Match: None
Match by Mountain Housing Opportunities (and other sources): $ 57,780
Enhancement Funds Requested: $ 231,120
Total Project Cost: $ 288,900

Project Description: This project proposes a continuation of streetscape improvements along the Clingman Avenue and Haywood Road Corridor. This project includes the design and construction of a single-lane, traffic circle at the intersection of Haywood Road and Roberts Street, which will include sidewalks and pedestrian crossings. A second component of this project includes the design and layout of a greenway on the southern side of the West Asheville RiverLink Bridge over to Haywood Road. The greenway will include barriers separating pedestrians from vehicular traffic movement. Along with the greenway, the pedestrian area will feature benches, a sun shelter and safe crosswalks. The West Asheville RiverLink Bridge, one of three crossings over the French Broad River serving west Asheville has been traditionally the favorable route for pedestrian and bicycle transit commuters to and from downtown. These changes will enhance the existing corridor and reinforce its identity as Asheville's gateway to the riverfront and West Asheville. The proposal will create a safer intersection solution at Haywood Road and Roberts Street and provide over 1,000 feet of on-road greenway into west Asheville.

CONSIDERATIONS:

- If awarded, these grants will bring in federal funds to complete transportation projects in the City of Asheville.
- A local cash match of 20% is required on all of the projects. The City of Asheville would only be responsible for the cash match on two of the projects.
- This is a competitive process across the State of North Carolina. If the money is not awarded to local projects, it will be spent on enhancements in other Counties.
- Staff time will be required to manage and implement the projects.
- City of Asheville will assume maintenance responsibilities for the improvements that are installed. In the case of Pack Square improvements, however, the Conservancy is taking steps to provide for long-term maintenance.

City staff recommends City Council (1) approve a resolution authorizing the City Manager to apply to the State of North Carolina for grant applications for New Haw Creek Road Sidewalk Improvements – Phase II, and for the French Broad Greenway Trail; and (2) approve a resolution designating the City of Asheville as the local government sponsor for grant applications for Pack Square Streetscape Improvements – Phase II and III, and Clingman Avenue Streetscape and Greenway – Phase II.

RESOLUTION BOOK NO. 28 – PAGE 261

H. RESOLUTION DESIGNATING THE CITY OF ASHEVILLE AS THE LOCAL GOVERNMENT SPONSOR FOR GRANT APPLICATIONS FROM PACK SQUARE CONSERVANCY INC. AND MOUNTAIN HOUSING OPPORTUNITIES TO THE N.C. DEPT. OF TRANSPORTATION THROUGH THE TRANSPORTATION ENHANCEMENTS PROGRAM

This item was pulled from the Consent Agenda due to a conflict of interest.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTE

RESOLUTION NO. 04-117 - RESOLUTION DESIGNATING THE CITY OF ASHEVILLE AS THE LOCAL GOVERNMENT SPONSOR FOR GRANT APPLICATIONS FROM PACK SQUARE CONSERVANCY INC. AND MOUNTAIN HOUSING OPPORTUNITIES TO THE N.C. DEPT. OF TRANSPORTATION THROUGH THE TRANSPORTATION ENHANCEMENTS PROGRAM

For summary see Consent Agenda Item G above.

Councilman Dunn moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Councilwoman Jones moved to adopt Resolution No. 04-117. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 262

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED OFF WHITE PINE DRIVE FOR THE CONSTRUCTION OF A 60 UNIT APARTMENT COMPLEX (KENILWORTH FOREST VILLAGE APARTMENTS) IN AN RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley said that a letter has been received from Mr. Robert M. Grasso, on behalf of the developer Virginia May, requesting a continuance of the hearing until July 27, 2004.

Councilman Dunn moved to continue the public hearing until July 27, 2004. This motion was seconded by Councilwoman Bellamy and carried unanimously.

B. PUBLIC HEARING TO CONSIDER CLOSING A PORTION OF AN UNOPENED SECTION OF APPALACHIAN WAY

RESOLUTION NO. 04-118 - RESOLUTION CLOSING A PORTION OF AN UNOPENED SECTION OF APPALACHIAN WAY

Mayor Worley opened the public hearing at 5:18 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to close a portion of an unopened section of Appalachian Way. This public hearing was advertised on April 30, May 7, 14 and 21, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, City of Asheville staff has initiated a request to close a portion of an unopened section of Appalachian Way. The closing of this portion of right-of-way will facilitate the realignment and connection of a greenway to a proposed extension of Oakcrest Place.

Closure of this section of right-of-way will have no impact on the ingress and egress for any of the abutting properties. There are three lots that abut this section of right-of-way. They are identified by PIN Nos. 9628.14-34-2261; 9628.14-34-5074; and 9628.14-34-2396.

City staff recommends that City Council adopt the resolution to close a portion of an unopened section of Appalachian Way.

Mayor Worley closed the public hearing at 5:22 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-118. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 263

C. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY IDENTIFIED AS BILTMORE POINTE LOCATED AT 100 FAIRVIEW ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO CONSTRUCT 136 NEW TOWNHOME UNITS

ORDINANCE NO. 3119 - ORDINANCE REZONING PROPERTY ON 100 FAIRVIEW ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3120 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY IDENTIFIED AS BILTMORE POINTE LOCATED AT 100 FAIRVIEW ROAD TO CONSTRUCT 136 NEW TOWNHOME UNITS

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:24 p.m.

All Council members disclosed that they have visited the site and/or have talked to the developer, prior to having any knowledge that the matter would come before Council as a conditional use permit. City Council said that they would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Heard said that this is the consideration of a request to rezone property located identified as Biltmore Pointe located at 100 Fairview Road from Commercial Industrial District to RM-16 Residential Multi-Family High Density District/Conditional Use, and a request to issue a conditional use permit to construct 136 new townhome units.

The Asheville City Development Plan 2025 (ACDP 2025), through its "Land Use and Transportation" goals and strategies, clearly supports and encourages efforts to provide affordable housing particularly in areas where public transit and alternative modes of transportation are available. In addition, both the ACDP 2025 and the City's Sustainable

Economic Development Strategic Plan describe the connection and need for affordable housing to support economic development.

The applicant, Bruce Goforth, has requested a rezoning of 13.04 acres of Commercial Industrial District property to RM-16 (Residential multi-family, high density) to allow for the new construction of 136 individual affordable townhome units (City Exhibit 3 – Aerial Map). The Conditional Use component of this project will be a site master plan showing the location of the proposed townhome units, amenities, open space, landscape buffers, drives, and new road access. The project site is located within City limits near the northwest corner of Fairview Road and Stoner Road, directly adjacent to the Slosman property from which the 13 acres under consideration is being subdivided. The subject property is surrounded on three sides by industrial or commercial warehousing/storage land uses. The fourth side borders a mix of commercial storage, single family residential, and vacant CI zoned property.

The site is a moderately sloping wooded site with frontage on two city maintained roads. Principal access will be located off of Fairview Road (City Exhibit 3 – Utilities & Grading Plan). A secondary access is required off of Stoner Road per the City of Asheville Ordinance and State Fire Code requirements, to be established before more than 30 units are built and occupied. This access will be gated and used only during emergency situations. In addition, a new loop road built to City of Asheville standards will be constructed to provide access to the individual townhome units. The rezoning component of this project is not being sought for higher density purposes. The CI zoning district currently allows the same density permitted in RM-16 (16 units per acre). Rather, this designation is being sought for its compatibility with the proposed use and reduced front setbacks more typical of residential developments. CI normally requires a 35' front setback meant to separate the more industrial uses from road traffic, while the RM-16 district has only 15' setbacks. Residential developments in CI are typically multi-family apartment developments with outdoor parking lots that do not require additional setbacks from new road frontage. In order to provide a less monolithic residential development of townhomes (with garages) that provide opportunity for ownership, the developer would prefer to rezone to RM-16.

The purpose of the CI zoning district is to provide areas for a wide range of commercial and industrial uses including but not limited to, light manufacturing, wholesale, and warehousing with outdoor storage, office, and residential. This district is to be established in areas where environmental conditions and urban infrastructure are adequate to support these uses.

The purpose of the RM-16 zoning district is primarily to encourage a full range of high density multi-family housing types to be located near employment centers, shopping facilities, roads and other urban infrastructure capable of handling the demand generated by high density residential development.

At their April 19, 2004, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the Conditional Use Rezoning request and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission, stipulating the following project conditions summarized as follows:

1. Sidewalk (or fee in lieu of) and street trees be provided along road frontage for Fairview and Stoner Roads. (Staff is not recommending a fee in lieu of.) If not feasible along the subject property, the Stoner Road sidewalk can be located across the street.
2. Show sewer easements and ensure that no required tree falls within the easement.
3. Revise required landscapes buffers per section 7-11-2(d) of the Unified Development Ordinance (UDO)
4. Obtain encroachment permits from Norfolk Southern (if necessary).

216

5. Show location and species of required street trees.

6. Delineate open space requirements.

7. Show and label building setbacks. Setbacks are to be measured from perimeter parcel lines and rights-of-way for existing and proposed roads. RM-16 requires a 15' front setback where some proposed footprints encroach.

8. Provide a revised site plan showing the following missing information:

   Label and dimension all rights-of-way.

   Label proposed road.

   Show location of required fire hydrants.

   Show location of required street lights.

   Provide information describing the number of bedrooms per unit.

   Provide plant schedule.

9. Provide a second entrance required per the City Ordinance and State Fire Code.

10. Provide accessible sidewalk connection to all common areas.

11. Show pedestrian protection on proposed retaining walls.

12. Turning radii must be less than 20'.

13. Traffic impact analysis is required.

14. A covered bench should be provided at the entrance of the neighborhood by the completion of Phase II.

15. A recorded subdivision will be required before grading or final approval.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.
The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
The project area is moderately sloped and will require clearing and grading. Given the typical Asheville terrain, the amount of grading is not unusual for a project of this type or size. Care will need to be taken to provide open space and roads that do not exceed a certain maximum percent slope. Minor retaining walls (under 8') are shown and may need to be extended to meet other project requirements.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
There is a significant amount of literature that describes how "affordable" housing does not negatively impact adjacent property values. Developments of this size in the City do require a homeowner's association that manages the common open space and typically has minimum site standards that control the deterioration that can contribute to a decrease in property values. These will be individually owned units that, historically, inspire care and upkeep. In addition, the higher density development could serve as a buffer/transition area to the existing single family residences that could be impacted by the more intense uses permitted in the CI zoning district.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.
The surrounding properties are primarily light manufacturing and warehousing/storage uses with significant work traffic. The proposed development will be residential but through its density and activity, will not be out of character/harmony or scale with these uses. Along the majority of the eastern side of the property are small, modest single-family homes on small lots (some lots are vacant) located on the opposite side of the right-of-way for Stoner Road. These homes are similar in size and are expected to be harmonious with the proposed development. The only area of concern is a smaller portion of the eastern boundary where there are two moderately sized single-family homes on comparatively larger lots. These homes are larger and less typical of the development in the area and are separated from the proposed development by a vacant lot and a 30' Type C buffer required where adjacent to the subject property. It is expected that these lots will not be significantly impacted by the proposed development.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
***The Asheville City Development Plan 2025 (ACDP 2025)*, through its "Land Use and Transportation" goals and strategies, clearly supports and encourages efforts to provide affordable housing particularly in areas where public transit and alternative modes of transportation are available. In addition, both the ACDP 2025 and the City's *Sustainable Economic Development Strategic Plan* describe the connection and need for affordable housing to support economic development.**

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
This proposed development is within close proximity to transportation facilities with the Route 12 bus line running regularly down Fairview Road. In addition, there are some infrastructure improvement plans in place for new sidewalk, road resurfacing, and stormwater control that will improve access along this corridor along with improvements that will be part of the proposed development (additional sidewalk, bus shelter, etc.). The project area is also located in clear and close proximity to other major road facilities and interstate connections, service centers, and easily accessed employment centers. Technical review has not revealed any problems for future utility service to the development.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.
The proposed project will include the construction of a new road to provide clear and safe access to the individual units. In addition, a second entrance will be

provided to help facilitate traffic movement and to accommodate alternative access in the event of an emergency. Lastly, preliminary review by the City's traffic engineer does not reveal any significant concern over traffic loads generated by a development of this size but is requiring a traffic impact analysis for verification.

Pros:

1. Clearly supports City goals to provide affordable housing in appropriately located areas.
2. Provides opportunity for infill residential development.
3. Proposed land use will provide a lesser impact than some potential land uses under current zoning designation.

Cons:

1. High density residential development that will contribute to the traffic load of Fairview Road and Stoner Road.
2. Located adjacent to commercial industrial zoning whose current land uses could change to a heavier impact over time.
3. Will require moderate to large amounts of clearing and grading to accommodate proposed density and road layout.
4. Removes opportunity for Commercial Industrial development in a generally Commercial Industrial area.

For the reasons outlined in this report, staff concurs with the Planning & Zoning Commission's recommendation to approve of the zoning change from CI to RM-16/Conditional Use and to approve the associated conditional use permit, as proposed by the applicant, subject to all TRC conditions being met.

Mr. Bob Grasso, land planner for the project, felt this is a great opportunity for affordable housing and it's a great urban infill project. When the project was laid out, they tried to create a sense of neighborhood. They have provided a basketball court, volleyball court and playground equipment to serve the residents in the development. There will be 2-bedrooms with a third bedroom option. Each unit will have a single-car garage and parking in front. They have provided the emergency access on the backside of the development. Questions arose at the TRC meeting if they could provide a second street access onto Stoner Road. He explained that (1) the residents on Stoner Road said that they did not want to see any traffic from the development onto Stoner Road; (2) he didn't think that Norfolk Southern would grant them any kind of right-of-way on top of their right-of-way; and (3) the intersection where Stoner Road comes out onto Fairview Road is a blind intersection. Therefore, he felt it was a good compromise to have the emergency access. He explained that the sidewalks along Stoner Road on the opposite side of the development would be very difficult from a grade standpoint, pointing out that they are trying to preserve as many of the mature trees along Stoner Road and also along Fairview Road as possible. He felt the scale of the project fits in well with the adjoining properties and he urged Council to support the conditional use rezoning and permit.

Mr. Doug Hill, partner of Biltmore Pointe, LLC, spoke in support of the development, however, asked that City Council amend a couple of the conditions, which will affect the cost of the affordability of the units. Regarding sidewalks along the road frontage for Fairview and Stoner Roads, he explained that along Stoner Road it is steeply elevated and there are mature trees and dense foliage. He felt the natural way it is might be a better fit for the neighborhood. He also pointed out that no other side streets in that neighborhood have sidewalks. Regarding sidewalks on the Fairview Road side, there is a concrete drainage ditch that runs the length of their property that will have to be removed and something done to have the water rerouted. The cost of the sidewalks and trees alone would add $1,000 to each unit. He explained that after all the units are sold, there will be approximately $16 Million to the City's tax base. He hoped the City would cover the sidewalk costs with the additional tax revenue brought in by their development. The other condition they asked to be relieved of was the requirement to provide a Traffic Impact Analysis (TIA). The City's Traffic Engineer said he didn't think the development would cause any significant traffic loads but was still requiring a TIA. A TIA will cost approximately $6-7,000. He felt that if there was no impact, the requirement for a TIA should be waived. He said the units will sell for approximately $120-125,000 per unit. He said it is their goal to keep the unit costs under $120,000. He also mentioned the secondary access road issue required by the Fire Department. He explained by putting in the emergency access road they have lost two units. He said that is another cost which will be added to the development fees, ultimately increasing the cost of the units by approximately $500 per unit.

Planning & Development Director Scott Shuford explained that it is a requirement of the State Fire Code that a secondary access road be built. When Councilman Newman asked if there could be two accesses onto Fairview Road, Mr. Heard said that there is a requirement that the accesses be a certain distance apart, thus eliminating the idea of two accesses on Fairview Road.

When Councilman Newman asked how the gate would work on the secondary road access, Mr. Shuford said that Fire Department will be able to access the road through a special arrangement that they have with a type of lock-box that is placed there. This is something that the Fire Department accesses all the time and it is a very routine type of situation for them.

Councilman Newman asked what other type of infrastructure improvements are planned for the area. City Engineer Cathy Ball said that a sidewalk will be built within the next 6 months, regardless of this development, from the church on Fairview Road down toward Sweeten Creek Road across the street from this development. Regarding sidewalks on Fairview and Stoner Roads, they feel like the impact of this project is significant enough to warrant the sidewalks being constructed and not allowing a fee in lieu of, particular with it being an affordable housing project. Regarding the condition that a sidewalk can be being constructed across the street from the development on Stoner Road, the Engineering Department staff surveyed Stoner Road and determined that there isn't enough of an easement for that to happen. Therefore, that is not an option.

Councilman Davis felt that the topography on the Stoner Road side of the project lends itself to not having sidewalks. He did think, however, that sidewalks on the Fairview Road side was appropriate.

City Engineer Ball explained the charges per linear feet for sidewalks in the Fees & Charges Manual. She also pointed out that the Fees & Charges Manual says that if it's an affordable housing project, and if Council decides to allow the fee in lieu of construction for the Stoner Road sidewalks, then after the last unit is sold and they can show that they are all affordable housing were sold under the affordable housing threshold, then the developer can get back 50% of the amount they paid in.

Councilwoman Bellamy asked what affordable housing rebates could be sought for this development. Mr. Shuford said that we have an arrangement with the Water Authority where they would get half their tap fees back, half of their building permit fees and half of their sewer tap fees back from MSD. In a project this size, it would be approximately $1,000-$1,500 per unit. He did note that the affordable housing rebates would be whatever affordable housing threshold is in place when they get their Certificate of Occupancy.

220

Regarding a comment from Mr. Hill about street trees, Mr. Shuford said we have an alternative compliance provision in our landscaping ordinance and if they are preserving the natural vegetation, that may very well substitute for the street trees.

Upon inquiry of Councilwoman Bellamy, Mr. Anthony Butzek, City Traffic Engineer, said that he does have a particular concern about concentrating traffic from this many units through one single entryway, which is the original reason why they requested a second access point. After hearing concerns of the residents on Stoner Road about that access point, we agreed with the Fire Department that an emergency access road would be adequate and requested that be conveyed to the City in either the form of a right-of-way or an access easement. The TIA is intended to determine what, if any, improvements are needed to be made to that primary access point. We did try to be reasonable in only requiring the study be done to show that that access point would work adequately. He said that they anticipate 1,000 trips per day to be generated by this development. He said that a TIA would cost approximately $3-4,000, depending on the consultant they select to do the study.

Mayor Worley asked what would happen if when the TIA analysis comes in and it indicates a need for some traffic measures. Mr. Butzek responded that if Council approves the conditional use permit, staff would ask for an additional condition of approval that gives staff the authority to make any corrections generated by the review of the traffic study for this project. If the developer objected to those, then he would have the ability to come back to Council and ask for a waiver.

Mr. Butzek explained that without having the study, they cannot project what traffic problems might ensue from the development. Since Fairview Road is such a busy street, there will be a significant number of vehicles turning in and out of this development, particularly in the morning peak hours. There will be a lot of cars exiting the development through one single point onto a very busy street. The traffic analysis might show that they need to provide a turn lane exiting the site, maybe a turn lane entering the site or maybe the need for a signal. The cost for a turn lane would be approximately $50,000. The City would like to know that ahead of time so the City is not burdened with that responsibility at a later date.

When Councilman Dunn asked why a TIA was not done prior to this meeting, Mr. Butzek responded that staff would have preferred that the study be done before now, but it was his understanding that the developer wanted to move forward quickly, and to require the TIA before going to Council would have delayed their process significantly.

Councilman Dunn suggested the developer pay for the TIA, and if the analysis calls for a turn lane at approximately $50,000, then Council use Trust Fund dollars to pay for it.

Councilwoman Bellamy agreed with Councilman Dunn, however, she recommended that a condition of approval be that the initial sales price have a cap of whatever the affordable housing rebate threshold will be, in order to make it eligible for Housing Trust Fund dollars. She said that the threshold is now $120,000, but anticipates that being raised to $130,000 in the very near future.

Upon inquiry of Mayor Worley, Mr. Hill said they have done their cost study based on $120,000 for a 2-bedroom unit. The $120,000 per unit already takes into account the affordable housing rebates. It does not include the cost for sidewalks outside the development, which will increase the per unit cost by over $1,000 per unit.

Councilman Newman asked Mr. Hill if he would be confident they could meet the affordable housing threshold. Mr. Hill replied that costs rise over time and this will be a 3-4 year project. He didn't want to get about 2 years down the road and find it's not feasible to build any more units because they are locked into a threshold. However, he said the $130,000 threshold is fine now and in the foreseeable future.

Ms. Smith, resident of Stoner Road, said that her community club has come to Council in the past to ask for sidewalks on their road. She stressed that they do want sidewalks. She said that most of the trees on the developer's side of Stoner Road are dead and always seem to be falling onto the road. The traffic on Stoner Road is getting to where the residents are thinking about asking the City for speed humps.

Mr. Alan Ditmore felt the traffic assumptions were incorrect in that the unit density reduces traffic by allowing people to walk or bus, instead of driving. He felt the more you build, the less traffic there will be.

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:24 p.m.

Councilwoman Bellamy said that in the past, City Council has approved development that had issues related to Norfolk Southern and they did give the developer permission to use access for their right-of-way. Mr. Butzek also noted that this is not a rail crossing, but just putting a street near a rail line.

Upon inquiry of Councilman Davis, Ms. Ball said staff cost estimates differ from the developer's estimates. They did some sidewalk costs for Stoner and Fairview Roads and their estimate of the maximum cost was $60,000, which is about $300 per unit for the sidewalks. The TIA requested is only a limited one just for the driveway (City Exhibit 4), which would be about $4,000 or $24 per unit. The estimated fee in lieu of for Stoner Road would be approximately $24,000.

Upon inquiry of Councilwoman Jones, Mr. Shuford recalled some of the items being discussed regarding building permit fees for affordable housing.

Vice-Mayor Mumpower felt the developer would not want Council to do anything that would step outside our standards. Therefore, he asked if City Council has the ability to waive the sidewalk requirement on Stoner Road in terms of the building a sidewalk or the fee in lieu of. Ms. Ball said that for Level 3 projects staff makes a recommendation to Council. Council has the option of accepting or rejecting staff's recommendation. City Attorney Oast also responded in that some cases Council has authorized forms of alternative compliance with sidewalks, i.e., through the use of sidewalks that may not necessarily be on a road, but are more in the nature of greenways.

When Vice-Mayor Mumpower asked if Council has the ability to waive the TIA requirement, Ms. Ball replied that Council also has the option of not requiring that analysis.

Mayor Worley explained why he would support waiving the sidewalk requirement on Stoner Road. He felt the entrance and the pedestrian activity generated by this development will clearly be on Fairview Road and there will be sidewalks inside the development. He would be willing to waive the sidewalk requirement on Stoner Road only. Councilman Dunn agreed with Mayor Worley.

Councilman Newman supported waiving the sidewalk requirement on Stoner Road. He suggested maintaining the sidewalk requirement (or a fee in lieu of) on Fairview Road and require the TIA with the understanding that if the TIA does indicate there are some additional improvements that need to be made on Fairview Road that the public handle those costs. Also, if certain requirements are waived, he felt Council needs to make sure that the homes will be affordable. He recommended an affordable housing threshold of $130,000 per unit.

City Attorney Oast said that until Council knows what the cost of the improvements are on Fairview Road, if any are recommended by the TIA, Council should stay away from a commitment to pay for them. He suggested City Council consider funding such improvements as recommended at the time they have such recommendations.

Councilwoman Jones supported the recommendations by Councilman Newman. However, she think that Council needs to have a more intentional conversation about the Housing Trust Fund than just saying that is for affordable housing. To date Council has been very clear, up until the last exception on Appeldoorn Condominiums, that the Fund would be for money being paid back at a certain percentage rate. She is fine with going outside those bounds, but would like to have that conversation.

Mr. Shuford said that we are not pursuing sidewalks in the Joint Planning Area, but when new streets are created we are asking that grading occur to allow sidewalks to be put in more effectively. He offered that as a compromise if no sidewalks will be required on Stoner Road and/or Fairview Road.

Vice-Mayor Mumpower thanked the developer for bringing affordable homes to Asheville, but he was concerned that Council may be taking steps that we don't normally take. He thinks we are stepping further than we should and ultimately are not going to realize that great of savings to this project. He felt that we have standards for a reason and even though he does not agree with all of them, we do have them and should try to apply them as consistently as we can.

Councilman Davis supported the TIA being performed and liked the suggestion about grading for sidewalks on Fairview Road or a fee in lieu of. However, regarding sidewalks on Stoner Road, he felt we would be losing valuable trees for sidewalks that will never be used.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3119 to approve the conditional use rezoning for property located at 100 Fairview Road from Commercial Industrial District to RM-16 Residential Multi-Family High Density District/Conditional Use. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 163

Councilman Newman moved to adopt Ordinance No. 3120 to issue a conditional use permit for property located at 100 Fairview Road to construct 136 new townhome units, subject to (1) waving the sidewalk requirements on Stoner Road; (2) maintain the sidewalk requirement (or a fee in lieu of) on Fairview Road; (3) require a Traffic Impact Analysis, with the understanding that City Council will consider funding such improvements at the time they have such recommendations; (4) the initial sales price of the units may not exceed the affordable housing threshold established by the City; and (5) all other TRC conditions being met as outlined above. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no".

ORDINANCE BOOK NO. 21 – PAGE 165

At 7:00 p.m., Mayor Worley announced a short break.

D. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 50 OREGON AVENUE FOR A PROPOSED TELECOMMUNICATION FACILITY/FLAGPOLE

ORDINANCE NO. 3121 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 50 OREGON AVENUE FOR A PROPOSED TELECOMMUNICATION FACILITY/FLAGPOLE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site-specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 7:28 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); City Exhibit 3 (Staff Report); and City Exhibit 4 (other information required by the ordinance).

Mr. Heard said that this is the consideration of the issuance of a conditional use permit for property located at 50 Oregon Avenue for a proposed telecommunication facility/flagpole.

The Asheville City Development Plan 2025 thoroughly describes the need to accommodate and encourage new technology as a critical factor in sustainable economic development both through the further stimulation of investment and technology and through the improved quality of life desired by residents and tourists. In addition, the proposed installation supports the notable Smart Growth Goal of 'adaptive reuse/infill' through the seamless co-operation with an existing site.

The applicant (Triton, PCS) is requesting a Conditional Use Permit for a 0.86 acre parcel to allow for the installation of a concealed monopole telecommunication tower on Institutional zoned property (City Exhibit 3 – Aerial Map). The City owned property being considered for this installation is located at 50 Oregon Avenue (corner of Oregon and Louisiana Avenues) and currently houses City Fire Station #3. The telecommunication tower will be located within a lease area of approximately 810 s.f. and will be housed within a 100' tall concealed monopole capable of accommodating up to 3 separate users (City Exhibit 3 – Tower Elevation). In addition to the monopole, a small (214 s.f.) building addition will be built to house the necessary ground equipment. This addition will be designed to blend into the existing fire station's architecture through material and form (City Exhibit 3 – Landscaping Plan and Details). Two separate areas will also be dedicated to accommodate future user's ground equipment; one of which will be concealed within a second building addition, the other is to be screened by a free standing brick wall and proposed vegetation. In addition to the site plan changes designed to accommodate the tower and equipment, other minor site improvements are planned as part of this development project. Specifically, a sidewalk, 4 additional parking spaces, a utility easement, storage space for firehouse use, a new generator, and a newly paved maneuvering area for vehicles and maintenance crews.

The original application called for the installation of a 100' tall stealth flagpole that would fly an American flag and be up lighted for visual effect (City Exhibit 3 – Site Plan). The recent discussion at the Technical Review Committee (TRC) meeting resulted in the recommended condition that in lieu of the flagpole design, a concealed monopole design be considered by City Council due to the maintenance concerns over the long term care and attention being afforded to the flag, as well as the presence of existing flags on the site, a bank on the adjacent property, and across Louisiana Avenue on the Army Reserve site (City Exhibit 3 – Tower Elevation).

The subject property is a corner lot located within the City Limits just one block south of Patton Ave. Although the lot is located on the corner, the lease area for the monopole is located to the rear of the site, behind the fire station adjacent to the ABC store. At ground level, the pole is well buffered from adjacent properties by existing vegetation.

Separate from this development review is a parallel review for a lease/contract agreement between the City and Triton PCS.

As part of the special requirements applied to Conditional Uses in the Institutional zoning districts per Sec. 7-16-2(c)(3), the project must meet a number of conditions for 'telecommunication towers' including those technical conditions addressed in the TRC report. In addition to the technical conditions, the following, non-technical standards must also be met:

f. Applicants shall first be encouraged to consider properties owned by the City or Buncombe County before considering private properties.
The site located at 50 Oregon Avenue is City of Asheville owned property.

l. No telecommunication facility shall interfere with usual and customary radio and television reception.
Triton PCS has stated in their application and notification letters that no interference is expected.

t.7. Generators may not be used as a primary electrical power source.
Generators will not be used as a primary electrical power source.

t.13. The City Council may require any other conditions deemed necessary or desirable to ameliorate the impact of the tower on the adjacent properties and uses.
Additional conditions to be proposed as deemed necessary by Council.

u. An annual wireless telecommunication facility permit shall be required for each wireless telecommunication facility located in the city.
In order to annually renew this permit the applicant must certify the information described in Sec. 7-16-2(c)(3)(u)1-6.

v. Conditional use permits for telecommunication towers shall be valid for an initial period of five years.
In order to review the permit for an additional five year period, the applicant must submit a renewal request within 60 days prior to the expiration of the initial permit period. A review shall be conducted to determine whether and under what conditions the conditional use may be extended for successive five year periods. Additional details of this renewal process are described in Sec. 7-16-2(c)(3)(v).

w. A conditional use approval for a telecommunication tower shall become null and void if the facility is not constructed and placed in service with one year of the date of approval.
Approval will become null and void after a period of one year; however, the conditional use approval may be extended for a period of 6 months if substantial

construction has commenced before the end of the initial year. If construction has not begun before the end of the initial year, re-application for a new conditional use permit would be required.

At their May 3, 2004, informal meeting, the TRC reviewed the Conditional Use Permit request and made a positive recommendation that the project be forwarded to City Council stipulating the conditions outlined in the TRC staff report with the additional recommendation that City Council consider the concealed monopole design in place of the stealth flagpole design.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1) That the proposed use or development of the land will not materially endanger the public health or safety.
The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
The proposed tower and accessory building additions, as a technical condition, must be designed to blend with the surrounding environment and is expected to have a nominal impact on the site area. In addition, the installation is extremely limited in its footprint and will require an extremely small amount of site disturbance with little to no grading or ground disturbing activity.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
The proposed telecommunication tower is designed to blend with the surrounding environment, is well screened at ground level, and is most visible from the adjacent commercial corridor where the impact of a concealed tower will be nominal. In addition, no reception interference is expected which could potentially affect other quality of life issues for adjacent or nearby residents.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.
As mentioned earlier, the lease/installation area for the tower is extremely small (810 s.f.) and, by definition, is designed to be in harmony with the scale, bulk, coverage, density and character of the area or neighborhood. The height of the pole is somewhat atypical but is located in proximity with other poles and objects of significant height including; flagpoles, power poles, light poles, signage, church steeples, and transmission lines. In addition, part of the justification for the concealed monopole, in place of the flagpole, was to minimize attention being drawn to the pole by the flying of a flag and possible uplighting.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
The Asheville City Development Plan 2025 **thoroughly describes the need to accommodate and encourage new technology as a critical factor in sustainable economic development both through the further stimulation of investment and technology and through the improved quality of life desired by residents and tourists. In addition, the proposed installation supports the notable Smart Growth Goal of 'adaptive reuse/infill' through the seamless co-operation with an existing site.**

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
The proposed development is located near transportation facilities and other utilities appear adequate. The initial technical review by other technical agencies and utility providers has not revealed any problems for serving the use.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.
The proposed installation is not expected to cause any increase in traffic to the site other than the occasional maintenance visit.

Pros:
1. Generates revenue for the City that is long term and increases annually.
2. Provides public benefit through better cell phone coverage.
3. Tower designed for co-location and use of three antennae, which eliminates the need for additional towers in the future.
4. Using stealth technology, the tower will not be obtrusive.
5. Installation can operate simultaneously and independently of other existing land use and does not occupy developable space.
6. As part of the license agreement, Fire station #3 will receive other site improvements.

Cons:
1. Encumbers the property for 5 years with the ability to renew for subsequent 5 year periods, potentially impacting the redevelopment of the property.
2. Monopole will be 100' tall and visible above tree line and from a significant distance.

Staff concurs with the Technical Review Committee recommendation of approval with the conditions outlined in the TRC report with the additional condition that a 'concealed monopole' design be used in lieu of the originally proposed 'stealth flagpole'.

Mr. Heard updated City Council on a letter dated April 20, 2004 (Attachment in City Exhibit 4). He said they (1) changed their proposal to a concealed monopole design; (2) received their letter of determination from the FAA in that the pole could present no hazard; (3) received their environmental determinations from the EPA; (4) received the Emissions Safety Report stating that the site will be in full compliance with FCC standards; and (5) a balloon test was not conducted pursuant to the TRC.

A resident on Louisiana Avenue asked if there are any possible or known health risks associated with the tower, will the licensor remedy any interference if it should arise, and where are the other towers located at in the west Asheville area.

Mr. Chad Groseclose, Property Management Specialist with Triton Systems, responded to the questions raised by a resident on Louisiana Avenue. Throughout his presentation, Mr. Groseclose used the following to support his responses to each conditional use standard:

Applicant Exhibit 1 (photo of tower); Applicant Exhibit 2 (analysis of the impact of communication towers on sale prices in residential neighborhoods by Charleston Appraisal Service Inc.); Applicant Exhibit 3 (map showing other towers in the west Asheville area); and Applicant Exhibit 4 (letter dated May 19, 2004, regarding the stability of a proposed flagpole/communications tower from Paul J. Ford and Company Structural Engineers).

Upon inquiry of Councilman Newman of the terms of the lease, Field Services Coordinator Ed Vess said that the developer will initially be doing improvements to the fire station that should cost them around $60-70,000, including the new generator, the new storage area, sidewalks, paved parking, etc. Then there will be a lease fee that they will begin paying. First year - $18,000; second year - $22,500; third year $25,960; the fourth year $27,000; and the fifth year $28,000. After that, the rate will increase 4% per year from then on.

After rebuttal, Mayor Worley closed the public hearing at 8:05 p.m.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3121, granting a conditional use permit for property located at 50 Oregon Avenue for a proposed telecommunication facility/flagpole, subject to the Technical Review Committee conditions being met and that a "concealed monopole" design be used in lieu of the originally proposed "stealth flagpole." This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 172

E. PUBLIC HEARING TO CONSIDER REZONING ONE LOT AT 555 BREVARD ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMERCIAL BUSINESS II DISTRICT

ORDINANCE NO. 3122- ORDINANCE TO REZONE ONE LOT AT 555 BREVARD ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO COMMERCIAL BUSINESS II DISTRICT

Mayor Worley opened the public hearing at 8:06 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, said that this is the consideration of an ordinance to rezone one lot at 555 Brevard Road from RM-8 Residential Multi-Family Medium Density District to Commercial Business District. This public hearing was advertised on May 14 and 21, 2004.

Mr. Heard said that the Asheville City Development Plan 2025 discusses land use and transportation goals and strategies for infill development that include pursuing, "compatible infill development in order to actively promote appropriate development and redevelopment within the City and its ETJ" along with assuring that the City of Asheville, "continues to serve as the regional commercial center for western North Carolina by providing opportunities for the location of large commercial uses within the City." The proposed rezoning and redevelopment of the Brevard Road corridor support these land use goals.

Two properties located on the northwest corner of Brevard Road and Pole Creasman Road were recently (12-16-03) rezoned from RS-4/RM-8 to Community Business II District.

The applicant (Progress Energy) has requested a rezoning from RM-8 (Residential Multi-family, Medium Density) to CB-II (Community Business II) to allow for further commercial development of the Brevard Road corridor. The subject property currently supports a CP&L Substation with numerous lines running across the property, but is otherwise undeveloped. The property is bordered by commercial retail and low density residential (mobile home sites) to the north, low density residential (zoned RM-8) to the east across Brevard Rd., vacant commercially zoned property to the south, and vacant residentially zoned property to the west There are some additional CB-II zoned properties to the north and south along Brevard Rd. The majority of CB-II properties on the Brevard Road corridor are non-conforming.

Understanding the recent and anticipated changes to the Brevard Road corridor, the Asheville City Council recently directed the staff of Planning and Development to conduct a zoning study for the corridor to determine whether there was need to consider rezoning areas along Brevard Road to better reflect the goals and guidelines of the City's development plan(s) and Smart Growth goals. As a result of the preliminary study, the subject parcel was noted as property better suited for commercial and/or mixed use development.

The purpose of the RM-8 district is to provide medium density multi-family housing types along with single family detached and attached residences. This district is also intended to provide a transitional area between medium density single family dwellings and other higher density residential uses and/or uses of a heavier impact.

The Community Business II district is established to provide business and service uses to medium/high density residential areas, serving several residential neighborhoods.

With the recent commercial rezoning to the properties on the corner of Brevard Road and Pole Creasman Road, the remaining RM-8 zoned property no longer serves as an effective transition area between low density residential and higher impact uses. In addition, it is recognized that the subdivision of the larger RM-8 parcel and proximity of the power substation remaining on site has decreased the opportunity for a quality multi-family development. Lastly, there is precedent for rapid turnover of non-conforming properties in areas where new conforming development and increased traffic spurs new demand. With the current road widening underway, increasing residential density, and the potential for new conforming CB-II commercial uses, it is believed that there is significant potential for quality commercial development along this corridor.

Pros:

1. Allows for opportunities of quality, conforming commercial and/or mixed use development.
2. Could spur the redevelopment of non-conforming, vacant, or underutilized properties.
3. Allows for infill development that supports City adopted plans and goals.
4. Rezoning will better support the commercial character of Brevard Rd.

Cons:

1. Reduces potential for residential multi-family development along a major corridor.
2. Rezoning has the potential to stall the turnover of existing non-conforming, vacant, or underutilized properties currently commercially zoned through the opportunity for new construction.

As a result of recent and anticipated changes to the Brevard Rd. corridor and for the reasons stated above, Planning and Development concurs with Planning and Zoning's recommendation to approve this rezoning request from RM-8 to CB-II.

Mr. Lou Bissette, attorney representing Progress Energy, urged City Council to support the rezoning in that the pretty is better suited to commercial use.

Councilwoman Jones felt this was an appropriate rezoning, however, she continues to be concerned about the multi-family residential districts being "whittled away" and at some point Council needs to figure out how we are going to replace what we are rezoning.

Mayor Worley closed the public hearing at 8:13 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3122. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 178

F. PUBLIC HEARING TO CONSIDER REZONING 142 N. BEAR CREEK ROAD FROM INSTITUTIONAL DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 3123 - ORDINANCE TO REZONE 142 N. BEAR CREEK ROAD FROM INSTITUTIONAL DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley opened the public hearing at 8:14 p.m.

Urban Designer Alan Glines said that this is the consideration of an ordinance to rezone 142 N. Bear Creek Road from Institutional District to RM-8 Residential Multi-Family Medium Density District. This public hearing was advertised on May 14 and 21, 2004.

Mr. Glines said that the property is located within the City limits in the western area of the City. The property appears to have been zoned Institutional based on its proximity to Institutional uses and to create compatibility with the underlying higher density manufactured housing units that are located on this parcel and the surrounding parcels.

The 2025 Asheville City Development Plan does not show any major changes expected in this area of west Asheville. The plan does recognize the need to strengthen residential neighborhoods and to provide a mixture of housing types in a wide range of prices to serve the needs of the community.

Surrounding properties to the north, west and south are zoned Institutional and have residential uses on them. To the east, across Bear Creek Road from this parcel the area is zoned RM-8 and include single family uses.

The Buncombe County parcel data does not entirely agree with a survey that has been prepared for this lot. The discrepancies are of a dimensional nature and location of the right-of-way for Bear Creek Road. Staff has spoken with Buncombe County who agreed with the survey information provided for the property. County staff will update the GIS map layer for this parcel. For the consideration of this rezoning, we will consider the survey information as most accurate for our review.

The parcel under review contains two single family homes and a single manufactured home. The rezoning would allow uses permitted in the RM-8 district and would allow some relief for the subdivision requirements for the property since the lot area is reduced and street frontage requirement is also reduced.

The Institutional District reserves land for the development of major educational, medical and offices uses and multifamily residential uses while minimizing conflicts with adjacent land uses.

RM-8 Residential Multi-Family Medium Density District establishes areas to provide a full range of medium density multifamily and single family housing types and limited non-residential development normally required to provide basic services in a community.

PROS: RM-8 Zoning is consistent with the properties located across the street. The zoning change will more closely align with the current use of the property.

CONS: The rezoning will remove the possibility of future institutional uses from this property.

The Planning and Zoning Commission, at its May 5, 2004, meeting, voted 7-0 to recommend approval. City staff recommends approval of this rezoning request as well.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that due to the size of the parcel it might look like spot zoning, however, he thinks that Mr. Glines has done a good job explaining the foundation of his recommendation and if you look at the aerial photograph it is actually zoning it to a use that is more compatible with what it is already being used for.

Mayor Worley closed the public hearing at 8:20 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3123. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 180

IV. UNFINISHED BUSINESS:

A. RESOLUTION NO. 04-119 - RESOLUTION APPROVING CITY COUNCIL'S STRATEGIC OPERATING PLAN

Mayor Worley said that this is the consideration of a resolution approving City Council's Strategic Operating Plan. He said this Plan is the outgrowth of Council's retreat process, visioning process and goal-setting process.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Bellamy moved to adopt Resolution No. 04-119. This motion was seconded by Councilwoman Jones.

Councilman Newman said that the planning process that we went through as a Council to create this strategic plan was really valuable. He knows Council all has a lot of different ideas that are not reflected in this document but it was really useful to work together to identify some of the areas that there are large areas of agreement on. He came out of the process realizing there are some really critical community needs that have been talked about for a long time but we haven't have the collective voice to tackle them. He was excited that some of those challenges have been identified and are committing ourselves to work together.

Councilman Dunn said there is no perfect plan. He said that sometimes his vision conflicts with other Council members but it's healthy. He felt this document is very important. His support on this document means he will listen to what the other visions are as long as others will listen to his vision. The statement that Council will all speak in one voice probably won't happen because we are all individuals. He was pleased, however, that Council has finally decided to tackle some of the big issues.

Vice-Mayor Mumpower felt this was a well-intended effort initiated by our Mayor and City Manager. He finds himself in an awkward position in that there are parts of this document that he agrees with a lot and there are parts that he disagrees with a lot. At its core, he has a concern that this document represents a distraction from our main mission, which is city services. He feels the document represents an expansion of our city government at a level that exceeds his personal comfort zone. He feels we are growing our government faster in some respects than we are of people and he has discomfort with that. The strongest point to take him away from signing this document, however, is that he believes we have fundamental things that we need to focus on (core city services) and that we are stepping in so many other directions that we tend to neglect some of those fundamental services. He pointed to sidewalks. We have a $100 Million budget and are only earmarking (for several years) $50,000 a year for new sidewalk construction and $150,000 for sidewalk repair. He said that is a very nominal portion of our budget for a fundamental infrastructure issue. There are other monies that go to sidewalks, like fee in lieu of, but those are inconsistent monies. We have had recent discussion about a hard drug interdiction program that the majority of Council spoke against. That to him is fundamental. Public safety is fundamental. We can talk about other exciting initiatives that can have a good and special impact on Asheville, but before we go to the exotic, we should stay with the basic and he believes this document takes us too far away from that. With regret, he will have to vote against the strategic plan.

Councilwoman Jones encouraged all citizens to go to the City's website and read the document. She believed that this document is very grounded in housing, economic development, infrastructure and planning. We are a growing community and it is part of what we are elected to do is to anticipate the growth so that we are able to deliver those critical services well into the future for our children. She felt this document will take us in a good direction in next 20 years.

Mayor Worley felt the process to arrive at this document was a good process, a very collaborative process and had a lot of give and take from Council. He felt this is a good vision for Asheville. He doesn't think it takes away from our core services and he doesn't think it expands government, but he does think it's a recognition of what we are and the direction we are going in as a City The document reflects what makes Asheville the 8th best place in the country to live. Also, it's clear that this is a high level vision supported by strategic goals. He felt that each of us, while we may buy in the overall vision, all have different ideas about how we institute it. He does believe that this document moves us in a good direction.

The motion made by Councilwoman Bellamy and seconded by Councilwoman Jones carried on a 6-1 vote with Vice-Mayor Mumpower voting "no."

RESOLUTION BOOK NO. 28 – PAGE 265

V. NEW BUSINESS:

A. RESOLUTION NO. 04-120 - RESOLUTION AUTHORIZING THE CITY MANAGER TO RENEW THE CONTRACT WITH BALL-JANIK, LLP, FOR THE PROVISION OF FEDERAL REPRESENTATION SERVICES

Economic Development Director Mac Williams said that this is the consideration of a resolution authorizing the City Manager to renew the contract with Ball-Janik, LLP, for the provision of federal representation services.

The City of Asheville entered into the initial contract with Ball-Janik in April 2003 for a 12-month period. In doing so, it was suggested at that time to consider the approach of engaging federal representation for at least three years but using annual contracts. The initial contract called for monthly payments of $5,000 "inclusive" of out-of-pocket expenses. The renewal contract is the same except that Ball-Janik is now asking for out-of-pocket expenses to be "exclusive" of the $5,000 monthly fee. Ball-Janik is proposing that out-of-pocket expenses would not exceed $5,000 annually.

The current Fiscal Year 2004-05 City budget proposal includes adequate funding for this proposed contract.

Support statement:

- Representation services enhance positioning of and advocacy for City agenda items by our own elected representatives as well as other Members of Congress and their staffs who also have influence over decisions affecting City agenda items.

Challenge statement:

- Representative Taylor, in particular, as a member of the House Appropriations Committee, is uniquely positioned to respond to City funding requests without the need for City funding of professional representation services.

Staff recommends approval of the resolution authorizing the City Manager to renew the contract with Ball-Janik, LLP, for the provision of federal representation services.

When Councilman Dunn asked if there have been any monies obtained for the City that we can directly attribute to our consultant's involvement, Mr. Williams said that there have been two specific funding earmarks for projects. One for $300,000 for a new transit bus and the other is $2,000,000 for traffic signal upgrades. He said that monies obtained for the City that can be indirectly attributed to Ball-Janik's involvement include: (1) they lobbied for inclusion of language in the reauthorization of the federal transportation bill known as TEA-21 which extends flexibility to Asheville and the Asheville Transit System to use federal transit funds for operational assistance. Without this legislative fix, the Asheville Transit System would lose approximately $800,000 in federal funding that it now receives for operational assistance. This effort has been ongoing as Congress continues to debate the reauthorization of TEA-21. (2) they supported two additional earmarks that made their way into Omnibus spending bill – a $1 million earmark to NC DOT for the WNC Passenger Rail Initiative which will be distributed to transit systems throughout the state for buses and bus facilities.

Mr. Williams said that the lobbyists also promote the City's priorities to the Congressional delegation staff, subcommittee, committee staff and the delegation members on a regular, sustained and on-going basis. Given the time pressures placed on the members of the Congressional delegation, considerable behind-the-scenes work takes place at the staff level and our lobbyists work hard to maintain and build strong relationships with delegation and committee staff. In doing so, they are able to gain access to these staff at critical points in the legislative process and to remind them of the City's funding priorities.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No.04-120. This motion was seconded by Councilman Dunn.

Vice-Mayor Mumpower felt this is an ex-officio level of government that we are creating artificially and he disagrees with it in principle. He thinks that it's the congressman's job and it's our job to work with our congressman in that regard. He believes that these connections can be developed independently. He felt it was hard to track the work and he doesn't think it's fair to say that they have created all these revenues for us, but he's sure they had an impact. He thinks that tracking what they do for us in a concrete way is extremely difficult. He also thinks it makes us an active participant in a system that is notorious for pork barrel politics and that's stepping out of the system that we have in place and that's wrong.

Councilman Dunn said that he voted against the contract last year. However, he will reevaluate them every year and if they can continue to produce, he will support them. He pointed out that Congressman Taylor does care for our community and will work for Asheville's need.

Councilman Davis agreed with Vice-Mayor Mumpower, however, he would support the contract for another year but look for more activity in the coming year.

Vice-Mayor Mumpower said that he has talked to Congressman Taylor's office and they have assured him that if we bring things to them, they will actively pursue them. He couldn't understand why Asheville doesn't do their own work and why we need the buffer of a lobbyist. Mr. Williams said that we can do our work for those individuals, but they only just one vote on the committees that they sit on. City Manager Westbrook also responded that Council decided about 1.5 years ago that we were not effective in Washington and we needed more professional assistance. He said it takes someone in Washington to pursue our items at this level.

Councilwoman Bellamy felt that our $60,000 investment has been returned and after reviewing our 2005 federal agenda requests, she felt having a lobbyist to assist the City was something she would support.

Ms. Hazel Fobes said that what Council could be using for the infrastructure of our water system is far more important than paying a lobbyist.

Councilwoman Jones said that delivery on basic infrastructure improvements was $2.3 Million. Part of what we are elected to do is to be smart, be strategic for Asheville, and to do what we need to do ethically to bring home our citizens what they need to be safer and to have better city services.

Mayor Worley spoke in support of the lobbyist. He was pleased that we have a congressman that works well with Asheville, however, he has a limited staff and we can't rely on his staff to do all the research. He felt this is a team effort.

The Secretary of the Libertarian Party of Buncombe County would rather see Asheville not hire a lobbyist.

Mr. Mike Lewis originally felt that hiring a lobbyist was not a good thing, however, after seeing what the lobbyist has helped the City obtain funds for, he now feels it is a good thing to continue and hoped Council will re-evaluates it again next year.

The motion made by Councilwoman Jones and seconded by Councilman Dunn carried on a 6-1 vote, with Vice-Mayor Mumpower voting "no."

RESOLUTION BOOK NO. 28 – PAGE 266

B. RESOLUTION NO. 04-121 - RESOLUTION APPOINTING MEMBERS TO URTV INC. BOARD OF DIRECTORS

Vice-Mayor Mumpower said that this is the consideration of appointing members to URTV Inc., the non-profit selected by Asheville and Buncombe County to manage the community's public access television station.

On December 16, 2003, City Council adopted Resolution No. 03-208 that the City and County would appoint two members each to the URTV Inc. Board of Directors.

At City Council's worksession on May 18, 2004, City Council instructed the City Clerk to arrange interviews for DeWayne Barton, Sandra Bradbury, Kofi Caldwell, Katina Turner and Mark Wilson. Ms. Bradbury was out of town and unable to attend the interview process.

Council was impressed with all candidates interviews and instructed the City Clerk to send the applications to Buncombe County and the URTV Inc. Board for their consideration.

DeWayne Barton received 2 votes, Sandra Bradbury received 7 votes, Kofi Caldwell received 0 votes, Katina Turner received 0 votes and Mark Wilson received 4 votes. Councilman Dunn noted that he was unable to attend the interviews and would only therefore vote for the person he knew and would recommend. Therefore, Sandra Bradbury and Mark Wilson will be the City representatives on the URTV Inc. Board of Directors to each serve a two year term respectively, terms to expire June 30, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 267

C. RESOLUTION NO. 04-122 - RESOLUTION TO AMEND OR TERMINATE THE RESTATED AND AMENDED SUPPLEMENTAL WATER AGREEMENT

Mayor Worley said that one of the things that came out of Council's goal setting process was a desire to regain control of the water. We talked about it in terms of what it means when we annex and the ability to have the potential to charge differential rates. There are also other financial and non-water issues involved. As a part of the resolution, we include in it a provision that directs the giving of one year's notice of termination of the Water Agreement and that will give us a one-year timeframe within which to conduct negotiations. Hopefully we will be able to conduct negotiations and arrive at some results satisfactory to both Asheville and Buncombe County, but it gives us some options down the road if those negotiations prove to be unsuccessful.

Mr. Brian Peterson, member of the Regional Water Authority but only speaking as a citizen of Asheville, applauded the Mayor and Council for taking this step. He has felt this is something that should have already happened. Even though some of comments he's heard has been about annexation or differential rates, but it's much more than that. Looking at where we are now, having been on the Regional Water Authority over a year, it's not that it's not properly managed, it's that it cannot be properly managed. He feels that the staff, governmental bodies and the Regional Water Authority do a good job, but the structure is dysfunctional. He thinks that making a significant change is the only thing we can do to be able to get out of that mess. Anytime we try to make some small improvements, this political dysfunction keeps coming up so that we can't really fix the system. He feels the fundamental problem is lack of accountability. If the people running the system don't do a good job, they are held accountable by the customers and voters. As it is now, no one is accountable. In looking at some of the negotiations with Hendersonville, it's hard for the members of Authority to think of themselves as Authority members – everybody thinks of themselves as looking out for their individual governmental body. He didn't think the Regional Water Authority works and thinks this is a good step. He hoped the City will get back into control and be held accountable.

Mr. Mike Lewis felt that this is a core issue in this community. If you can't supply the basics, and water is very basic, then you are not governing. He urged City Council to regain control and do something about our extremely high water bills.

Ms. Hazel Fobes, Chair of Citizens for Safe Drinking Water and Air, provided City Council with her comments. She attended the May 13 and 18 Regional Water Authority meetings to hear public comments on the budget. She was pleased that the entire group seemed to have a cooperative exchange about the water system. They were very interested in the amount of money that the Water Authority needs, the lack of sources and the fact that Asheville and Buncombe County were taking off the top $2 Million. She thought they were going to do something about getting all or part of that money back. Now there is this resolution which she feels was hastily drawn up. It seems that the City of Asheville wants to take over the Water Authority, but Council wants to take it over in a way that is not pleasant. She knows it is Asheville's water system, but if you take it over, then we don't have any Regional Water Authority. She wants an independent Water Authority. She urged Council not to pass this resolution immediately. The Water Authority now has a civil engineer who has the authority to practice water and systems and land planning in North Carolina, South Carolina and Florida. She asked Council to have an independent regional water system, but the resolution doesn't even talk about regionalism.

Councilman Dunn said that regionalism isn't about who owns the system, but about the water. The important thing is for everyone in this community to have water. The Regional Water Authority has not worked and he is pleased that this Council is going to do something about the Water Agreement. The citizens of Asheville elected City Council to do something and it's now time for the City of Asheville to regain control of our water system and five a break to the water users. He has been on the Regional Water Authority for approximately three month and agrees it is a broken system, which is not accountable to anyone. The City of Asheville taxpayers are paying the bonds on these water improvements – not Henderson County and not the City of Hendersonville, and the City Council needs to be accountable to our taxpayers. He feels that City Council is fair and will take into consideration what the County needs are. He felt the people in Henderson County should be able to have water, but it doesn't mean they should be making decisions for the City of Asheville taxpayers.

Councilman Newman said that families and businesses in Asheville pay twice the property taxes as all the other residents and businesses in Buncombe County and they pay some of the highest residential water rates in North Carolina. The Water Authority is currently proposing to increase water rates by 50% over the next five years and we still need to invest a lot more into the infrastructure. Someone needs to look out for the taxpayers of Asheville. He hoped we can negotiate successfully with the County and our neighbors but we need to start getting some kind of change in place.

Vice-Mayor Mumpower said we are only announcing the beginning of the process of looking at change. We are not locking ourselves into anything and we are not violating any agreements. We are announcing to other bodies that we think we have a broken system of management and we need to look at ways to fix that. We hear a lot about regional authorities and it is a good concept, but when you look across the state, that is not the model that exists in North Carolina. Most cities own their resources and they own them for a reason. Our not owning our resources is one of the reasons is one of the reasons we have such a difficult time with annexation. It is a fairness issue to the City and we can talk about regionalism as a good concept but when you get down to reality, that is not what everyone else is doing. We are trying to fix a broken system and do it in a fair, even-handed manner. Nothing will change quickly or thoughtlessly.

Councilwoman Bellamy said the primary purpose of the 1996 Water Agreement was to provide for the operation of a unified water distribution system that was regional in scope, and to provide a means for the orderly extension of water service to unincorporated areas of Buncombe County and beyond, and to provide for the cost-effective repair and maintenance of the existing water distribution system She doesn't feel like those purposes are being addressed today. She thinks it is regional in name only. When we did try to extend water lines into Henderson County, there was a lot of disagreement on how that should have been done. Conflict continues to arise when we think about decisions that need to be made with regard to the water system. She feels that putting this issue on the table for Council to review in detail over the next year will give the people the opportunity to give input on what they want to see as well as our elected officials. If we are going to look at being cost-effective, we need to look at every aspect of that happening, not just what it would look like from a regional approach. She supports looking at this for a year to decide if we want to continue with our current relationship under the 1996 Water Agreement.

Councilwoman Jones said that it is her observation is that the Regional Water Authority has very good people on it that care about the region and the entities that they represent, but that regional body has not been able to do what it needed to do for the region. A recent example is that Asheville wanted to work with the City of Hendersonville (the only other water distributor in our region) on a plan to scout out what would happen in an emergency. We couldn't even get an emergency plan for our people. That is not looking after the region. To assume that Asheville is moving towards controlling its taxpayers assets equals to a disregard of the water needs of our region is not the case.

Mayor Worley said the water system is a ¾ of a billion dollar asset and that is a pretty significant asset for us not to be managing ourselves. We do a disservice to our citizens in the water rates. Our citizens pay higher water rates than just about any other city in North Carolina. And, all of those cities have deferential rates involved, which serves as a tool for many aspects. It is a tool we don't have. This is also a process that will take considerable amount of time and we don't know what's going to come out of the negotiations. He anticipates a lot of give and take, a lot of discussion and a lot of ideas. He doesn't think the steps we are taking tonight or anything that will come out of the negotiations over the coming year in any way diminishes our regional commitment. Every member of this Council recognizes that in this day and age we have to be regional in nature. What benefits our neighbors benefits us and vice versa. We only succeed by working together. The provision of water is certainly a regional commitment and a regional asset, but we get a portion of our water from another county and it's only fair that we share that water with other counties and other jurisdictions that need it. We have done that in the past and we will continue to do that in the future. The way we are regional in nature may change, but he doesn't see any change whatsoever in the regional commitment. We will continue to have that commitment, will continue to work with our neighbors, and will continue to honor every regional agreement that we are a party to.

Following up on Councilman Dunn's comment, Mayor Worley said that it's easy to say the $1 Million Asheville gets out of the water revenues should be given back, but the water system is our asset. If we gave up that $! Million to replace it, we would have to raise our property tax rates by 2-cents on the dollar. We have to have that $1 Million to balance our budget. So, the question is do we get that as a return on the investment of our asset where all the water customers pay that bill (which a substantial number of whom do not live in the City of Asheville) or do we shift that burden to strictly City residents. That is how giving back the $1 Million affects Asheville.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-122. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 268

VI. OTHER BUSINESS:

Vice-Mayor Mumpower announced the following vacancies for June, 2004. He asked interested people to contact the City Clerk for an application form.

Vice-Mayor Mumpower reminded Council of the various ceremonies which will be taking place on Memorial Day. He especially invited the public to the Memorial Day Ceremony on May 31 at 2:00 p.m., in the City/County Plaza area.

Councilwoman Bellamy formally recognized the Asheville High Girl's Basketball Team, Asheville High Girl's Soccer Team and T.C. Roberson's Soccer Team on their successful seasons. She also congratulated the Asheville High School Seniors and was astounded to see the amount of community service these young people commit to.

All of City Council congratulated Councilman Newman and his wife Beth on their daughter, Tess Newman.

The following claims were received by the City of Asheville during the period of May 7-13, 2004: Natalie Baker (Police), Katherine Mccoy (Fire), Lisena Moss (Sanitation), Linda Buckner (Fire), Jimmy Cole (Water) and Bellsouth (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Mike Fryar asked City Council to approve an arbitrator to meet with him, his attorney Mr. Reidinger, the City Manager, and the City Attorney to discuss a fair solution of his concerns regarding annexation of his property on Smoky Park Highway. Mayor Worley responded that City Council has listened to Mr. Fryar for the past year and has carefully considered every aspect. City Council has not sided with the views of Mr. Fryar. He put Mr. Fryar on notice that Council is not going to continue having the same presentation on the same subject every time we meet.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 9:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 8, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Retired U.S. Marine Corp Veteran Charles Sherlin led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Dunn gave the invocation.

ADDITION TO THE AGENDA

Mayor Worley asked that an item be added under "New Business" regarding asking the N. C. Dept. of Transportation to rename "Amboy Road" to "Bob Pressley Memorial Roadway."

Mayor Worley asked that an item be added under "New Business" regarding an appropriation to the Grove Arcade in the amount of $25,000.

I. PROCLAMATIONS:

A. RESOLUTION NO. 04-123 - RESOLUTION EXTENDING AN INVITATION TO THE CITY OF KARPENISI, GREECE, TO BECOME A SISTER CITY AND INVITING THE PEOPLE OF KARPENISI, GREECE, TO PARTICIPATE IN THE ASHEVILLE SISTER CITIES PROGRAM

Mayor Worley was pleased to announce Asheville's newest Sister City – Karpenisi, Greece.

Mr. Ken Richards, State Coordinator for Sister Cities International, thanked City Council for their support of the Sister Cities Program and announced the 100th anniversary of the Greek community in Asheville.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved to adopt Resolution No. 04-123. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 270

II. CONSENT AGENDA:

Councilwoman Bellamy asked that Consent Agenda "L" be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 25, 2004

B. RESOLUTION NO. 04-124 - RESOLUTION AMENDING INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY TO PROVIDE FOR PARKING REGULATION ENFORCEMENT ON COUNTY FACILITIES WITHIN THE CITY

Summary: The consideration of a resolution amending an interlocal agreement for parking enforcement on County-owned lots within the City.

In August of last year, the City and Buncombe County entered into an interlocal agreement whereby the City enforced County parking regulations on County-owned/operated parking facilities within the City. The agreement included a list of the facilities where the City was authorized to do this.

The County wishes to add another lot to the list of those where the City enforces the regulations, and may wish to add others in the future. The resolution authorizes the August 2003 agreement to be amended so that facilities can be added by agreement of the City and County staff, without going through the formal amendment process, which would require governing body approval.

Our staff has reviewed the proposed change and has no objection to it.

Considerations:

- This amendment streamlines an existing agreement that is already working well.

If the Council approves of amending the agreement, adoption of the resolution amending an interlocal agreement for parking enforcement on County-owned lots within the City is recommended.

RESOLUTION BOOK NO. 28 – PAGE 271

C. RESOLUTION NO. 04-125 - RESOLUTION AUTHORIZING THE CHAIRMAN OF THE ASHEVILLE REGIONAL AIRPORT AUTHORITY TO EXECUTE A GRANT AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR IMPROVEMENTS TO THE ASHEVILLE REGIONAL AIRPORT

Summary: The consideration of a resolution with the N.C. Dept. of Transportation for matching funds for improvements to the Asheville Regional Airport.

The City is required by law to execute certain contracts and agreements for the Airport Authority. This grant agreement is to allow the Authority to receive additional matching funds from the N. C. Dept. of Transportation ("DOT") for the following project:

- AIP 28: Runway 34-16 Blast Pads, Snow Removal Equipment, Resurface Taxiways, Southeast ARFF Road Culvert Replacement, Baggage Claim Expansion (portion), Hold Room (portion)

The grant, in the amount of $171,413, has been approved by DOT based on a total estimated cost of $3,428,261.

City staff recommends adoption of the resolution with the N.C. Dept. of Transportation for matching funds for improvements to the Asheville Regional Airport.

RESOLUTION BOOK NO. 28 – PAGE 272

D. RESOLUTION NO. 04-126 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A TEMPORARY SERVICES AGREEMENT WITH FORSYTH INITIATIVE FOR RESIDENTIAL SELF-HELP TREATMENT INC.

Summary: The consideration of a resolution authorizing the City Manager to enter into a Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. (F.I.R.S.T.) for temporary workers.

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation Division), and the Civic Center. This agreement is a collective contract for all City Departments.

F.I.R.S.T. is a non-profit organization that provides counseling to individuals and provides these individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville has utilized F.I.R.S.T staff for the past two years with excellent results.

Benefits to contracting with FIRST, Inc. include reduced costs in recruiting, hiring, and benefits for full-time workers. There is also a savings realized in management costs. The City is guaranteed all FIRST personnel requested, enabling operations to be fully productive at all times.

A negative aspect of using FIRST, Inc. is that the City of Asheville must negotiate an annual contract for this service.

City staff recommends approval of a resolution authorizing the City Manager enter into a Temporary Services Agreement with Forsyth Initiative For Residential Self-Help Treatment, Inc. for temporary workers.

RESOLUTION BOOK NO. 28 – PAGE 273

E. RESOLUTION NO. 04-127 - RESOLUTION OF INTENT TO SET A PUBLIC HEARING ON JULY 13, 2004, TO CONSIDER THE CLOSING OF NELSON STREET

RESOLUTION BOOK NO. 28 – PAGE 274

F. RESOLUTION NO. 04-128 - RESOLUTION TO PURCHASE REAL PROPERTY ON CAUBLE STREET AT THE FAIR MARKET VALUE FOR THE REED CREEK GREENWAY PROJECT

Summary: The consideration of a resolution to purchase real property on Cauble Street from BATT Associates Inc. at the fair market value of $31,100 for the Reed Creek Greenway project.

The property on Cauble Street (owned by BATT Associates) is located about 200' west of the intersection of Cauble Street and Broadway. It is irregular in shape following the meandering of Reed Creek and containing approximately 0.32 acre. It is generally level with the street and forms a grassy plain along the bank of the creek. Its highest and best use per the appraisal is residential as permitted by the zoning. It is proposed to be acquired as part of the Reed Creek Greenway.

The property was appraised by Joseph Moore and Joel B. Dew, MAI. Ed Vess, Real Estate Manager, reviewed the appraisals. The recommended fair market value of the property is $31,100.

The positive aspects of the proposed acquisition are:

1. Offers a superior and more practical path compared to the land currently owned by the City on the east side of Reed Creek.
2. The savings realized in not having to build a bridge across the creek meeting ADA guidelines will offset the cost of the property.
3. Will expedite completion of the Reed Creek Greenway because a bridge will not be required.
4. It is a voluntary sale at fair market value.
5. Includes only the land necessary for the greenway leaving the owner with two good home sites.
6. Will free up a parcel for possible disposition once a parking area for the Greenway is selected.

The negative aspects are:

1. Removes property from the tax base.
2. Removes a residential lot from the market.

Approval of the resolution will establish $31,100 as the just compensation for the property and accept the Offer of Sale of Land from BATT Associates, Inc. for that amount.

Planning & Development staff and Parks & Recreation staff recommend adoption of the resolution accepting an Offer of Sale for land on Cauble Street which is needed for the Reed Creek Greenway for the sum of $31,100.

RESOLUTION BOOK NO. 28 – PAGE 275

G. RESOLUTION NO. 04-129 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A 60-DAY EXTENSION OF AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY TO PROVIDE REGIONAL HAZARDOUS MATERIALS EMERGENCY RESPONSE FOR REGION 6

Summary: The consideration of a resolution authorizing the City Manager to enter into a 60-day extension of an agreement with the N.C. Dept. of Crime Control and Public Safety to provide regional hazardous materials emergency response for Region 6.

The N.C. Dept. of Crime Control and Public Safety is in the process of extending contracts by 60 days with seven North Carolina governmental units in North Carolina for provision of regional hazardous materials emergency response. The City of Asheville has been a regional hazardous materials provider since Fiscal Year 1994-1995. The State of North Carolina provides funding that fully supports the operational costs of the program.

North Carolina is divided into seven geographical regions for the purpose of hazardous material emergency response. The N. C. Dept. of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response. The region six area encompasses the westernmost twenty counties.

PROS:

- The State of North Carolina provides the hazardous materials response truck, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire and Rescue Department to enable us to competently handle hazardous materials emergencies.
- The City of Asheville has full use of the truck and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of resources necessary to properly respond to emergencies within Asheville. With the contract, we have the advantage of the equipment and resources being funded at the state level, rather than at the local level.
- During the ten years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program. This program is also consistent with the City's Strategic Operating Plan in partnerships.

CONS:

- None have been identified or known at this time.

City staff recommends City Council authorize the City Manager to enter into a 60-day extension of an agreement with the N.C. Dept. of Crime Control and Public Safety to provide regional hazardous materials emergency response for region 6.

RESOLUTION BOOK NO. 28 – PAGE 276

H. RESOLUTION NO. 04-130 -RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH DIXON HUGHES PLLC FOR AUDITING SERVICES FOR FISCAL YEAR 2003-04

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2003-2004.

N.C. General Statute Section 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

In 1998, the City solicited proposals from 36 accounting firms to perform the City's annual audit. City Council selected Dixon Hughes PLLC, formerly known as Crisp Hughes Evans LLP, to conduct the Fiscal Year 1997-98 audit and has re-engaged them annually through Fiscal Year 2002-2003. They completed all of those engagements in a satisfactory manner and have now submitted an engagement letter for the Fiscal Year 2003-2004 audit. The base fee has been proposed at $66,800. Funds are appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends City Council adopt the resolution which authorizes the Mayor to execute a contract with Dixon Hughes PLLC for auditing services for Fiscal Year 2003-2004.

RESOLUTION BOOK NO. 28 – PAGE 277

I. RESOLUTION NO. 04-131 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE AMBOY ROAD TO HOMINY CREEK ROAD GREENWAY CONNECTOR PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N. C. Dept. of Transportation (NCDOT) for construction of a multi-purpose greenway facility from Amboy Road to Hominy Creek Park, and to amend the budget to accommodate up to $300,000 in reimbursements revenue from NCDOT for the project.

The City of Asheville has an allocation of $300,000 in construction funds from NCDOT to construct a greenway along the French Broad River from Amboy Road to Hominy Creek Park, overlapping Metropolitan Sewer District and Progress Energy easements. This portion of the City Greenway Master Plan will link the French Broad River Greenway and Park system to Hominy Creek Road and West Asheville. While no local match for these funds is required up front, the City is responsible for land/right-of-way acquisition, trail design and engineering, and any construction costs over the $300,000.

City staff provided an update on this project to Council on February 17, 2004, and has since completed a survey of the project area and met with key landowners. Staff will continue to work with landowners to secure needed right-of-way, to develop easement agreements with the Metropolitan Sewage District and Progress Energy, and to finalize the trail design.

The positives of this project are that:

- The execution of a Municipal Agreement releases $300,000 in reimbursement dollars to the City for implementation of the Greenway Plan;
- This portion of Greenway will connect West Asheville neighborhoods to the larger Greenway System along the French Broad River;
- This project will clean up and maintain an area along the river which has long attracted pedestrians and fisherman, making it safer and easier to patrol; and
- This project will establish a greenway that will be integrated into the I-240 widening project.

The potential negatives of this project are that:

- The execution of the Municipal Agreement will bind the City to complete construction within a three-year period and to cover any construction costs over the $300,000; and
- The City will need to work with multiple landowners to obtain the required right-of-way. This will require expenses for Phase I studies, appraisals, legal fees, and possibly out-right purchase of property in cases where the landowners will not dedicate or donate the needed area.

Staff recommends that City Council authorize the City Manager to execute the municipal agreement with the N.C. Dept. of Transportation for construction of a multi-purpose greenway facility from Amboy Road to Hominy Creek Park and to amend the budget to accommodate up to $300,000 in reimbursement revenue for trail construction.

RESOLUTION BOOK NO. 28 – PAGE 278

J. ORDINANCE NO. 3124 - BUDGET AMENDMENT FOR THE AMBOY ROAD TO HOMINY CREEK ROAD GREENWAY CONNECTOR PROJECT

Summary: See Consent Agenda Item "I" above.

ORDINANCE BOOK NO. 21 – PAGE 182

K. APPROVE FORM OF ORDINANCE NO. 3116 – ORDINANCE AMENDING THE CONDITIONAL USE PERMIT OF APPELDOORN CONDOMINIUMS LOCATED AT 200 BROOKLYN ROAD

Summary: The consideration of an ordinance amending the Conditional Use Permit for Appledorn Condominiums.

At its May 11, 2004, meeting, Council indicated that it wished to amend the Conditional Use permit for Appledorn Condominiums to delete the requirement for the developer to contribute $500 per unit for traffic calming, and that the City would implement whatever traffic calming measures were determined to be necessary. Council also indicated that the guidelines for affordability with respect to the units to be constructed should be clarified.

The ordinance amends the Conditional Use Permit issued on August 13, 2002, to address these two issues.

If Council approves of the amendments as set forth in the ordinance, adoption of the ordinance is recommended.

ORDINANCE BOOK NO. 21 – PAGE 154

L. RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ARDEN/BILTMORE ROTARY CLUB FUNDRAISER AT THE ROYAL PINES PARK ON JULY 3, 2004

This item was pulled from the Consent Agenda for an individual vote.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA

RESOLUTION NO. 04-132 - RESOLUTION AUTHORIZING THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ARDEN/BILTMORE ROTARY CLUB FUNDRAISER AT THE ROYAL PINES PARK ON JULY 3, 2004

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Arden/Biltmore Rotary Club Fundraiser at Royal Pines Park on July 3, 2004.

The Arden/Biltmore Royal Club has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their Fundraiser at the Royal Pines Park and allow for consumption at this event.

The Arden/Biltmore Royal Club Fundraiser is a fundraiser for the 100-year celebration of Rotary International. The funds raised will be used to construct a gazebo at Royal Pines Park.

City staff recommends City Council approve the resolution to authorize the possession of malt beverages and/or unfortified wine for the above-mentioned event at specific locations and times noted in the resolution.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-132. This motion was seconded by Councilman Dunn and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 28 – PAGE 279

III. PUBLIC HEARINGS:

Mayor Worley said that Mr. Bob Deutsch, attorney for the petitioners requesting rezoning of 53 and 51 Arlington Street, notified the City on June 4, 2004, that the petitioners are dropping their applications for rezoning (Public Hearings "B" and "C").

A. PUBLIC HARING TO CONSIDER THE CLOSING OF A PORTION OF REED STREET

RESOLUTION NO. 04-133 - RESOLUTION TO CLOSE A PORTION OF REED STREET

Mayor Worley opened the public hearing at 5:16 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to close a portion of Reed Street. This public hearing was advertised on May 14, 21, 28 and June 4, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been opened.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close to public use as a public street a portion of Reed Street.

Closure of this section of right-of-way will have no impact on the ingress and egress for any of the abutting properties. There are two lots that abut this section of right-of-way. They are identified by PIN Nos. 9647.12-86-0434 and 9647.12-86-4339.

Mr. Cole said that this closing is subject to the retention of easements extending the full length and width of said portion of Reed Street by Progress Energy, PSNC Energy, BellSouth, Charter Communications, and the City of Asheville Water Department for the operation and maintenance of public utilities.

City staff recommends that City Council adopt the resolution to close a portion of Reed Street.

Dr. William Chambers spoke in support of the closing of a portion of Reed Street and responded to Councilwoman Jones' inquiry of how this closing connects with the larger community goal of better exiting onto Hendersonville Road.

Mayor Worley closed the public hearing at 5:18 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 04-133. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 281

B. PUBLIC HEARING TO CONSIDER THE REZONING OF 53 ARLINGTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT

Mayor Worley said that Mr. Bob Deutsch, attorney for the petitioners requesting rezoning of 53 and 51 Arlington Street, notified the City on June 4, 2004, that the petitioners are dropping their applications for rezoning (Public Hearings "B" and "C").

C. PUBLIC HEARING TO CONSIDER THE REZONING OF 51 ARLINGTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT

Mayor Worley said that Mr. Bob Deutsch, attorney for the petitioners requesting rezoning of 53 and 51 Arlington Street, notified the City on June 4, 2004, that the petitioners are dropping their applications for rezoning (Public Hearings "B" and "C").

D. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE REZONING OF PROPERTY LOCATED AT 673 SAND HILL ROAD FROM RM-6 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO CONSTRUCT 12 ADDITIONAL APARTMENTS IN ADDITION TO THE 11 EXISTING APARTMENTS

ORDINANCE NO. 3125- ORDINANCE REZONING PROPERTY LOCATED AT 673 SAND HILL ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3126- ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 673 SAND HILL ROAD TO CONSTRUCT 12 ADDITIONAL APARTMENTS IN ADDITION TO THE 11 EXISTING APARTMENTS

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:22 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Carter Pettibone submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pettibone said that this is the consideration of a request to rezone property located at 673 Sand Hill Road from RM-6 Residential Multi-Family Low Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use; and the issuance of a conditional use permit to construct 12 additional apartments in addition to the 11 existing apartments.

The Asheville City Development Plan 2025 (ACDP 2025) specifically calls for an initiative to address the problem of affordable housing by increasing the supply of affordable housing units.

The property is located within the City limits on the north side of Sand Hill Road south of Smoky Park Highway. Surrounding land uses and zoning include single-family residences to the north and west, vacant property to the east, and a church to the south, all of which are zoned RM-6. The site is landlocked and is located directly behind a church property, which has frontage on Sand Hill Road. Access is from a road that crosses the church property. There are currently 11 multi-family units on the property contained in three buildings.

The applicant, Anthony Willis, wishes to obtain a conditional use rezoning in order to exceed the maximum density permitted by the RM-6 district. The property is 3.29 acres, which would yield a total of 20 units. The applicant is proposing 23 multi-family units, which would require an RM-8 designation due to size of the size of the property. The applicant also plans to rent out the units within the development at rents that fall within the City's guidelines for affordable housing.

Highlights of the proposed site plans and building elevations for the development include:

Access & Parking: The site's access is from Sand Hill Road through the church property to the south. Parking is provided in front of the proposed buildings and to the sides of the existing buildings. The proposed number of spaces falls within the limits stated in the Unified Development Ordinance (UDO).

Height and Building Dimensions: The proposed apartment buildings as well as the existing ones are two stories in height and appear to be less than the 40-foot height maximum for the RM8 District.

Open Space: The UDO requires 500 square feet of open space for every residential unit proposed. This would result in a total of 11,500 square feet required for reservation as open space for the 23 multi-family units. While the site plan mentions over 20,000 square feet of open space, the plan must clearly delineate the open space and provide a more accurate total.

Landscape & Buffering: Buffering is required on all sides with a 15-foot type "A" buffer to the south and 20-foot type "B" buffers to the east, north, and west. Landscaping is required around the off-street parking areas.

Street Trees: The UDO requires that new developments provide one large maturing tree (over 35 feet in height at maturity) for every 40 linear feet of property abutting a street. The development must have these street trees along the access road through the development.

Sidewalks: The UDO requires sidewalk installation along the frontage of all streets. The applicant has proposed installing a sidewalk along the entrance street from Sand Hill Road to the apartment buildings on the site.

The Technical Review Committee (TRC) reviewed the proposed site plan and recommended approval with conditions. The applicant has revised the site plan to address a number of the conditions, but some conditions are still outstanding. The following is a list of the outstanding conditions listed by department:

PLANNING

- Parking and vehicular use areas to be calculated for entire site and planted with corresponding parking lot landscaping per Article 11.
- Open space to be calculated for entire 23 units (23 x 500 = 11,500 square feet or 0.26 acres) and delineated on plan.

WATER RESOURCES

- The owner needs to make application for a Letter of Commitment (LOC) regarding water availability.

ENGINEERING

Stormwater/Erosion Control information:

- Provide a location map.
- Storm water and Erosion Control Plans will be required. Storm water control design must show the post development run off is equal to or less than pre development rates. The design shall be developed for a 2 and 10-year storm event and providing for a 50-year emergency overflow.
- If the entire project is being graded under the original submittal the City will provide individual grading permits for each site so that each house can obtain a certificate of occupancy upon completion without having to wait until the end of the project.
- NPDES – Non point source discharge permit is required for any land disturbance over 1 acre. DENR regulates the permit. The City of Asheville is delegated to issue the permit and will once the Erosion Control Plans are reviewed and approved for construction.

Traffic engineering information:

- Details required for roadway construction.
- Sidewalks along private road & Sand Hill Road property frontage.
- Clarify the ownership of the roadway to the site
- State driveway access application and City of Asheville driveway access application will be required for construction of the proposed entrance/exit onto Sand Hill Road.

Waterline information:

- Apply for Water Availability through the City of Asheville Water Resource Department.

MSD

- To reach the existing MSD sewer line, the developer will have to obtain an off-site easement and install an 8-inch sewer extension per MSD standards. It is noted that an appropriate easement will have to be secured for this new line.
- MSD recommends approval for this project contingent upon the MSD wastewater allocation and plan review process being properly completed by the developer.

The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety;

The project received conditional technical approval from the Water Resources Department, the Fire Department, MSD, Engineering, and other City Departments. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

The project must comply with all City standards in regards to maximum clearing and grading, erosion control, and maximum slope for streets. The applicant also proposes to preserve a significant sloping, wooded area to the rear of the property that adjoins a creek as an open space area.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

There is no evidence that the additional development will substantially injure the value of adjoining or abutting property given the existing site development and that of surrounding properties.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

The applicant plans to demonstrate that the resulting development will be in harmony with the surrounding neighborhood in terms of bulk, density, and character.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

The proposed development will comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies. The development will help satisfy the ACDP 2025 plan goal of increasing the supply of affordable housing.

That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities;

The project received technical approval from the Technical Review Committee, which includes representatives of the Water Resources Department, MSD, Engineering, the Fire Department, and Public Works.

6. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The project received technical approval from the Technical Review Committee, which includes the City Traffic Engineer, who did not raise comments or concerns in regards to possible undue traffic congestion from the development.

Advantages (Pros) of the proposed development

- Provides for infill multi-family residential on a site already dedicated to that use.
- Increases the supply of affordable multi-family units as the units are proposed to be rented at rates within the City's affordability guidelines.
- The site plan calls for the portion of the site nearest to the stream to the rear to be preserved as open space

Disadvantages (Cons)

- The proposed site plan does not clearly delineate nor specify exactly how much open space will be dedicated.

In consideration of the above and the adjoining zoning and land uses, the proposed zoning change appears to be consistent with the intent and purpose of the UDO for consideration of a conditional use rezoning from RM-6 to RM-8/Conditional Use and the issuance of a conditional use permit for 12 additional multi-family units.

Staff recommends approval of the rezoning and the issuance of a conditional use permit with the following conditions:

- All outstanding TRC conditions (outlined above by department) are addressed and detailed plans are reviewed by TRC after approval by City Council.
- The applicant works with staff to determine final amount and location of open space.
- The existing and proposed multi-family residential units are to remain affordable.

The Planning and Zoning Commission, by a vote of 6-0 at its June 2, 2004, meeting, recommends approval as well.

Mayor Worley closed the public hearing at 5:26 p.m.

Councilwoman Bellamy wanted to make sure that there was legal access to the road.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3125 to rezone property located at 673 Sand Hill Road from RM-6 Residential Multi-Family Low Density District to RM-8 Residential Multi-Family Medium Density District/Conditional Use. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 184

Councilwoman Bellamy moved for the adoption of Ordinance No. 3126 granting a conditional use permit for property located at 673 Sand Hill Road for the construction of 12 additional apartments in addition to the 11 existing apartments, subject to the following conditions: (1) All outstanding TRC conditions (outlined above by department) are addressed and detailed plans are reviewed by TRC after approval by City Council; (2) The applicant works with staff to determine final amount and location of open space; and (3) The existing and proposed multi-family residential units are to remain affordable. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 186

E. PUBLIC HEARING ON THE FISCAL YEAR 2004-05 ANNUAL OPERATING BUDGET

Mayor Worley opened the public hearing at 5:29 p.m.

Budget Director Ben Durant said that the City Council conducts a public hearing each year to receive public input on budget issues before the Annual Operating Budget is adopted.

The Fiscal Year 2004/2005 Annual Operating Budget was presented to City Council on May 3, 2004. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on May 28 and June 4, 2004. Adoption of the Budget Ordinance is scheduled for June 22, 2004, at the City Council meeting.

The Fiscal Year 2004/2005 Annual Operating Budget is balanced with an Ad Valorem Tax rate of $0.53 per $100 assessed value.

A copy of the Budget is available for public inspection in the City Clerk's Office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the Budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the Ad Valorem Tax rate, which cannot be changed once adopted.

City staff requests City Council conduct the public hearing on the City of Asheville Fiscal Year 2004/2005 Annual Operating Budget and include public input in consideration of the budget.

Mr. Mike Marshall, Captain in the Asheville Fire Department and President of the Asheville Firefighters Association, spoke in support of the City Manager's budget, in particular the employee benefits.

Mr. Fred English spoke regarding the Hard Drug Interdiction Proposal and the Safe Neighborhoods Initiative. He felt that the increase in recycling fees was in fact a tax increase. He supported the need for additional police officers. He didn't feel that giving people money will make them want to go to school, but instead suggested the education money be spent towards educating unwed mothers. In addition, he didn't think the any funds should be distributed for affordable housing in the housing projects.

Mr. Bob Smith, Executive Director of the Asheville-Buncombe Community Relations Council, voiced concern that the public is viewing the people who live in public housing as "those" people, but we need to realize that we are all the same people. Regarding the two proposals developed by Council, he felt that Council should have gone to the neighborhoods involved to ask them what the real issues are and to ask them what they think is important. He urged Council to take the time and energy to meet with the communities involved so that there is a buy-in and a good solid foundation on which to work on.

Mr. Ken Putnam, Traffic Engineer for the N.C. Dept. of Transportation, asked City Council for their support for the Yorkshire Street widening.

Ms. DeAnn Robinson, resident at Lee Walker Heights Apartments, supported the Safe Neighborhood Initiative Program. She suggested the money be used for summer programs and jobs for our youth, computers in all community centers and tutors for our children. In addition, she felt it was inappropriate for the news media to come into Lee Walker Heights and talk to the children without having parental consent (from a safety standpoint). She also felt it was not appropriate for the police officers to jump out at night, scattering playing children, running through the projects with guns drawn. That is something that should be researched further. She also felt that Council needs to sit down with the neighborhoods as well to find out what they need and want.

Ms. Althea Goode, public housing advocate, agreed with Mr. Smith in that people are always coming into their communities telling them how to live. Officials need to talk to them first because they too pay taxes.

Mr. James Sheeler, West Asheville resident, suggested the $1 Million go towards reinstating the summer job program and making it a year-round program that would employ people to work after-school.

Ms. Luella Whitmire Reeves said that through the Housing Authority, she has allowed her to reach people on the streets and the people in the projects to bring them to church. It has made a positive difference. She explained that if people have something to do, they wouldn't be doing the things they shouldn't be doing. She urged City Council to reinstate the summer jobs program.

Mr. Iver Thomas said that the drug program can be solved by tough police action; however, he is not in favor of the jump-outs by the police officers. He would prefer to see a reverse sting where the customers are arrested. He believed our residents in public housing should be treated with dignity and respect and their desires should be paramount in any action taken. He suggested we look at other cities that have been successful through their tough police action. He was also in support of the Hard Drug Interdiction proposal. He felt the Safe Neighborhood Initiative, as written, is not enough and is too late.

Mr. Alan Ditmore felt that the core services of a city is to tax the rich and meet human needs. Health care and housing are the most unmet human needs. The City insists on leaving health care to the County and augment the Police Department. He feels the City should not be using local funds to enforce state and federal drug laws.

Mr. Fisher Caudle, representing property owners on Kentucky Drive and Buttonwood Court, felt that government is not here to create jobs for people. He explained how the area around Pisgah View Apartments has been severely affected by drug traffic in and out of the area. They continue to be harassed daily by drug thugs. He urged the public housing residents to rise up and make their voices heard about how they want to restore safety to their communities. He spoke in support of the Hard Drug Interdiction program.

Ms. Minnie Jones, public housing advocate, spoke about the drug thugs who are driving expensive cars into their neighborhoods. She felt we needed to get rid of those hoods and head them off up on Haywood Road, down on I-26 or I-40, and then Pisgah View Apartments wouldn't have the drug thugs standing on the corner.

Mr. H.K. Edgerton, President of the N.C. Heritage Preservation Association, said there is a loss of African American principals and teachers. He felt that there should be tough police action towards the people who bring the drugs into our neighborhoods. He suggested African American ministers open up their churches and start home schooling the children.

Mr. Isaac Coleman, President of the Buncombe County African American Caucus of the Democratic Party, said that the first police team at Hillcrest was successful in that they stopped the expensive vehicles and people who wanted to buy drugs from coming into Hillcrest. He couldn't understand why they don't want to use that approach rather than jumping on people who live in public housing for selling the drugs. He hoped everyone realizes that the drug problem is a social and economic problem. Until we correct the social and economic problems that exist, especially among people who live in public housing, then we don't have a chance of changing the dangers that exist in our public housing developments and other communities in Asheville. He spoke in support of the Safe Neighborhoods Initiative program; however, he felt it was important to involve the community in developing the program. He also felt that whatever programs are developed, they should be sustainable

The Reverend Jim Abbott, Rector of St. Mathias Episcopal Church and Co-Chair of Christians for United Community, assured Council that they have been spending the last year talking with each other and trying to hear from the community, knowing the only way we are going to solve any of our social problems is to work together. He said that he supports the holistic approach but would also like for the Christians for United Community to be a part of that approach.

Mr. Bill Stamey, Beaverdam resident, stressed that the police need to go after the people selling the drugs. He questioned whether City government has ever researched every department to make sure that there was no overlap or unnecessary positions. He urged Council to give taxpayers some type of relief on their property taxes.

Ms. Marcia Thomas said that she has obtained several signatures on a petition which support the Hard Drug Interdiction program. She doesn't see drugs as a race problem, but a people and kid problem. Children need a safe neighborhood.

Ms. Norma Baynes, resident on Caribou Road, said that there are drugs in everybody's neighborhoods, either on the corners or in the homes. This is a problem for everyone.

Mr. Peter Dawes said that the drug problem is a cancer, which needs to be killed first and then we can institute some programs. It affects everyone all over Asheville.

Ms. Leslee Kulba found five people (California, Georgia, Florida, Utah) who were able to talk about how they got rid of the drug problem in their municipalities. They recommended 24-hour surveillance in front of crack houses. When the crack houses would move, the police would move. Adding two more police officers is not enough. If you really want to get rid of drugs, we need more police. The government needs to spend money on protection. In addition, the police have a bad reputation in Asheville and she suggested some monies go to a program to improve their image and rapport.

Mr. John Hayes, founder of the Hillcrest Enrichment Program, said drugs are not a low income-housing problem. The Hillcrest Enrichment Program has received numerous awards and the children even accompanied the City of Asheville officials when they received the All American City Award. The Hillcrest Enrichment Program can be a model for other programs. He presented Council with two books – Developmental Analysis of After-School Programs for the Governor's Crime Commission and SETCLAE Self-Esteem Through Culture Leads to Academic Excellence. The book by the State included the Hillcrest Enrichment Program. The main time children get in trouble is after school to 8:00 p.m. so we need to work on after-school programs.

Ms. Susan Preston, member of the Christians for United Community, spoke about the need for good after-school programs. She also stressed that Council needs to ask the community to make suggestions for their children and ask the people who have experience with children.

Mayor Worley closed the public hearing at 6:21 p.m.

Mayor Worley announced that on June 22, 2004, City Council will take all comments into consideration and consider the adoption of the Fiscal Year 2004-05 Annual Operating Budget.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

RESOLUTION REQUESTING THE N.C. DEPT. OF TRANSPORTATION TO RENAME "AMBOY ROAD" TO "BOB PRESSLEY MEMORIAL ROADWAY"

Councilman Dunn was pleased to introduce and read the following resolution: "WHEREAS, the City Council of the City of Asheville finds it would be fitting and proper to honor the memory of racing legend Bob Pressley; and WHEREAS, in recognition of his outstanding career in racing, starting at the Asheville Motor Speedway on Amboy Road, and for his dedicated community service, City Council requests that Amboy Road be renamed the "Bob Pressley Memorial Roadway" in his memory; and WHEREAS, the City Council finds that it would be in the best interest of the citizens of the City of Asheville and Buncombe County to memorialize Bob Pressley, a racing legend and community servant, by requesting that the N.C. Department of Transportation make this road name change; NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT (1) The Asheville City Council does hereby request that the N. C. Department of Transportation designate Amboy Road as the "Bob Pressley Memorial Roadway"; and (2) That upon said designation the N. C. Department of Transportation cause to have erected appropriate signage to make the general public aware of said designation." He felt it was fitting and proper to recognize people in our community that have performed such a great service. Mr. Pressley was an icon and he was pleased Council would consider recognizing his memory.

Councilwoman Jones raised two concerns. She felt we should research the history of Amboy Road first so we don't insult someone else's memory, just in case Amboy Road was named for someone else. Secondly, she knows that there is a Pressley Road already in Asheville and she wanted to make sure that we are doing something appropriate in terms of mapping and directions.

Councilman Dunn said that growing up in Asheville, he knows that Amboy Road was always synonymous with the racetrack.

Councilman Davis spoke about the early NASCAR racing at the Asheville Speedway. He was proud that the City is doing something of this nature because he felt there was still some hard feelings about the racetrack, even though a number of people are enjoying the Park there now. He felt it was an honor to know Mr. Pressley and he wasn't opposed to asking the road be renamed, but he was concerned about how to be fair with others, e.g., the Dickey Plemmons' family or Jack Ingram. He felt it is a great thing when we name a street for a person but we also need to consider the number of other people that need some recognition as well. Personally he felt it would a great service to have a new racetrack in Asheville, perhaps on some city-owned land, which would be a great economic tool. Perhaps grandstands could be named after some of the people. There have been some very fine racers over the years and building engines used to be a fairly big industry in Asheville. He doesn't want to take anything away from Mr. Pressley's family, but he felt we have a lot of people who should be honored in such a fashion.

Mr. Mike Fryar thought years ago there were people that were named Amboy that owned the property. They built a small airport, which was named Carrier Field, and then they decided to build a racetrack.

Councilman Dunn said that Council has made some good points; however, we are considering naming a bridge over near the Airport for Col. Morgan and there were hundreds of thousands of people who died, so he didn't know how you can get around that issue.

City Manager Westbrook suggested City Council delay taking action at this time and let the City staff do some research on the historical aspect of the name.

Councilman Dunn would be amenable to some type of recognition of the racing community be made on that road.

Councilman Davis suggested that we get some feedback from the racing community as well since there are still a lot of people in the community that are very active in racing. He would be happy to work with Councilman Dunn in getting that feedback.

Mr. Rick Jenkins shared with Council a brief look into the history of racing legend Bob Pressley, not only as a racer but as a man who always found time to help people less fortunate than him and other terminally ill patients. He felt a permanent structure should be constructed in his memory.

GROVE ARCADE ALLOCATION

Mayor Worley said that a $25,000 funding request has been received from Progress Energy for an initiative to bring additional traffic and tourists to the Grove Arcade. The effort by Progress Energy is 100% for the benefit of this community, the downtown and the Grove Arcade. What the City is being asked for is to come to the table with a small portion of the overall funding that is going into that initiative. There are also a number of grants and other funding sources being sought. He said that Buncombe County has already appropriated $25,000 for the same purpose.

Vice-Mayor Mumpower said that this is about an anchor building in Asheville. He felt this is a constructive initiative to try to make the Grove Arcade successful.

Councilwoman Bellamy said that Ms. Becky Anderson, Executive Director of Handmade in America, was recognized nationally for the work she has done to bring attention to local craftsmen in the western part of North Carolina. This focuses on economic development and many of our rural counties are putting a lot of emphasis on our local craftsmen because it is a good economic tool. What Progress Energy is doing is tapping into what is already happening for our region.

Councilwoman Bellamy moved to instruct the City Manager to transfer $25,000 from the Contingency Fund for this initiative. This motion was seconded by Councilman Davis and carried unanimously.

GOOD NEWS

At the suggestion of Councilwoman Bellamy in order to counteract the negative information that is so prevalent, each Council Member said at least one positive thing about Asheville.

Vice-Mayor Mumpower thanked Ashland Paving Company for their grateful donation of 4 speed humps in one of our public housing developments. He also thanked Lonesome Mountain Paving Company for doing the work and City staff for their work associated with project in the overall For Our Kids Program, which he and Councilwoman Bellamy share responsibilities in.

CLAIMS

The following claims were received by the City of Asheville during the period of May 14-27, 2004: Thomas Neal (Fire), Devon Neimire-Pepe (Streets, Jarrod Eilers (Police), Cindy Miller (Water), Joan Maxcy (Streets), Mary Crawford (Streets), Edward Couser Jr. (Parking Services) and David Lewis (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English spoke in opposition of the passenger rail service

Mr. Mike Fryar spoke in support of the Hard Drug Interdiction Program.

Mr. Dennis Justice, Fletcher resident, thanked City Council for the turf at Memorial Stadium. He suggested that City Council extend their consideration of applications for the Civic Center Commission to adjacent counties since it is the Asheville Area Civic Center Commission. In addition, he suggested the City work with Henderson County and Buncombe County to raise the room tax to help pay for the serious upgrades needed at the Civic Center.

Mr. Bill Stamey hoped that City Council would not take into consideration any comments made by non-city residents. He felt that if the people don't pay City taxes, then they shouldn't be allowed to have input into what happens in the City.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:10 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 15, 2004 - 3:00 p.m.

Worksession

Present:	Vice-Mayor R. Carl Mumpower, Presiding; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson
Absent:	Mayor Charles R. Worley and Councilman Brownie W. Newman

CONSENT AGENDA:

Re-Roofing Reid Community Center

Summary: The consideration of a resolution authorizing the City Manager to enter into a contact with Carolina Mountain Roofing and Construction Company to re-roof the Reid Recreation Center on Livingston Street and an associated budget amendment from the contingency fund, in the amount of $77,377.

The current roof at the Reid Recreation Center is well over 25 years old. Over the past three years, requests have been made in the Capital Improvement budget to re-roof this facility. We are currently spending in excess of $10,000 each year on repairs to the existing roof. Bids were solicited from six roofing companies with two being certified Minority Businesses. The following bids were received and include an additional 10% contingency to cover any excess cost that may occur when the existing roof is removed.

Carolina Mountain Roofing and Construction Company	$77,377
Stroup Sheet Metal Works	$78,605
Service One Inc.	$124,043
Carolina Cornerstone Construction (MB)	Did not Bid
LCM Builders, Inc. (MB)	Non-responsive
McElrath Roofing	Not Licensed in NC

Through the generosity of the Junior League, $95,000 has been appropriated to make improvements to the interior of the Reid Recreation Center over the next three years. However, due to the extensive problems with the roof, work in the interior of the building should not occur until a new roof has been completed. As stated above, staff continues to address a number of issues at the Reid Recreation Center including the development of a master plan for the facility that will be used as the framework for additional work to occur based upon community and departmental needs. Without the necessary roof repairs none of this work can progress.

Pros:

- Current funding from the Junior League will address much-needed interior needs.
- Extensive water damage has occurred in the facility due to the deteriorated roof. A new roof will eliminate further damage.
- Support of this initiative has been given by the Reid Center Advisory Board and the Parks and Recreation Advisory Board.
- Use of contingency funds will allow this work to occur as soon as possible.

Cons:

- None

The Parks and Recreation Department recommends City Council authorize the City Manager to enter into a contact with Carolina Mountain Roofing and Construction Company to re-roof the

Reid Recreation Center on Livingston Street and to approve a budget amendment, in the amount of $77,377.

Request to NC DOT for Traffic Signal at the Intersection of Hendersonville Road and Yorkshire Street

Summary: The consideration of a resolution requesting the N. C. Dept. of Transportation (NC DOT) to install a traffic signal at the intersection of Hendersonville Road and Yorkshire Street.

The City of Asheville has been working with some property owners, as well as the Biltmore Methodist Church, to reduce traffic accidents and delays at the intersection of Biltmore Avenue and Yorkshire Street. Some of the property owners hired a traffic consultant to prepare a traffic impact analysis of the intersection. The traffic engineer determined that installing a traffic signal at the intersection of Hendersonville Road and Yorkshire Street would allow vehicles to make the left turn onto Hendersonville Road safely. Additionally, the consultant recommended other improvements such as widening Yorkshire Street.

The NC DOT staff has indicated that the City's support for the installation of the traffic signal may expedite the request.

Pros:

- Provide improved safety for vehicles using the intersection of Hendersonville Road and Yorkshire Road.
- Reduce congestion on Yorkshire Street during the afternoon peek travel period.
- Reduce cut-through traffic on adjacent residential streets.

Cons:

- This change will have a minor increase in congestion to traffic traveling Hendersonville Road.
- The proposed traffic signal must be coordinated with the traffic signal at I-40 and Hendersonville Road. This is initially a technically difficult task to accomplish.
- NC DOT will be responsible for the installation and maintenance cost of the traffic signal.

This request meets the City of Asheville Strategic Operating Plan focus area of Planning Goal #2 Task #1, which states:

> *"Determine opportunities for managing traffic demand through changes to community patterns and transportation modes, land use patterns, signalization improvements, etc."*

City staff requests City Council adopt a resolution supporting the installation of a traffic signal at the intersection of Hendersonville Road and Yorkshire Street and requests NC DOT to consider implementation of this recommendation as soon as is reasonable and feasible.

Upon inquiry of Councilwoman Jones, City Engineer Ball said that she would provide data regarding the intersection to City Council.

Local Law Enforcement Block Grant and Crowd Control Equipment

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the U.S. Dept. of Justice, Office of Justice Assistance for a Local Law Enforcement Block Grant and an associated budget amendment to the City's grant fund, in the amount $71,211, to appropriate the block grant funding; and a budget amendment to the City's general fund, in the amount of $20,079, to provide grant matching funds and purchase crowd control equipment.

The City of Asheville has been awarded a grant in the amount of $71,201 under the 2003 Local Law Enforcement Block Grant Program. The City is required to match this grant with $7,911 of its own funds, which will result in a total block grant budget of $79,112. The Asheville Police Department will use this grant funding to purchase 20 In-Car Video Camera Systems. In addition to recording traffic stops, drug interdiction efforts and police pursuits, this equipment will improve the quality of evidence obtained by police officers while documenting their daily interaction with the public.

To provide the required grant matching funds and also to provide additional funds for equipment, staff is requesting the appropriation of $20,087 in Drug Tax Revenue that has been received from the North Carolina Department of Revenue but that is currently unbudgeted. The Department of Revenue assesses the Drug Tax on persons convicted of possessing drugs for sale. The City of Asheville Police Department has used Drug Tax Revenue over the past several years to provide matching funds for grants, as well as for other special projects. Of the $20,079 amount, $7,911 will be used as the local match for the aforementioned 2003 Local Law Enforcement Block, and the remaining $12,168 will be used to purchase crowd control equipment. These items include personal protective equipment for Police Officers as well as communications equipment needed to coordinate public safety operations during public demonstrations.

Pros: The use of drug tax money for the purchase of crucial public safety equipment improves the Police Departments ability to carry out its mission. .

Cons: When the purchased equipment requires maintenance or must be replaced, the expectation is created that the general fund will pay for it.

Strategic Operating Plan and Focus Area: The acquisition of this equipment will enhance the focus area, "Critical Services & Infrastructure" and to a large degree, goal #4, *Develop programs and policies to defeat street level drug problems and crime.*

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into an agreement with the U.S. Dept. of Justice, Office of Justice Assistance for a Local Law Enforcement Block Grant and an associated budget amendment to the City's grant fund, in the amount $71,211, to appropriate the block grant funding; and (2) a budget amendment to the City's general fund, in the amount of $20,079, to provide grant matching funds and purchase crowd control equipment.

Stradley Mountain Booster Pump Station

Summary: The Regional Water Authority of Asheville, Buncombe and Henderson at its May 18, 2004, meeting approved the bid award to Hobson Construction Company to replace an old pump station on Stradley Mountain.

Bids were received for the Stradley Mountain Booster Pump Station project on May 6, 2004. Three bids were received with Hobson Construction Company submitting a low bid of $143,485.00. The project includes the installation of small water booster pumping station on Lower Stradley Mountain Road to replace an existing, old, non-standard pumping station. The project also includes the installation of approximately 560 linear feet of 6-inch waterline to replace old two (2) inch galvanized pipe.

Engineer's Estimate: $ 175,000

COMPANY	BID
Hobson Construction Company Arden, North Carolina	$143,485.00
Shoreline Enterprises	$163,360.00
Buckeye Construction Company Canton, North Carolina	$233,265.00

The bids were reviewed by the engineer for the project, McGill Associates, which recommended awarding the project to Hobson Construction Company. The bids were also reviewed by the Office of Minority Affairs and Brenda Mills, Director, approved the award of the contract to Hobson Construction Company.

Construction is expected to be completed within 45 – 90 days, which will increase pressure and flow in the Stradley Mountain service area.

This is for informational purposes only to keep City Council informed of construction projects within the water system and does not require any action by City Council.

Street Paving Contract

Summary: The Regional Water Authority of Asheville, Buncombe and Henderson at its May 18, 2004, meeting approved the bid award to Tarheel Paving Company, Inc. to complete street repaving for Critical Needs Phase III water line replacement projects.

Precision Contracting Company defaulted on their Critical Needs Phase 3 – Contract 3 contract. Precision Contracting completed the waterline and appurtenances installation, but did not complete the street repair component of the project. To complete this component of the project, bids were received for the Street Pavement Repairs Project on May 11, 2004. Despite having two pre-bid conferences where multiple local and out of town contractors were personally invited, only one bid was received at the bid opening. Since the amount of this bid made it informal ($300,000 or less), and because of the effort made to attract additional bidders, and the desire to complete this work which has been pending for nearly two years, the bid from Tarheel Paving Company, Inc. (Hendersonville, N.C.) was opened and read. Tarheel's low bid of $ 185,408.27 was less than the engineer's estimate of $210,651 and is within budget for fund reimbursement.

The bid has been reviewed by the engineer for the project, W K Dickson, who recommended award of the project to Tarheel Paving Company, Inc. The bid was also reviewed by the Office of Minority Affairs with recommendation of award to Tarheel by Ms. Leronica Casey, Certification Coordinator.

Funds for this project are through a State of North Carolina grant for $3,000,000.00, which was obtained in 2002.

Completion of the street repaving which includes streets in West Asheville, South Asheville and South Buncombe County should be completed with 30 – 60 days.

This is for informational purposes only to keep City Council informed of construction projects within the water system and does not require any action by City Council.

Mills River Water Treatment Plant Intake Expansion

Summary: The Regional Water Authority of Asheville, Buncombe and Henderson at its April 20, 2004, meeting approved the bid award to Turner Murphy Company for building a new water intake at the Mills River Water Treatment Plant in to the French Broad River.

This project was approved as part of the Brown and Caldwell engineering study for the Regional Water Authority of Asheville, Buncombe and Henderson and was requested to be fast tracked by the NCDENR Water Quality Division. Bids were received from three contractors with Turner Murphy Company being the low bid at $486,858.00. The project includes the installation of a new water intake on the French Broad River. This intake will only be used during drought conditions when the Mills River cannot adequately supply the required water needed by the water plant for distribution through the water system.

Engineer's Estimate: $ 550,000

COMPANY	BID
Turner Murphy Company	$486,858.00
Buckeye Construction	$519,030.66
Cooper Construction	$1,014,900.00

The bids were reviewed by the engineer for the project, Brown and Caldwell, which recommended awarding the project to Turner Murphy Company. The bids were also reviewed by the Office of Minority Affairs and Brenda Mills, Director, approved the award of the contract to Turner Murphy Company.

Construction is expected to be completed within 90 – 120 days.

This is for informational purposes only to keep City Council informed of construction projects within the water system and does not require any action by City Council.

Interim Water Resources Director David Hanks responded to various questions from Councilwoman Bellamy.

Vice-Mayor Mumpower asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

AMENDMENT ONE, SELF-FINANCING BONDS REFERENDUM

Mr. Mac Williams, Co-Chair of the North Carolinians for Jobs and Progress, said that this is the consideration of a resolution of support for Amendment One – Self-Financing Bonds Referendum which will appear on the ballot November.

North Carolina communities need every available tool at their disposal to help develop new jobs and tax base. Self-financing bonds are a proven mechanism whereby local governments may finance public infrastructure improvements in support of related private sector development within their communities. As this approach represents another way local governments can approve bonds, a statewide referendum is required.

Mr. Williams said self-financing bonds is a mechanism for financing local public infrastructure associated with private investment, to revitalize communities, attract new development opportunities and to create new jobs. He then said the bonds are repaid from the revenues off the incremental increase in property values generated by private development supported by the infrastructure paid for by the bonds. Thus, the bonds are self-financing. A private, taxpaying project is required. Only revenue from the increment is dedicated to pay off the bonds. Once bonds are paid, all revenue goes to the general fund. Allows local governments to be more timely in responding to development opportunities. There is a stringent project approval process. He then explained how self-financing bonds can be used. He said that self-financing bonds are fiscally conservative: (1) There is a limit on the types and amount of projects the bonds can support; (2) The bonds must be accompanied by a commitment of private investment; (3) Those who benefit most directly from use of the bonds pay them off; (4) The public is at less risk with these bonds than with general obligation bonds; and (5) Requires approval from the N.C. Local Government Commission.

He explained that more than 95% of self-financing bonds have succeeded across the country. In over 50 years of approving bond issues, no issue approved by the N.C. Local Government Commission has failed.

Support statements:

- NC has lost over 180,000 jobs in recent years – more than most other states. Every tool must be used to make our state and communities more competitive for development opportunities and the jobs they can create. Self-financing bonds are currently used in **48** other states.
- NO NEW TAXES or INCREASED TAXES are required to pay off bonds – they are self-financed from the incremental increase in revenue generated from the increased value resulting from the new private development.
- The tool allows local governments to be a more responsive and nimble partner with the private sector in undertaking catalytic projects resulting in higher quality communities.
- North Carolina's application of the mechanism has some of the strongest accountability safeguards in the country. Public input, local government approval, and Local Government Commission approval are all part of the project/district approval process.

Challenge statements:

- While statewide voter approval is needed to have the tool available as a local option, local voter approval is not required for each specific local application.
- Other means already exist for financing public infrastructure.

City staff and the Sustainable Economic Development Strategic Plan Implementation Task Force recommends Council approval of the resolution of support for Amendment One – Self-Financing Bonds Referendum to be on the ballot in November.

Upon inquiry of Councilman Davis, City Manager Westbrook said that he would check with the City Attorney whether the City could participate financially.

Mr. Williams responded to various questions from Council.

Councilwoman Bellamy felt this is an excellent tool for Asheville.

Vice-Mayor Mumpower asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

FOREST MANAGEMENT PLAN

Due to the absence of Mayor Worley and Councilman Newman and because of the importance of this issue, Councilwoman Bellamy moved to postpone this matter to the July 20, 2004, worksession. This motion was seconded by Councilwoman Jones and carried unanimously.

When Councilman Dunn asked what would happen if a Council Member was not present at the July 20 worksession, Vice-Mayor Mumpower said it would be Council's intent to press forward.

INTENT TO CLOSE BLANKENSHIP AVENUE

Assistant Public Works Director David Cole said that this is the consideration of a resolution of intent to close Blankenship Avenue between Smoky Park Highway and Brookside Circle and setting a public hearing for July 27, 2004.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been accepted as city maintained streets.

Pursuant to this statute, the adjoining property owners have requested the City close Blankenship Avenue, extending north from its intersection with Smoky Park Highway to its intersection with Brookside Circle.

Public Works Department staff has researched and established that this portion of right-of-way is not a City maintained street and its closure will not deprive any property owner of a reasonable means of ingress or egress to their property. This portion of right-of-way is abutted by three lots, identified by PIN Nos. 9617.14-44-5768; 9617.14-44-3873; and 9617.14-44-3740.

However, the City's Traffic Engineer has determined that Blankenship Avenue provides an important connection between Brookside Circle and Smoky Park Highway. Though not a City maintained right-of-way, Blankenship Avenue is signed, has a gravel surface and is used by pedestrian and vehicular traffic. Consequently, City staff advises that closing Blankenship Avenue without any alternate provisions for a transportation connection would be contrary to the public interest.

On Thursday, May 27, 2004, the Traffic Engineer and Assistant Director of Public Works met with Patsy Meldrum, counsel for petitioner Teresa Cathey, to discuss staff concerns about closing Blankenship Avenue. Ms. Meldrum was vague about the needs underlying her client's request to close the street. Consequently, it was difficult to generate alternatives that might satisfy both Ms. Cathey's interests and the City's interests in preserving connectivity.

Assuming that setbacks from Blankenship Avenue's right-of-way could be a concern, staff offered two potential alternative solutions: 1) to relax setback requirements from Blankenship Avenue or 2) to support closure of the right-of-way under an agreement that the petitioners provide a 20-foot public access easement in its place. Either alternative would have the same effect on setback requirements as closing the street, but would preserve the public's right to use the right-of-way for travel. However, Ms. Meldrum has indicated that her client is not amenable to either of these alternatives and wishes to pursue the petition to close Blankenship Avenue over staff objections.

Though intent to close Blankenship Avenue has not yet been advertised or posted, the Public Works office has received three telephone calls from local residents objecting to the closure. The primary concern voiced was that the street is used as a pedestrian access for people walking to and from Brookside Circle and The Lunch Box, a restaurant on Smoky Park Highway. Closing this right-of-way would require that these people walk along Brookside Circle and Smoky Park Highway, neither of which have sidewalks.

Progress Energy, BellSouth Telephone, and Charter Communications (cable television) all have aerial lines on Blankenship Avenue. Additionally, BellSouth has underground conduit (approximately 4-feet wide) along the eastern margin of right-of-way. Easements must be provided or arrangements made by the petitioners to relocate these utilities in order to close Blankenship Avenue.

Based on its importance as a connection between Brookside Circle and Smoky Park Highway, it is the opinion of City staff that closing Blankenship Avenue is contrary to the public interest. Therefore staff recommends against adoption of a resolution to permanently close Blankenship Avenue.

City staff recommends that Blankenship Avenue not be closed. However, consistent with the petitioner's request, staff request that City Council adopt the resolution of intent to close Blankenship Avenue between Smoky Park Highway and Brookside Circle and set the public hearing for July 27, 2004.

Upon inquiry of Councilman Davis, Ms. Patsy Brison Meldrum, representing petitioners, said the alley is not maintained by the City of Asheville.

Vice-Mayor Mumpower asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UPDATE ON CHANGES TO THE MINIMUM HOUSING CODE

Director of Building Safety Terry Summey said that this is a review of the status of the implementation of the Minimum Housing Code.

Mr. Summey reviewed the Housing Division Report, which has been operating since its adoption by Council on October 14, 2003. He explained the publicity and education surrounding the changes: (1) distribution of 850 copies of the easy to use reference guide along with informational brochures; (2) 48,000 water bill inserts distributed during January and February, 2004; (3) 3,000 door hangers printed and being distributed to multi-family companies; (4) Housing Code Coordinator has been a guest on call-in program; (5) there have been presentations to 15 realty organizations with over 800 realtors in attendance; and (6) Housing Code website has been established.

Mr. Summey then reviewed in detail the complaint and inspection activities, staffing and recordkeeping.

Mr. Summey explained that City staff will work on more consistency and training for independent inspectors. He also said that there may be possible Code changes presented to City Council in the fall of 2004.

Mr. Summey and Housing Code Coordinator Jeff Baker responded to various questions/comments from Council, some being, but are not limited to: why is there a big increase with third-party inspector inconsistencies; what was the number of annual complaints prior to adoption of the new Minimum Housing Code changes; are complaint originations about the same; is the number of life safety letters higher than anticipated; what are the percentages of owner-occupied homes and rentals being inspected; are the overall units in our City safer; how many eviction-retribution cases are there now compared to the prior Code; how many rental units are there in Asheville; do we have any tools we can implement if there is a clear sense of retribution-related cases; can the City increase the accountability of the inspectors by some policy that says dramatic failures to perform can result in reimbursement to the homeowner or something similar; and does the same inspector perform the repeat inspection.

Councilwoman Jones asked that Mr. Summey track inconsistencies of third-party inspectors and institute a process, if there is not one already, to take them off the list.

When Councilman Dunn asked what the policy was regarding complaints, Mr. Baker said that when the complaint is received, City staff asks the tenant if they have talked to the owner and given them a reasonable period of time to make the repair. They also suggest that the tenant put the complaint in writing. He said that they do have a complaint form on the new Housing Code website for tenants to use. Councilman Dunn felt it would be a good practice to obtain a copy of the complaint letter the tenant gave to the landlord.

Vice-Mayor Mumpower hoped that City staff will bring to the attention of Council any patterns of problems that affect either the tenants or the property owners for Council policy recommendations.

No action on the report required.

At 4:55 p.m., Vice-Mayor Mumpower announced a short break.

DOWNTOWN DEVELOPMENT AGREEMENT WITH THE GROVE PARK INN FOR DEVELOPMENT OF SITE #2 ON THE SOUTH SIDE OF THE CITY HALL BUILDING

City Attorney Bob Oast said that this is the consideration of an amendment to the Downtown Development Agreement with Grove Park Inn (GPI) for Site #2.

Last year, the City entered into a Downtown Development Agreement with the Grove Park Inn for the potential development of public-private projects on two sites in downtown near City Hall. Site #1 was at the intersection of College Street, Spruce Street, Market Street and Patton Avenue extension. Site #2 was on the south side of the City Building, on property that is used by the City as a parking lot.

Pursuant to the Agreement, Council authorized the City to enter into an option of GPI for Site #1. After analyzing financial information and projections, however, GPI decided not to proceed with Site #1, and officially withdrew from consideration of Site #1 in December of 2003.

Since then, staff and representatives of GPI have continued to discuss possibilities for Site #2. Progress on this site was delayed while the City completed its acquisition of the "old jail site" from Buncombe County, which gave us ownership of the entire upper level. As noted below, some of the property in Site #2 is still in private hands.

The Amended Downtown Development Agreement under consideration is characterized as an amended agreement to recognize that it involves the same parties and one of the same properties, and that the delay in proceeding with it was due to property acquisition issues. But it is really a new agreement dealing only with Site #2. In fact, the Agreement recites that Site #1 is no longer under consideration.

Proposed Uses; Design. As proposed, the building on Site #2 will include a mixture of commercial, office, and residential units (15% in the affordable range) in the private part of the development, and incorporating a substantial City employee/public parking facility as the public element, with the possibility of some City office or meeting space as well. The physical design of the building has not progressed beyond the conceptual stage at this point, but discussions with GPI have indicated that it will be multi-story, with a pedestrian-scaled and oriented street level appearance. It may be designed to be built in phases. The Agreement contains some height restrictions (no higher than the cornice of the City Building), and some other required considerations, but more details will depend on the actual design of the building, which must undergo an extensive public review process, and extensive review by the City

Design review. The Agreement provides for an extensive review process, including at least two public meetings coordinated by GPI. In addition, there are required reviews by the Downtown Commission, the Technical Review Committee, and the Pack Square Conservancy. The final design of the building is subject to approval by the City, which could take the form of a Conditional Use Permit, but in any case will involve a public hearing.

Process. Following the parties' entering into this Agreement, and subject to obtaining an appraisal, the parties would enter into an option (which requires a public hearing), that would secure the property while GPI goes through the design approval process, and investigates financing feasibility. During this time, the City would also be exploring the financial feasibility for its part of the project. Provided the design is approved, and financing secured, the property would be conveyed and construction would begin.

Time line. The tentative dates for these events are:

1. Enter Downtown Development Agreement – June 2004
2. Obtain appraisal – July 2004
3. Consideration of Option Agreement – August 2004
4. Option period – 1 year (with extension possible)
5. Completion of design review – prior to expiration of option
6. Conveyance of property (no date yet)
7. Construction (no date yet).

Amendment. It is anticipated that, once the decision is made to proceed with an approved project, further amendments to the Downtown Development Agreement, or additional agreements, will be needed to clarify the public / private roles in this project.

Other issues.

- The Agreement requires that the design be sensitive to the Eagle/Market Street Area and Pack Square / City-County Plaza, and that area stakeholders are involved in the design review process.
- The City will have to acquire a piece of Site #2 that remains in private hands. GPI may have to acquire the Hayes & Hopson Building, also in private hands.

Considerations.

- The projected value of the structure will exceed $40 million
- The project will help tie the South Pack Square area into the rest of downtown, economically and physically
- The project will provide a commercial / residential anchor for this end of town
- The Downtown Development Agreement enables the City to work with one developer, and does not require the City to use a competitive process to sell the land. This encourages the private sector to invest the time and resources necessary to design these complex projects, without fear that they might lose the property to another purchaser.

- Despite this part of the project having been heavily publicized in connection with the public debate about Site #1, there has been no other interest expressed in Site #2.
- Entering into the Downtown Development Agreement does not commit the City to anything but the process; no building is approved and no property is sold without further action by Council.
- This Agreement is heavy on process and public participation.

If the Council desires to pursue the development of Site #2, adoption of the resolution is recommended.

Discussion occurred, which was initiated by Councilwoman Bellamy, to request the Grove Park Inn include the South Pack Square Business Association in the required reviews at least for courtesy sake, since the design will be sensitive to the Eagle/Market Street Area. City Attorney Oast said that he would review the South Pack Square Redevelopment Plan to see if this Site #2 is in the area of that Plan. He said that there are a lot of stakeholders and interests in that area, e.g., Mt. Zion Church, YMI Cultural Center, Eagle/Market Streets Development Corporation, and he would be hesitant to list them for review in fear of leaving others out. It was his expectation that the Grove Park Inn would be well-advised to invite and seek input to all area stakeholders, without having to name any particular organization. However, he would be happy to amend the agreement in any fashion Council wished – to either give the South Pack Square Development Association the same ability to comment as the Pack Square Conservancy, or take out the Pack Square Conservancy.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that Site 2 is the City of Asheville's property and Council can place whatever restrictions they wish in the agreement.

Councilman Dunn felt that the City should give the Grove Park Inn more flexibility in the number of affordable units since it is so early in the project. City Attorney Oast said that 15% was based on what staff felt City Council would want in terms of the location of the project in the downtown area and Council's efforts to include affordable housing.

Mr. W. Louis Bissette, Jr., attorney representing the Grove Park Inn, said that they want affordable housing in this project and he felt that 15% of those units can be set aside for affordable housing.

Mr. Bissette said that the Grove Park Inn is very concerned about all the entities in this area and want them to be involved as much as possible. They will make an effort to bring them all into the process, however, they don't want every group to have veto over the project design.

A brief discussion occurred about the number of parking spaces is on Site 2 now and what will be planned for in the project. Mr. Bissette said at this time they can commit to 200 new parking spaces.

Upon inquiry of Councilwoman Bellamy, City Attorney Oast assured her that no park space was in this Site, only parking.

City Attorney Oast suggested language in the agreement that requires the Grove Park Inn, in connection with public presentations, target solicitations to as many groups as he can think of and if Council wants to add more, they can.

Vice-Mayor Mumpower asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

ORDINANCE NO. 3127 - ORDINANCE GRANTING A NON-EXCLUSIVE FRANCHISE TO EDUCATIONAL RESEARCH CONSORTIUM OF THE WESTERN CAROLINAS LLC FOR INSTALLATION OF TELECOMMUNICATIONS FACILITIES IN THE PUBLIC RIGHT-OF-WAY OF THE CITY OF ASHEVILLE

City Attorney Bob Oast said that this is the consideration of an ordinance granting a franchise to the Educational Research Consortium of the Western Carolinas (ERC), pursuant to the City's Telecommunications Ordinance.

In September the City considered and adopted Ordinance No. 3056 to provide for the granting of non-exclusive franchises to install telecommunications facilities in the City's right-of-way. Last year, the City had begun discussions with ERC for a fiber optic installation that lead to a limited area installation that was also limited as to time.

Since then, staff has studied ways to accommodate this emerging technology, and has developed a fee structure and installation guidelines that are now part of our analysis of these proposals and are incorporated into the franchise ordinances.

The franchise ordinance is essentially identical to the DukeNet franchise in its terms and conditions. The most important difference is that ERC will be installing some facilities for use in connection with the City's institutional network, and the cost of this installation and maintenance will be an offset from the franchise fee.

The main lines of the proposed installation are shown on Exhibit A[1]. Some of this proposed installation is within the "high density" areas, where the fees are highest, and some of it is not. The City has requested that some fiber optic lines be installed for its use along these routes, in connection with the existing Institutional Network installed pursuant to the cable TV franchise, and has proposed some connection points as well. The route and connection points are subject to change as conditions dictate, but these would be minor changes and would not need to come back to Council.

The proposed initial term of this franchise is 10 years, renewable for two 10-year terms, unless either party terminates. The franchise fee begins to escalate according to the Consumer Price Index after 5 years.

Considerations:

(1) This is the City's second telecommunications franchise, and following closely on the heels of the first. We really have no local experience with such efforts, other than cable television, which is not directly relevant.

(2) The City has the obligation to protect and preserve its right-of-way for public use, and the right to expect fair compensation for that use. The compensation that we receive should be fair and equitable, and we may not prefer one provider over another, so the compensation paid or in-kind services rendered by ERC will be a benchmark for future installations.

(3) There is a significant public interest in enabling telecommunications providers to provide their service, and especially to enable, or at least not obstruct, provision of such service to less densely populated and underserved areas.

City Attorney Oast passed out some insignificant changes to the franchise ordinance.

---

[1] Exhibits are not available in electronic form, but will be available at work session.

If Council wishes to grant a franchise to ERC, adoption of the ordinance, with revisions, is recommended. Council may suggest alternatives to the proposed fee schedule and the term, but most other substantive issues are already dealt with in the Telecommunications Ordinance adopted in September. Because this is a franchise ordinance, a second reading of it will be required. It is recommended that Council waive its rules and vote on this matter on first reading at the work session.

Councilwoman Bellamy moved to waive the rules and proceed to the first reading of Ordinance No. 3127. This motion was seconded by Councilwoman Jones and carried unanimously.

Vice-Mayor Mumpower said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3127, on its first reading with the revisions distributed by City Attorney Oast. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 191

Vice-Mayor Mumpower said that the second and final reading of Ordinance No. 3127 would be held at the next formal City Council agenda.

BOARDS/COMMISSIONS

It was the consensus of City Council to instruct the City Clerk to arrange interviews of Lawrence Haas, Loyd Kirk and George Peery for a vacancy on the WNC Regional Air Quality Agency.

It was the consensus of City Council to have a City Council Member on the Airport Authority.

Councilwoman Jones felt that in the future Council needs to be consistent in that if a member of Council serves on a board and is no longer on Council, that either that person automatically resigns or there be a resignation request by Council. At Council's consensus, City Attorney Oast said that City Council can remove the person for cause and that cause could be if the person is no longer a Council Member. He said that he would structure future resolutions accordingly.

Councilwoman Bellamy said that a member on the Airport Authority asked her to request Council's support for an increase in their stipend.

It was the consensus of City Council to instruct the City Clerk to readvertise vacancies on the Civic Center Commission.

It was the consensus of City Council to instruct the City Clerk to arrange interviews of Leesa Young and Leslie Yancey to the Downtown Commission. Pamela Myers will be a candidate, however, she did not need to be interviewed.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Keith Hargrove and readvertise for a vacancy on the Historic Resources Commission.

It was the consensus of City Council to instruct the City Clerk to prepare the property paperwork to appoint Laura Williams to the Recreation Board.

ADJOURNMENT:

Vice-Mayor Mumpower adjourned the meeting at 6:15 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Hurley
MAYOR

Tuesday – June 22, 2004 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson
Absent:	None

PLEDGE OF ALLEGIANCE

Mr. Larry Rice, veteran from the U.S. Marine Corp, led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JUNE 22, 2004, AS "161ST AREA SUPPORT MEDICAL BATTALION DAY"

Mayor Worley read the proclamation proclaiming June 22, 2004, as "161st Area Support Medical Battalion Day" in the City of Asheville. He presented the proclamation to Mr. B. A. Silver, employee with the Asheville Fire Department, who has just returned home from Iraq. Mayor Worley also recognized the other City employees who are actively serving in the military.

B. RECOGNITION OF CITY OF ASHEVILLE RESERVIST B.A. SILVER

On behalf of City Council, Mayor Worley recognized B.A. Silver from the 161st Area Support Medical Battalion, employee with the Asheville Fire Department

C. PROCLAMATION PROCLAIMING ELLEN RICKMAN AS THE RECIPIENT OF THE BILL FULP AWARD AND VOLUNTEER OF THE YEAR 2004

Mayor Worley read the proclamation proclaiming Ellen Rickman as the recipient of the Bill Fulp Award and Volunteer of the Year 2004 in the City of Asheville. He presented the proclamation to Ms. Rickman.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 8, 2004, AND THE WORKSESSION HELD ON JUNE 15, 2004

Councilwoman Bellamy asked that the June 8, 2004, minutes be corrected regarding the nature of the speaking members involvement regarding public housing.

B. RESOLUTION NO. 04-134 - RESOLUTION OF INTENT TO SET A PUBLIC HEARING ON JULY 27, 2004, TO CLOSE BLANKENSHIP AVENUE

City Attorney Oast said that the first Whereas in the resolution should state that the petition has been filed by all of the property owners adjoining Blankenship Avenue.

RESOLUTION BOOK NO. 28 – PAGE 283

C. RESOLUTION NO. 04-135 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH CAROLINA MOUNTAIN ROOFING AND CONSTRUCTION COMPANY TO RE-ROOF THE REID RECREATION CENTER ON LIVINGSTON STREET

Summary: The consideration of a resolution authorizing the City Manager to enter into a contact with Carolina Mountain Roofing and Construction Company to re-roof the Reid Recreation Center on Livingston Street and an associated budget amendment from the contingency fund, in the amount of $77,377.

The current roof at the Reid Recreation Center is well over 25 years old. Over the past three years, requests have been made in the Capital Improvement budget to re-roof this facility. We are currently spending in excess of $10,000 each year on repairs to the existing roof. Bids were solicited from six roofing companies with two being certified Minority Businesses. The following bids were received and include an additional 10% contingency to cover any excess cost that may occur when the existing roof is removed.

Carolina Mountain Roofing and Construction Company	$77,377
Stroup Sheet Metal Works	$78,605
Service One Inc.	$124,043
Carolina Cornerstone Construction (MB)	Did not Bid
LCM Builders, Inc. (MB)	Non-responsive
McElrath Roofing	Not Licensed in NC

Through the generosity of the Junior League, $95,000 has been appropriated to make improvements to the interior of the Reid Recreation Center over the next three years. However, due to the extensive problems with the roof, work in the interior of the building should not occur until a new roof has been completed. As stated above, staff continues to address a number of issues at the Reid Recreation Center including the development of a master plan for the facility that will be used as the framework for additional work to occur based upon community and departmental needs. Without the necessary roof repairs none of this work can progress.

Pros:

- Current funding from the Junior League will address much-needed interior needs.
- Extensive water damage has occurred in the facility due to the deteriorated roof. A new roof will eliminate further damage.
- Support of this initiative has been given by the Reid Center Advisory Board and the Parks and Recreation Advisory Board.
- Use of contingency funds will allow this work to occur as soon as possible.

Cons:

- None

The Parks and Recreation Department recommends City Council authorize the City Manager to enter into a contact with Carolina Mountain Roofing and Construction Company to re-roof the Reid Recreation Center on Livingston Street and to approve a budget amendment, in the amount of $77,377.

RESOLUTION BOOK NO. 28 – PAGE 284

D. ORDINANCE NO. 3128 - BUDGET AMENDMENT TO RE-ROOF THE REID RECREATION CENTER ON LIVINGSTON STREET

Summary: See Consent Agenda Item "C" above.

ORDINANCE BOOK NO. 21 – PAGE 209

E. RESOLUTION NO. 04-136 - RESOLUTION REQUESTING THE N.C. DEPT. OF TRANSPORTATION TO INSTALL A TRAFFIC SIGNAL AT THE INTERSECTION OF HENDERSONVILLE ROAD AND YORKSHIRE STREET

Summary: The con[illegible] resolution requesting the N. C. Dept. of Transportation (NC DOT) to install a traffic si[illegible]section of Hendersonville Road and Yorkshire Street.

The City of Asheville has been working with some property owners, as well as the Biltmore Methodist Church, to reduce traffic accidents and delays at the intersection of Biltmore Avenue and Yorkshire Street. Some of the property owners hired a traffic consultant to prepare a traffic impact analysis of the intersection. The traffic engineer determined that installing a traffic signal at the intersection of Hendersonville Road and Yorkshire Street would allow vehicles to make the left turn onto Hendersonville Road safely. Additionally, the consultant recommended other improvements such as widening Yorkshire Street.

The NC DOT staff has indicated that the City's support for the installation of the traffic signal may expedite the request.

Pros:

- Provide improved safety for vehicles using the intersection of Hendersonville Road and Yorkshire Road.
- Reduce congestion on Yorkshire Street during the afternoon peek travel period.
- Reduce cut-through traffic on adjacent residential streets.

Cons:

- This change will have a minor increase in congestion to traffic traveling Hendersonville Road.
- The proposed traffic signal must be coordinated with the traffic signal at I-40 and Hendersonville Road. This is initially a technically difficult task to accomplish.
- NC DOT will be responsible for the installation and maintenance cost of the traffic signal.

This request meets the City of Asheville Strategic Operating Plan focus area of Planning Goal #2 Task #1, which states:

> *"Determine opportunities for managing traffic demand through changes to community patterns and transportation modes, land use patterns, signalization improvements, etc."*

City staff requests City Council adopt a resolution supporting the installation of a traffic signal at the intersection of Hendersonville Road and Yorkshire Street and requests NC DOT to consider implementation of this recommendation as soon as is reasonable and feasible.

RESOLUTION BOOK NO. 28 – PAGE 285

F. RESOLUTION NO. 04-137 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF JUSTICE FOR A LOCAL LAW ENFORCEMENT BLOCK GRANT TO REDUCE CRIME AND IMPROVE PUBLIC SAFETY

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the U.S. Dept. of Justice, Office of Justice Assistance for a Local Law Enforcement Block Grant and an associated budget amendment to the City's grant fund, in the amount $71,211, to appropriate the block grant funding, and a budget amendment to the City's general fund, in the amount of $20,079, to provide grant matching funds and purchase crowd control equipment.

The City of Asheville has been awarded a grant in the amount of $71,201 under the 2003 Local Law Enforcement Block Grant Program. The City is required to match this grant with $7,911 of its own funds, which will result in a total block grant budget of $79,112. The Asheville Police Department will use this grant funding to purchase 20 In-Car Video Camera Systems. In addition to recording traffic stops, drug interdiction efforts and police pursuits, this equipment will improve the quality of evidence obtained by police officers while documenting their daily interaction with the public.

To provide the required grant matching funds and also to provide additional funds for equipment, staff is requesting the appropriation of $20,087 in Drug Tax Revenue that has been received from the North Carolina Department of Revenue but that is currently unbudgeted. The Department of Revenue assesses the Drug Tax on persons convicted of possessing drugs for sale. The City of Asheville Police Department has used Drug Tax Revenue over the past several years to provide matching funds for grants, as well as for other special projects. Of the $20,079 amount, $7,911 will be used as the local match for the aforementioned 2003 Local Law Enforcement Block, and the remaining $12,168 will be used to purchase crowd control equipment. These items include personal protective equipment for Police Officers as well as communications equipment needed to coordinate public safety operations during public demonstrations.

Pros: The use of drug tax money for the purchase of crucial public safety equipment improves the Police Departments ability to carry out its mission.

Cons: When the purchased equipment requires maintenance or must be replaced, the expectation is created that the general fund will pay for it.

Strategic Operating Plan and Focus Area: The acquisition of this equipment will enhance the focus area, "Critical Services & Infrastructure" and to a large degree, goal #4, *Develop programs and policies to defeat street level drug problems and crime.*

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into an agreement with the U.S. Dept. of Justice, Office of Justice Assistance for a Local Law Enforcement Block Grant and an associated budget amendment to the City's grant fund, in the amount $71,211, to appropriate the block grant funding; and (2) a budget amendment to the City's general fund, in the amount of $20,079, to provide grant matching funds and purchase crowd control equipment.

RESOLUTION BOOK NO. 28 – PAGE 286

G. ORDINANCE NO. 3129 - ORDINANCE TO RECEIVE A LOCAL LAW ENFORCEMENT BLOCK GRANT

Summary: See Consent Agenda "F" above.

ORDINANCE BOOK NO. 21 – PAGE 211

H. ORDINANCE NO. 3130 - ORDINANCE TO APPROPRIATE DRUG TAX REVENUE TO PROVIDE GRANT MATCHING FUNDS AND PURCHASE CROWD CONTROL EQUIPMENT

Summary: See Consent Agenda "F" above.

ORDINANCE BOOK NO. 21 - PAGE 213

I. RESOLUTION NO. 04-138 - RESOLUTION SUPPORTING AMENDMENT ONE: SELF-FINANCING BONDS, A LOCAL ECONOMIC DEVELOPMENT TOOL TO CREATE QUALITY JOBS, REVITALIZE COMMUNITIES AND ATTRACT NEW ECONOMIC OPPORTUNITIES IN NORTH CAROLINA

Summary: The consideration of a resolution of support for Amendment One – Self-Financing Bonds Referendum which will appear on the ballot November.

North Carolina communities need every available tool at their disposal to help develop new jobs and tax base. Self-financing bonds are a proven mechanism whereby local governments may finance public infrastructure improvements in support of related private sector development within their communities. As this approach represents another way local governments can approve bonds, a statewide referendum is required.

Support statements:

- NC has lost over 180,000 jobs in recent years – more than most other states. Every tool must be used to make our state and communities more competitive for development opportunities and the jobs they can create. Self-financing bonds are currently used in 48 other states.
- NO NEW TAXES or INCREASED TAXES are required to pay off bonds – they are self-financed from the incremental increase in revenue generated from the increased value resulting from the new private development.
- The tool allows local governments to be a more responsive and nimble partner with the private sector in undertaking catalytic projects resulting in higher quality communities.
- North Carolina's application of the mechanism has some of the strongest accountability safeguards in the country. Public input, local government approval, and Local Government Commission approval are all part of the project/district approval process.

Challenge statements:

- While statewide voter approval is needed to have the tool available as a local option, local voter approval is not required for each specific local application.
- Other means already exist for financing public infrastructure.

Staff recommends approval of the resolution of support for Amendment One – Self-Financing Bonds Referendum to be on the ballot in November.

RESOLUTION BOOK NO. 28 – PAGE 287

J. SECOND READING OF ORDINANCE NO. 3127 - ORDINANCE GRANTING A NON-EXCLUSIVE FRANCHISE TO EDUCATIONAL RESEARCH CONSORTIUM OF THE WESTERN CAROLINAS INC LLC FOR INSTALLATION OF TELECOMMUNICATIONS FACILITIES IN THE PUBLIC RIGHT-OF-WAY OF THE CITY OF ASHEVILLE

Summary: Second reading of an ordinance granting a franchise to the Educational Research Consortium of the Western Carolinas (ERC), pursuant to the City's Telecommunications Ordinance.

In September the City considered and adopted Ordinance No. 3056 to provide for the granting of non-exclusive franchises to install telecommunications facilities in the City's right-of-way. Last year, the City had begun discussions with ERC for a fiber optic installation that lead to a limited area installation that was also limited as to time.

Since then, staff has studied ways to accommodate this emerging technology, and has developed a fee structure and installation guidelines that are now part of our analysis of these proposals and are incorporated into the franchise ordinances.

The franchise ordinance is essentially identical to the DukeNet franchise in its terms and conditions. The most important difference is that ERC will be installing some facilities for use in connection with the City's institutional network, and the cost of this installation and maintenance will be an offset from the franchise fee.

The main lines of the proposed installation are shown on Exhibit A. Some of this proposed installation is within the "high density" areas, where the fees are highest, and some of it is not. The City has requested that some fiber optic lines be installed for its use along these routes, in connection with the existing Institutional Network installed pursuant to the cable TV franchise, and has proposed some connection points as well. The route and connection points are subject to change as conditions dictate, but these would be minor changes and would not need to come back to Council.

The proposed initial term of this franchise is 10 years, renewable for two 10-year terms, unless either party terminates. The franchise fee begins to escalate according to the Consumer Price Index after 5 years.

Considerations:

(1) This is the City's second telecommunications franchise, and following closely on the heels of the first. We really have no local experience with such efforts, other than cable television, which is not directly relevant.

(2) The City has the obligation to protect and preserve its right-of-way for public use, and the right to expect fair compensation for that use. The compensation that we receive should be fair and equitable, and we may not prefer one provider over another, so the compensation paid or in-kind services rendered by ERC will be a benchmark for future installations.

(3) There is a significant public interest in enabling telecommunications providers to provide their service, and especially to enable, or at least not obstruct, provision of such service to less densely populated and underserved areas.

The agreement contains the revisions discussed at the work session on June 15, 2004, together with a list of exhibits.

If Council wishes to grant a franchise to ERC, adoption of the second reading of the ordinance is recommended.

K. RESOLUTION NO. 04-139 - RESOLUTION APPOINTING A MEMBER TO THE RECREATION BOARD

Summary: The consideration of appointing a member to the Recreation Board.

Ms. Susan Sparboe has resigned as a member of the Recreation Board, thus leaving an unexpired term until June 30, 2006.

At City Council's worksession on June 15, 2004, City Council instructed the City Clerk to prepare the proper paperwork to appoint Laura Williams to the Recreation Board to fill the unexpired term of Ms. Sparboe, term to expire July 30, 2006, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 289

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF PROPERTY LOCATED AT 407-411 LIBERTY ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR A PART OF THE EXISTING RESIDENTIAL STRUCTURE TO BE CONVERTED TO OFFICE USE

ORDINANCE NO. 3131- ORDINANCE REZONING PROPERTY LOCATED AT 407-411 LIBERTY ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3132 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 407-411 LIBERTY ROAD TO ALLOW FOR A PART OF THE EXISTING RESIDENTIAL STRUCTURE TO BE CONVERTED TO OFFICE USE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:17 p.m.

278

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of a request to rezone property located at 407-411 Liberty Road from RM-8 Residential Multi-Family Medium Density District to Office District/Conditional Use; and the issuance of a conditional use permit to allow for a part of the existing residential structure to be converted to office use.

The project is supported by several goals and strategies in the plan relating to adaptive reuse, infill development, and smart growth policies. The project utilizes the existing structures on the lot to house a low impact office while maintaining its residential component by providing several affordable rental units to the area. Subsequent phases of the project would support infill development by utilizing the undeveloped portions of the property for additional multi-family development. This project also incorporates smart growth goals by using new zoning tools in order to promote compatible lands uses through the conditional use process.

The applicant, James Edmonds, is requesting a conditional use rezoning of a parcel located at 407-411 Liberty Road in Candler (City Exhibit 3 – Location Map). The property, consisting of 1.69 acres, is in the City's Extraterritorial Jurisdiction area and is zoned RM-8. Currently, two structures exist on the lot that includes a garage apartment and a 2-story residential structure. The applicant is pursuing a rezoning of the lot to Office/Conditional Use in order to convert the lower story of the residential structure to a law office. This structure has been used as a single-family dwelling and also a 2-unit apartment building in the past. It is the applicant's intent to continue renting the second floor apartment in this structure. No change is intended for the garage apartment. Future development of the site may include additional multi-family units that would be reviewed by staff in accordance with the RM-8 zoning requirements.

The conditional use master plan shows the location of the existing structures and the proposed parking areas for the development of the site (City Exhibit 3 – Site Plan). The plan also shows the location of existing trees and other vegetation around the developed portions of the lot. In addition to the existing vegetation, a 20-foot, Type "B" buffer will be required around the North and West sides of the property adjacent to low-density, single-family uses. Street trees will be required on both Liberty Road and Ridge Street. The applicant will also be required to provide parking lot landscaping, if the parking lot exceeds 6 spaces.

The purpose of the RM-8 zoning district is to establish a diverse medium density multifamily and single-family district in areas where public infrastructure is sufficient to support such densities. The purpose of the Office District is to provide small-scale office uses (or a mixture of office and residential use) adjacent to residential uses and to serve as a transition as residential areas convert to other uses or between residential and commercial areas. Due to the location of the Office District near residential areas, uses in this district shall conduct most of their activities during daylight hours.

At their May 19, 2004, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the Conditional Use Rezoning request and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission subject to the TRC conditions outlined in their report.

The plan submitted with the staff report has been revised to address several TRC comments that resulted in minor changes to the initial design. This plan addresses the first five "Planning" comments on the TRC staff report in regards to the number and location of permitted parking spaces and the location of buffer plantings and other required landscaping. Additionally, Engineering has determined that sidewalks will not be required for this phase of the development. The remaining conditions outlined in the TRC report are items that would be addressed at the final submittal to the TRC, should the project be approved.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The project site is relatively flat. The property will be developed with minimal disturbance to the site and existing vegetation. The only land disturbing activity occurring on site will be the construction of the proposed parking area and the installation of required landscaping. Renovations required for the conversion to office space will be confined to the interior of the structure. Any future development of the site will be in accordance with the requirements of the RM-8 zoning district.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The proposed use is considered to be low impact. Only one floor of the existing main structure on the lot will be converted to office space. The second floor apartment and the garage apartment will continue in its current use. No exterior change to the existing structures is proposed. Additionally, landscape buffers in accordance with the UDO standards will be required in areas directly adjacent to residential uses to mitigate any potential negative impacts. Any future development of the site will be reviewed in accordance with the requirements of the RM-8 zoning district.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

As stated above, the proposed use is considered to be low impact. The exterior of the existing structure(s) will not be altered and will continue to be in scale, bulk, coverage, density and character with the neighborhood. The property will be developed with minimal disturbance to the site and existing vegetation. Additionally, any future development of the site will be reviewed in accordance with the requirements of the RM-8 zoning district.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The project is supported by several goals and strategies in the plan relating to adaptive reuse, infill development, and smart growth policies. The project utilizes the existing structures on the lot to house a low impact office while maintaining its residential component by providing several affordable rental units to the area. Subsequent phases of the project would support infill development by utilizing the undeveloped portions of the property for additional multi-family development. This project also incorporates smart growth goals by using new zoning tools in order to promote compatible land uses through the conditional use process.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

Transit service is currently unavailable in this area of the City. The project is, however located near major road facilities, interstate connections and other service centers. Additionally, the proposed development was reviewed by the City's Technical Review Committee that includes representatives of the Water Resources Department, Fire Department, Engineering Department, Public Works Department, and Public Works Department.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The proposed office use is not expected to generate any noticeable amounts of traffic. The site will be developed with an off-street parking area that will adequately serve the proposed use and the existing multi-family component.

Pros:

1. Allows for the adaptive reuse of an existing building while maintaining its residential component with its multi-family use.
2. Provides for office use in an area that is accessible to residential and commercial services.
3. The character and integrity of the existing structures are preserved through the conditional use zoning process.
4. Additional land on this site is available for future infill development that could make a contribution towards meeting the need for multi-family housing.

Cons:

1. Paving of the proposed parking area will somewhat alter the residential character of the lot.

The site plan submitted as part of this conditional use zoning application allows for an adaptive reuse of property for a low impact office. It preserves the existing residential structures while maintaining its residential component; it limits land disturbance and tree removal on the site and ensures compatibility with the surrounding neighborhood. Additionally, landscape buffers required by the UDO would mitigate any negative impacts to the adjoining properties.

Based on the proposed development and the seven findings staff recommends approval of the project subject to the following conditions: (1) All conditions by the Technical Review Committee be met; (2) In addition to the mixed adaptive reuse of the existing structures permitted herein, other uses of the remaining portions of the site that may be permitted without a modification to this permit shall be limited to multifamily development in accordance with the density and dimensional limitations of the RM-8 zoning district; and (3) Signage shall be limited to 8 feet in height, 32 square feet in size, and cannot be internally illuminated.

Mr. Jim Edmonds, applicant, spoke in support of the rezoning and conditional use permit. He felt it would be good for the community.

After rebuttal, Mayor Worley closed the public hearing at 5:25 p.m.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3131, to rezone property located at 407-411 Liberty Road from RM-8 Residential Multi-Family Medium Density District to Office District/Conditional Use. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 215

Councilman Dunn moved for the adoption of Ordinance No. 3132, granting a conditional use permit for property located at 407-411 Liberty Road to allow for a part of the existing residential structure to be converted to office use, subject to the following conditions: (1) All conditions by the Technical Review Committee be met; (2) In addition to the mixed adaptive reuse of the existing structures permitted herein, other uses of the remaining portions of the site that may be permitted without a modification to this permit shall be limited to multifamily development in accordance with the density and dimensional limitations of the RM-8 zoning district; and (3) Signage shall be limited to 8 feet in height, 32 square feet in size, and cannot be internally illuminated. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 217

B. PUBLIC HEARING TO CONSIDER THE REZONING OF THREE LOTS AT 70 ALLEN AVENUE FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3133 - ORDINANCE REZONING THREE LOTS AT 70 ALLEN AVENUE FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:26 p.m.

Urban Planner Carter Pettibone said that this is the consideration of a rezoning of three lots at 70 Allen Avenue from RS-2 Residential Single-Family Low Density District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on June 11 and 18, 2004.

The property is located within the City limits at the western end of Allen Avenue north of Long Shoals Road. Surrounding land uses and zoning include school and recreational uses to the north zoned Institutional, multi-family residential to the east zoned RM16, and vacant property and a manufactured housing community zoned RS2 and INST respectively.

The property owners, Albert and Hilda Sorrells, wish to rezone the properties in order to utilize them for uses permitted in the RM16 District.

According to Buncombe County Tax information, the largest of the three properties is used for single-family residential use and the others are vacant. The properties are accessed via Allen Avenue by a private street named Lance Lane, which contains the driveway to the home.

The purpose of the RS2 District is to establish a low density for single-family dwellings and other compatible uses. The purpose of the RM16 District is to permit a full range of high-density multi-family housing types along with limited institutional, public, and commercial uses appropriate within high-density residential areas.

Rezoning the properties would allow the owner the opportunity to develop the property for uses permitted in the RM16 District. The three properties could also be combined to form a larger development parcel if rezoned.

Advantages (Pros)
- RM16 zoning would mirror the RM16 to the east across Lance Lane.
- Increase in the amount of zoning dedicated to multi-family residential.
- RM16 zoning could yield around 58 multi-family residential units on the property.
- Allen Avenue already provides access to multi-family residential as well as office and commercial uses along the street.

Disadvantages (Cons)
- Increase vehicular traffic resulting from development of the properties.
- Allen Avenue may need to be improved to handle the vehicular traffic resulting from potential development of the properties.

In consideration of the above and the adjoining zoning and land uses, the proposed zoning change appears to be consistent with the intent and purpose of the Unified Development Ordinance.

Staff recommends approval to rezone 70 Allen Avenue from RS-2 to RM-16.

The Planning and Zoning Commission, by unanimous vote at its June 2, 2004 meeting, recommends approval as well.

Mr. Albert Sorrells, property owner, spoke in support of the rezoning request.

Mayor Worley closed the public hearing at 5:30 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3133. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 222

C. PUBLIC HEARING TO CONSIDER THE REZONING OF 18 BALDWIN STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3134 - ORDINANCE REZONING OF 18 BALDWIN STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 5:31 p.m.

Urban Planner Carter Pettibone said that this is the consideration of a rezoning of 18 Baldwin Street from Neighborhood Business District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on June 11 and 18, 2004.

The *Asheville City Development Plan 2025 (ACDP 2025)* specifically calls for an initiative to strengthen and enhance neighborhood viability through the encouragement of compatible development that preserves architectural diversity and protects neighborhoods from inappropriate non-residential encroachment.

The Future Land Use and Transportation Plan of the ACDP 2025 also identifies this area as being located near a future Regional Development Node at the intersection of Interstates 40 and 240.

The property is located within the City limits on the west side of Baldwin Street north of Fairview Road. Surrounding land uses and zoning include single family residential to the north zoned RS 8, residential to the east zoned NB, commercial to south zoned NB and a place of worship to the west zoned RS 8.

The property owner, Floyd Bailey, wishes to rezone the property in order to utilize it for uses permitted in the RS-8 Residential Single-Family High Density District. Specifically, he would like to construct a single-family home on the property but the NB Neighborhood Business District does not permit a detached single-family home as a permitted use.

According to Buncombe County Tax information and field observation, a cellular communications tower and its associated equipment are located to the rear of the property. The cell tower was constructed on the property prior to it being rezoned NB in 1997 and its use would be a non-conformity whether the property was zoned NB or RS 8. The property also contained a single-family home until it was demolished recently. The property would be mainly accessed from Baldwin Street, but the cell tower equipment is accessed from the rear of the property, which abuts a church property to the west.

The purpose of the NB District is to reserve areas for low-intensity business centers which are accessible to pedestrians from the surrounding neighborhood. The purpose of the RS 8 District is to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development.

Rezoning the property to RS 8 would allow the owner the opportunity to build another single-family home on the property.

Advantages (Pros)
- Continues the zoning pattern of properties directly north and west and a portion of the property to the east which are zoned RS 8.
- Properties to the east across Baldwin Street that front on Fairview Road that are not yet developed for commercial use will remain zoned NB.
- Lessens the possibility of further encroachment of commercial uses into single-family residential neighborhood to the north.
- The property owner has a clear intention of building a single-family house on the property.

Disadvantages (Cons)
- Loss of zoning devoted to small-scale commercial zoning near a well-traveled intersection.
- The cell tower on the property would continue as a non-conforming use.

In consideration of the above and the adjoining zoning and land uses, the proposed zoning change appears to be consistent with the intent and purpose of the UDO.

Staff recommends approval of the rezoning request to rezone 18 Baldwin Street from Neighborhood Business District to RS-8 Residential Single-Family High Density District.

The Planning and Zoning Commission, by unanimous vote at its June 2, 2004, meeting, recommends approval as well.

Mr. Alan Ditmore said this is an expansion of single-family zoning, which he opposed as exclusionary barrier to affordable housing.

Mayor Worley closed the public hearing at 5:32 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3134. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 224

IV. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3135 - ORDINANCE ADOPTING THE FISCAL YEAR 2004-05 ANNUAL OPERATING BUDGET

City Manager Westbrook said that this represents the Fiscal Year 2004/2005 Annual Operating Budget for City Council's consideration before adoption.

The Fiscal 2004/2005 Annual Operating Budget was presented to City Council on May 3, 2004. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on May 28 and June 4, 2004. The City Council conducted a public hearing on the Budget on June 8, 2004.

The Fiscal Year 2004/2005 Annual Operating Budget is balanced with a tax rate of $0.53 per $100 of assessed valuation, which reflects no increase over the current property tax rate. All essential City programs and services are maintained.

The net operating budget as currently presented to City Council is set at $98,560,570, which includes a General Fund appropriation of $71,737,276. This budget includes several changes that were made during Council budget deliberations that took place in May and June. Those changes are reviewed below:

- An appropriation of $600,000 is included in the budget for a Safe Neighborhoods Initiative program aimed at improving safety in neighborhoods and addressing the root causes of crime. This program includes 5 additional police officer positions and equipment at a cost of $250,000; $50,000 to expand community policing efforts; $50,000 for a summer youth program; $50,000 for an educational tutoring program; and $200,000 to support affordable housing infrastructure.
- An additional 5-person construction crew was added to the budget during the deliberation process in order to expand the City's resources directed toward the construction of new sidewalks. The budget for salaries and materials associated with this crew is $298,539. This

budget is supported by $202,000 in additional grant revenue and fee-in-lieu of sidewalk funds. Based on the expenditures and revenues associated with this crew, the net cost of this program is $96,500.

- Council funded the Safe Neighborhoods Initiative program and the net cost of the additional sidewalk crew by reinstating the full recycling fee, which generated an additional $366,000 in revenue; reducing the merit-pay budget from an average award of 3% to 2.5%, which saved approximately $112,000; reducing $129,000 from the vehicle replacement budget; cutting $55,000 from the Civic Center budget; and making other minor changes and revisions.

- The City and the Water Authority proposed a new capital maintenance fee as a part of the Water Resources Department's operating budget. This fee provided approximately $5.2 million in revenue that was earmarked for various water capital improvement projects. On Tuesday, June 15, however, Buncombe County voted not to approve the Water Resources Proposed Budget, which included the new capital maintenance fee. As you know, the Water Resources Budget requires approval from the City, the Water Authority, as well as Buncombe County, before it can be officially adopted.

  In light of the County's action, the Water Budget that is currently presented for adoption has been revised to exclude the new capital maintenance fee. The exclusion of this fee reduces the Water Resources Budget from $27,940,616 to $22,646,720. Staff made cuts to various capital, operating and rolling stock line items to offset the loss of revenue. The Water Authority and Buncombe County must still approve this revised budget in conjunction with the City. If either of these two entities do not approve the revised budget, the Water Budget will revert back to the Fiscal Year 2003-04 approved budget and it will be necessary for Council to amend the current budget ordinance accordingly.

- Exclusion of the Capital Maintenance Fee from the Water Resources Budget also had an impact on the City's General Fund. Per the Water Agreement, the City currently receives 5% of the Water Fund's gross revenues as a payment in lieu of taxes. By excluding the capital maintenance fee, the general fund's revenues are reduced by $264,000. In the proposed budget, the revenue to the general fund associated with the capital maintenance fee was earmarked for additional street improvement and paving projects. In light of the reduced revenue, expenses for those projects have been removed from the budget.

- Outside agency funding is presented in accordance with the Outside Agency Committee recommendations to allow most agencies that currently receive funding to receive the same appropriation in Fiscal Year 2004-05 as originally appropriated in Fiscal Year 2003-04. Funding for the Asheville Buncombe VISION, Inc. has been eliminated, and funding for the Asheville Area Arts Council has been reduced from $25,000 to $20,000. Below are the recommendations:

  Asheville Area Arts Council - $20,000
  A-B Community Relations Council - $60,000
  Asheville Sister Cities Inc. - $2,000
  Clean Air Community Trust - $5,000
  Economic Development Commission - $40,000 (annual payment for Board participation)
  The Health Adventure - $5,000
  Hospitality House of Asheville Inc. - $20,000
  Kids Voting - $1,000
  One Youth at a Time Inc. - $9,500
  Project STEAM - $7,500
  Visitor's Center - $100,000 (part of a 5-year capital campaign)
  YWCA - $10,000

- Various changes or increases to fees & charges are presented in accordance with the Fees & Charges Committee recommendations. Specific fees & charges recommendations are provided as a part of the annual budget ordinance. Changes to building safety fees are not included as part of the currently presented annual budget ordinance, but will be reviewed during the coming fiscal year for possible adoption in October, 2004.

Staff requests that Council review the Fiscal Year 2004-05 Annual Operating Budget, including the changes noted above, and make necessary recommendations or adjustments followed by adoption of the Budget Ordinance.

Upon inquiry of Councilman Newman, Mayor Worley said that that budget, as presented to us, has a water budget in it that does not reflect the Water Authority's proposed maintenance and refurbishment fee. That is based upon the recent decision by the County that puts some conditions on their approval. His thought would be to adopt our budget ordinance, including the water budget without the maintenance fee, but to then consider a motion approving the Water Authority's proposed budget with the understanding that if the County approves the Water Authority's proposed budget with a maintenance fee increase, then we would amend our budget accordingly. If it doesn't happen, then we will have dealt with it appropriately.

Councilman Dunn, member of the Water Authority, said that the Water Authority has scheduled a meeting this Friday to re-visit the budget that the Water Authority first presented and the County did not approve. He personally believed that we should not raise water rates that high until we can get a better handle on the Water Agreement. He has talked to two County Commissioners who said they would like to approve a capital budget, but they would like for it to be a lesser amount.

Councilman Newman moved to approve the 2004-05 Annual Operating Budget as presented by the City Manager. This motion was seconded by Councilwoman Bellamy.

Councilman Newman said that the appreciated the way the City Manager structured the budget process this year. He said we've had a positive growth in our fund balance from last year and that represents the responsible thing we should be doing for the economic strength and financial health of the City. We are not facing pressures for tax increases this year either. He said the 2004-05 budget includes a strategic investment in improving maintenance and construction of sidewalks. This will allow us to take better care of the sidewalks we have in our neighborhoods and help make Asheville a safer place for people to walk and to lead a healthier lifestyle. While there have been some disagreements about specific funding for neighborhood safety and law enforcement, he was very glad our Council had a focus on those discussions, even though we don't all agree on how much funding we should put into the different parts of the plan to be effective in making neighborhoods safer. Even if Council does have some differences of opinion about exactly what we should do, he looked forward to Council working together as we move forward to make this effective. We all know that we are going to need more funding for all parts of what we need to do to have an effective approach and he was glad that the Council has agreed to work together to find other sources of funding for that. He felt that the dialog with the ABC Board was a good step in finding the additional resources that we can use for more law enforcement. He supports the safe neighborhood initiatives. While it will not solve all of the communities problems in a single year, it lays the foundation we need to have a comprehensive approach to addressing neighborhood safety and vitality issues in our community. About 50% of the funds in this initiative will go towards increasing law enforcement and organizing stronger community policing in the neighborhoods where we have documented crime. The other 50% of those funds will go to create job opportunities for young people from those neighborhoods. We also have funds to invest in infrastructure to disburse attractive affordable housing throughout Asheville and improve the quality of life in neighborhoods with concentrated poverty. He feels that this is the type of effective foundation we need for long term success.

Councilwoman Jones moved to amend the budget to allocate $5,500 to Asheville-Buncombe VISION. That amount reflects a 50% decrease in what was allocated to them last fiscal year. She said that they did request the amount they received last year ($11,500), however, they felt that $5,500 would help. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilman Dunn voting "no."

Councilman Dunn was concerned with a budget increasing from $86 Million to $103,000 Million in two years. He understands that the City has good staff, but some of the work they do is self-inflicted by too many regulations and too much oversight in many ways. He thinks he could support this budget if he knew we were doing everything we could to work with the County to eliminate the duplication of services, e.g., two school systems, two police forces, two recreation departments, etc. Using a current telephone book, he showed Council the numerous number of listings for drug problem agencies pointing out the extensive drug problem in Asheville. He is willing to work with Council, but this budget does not reflect the real needs in this community regarding drugs. He felt that both plans (the Safe Neighborhood Initiative and the Hard Drug Interdiction Program) had some mistakes, however, he hoped that Council would wait to spend the $600,000 until they receive the Police Chief's recommendations since he is more experienced in these matters. He would be voting against the budget in its present form.

Upon inquiry of Vice-Mayor Mumpower, City Manager Westbrook said that 5 additional police officers from the Safe Neighborhood Initiative will be added to the 3 new officers for a total of 8 new police officers in Fiscal Year 2004-05.

Vice-Mayor Mumpower said there has been a lot of misinformation shared in the community about the issue of hard drugs. One of which is that some of us have been portrayed as having an interest in seeing more people arrested. That is not what the proposal is about at all. It has been about decreasing traffic. Arresting more people has not and will not be the answer, but there are things you can do to stop people from selling and buying drugs in Asheville. He spoke very strongly against the Safe Neighborhood Initiative proposal in the budget. He thinks we are being terribly deceptive to ourselves and others to suggest that social programs and housing are going to solve, in any meaningful way, our hard drug problem in Asheville. If houses, jobs and other things would solve our drug problems, we wouldn't have doctors, lawyers or rich people with those problems. Council has been told that it's a parade of Mercedes and Lexus'. It escapes him to think how $200,000 spent on affordable housing is going to have any meaningful impact on our hard drug problem. Five more police officers is great, but will not stop our problem. The three Council members who supported the Hard Drug Interdiction program didn't come up with 12 additional officers without any research. They asked the Interim Police Chief what it would take to go after the people who deal and sell drugs in Asheville at the street level, with persistency, 24 hours a day. The best answer they could get was 12 additional police officers. Drugs are like a cancer in our city and you can't make it go away with watered down chemotherapy. Five additional officers, when we need 12, won't do it either. Asheville is a regional resource for drugs in our region and that is not okay. There is no evidence that money and social programs have significant impact on hard drug use. Once you start saying "no" to people and once you take away their drug resources and their opportunity to sell drugs, then you need programs to help these people. He asked the majority number of Council members who voted against a strong street level drug interdiction program if they will reconsider. He will not resist the social program and other initiatives, but he would ask that we do not do "watered-down chemotherapy." Let's fund enough officers to get this right this year. There is a way to do that without assaulting our budget. If we make a decision to do that this year and allow our new Police Chief as much time as he needs, that can get the budget dollars down to where it is more acceptable to Council. The people who use and sell hard drugs in Asheville are not going to stop and one day this Council will have to take steps. The problem will get worse and worse. One day we will have to find the courage and political will to take some steps that are costly and are difficult and that conflict with some of our personal values to try to address this problem.

Councilwoman Jones said that in terms of diagnosing a cancer, chemotherapy can be a very effective treatment, but sometimes you operate, do radiation, change your diet, and pray. That is the holistic approach and a skilled doctor determines what that holistic approach is. It's not necessarily a one-shot thing. She believes this is a strong approach. Part of its strength is because it will be received by not the dealers, but the people that live in peril everyday. If we want our tax dollars to yield fruit, there has to be receptivity in the community. The Safe Neighborhood Initiative will be received well. Again, she feels this is a strong effort. She was glad that we are building more police officers to our force. She was also excited the budget has a lot of capital investments and that the neighborhoods are going to see more sidewalks. She was pleased that we have come up with a way to help the private sector developers who have been courageous to step into affordable housing development. The Safe Neighborhood Initiative is not 100% perfect but it is a start. She will be willing to work with all Council and the Police Chief in moving forward.

Councilman Davis agreed that the Safe Neighborhood Initiative is a strong effort. However, he would not be supportive of the budget as proposed. He felt that somewhere between the Safe Neighborhood Initiative and the Hard Drug Interdiction Program there is a good plan. The Initiative is a good show of good faith, a desire to do good in the community and we have heard people say they would like some help in their neighborhoods. It shows we have their interests in our heart. He personally feels the police presence is very important initially so we can provide protection to those neighborhoods. He didn't think we are adequately doing that with the addition of 5 police officers. The $200,000 for affordable housing is a good thing, but let's call it what it is – affordable housing, not a Safe Neighborhood Initiative. This Council is supportive of affordable housing. He felt it was important to have summer job programs and mentoring, but he doesn't think that competes well with people that are giving kids big dollars to stand lookout or run drugs. It does give them a positive alternative and he does think we should be spending money in that direction. He would personally like to see us utilize our assets with our new Police Chief coming up with a plan. He wouldn't mind funding the Initiative with the knowledge that we would create a better plan. Another problem he has with the Initiative is that we are funding it with .5% merit increase from City employees when we give ourselves a raise, which he does feel is appropriate. Also, the Civic Center Director has made good progress with the Civic Center and we are going to cut his $30-40,000 needed for tables and chairs. Also, we are cutting out $120,000 for needed replacement vehicles. He knows that we need to fund this Initiative if we put it in there, but he's just not sure he feels good about funding it in this method for what we are going to get out of this. This is a good movement, but not the right one. He will not support the budget as proposed.

Councilman Dunn said that aggressive problems need aggressive treatment. Wherever our Police Chief thinks the City should go, with more police officers or affordable housing, we should go. We can't remove thugs if we don't have the manpower. We lost the drug war because we didn't have enough of a commitment in the first place. And, there is a fear of retaliation for those people in the neighborhoods. We need to take aggressive action.

Councilman Newman said that he looks forward to working with Police Chief Hogan and appreciates how he is getting out into our communities to listen to people. In addition to listening to Chief Hogan's recommendations, we also need to listen to people in the neighborhoods that are being affected. Council has heard that some of the things in the Initiative will make a real difference in the life in those communities. The Initiative contains $250,000 for law enforcement and $50,000 for organizing stronger community policing. The only part of the Initiative that can be described as a social program is the $100,000 for creating job opportunities for young people in neighborhoods where crime has been identified as a problem We do need support of this part of the Initiative. Generally he doesn't think it's the government's job to go out and create jobs for people, but the reality is that in some parts of our community we need to take the jobs to the young people because a lot of these kids don't have a way to get to the jobs. Investing in job opportunities for kids in those neighborhoods will make a real difference in their life. He didn't think that frankly for the vast majority of young people in our community we don't have to compete dollar for dollar with folks who sell drugs in their neighborhoods – most young people don't want to sell drugs. They don't want to get involved in drug activities. But if the only people they see in their neighborhood who are making money are people who are involved in drug activities, that is wrong. He felt that the first job offer that a young person gets should not be from someone who is enticing them to sell drugs. We have a responsibility to create those opportunities. The affordable housing part of the initiative talked about least is also fundamental to a long term effective vision for our community. It's not just about safety, it's about community and the vitality of our neighborhoods. Through local and federal governmental policies we have created situations in our community where we have neighborhoods with heavily concentrated poverty. Studies have shown that the creation of high concentrations of poverty creates higher levels of drug activity. He agreed that $200,000 is not going to make a dent in that, but if we are going to identify creating safer neighborhoods long-term as a goal for our City, then we have to have the dispersal of affordable housing within our community as a key part of that. The allocation of funding as part of the Initiative will lay the foundation that we can build on.

Councilwoman Jones explained the very generous compensation for City employees, noting that Council is not cutting employee benefits to fund the Initiative. There is a 1% cost of living increase, 2.5% merit increase, and a 1% increase for the 401-K program. Regarding the tables and chairs for the Civic Center, she asked the City Manager that as we close year-end, if there are some additional dollars that we prioritize those needs to the top.

Vice-Mayor Mumpower said that at the very least we are ignoring drug dealers and users with this budget proposal. At the worst we are protecting them. That's wrong. This budget also provides excessive support for the non-profit community and that's a community that employs 3 of the 7 members on Council. He likes to be gentle, fair and even-handed, but he's not the man who people are shooting at, the mother trying to raise kids around drug dealers, the person who gets his house broken into all the time, or the person who gets solicited for drugs every time he drives to his home. He lives somewhere safe where he doesn't have to deal with this so he can afford to be humble, but this is not the time for us to be demonstrating humility. This is the time for us to be bold, to say it's not okay, or to turn our head aside and let people consistently and persistently break the laws, specifically with reference to hard drugs. He feels anger and is ashamed and at some point we will have to deal with this and he looks forward to the time when we find the courage to do it.

Councilwoman Jones said that in such a volatile arena that we are in, she thinks it is even more important that the leadership has boldness, but rationality around the issue. It is really important that we keep our cool and that not tread lightly into some dangerous areas. She felt it is imperative for city-elected officials to be wise, safe, and cautious in this arena. She was thrilled there was a misinterpretation about the one of the plans presented entitled "Operation Hard Time." She could see where people were confused, because the whole plan sounded like it was being packaged with the end being prison. She was glad that misunderstanding was cleared up because it will make it easier to go forward as we try to work together.

Vice-Mayor Mumpower said there have been five compromise plans put on the table by three Council members. The first one was called "Operation Hard Time" and it meant giving drug dealers and users a hard time – making it difficult to buy and sell drugs in Asheville. None of the subsequent plans ever reflected on that topic because Councilwoman Jones brought it to their attention early on and he felt that was a good point.

Mayor Worley said that from the discussions, you can see that all Council members are concerned about drugs in Asheville. It's too easy to lose site of the fact that that is the case. It is also obvious that we have passion about our feelings and how we want to approach that issue.

It's clear that we differ in our approach but that's good too because when we differ we come up with a lot of different ideas and good solutions. The reality is that none of Council really knows what the best solution is and the key is to pull it all together. No program is perfect – we are not the experts on this issue. Unfortunately now is the time we adopt our budget each year so we have to do something and we have to do what we think is best, given what we have and our knowledge at the present time. We are forced to decide now and implement later. The good news is we can implement a lot of this later. We now have a new Police Chief and have had no chance for his input. While we are prepared to move forward with a 600,000 budget appropriation, he was pretty certain that all of Council is willing to wait, to listen and to consider recommendations that will come from Police Chief Hogan after he becomes familiar with Asheville and is able to see what the problem is and present us with recommendations as to how to best approach it and then perhaps then Council can reconsider how some of this $600,000 is allocated.

Councilman Dunn suggested that we allocate $250,000 that we expect from the Alcoholic Beverage Control Board to be earmarked for the drug program. They have to spend 5% on drug and alcohol education, so he felt it was appropriate they allocate the money to the City for their drug program. He also suggested that Council agree to wait until the Police Chief comes to Council with his recommendations and then Council make a decision on the best approach to the problem.

Mayor Worley said that the Council can't include the $250,000 in the budget because it is not a revenue source locked in, however, he thinks that asking the ABC Board is entirely appropriate. If the City receives the money, then Council can make a decision at that time in terms of how to allocate it, but that would be given very serious consideration.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

The amended motion carried on a 4-3 vote, with Mayor Worley, Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

Mayor Worley moved to approve the Water Authority budget as presented to City Council by the Water Authority with the understanding that if the other required approvals are obtained, we will conform our adopted budget to be consistent with the Water Authority budget. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 226

At 6:33 p.m., Mayor Worley announced a short break.

V. NEW BUSINESS:

A. RESOLUTION NO. 04-140 - RESOLUTION AUTHORIZING THE CITY TO ENTER INTO A DOWNTOWN DEVELOPMENT AGREEMENT WITH THE GROVE PARK INN

City Attorney Oast said that this is the consideration of an amendment to the Downtown Development Agreement with Grove Park Inn (GPI) for Site #2.

Last year, the City entered into a Downtown Development Agreement with the Grove Park Inn for the potential development of public-private projects on two sites in downtown near City Hall. Site #1 was at the intersection of College Street, Spruce Street, Market Street and

Patton Avenue extension. Site #2 was on the south side of the City Building, on property that is used by the City as a parking lot.

Pursuant to the Agreement, Council authorized the City to enter into an option of GPI for Site #1. After analyzing financial information and projections, however, GPI decided not to proceed with Site #1, and officially withdrew from consideration of Site #1 in December of 2003.

Since then, staff and representatives of GPI have continued to discuss possibilities for Site #2. Progress on this site was delayed while the City completed its acquisition of the "old jail site" from Buncombe County, which gave us ownership of the entire upper level. As noted below, some of the property in Site #2 is still in private hands.

The Amended Downtown Development Agreement under consideration is characterized as an amended agreement to recognize that it involves the same parties and one of the same properties, and that the delay in proceeding with it was due to property acquisition issues. But it is really a new agreement dealing only with Site #2. In fact, the Agreement recites that Site #1 is no longer under consideration.

Proposed Uses; Design. As proposed, the building on Site #2 will include a mixture of commercial, office, and residential units (15% in the affordable range) in the private part of the development, and incorporating a substantial City employee/public parking facility as the public element, with the possibility of some City office or meeting space as well. The physical design of the building has not progressed beyond the conceptual stage at this point, but discussions with GPI have indicated that it will be multi-story, with a pedestrian-scaled and oriented street level appearance. It may be designed to be built in phases. The Agreement contains some height restrictions (no higher than the cornice of the City Building), and some other required considerations, but more details will depend on the actual design of the building, which must undergo an extensive public review process, and extensive review by the City

Design review. The Agreement provides for an extensive review process, including at least two public meetings coordinated by GPI. In addition, there are required reviews by the Downtown Commission, the Technical Review Committee, and the Pack Square Conservancy. The final design of the building is subject to approval by the City, which could take the form of a Conditional Use Permit, but in any case will involve a public hearing.

Process. Following the parties' entering into this Agreement, and subject to obtaining an appraisal, the parties would enter into an option (which requires a public hearing), that would secure the property while GPI goes through the design approval process, and investigates financing feasibility. During this time, the City would also be exploring the financial feasibility for its part of the project. Provided the design is approved, and financing secured, the property would be conveyed and construction would begin.

Time line. The tentative dates for these events are:

1. Enter Downtown Development Agreement – June 2004
2. Obtain appraisal – July 2004
3. Consideration of Option Agreement – August 2004
4. Option period – 1 year (with extension possible)
5. Completion of design review – prior to expiration of option
6. Conveyance of property (no date yet
7. Construction (no date yet).

292

Amendment. It is anticipated that, once the decision is made to proceed with an approved project, further amendments to the Downtown Development Agreement, or additional agreements, will be needed to clarify the public / private roles in this project.

Other issues.

- The Agreement requires that the design be sensitive to the Eagle/Market Street Area and Pack Square / City-County Plaza, and that area stakeholders are involved in the design review process.
- The City will have to acquire a piece of Site #2 that remains in private hands. GPI may have to acquire the Hayes & Hopson Building, also in private hands.

Considerations.

- The projected value of the structure will exceed $40 million
- The project will help tie the South Pack Square area into the rest of downtown, economically and physically
- The project will provide a commercial / residential anchor for this end of town
- The Downtown Development Agreement enables the City to work with one developer, and does not require the City to use a competitive process to sell the land. This encourages the private sector to invest the time and resources necessary to design these complex projects, without fear that they might lose the property to another purchaser.
- Despite this part of the project having been heavily publicized in connection with the public debate about Site #1, there has been no other interest expressed in Site #2.
- Entering into the Downtown Development Agreement does not commit the City to anything but the process; no building is approved and no property is sold without further action by Council.
- This Agreement is heavy on process and public participation.

If the Council desires to pursue the development of Site #2, adoption of the resolution is recommended.

Mr. Oast then reviewed the issues raised by Council at the June 15 work session regarding the Amended Downtown Development Agreement with the Grove Park Inn.

1. Parking spaces. There was some disagreement over the number of parking spaces that would be included for preliminary design purposes. The lot currently has approximately 220 spaces, with roughly 125 of these spaces being for employee parking. Other spaces are for storage of City vehicles or County employee parking. When the County detention center is expanded onto the lot on the east side of the City building, the City will lose approximately 90 spaces. The lower parking lot that we acquired from the County (southwest corner of Marjorie and Davidson Streets) contains about 35 spaces that will be available for the City's use, and some surface parking spaces may remain on Site #2. Although designs for the GPI Site #2 project are still in the conceptual stage, the project will almost certainly include a parking facility for use by the tenants and residents of the building. In order for the City not to experience a net loss of parking spaces for employees as a result of this project, we would need approximately 200 spaces in whatever facility is constructed. This is probably a more appropriate figure to use for preliminary design purposes as it establishes an absolute floor, with the potential for adding employee or public spaces as the design evolves. There is also some potential for shared parking, depending on the uses of the GPI building.

2. Relationship to South Pack Square Redevelopment Plan. The property comprising Site #2, which is the property that is the subject of this agreement, is not part of the area covered by

the South Pack Square Redevelopment Plan. The SPS Plan area involves property on the south side of Eagle Street, but does not include the property on the north side of Eagle Street, where Site #2 is located.

3. Inclusion of South Pack Square stakeholders in design review process. The agreement as drafted provides that the preliminary design will reflect a sensitivity to the Eagle/Market Street area. There are several organizations operating in the South Pack Square area, and all of them potentially have an interest in the design of GPI's project for Site #2; some as owners of nearby property, some as operators of nearby businesses, and some just because of their interest in the area.

Paragraph 3.b. of the agreement, regarding public participation, strongly encourages GPI to involve stakeholders from the South Pack Square area in the public presentations required as part of the preliminary design process. This paragraph has been revised to require GPI to send targeted invitations to these presentations to the following organizations, or to meet with them separately:

a. South Park Square Business Association
b. Eagle Market Street Development Corporation
c. YMI Cultural Center and YMI Development Corporation
d. Mt. Zion Development Corporation
e. Any other organization identified by the City.

As with the Downtown Commission and Pack Square Conservancy, any design presentations involving these organizations will be of a "mandatory review / voluntary compliance" nature.

4. Pack Square Conservancy. The inclusion of the Park Square Conservancy as a reviewing agency is because the Pack Square Design Guidelines adopted by Council last year specifically identified portions of Site #2 as a site where the design of a proposed development would have a potentially significant effect on the Conservancy's plans and programs. Site #2 is not within the area subject to the City's agreement with the Conservancy, so the Conservancy's role in this Agreement as to Site #2 is one of mandatory review, voluntary compliance.

5. Affordable Housing Component. The provision in the agreement for some of the residential units to be within the affordable range was included in an effort to be consistent with Council's continuing desire to increase the supply of affordable housing in the area. This has recently been incorporated into the Strategic Operating Plan as Goal #4. Though no specific percentages are mentioned in the Plan, the 15% figure approximates the percentage that has been used in connection with other projects, such as the Eagle/Market Street project, and is in the same range (10% - 20%) as other such projects nationally. This also approximates the percentage where other provisions of the City Code (e.g. Planned Unit Development) trigger density bonuses.

6. Other. A provision has been added to para. 6.b.(2). that it is not a breach of a material term of the Agreement, and thus not grounds for termination of the Agreement, if City Council does not approve the design for the project as submitted by GPI.

In its approval of the final design of the project, the City Council may adopt some or all of the recommendations resulting from any of the design review processes set out in the Agreement.

Mr. W. Louis Bissette Jr., attorney representing the GPI, said that this agreement will see if the City's and the GPI's needs can join together and produce a project which will be good for the City of Asheville and the GPI. The GPI would like to develop the property for a number of reasons and they would like to build something on Site 2 that will serve everyone's needs. Because the GPI is a for-profit entity, it has to meet their economic feasibility studies. That is what this agreement will begin. With this process, the GPI can begin to identify what the City wants to see there and the GPI can begin to educate the City on what it would like the City to see there. We do agree to the new conditions outlined above by the City Attorney.

Ms. Julie Brandt felt that downtown property is very valuable especially when it borders the park on our historic square. Therefore, she asked that the City get the highest possible price and not the lowest price allowable on Site 2. She asked that because this is a complicated project and the City and the GPI are partnering, that when details are worked out on what part the City will own and the part the GPI will own, that the GPI is taxed appropriately for their proportion of the land and the building, etc. She asked that the architecture be in keeping with the historic nature of the square and the adjacent Courthouse and City Hall Building and not block the viewshed of the Courthouse or City Hall. She asked that the Downtown Review Guidelines be mandatory compliance. She also asked that since the area is in the historic downtown district, that the A-B Historic Resources Commission play a role in the review of the design process. Finally she asked where the City will be getting the money from for their portion of the project.

Mr. Fred English felt the property should be sold to the highest bidder.

Councilman Newman asked if it would be possible to sent out a Request for Proposals with specific criteria. City Attorney Oast said that it is possible that Council can have a design competition with a Request for Proposals, but it was his opinion that when you do that you lose some front-end control on the ultimate project. You can specify certain things but he felt that working with a developer from the very beginning, you wind up with the ability to have a lot more input into the process and the ultimate project. He doesn't want to suggest that a design competition wouldn't yield a good product, but in this case we are able to get some assurances that a design competition wouldn't give us, in addition to getting the appraised value of the property. This project has been in the public for almost a year now and no one with means has expressed any interest in developing the property. He was not was not sure that we would get much response if we were to do a Request for Proposals and he was not sure that we have the in-house ability to design the kind of project we would like to see there.

Upon inquiry of Councilman Newman, City Attorney Oast said the 15% affordable component applies only to the residential space, not the commercial space.

Upon inquiry of Councilman Newman, Mr. Craig Madison, President of the Grove Park Inn, said they are currently looking at a mix of condominium, rental, affordable housing, and also some townhome components, but it is a floating target at this time.

When Councilman Newman asked about the parking component, Mr. Madison said 200 spaces is a requirement for the City, so there will be no net loss to parking on that site. Additional parking will be required for the office, retail and living. Parking is an expensive commodity at $1,500-$1,800 a space.

Councilman Dunn was concerned how 15% for affordable housing can be negotiated when the GPI doesn't have final numbers. Mr. Madison explained how they do have some working numbers.

Vice-Mayor Mumpower was pleased that the GPI will be trying to create something good on that property. However, he said that last time when the GPI was trying to development Site 1, we used up a lot of community good will and wear and tear on Council coming to a point of good decision and then we found it was not doable, probably from the very beginning. So, this time, are you are saying you will do all the studies and have the plan in place before this Council ever makes a final decision on this? Will you be able to make a decision on whether it will work or not? Mr. Madison responded by saying yes. When the Site 1 process began, the restrictions (particularly the height) placed mid-way was the factor which dramatically changed the viability of the project to work. It was also a tremendous stress to his company and to him personally but he is still committed to Site 2. He has already spent $250,000 to get to this stage and the next stage will be another $250,000. So, as far as his commitment to not waste public good will and stress to Council, they are committed to take it to that stage or end it as soon as possible.

Vice-Mayor Mumpower pointed out that regarding Site 1, Mr. Madison was specifically asked at that hearing when those changes were made if he could make the project work and Mr. Madison replied that to the best of his knowledge they can, with these changes. Mr. Madison responded that that it was their intent to try to make it work but they failed. Vice-Mayor Mumpower said that his point is we need to get to a better place this time and we are grateful they are here and we will help you get there.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 04-140. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 290

B. RESOLUTION NO. 04-141 - RESOLUTION APPOINTING A MEMBER TO THE WNC REGIONAL AIR QUALITY AGENCY

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the WNC Regional Air Quality Agency.

The term of Ms. Nelda Holder, as a member on the WNC Regional Air Quality Agency, expires on July 1, 2004.

At City Council's worksession on June 15, 2004, City Council instructed the City Clerk to arrange interviews for Lawrence Haas, Loyd Kirk and George Peery.

Lawrence Haas received 3 votes, Loyd Kirk received 4 votes and George Peery received no votes. Therefore, Loyd Kirk was appointed to the WNC Regional Air Quality Agency to serve a six-year term. His term will begin July 2, 2004, and expire July 1, 2010, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 291

C. RESOLUTION NO. 04-142 - RESOLUTION APPOINTING A MEMBER TO THE AIRPORT AUTHORITY

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Asheville Regional Airport Authority.

The term of Mr. Robert Turner, as a member on the Asheville Regional Airport Authority, expires on June 30, 2004.

At City Council's worksession on June 15, 2004, it was the consensus of City Council to appoint a member of City Council to the Airport Authority. Vice-Mayor Mumpower and Councilman Dunn both expressed an interest in serving on the Authority.

Regarding Council's discussion at the June 15, 2004, worksession, City Attorney Oast said that he would include a paragraph in the resolution that City Council wishes to appoint a member of the City Council to the Airport Authority to ensure that the City's interests, as expressed through the Council, are represented on the Authority. He said that he feels that with the language in the resolution, Council has grounds for a for-cause removal if the appointee refuses to resign at the end of the term.

Vice-Mayor Mumpower said that by consensus City Council has agreed to appoint Councilman Dunn to the Airport Authority as the City Council representative to serve a four-year term, term to begin July 1, 2004, and expire June 30, 2008.

RESOLUTION BOOK NO. 28 – PAGE 292

D. RESOLUTION NO. 04-143 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE DOWNTOWN COMMISSION

Vice-Mayor Mumpower said that this is the consideration of appointing a member to the Asheville Downtown Commission.

Mr. Bill Byrne has resigned as a member of the Asheville Downtown Commission, thus leaving an unexpired term until December 31, 2005.

At City Council's worksession on June 15, 2004, City Council instructed the City Clerk to arrange interviews for Leslie Yancey and Leesa Young. Pamela Myers will be considered as an applicant, however, an interview is not necessary.

Leslie Yancey received 6 votes, Leesa Young received 1 vote and Pamela Myers received 0 votes. Therefore, Leslie Yancey was appointed as a member of the Downtown Commission to serve the unexpired term of Mr. Byrne, term to expire December 31, 2005, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 293

VI. OTHER BUSINESS:

Vice-Mayor Mumpower thanked several people for the work in the Hillcrest Community Clean-Up Day, which is a project associated with the overall For Our Kids Program, which he and Councilwoman Bellamy share responsibilities in.

The following claims were received by the City of Asheville during the period of May 28-June 10, 2004: Boyd Stevens (Fire), Loretta Woolley (Water), Beverly Williams (Streets), Matt Ballard (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Fred English, Haw Creek resident, spoke about the 229th anniversary for the U.S. Army and hoped that in the future the City of Asheville tries to publicize this wonderful event.

Mr. Mike Fryar supported City Council's decision to wait until they hear from the Police Chief before implementation of the drug program.

Closed Session

At 7:21 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Morris Communications d/b/a Fairway Outdoor Advertising; Lamar Outdoor Advertising; and City of Asheville. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (2) To establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate. The statutory authorization is contained in N. C. Gen. Stat. 143-318.11(a)(5). This motion was seconded by Councilman Dunn and carried unanimously.

At 8:45 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – June 29, 2004
North Asheville Community Center
37 East Larchmont Road
Asheville, N.C.

7:00 p.m. – Community Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and Deputy City Clerk Phyllis Corns

Absent: Councilwoman Terry M. Bellamy

The following topics/concerns were raised by residents and addressed by City Council and City staff: concerns about ongoing drug activity in the vicinity of Claxton Elementary School were raised by representatives of the Claxton Neighborhood Association; the need to close suspected drug houses, particularly on Annandale Avenue, Broad Street and Hillside Street was discussed; an increased Police presence was requested for the Claxton area, as well as assistance from MHO which owns some of properties associated with drug activity; more covert drug enforcement efforts in the area was suggested; a sidewalk was requested along Merrimon Avenue from Burger King to Swannanoa Cleaners for increased pedestrian safety, especially for elderly residents; reasons for the delay in installing a sidewalk at the location were discussed; questions about future plans for reducing traffic congestion on Merrimon Avenue were asked; safety issues at the intersection of Merrimon Avenue and Edgewood Road were brought up, in particular southbound motorists making left-hand turns at the Atlanta Bread Company; questions about the future of the Regional Water Authority were raised, as well as the need for regionalism; questions about the Asset Management Plan and funding for water line replacement and refurbishment ("R&R") were asked; the status of the water agreement renegotiations was discussed.

Mayor Worley adjourned the meeting at 8:08 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 13, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mr. Theodore Hunter Sr., Retired Master Sergeant of the U.S. Army led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF MARO SLAUGHTER, WINNER OF THE "N.C. BUILDING INSPECTOR OF THE YEAR AWARD"

Mayor Worley read the recognized Maro Slaughter with the Building Safety Department as winning the N. C. Building Inspector of the Year Award. She also became the first female to win the award in the 48 years since the Inspector's Association was created.

B. RECOGNITION OF JOHN MIALL BEING NAMED THE 2004 PUBLIC RISK MANAGER OF THE YEAR BY THE PUBLIC RISK MANAGEMENT ASSOCIATION

Mayor Worley read the recognized John Miall, Director of Risk Management, as being named the 2004 Public Risk Manager of the Year by the Public Risk Management Association.

C. RECOGNITION OF CITY OF ASHEVILLE EMPLOYEES IN 13th ANNUAL EXCELLENCE IN PUBLIC SERVICE AWARDS PROGRAM

Mayor Worley read a proclamation recognizing several City of Asheville employees who were winners in their respective categories in the 14th Annual Excellence in Public Service Awards Program. Employees recognized were Tim E. Haynes, Scott T. Burnette, Deborah Bryant, Cheyenne Youell, Jamie Sullivan and Douglas (Mike) Quinones. He thanked each employee for their faithful and loyal dedication in their career of public service.

II. CONSENT AGENDA:

Councilwoman Bellamy asked that Consent Agenda Item F be removed from the Consent Agenda for discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 22, 2004, AND THE COMMUNITY MEETING HELD ON JUNE 29, 2004

B. RESOLUTION NO. 04-144 - RESOLUTION OF INTENT TO CLOSE ROBERTS ROAD EXTENSION AND SETTING A PUBLIC HEARING ON AUGUST 10, 2004

Summary: The consideration of a resolution of intent to close Roberts Road Extension and set a public hearing on August 10, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close to public use as a public street Roberts Road Extension.

Closure of this section of right-of-way will not deny any of the abutting properties a reasonable means of ingress or egress. There are two lots that abut this section of right-of-way. They are identified by PIN Nos. 9657.10-35-4414 and 9657.10-35-6577. All abutting property owners have joined in the petition to close.

City staff recommends that City Council adopt the resolution setting a public hearing for August 10, 2004, to close Roberts Road Extension.

RESOLUTION BOOK NO. 28 – PAGE 294

C. RESOLUTION NO. 04-145- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY TO PROVIDE REGIONAL HAZARDOUS MATERIALS RESPONSE FOR REGION 6

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Crime Control and Public Safety to provide regional hazardous materials emergency response for Region 6.

North Carolina is divided into seven geographical regions for the purpose of hazardous material emergency response. The N. C. Dept. of Crime Control and Public Safety contracts with municipalities across North Carolina to respond into the geographical regions and provide technician level hazardous materials emergency response. The region six area covers from Rutherford County west to the Tennessee Border. Twenty counties comprise the response region.

The City of Asheville has been a regional hazardous materials provider since Fiscal Year 1994-95. The State of North Carolina provides funding that fully supports the operational costs of the program.

Pros: The State of North Carolina provides the hazardous materials response truck, all response equipment and provides for administrative costs of operating the team. In addition, the state funds extensive training for members of the Asheville Fire and Rescue Department to enable us to competently handle hazardous materials emergencies.

The City of Asheville has full use of the truck and all specialty equipment within the City of Asheville. Without the state hazardous materials contract, Asheville taxpayers would need to provide much of resources necessary to properly respond to emergencies within Asheville. With the contract, we have the advantage of the equipment and resources being funded at the state level, rather than at the local level.

Cons: During the ten years that we have provided regional hazardous materials response services, we have not experienced difficulties or disadvantages with the program. Losing this program and the associated benefits would be a negative for the citizens of Asheville.

This program is consistent with the City's Strategic Plan in forming partnerships with other governmental units to provide services.

City staff recommends City Council authorize the City Manager to renew the Regional Hazardous Materials Contract with the N. C. Dept. of Crime Control and Public Safety and Crime Control for Region 6.

RESOLUTION BOOK NO. 28 – PAGE 295

D. RESOLUTION NO. 04-146 - RESOLUTION ESTABLISHING MINIMUM PRICE AND DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS FOR TWO LOTS ON MCDOWELL STREET FROM LIVINGSTON STREET, LLC

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids Disposal Parcels 75A and 75B located on McDowell Street.

Disposal Parcels 75A and 75B are zoned Institutional and comprise 0.21 acres total. Both lots are located on the west side of McDowell Street (PIN Nos. 9648.14-34-7353 and 6494). The two parcels were appraised by Joseph Moore on March 7, 2004, at total value of $33,000. According to the appraisal, the highest and best use is for assemblage. The proposed land use for the subject property in the East Riverside Redevelopment Plan is for assemblage with adjoining property.

Livingston Street, LLC (LS) has submitted a bid to purchase both parcels for the sum of $33,000. LS owns adjoining property improved with medical offices and parking and desires to assemble the subject parcels with the property it owns to provide access and parking for its employees.

Approval of the resolution will establish a minimum price of $33,000 and initiate the sale of the property through the upset bid process as provided in N. C. Gen. Stat. sec. 160A-269.

Planning & Community Development staff recommend City Council adopt a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids Disposal Parcels 75A and 75B located on McDowell Street.

RESOLUTION BOOK NO. 28 – PAGE 296

E. RESOLUTION NO. 04-147 - RESOLUTION ACCEPTING AN EXTENSION OF LANGWELL AVENUE IN WEST ASHEVILLE AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept an extension of Langwell Avenue in West Asheville as a City maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

The City currently maintains Langwell Avenue in West Asheville. A developer has extended this street to provide affordable housing. The extension to Langwell Avenue is approximately 0.02 miles with an average paved width of 18 feet. The City will only maintain to the end of the curb. The remainder of the paved roadway will be a private driveway. Engineering Department staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, the extension to Langwell Avenue will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

City staff recommends City Council accept the extension of Langwell Avenue in West Asheville as a City maintained street.

RESOLUTION BOOK NO. 28 – PAGE 297

F. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES

This item was removed from the Consent Agenda for discussion.

G. RESOLUTION NO. 04-148 - RESOLUTION SETTING A PUBLIC HEARING FOR THE ADOPTION OF AN ORDINANCE TO CLOSE AND VACATE THE DWELLING LOCATED AT 1086 HENDERSONVILLE ROAD

Summary: The consideration of a resolution setting a public hearing on July 27, 2004, for the adoption of an ordinance to close and vacate the dwelling located at 1086 Hendersonville Road.

The dwelling at 1086 Hendersonville Road (PIN 9656.05-08-6459) is a wooden structure containing nine dwelling units. Since December of 1998, following the first complaint, City staff has repeatedly worked with the property owners to bring the dwelling into compliance with the Housing Code, to no avail. To date, the dwelling remains in non-compliance with the Housing Code.

A hearing was held on November 19, 2003, and an Order issued to the owner to render all nine dwelling units compliant with the Housing Code by February 2, 2004. The owner failed to comply with the Order and to date has not completed the required electrical repairs. In addition, with clear notice that they were renting the dwelling units in violation of the Housing Code, the owners exacerbated their non-compliance by renting the unfinished and un-permitted basement.

Prior to the Housing Code Coordinator proceeding to enforce the Housing Code by causing the dwelling to become vacated and closed, an Ordinance must be adopted by City Council ordering such.

Staff recommends adoption of a resolution setting a public hearing on July 27, 2004, to consider an ordinance ordering the dwelling located at 1086 Hendersonville Road vacated and closed until brought into compliance with the City's Housing Code.

Housing Code Enforcement Officer Jeff Baker responded to questions from Councilwoman Bellamy about the process to date and if every effort has been made to work with the owners of the property.

RESOLUTION BOOK NO. 28 – PAGE 299

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

ITEM ON THE CONSENT AGENDA PULLED FOR DISCUSSION

RESOLUTION NO. 04-149 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

For the past few years, Buncombe County has required the City to pay for animal shelter services through the Asheville Humane Society who has contracted with the County to run the animal shelter. On June 29, 2004, the City approved the budget for Fiscal Year 2004-2005 and in that budget approved $121,000.00 to pay for shelter services. The City and the Humane Society need to enter into an agreement for shelter services for the term of July 1, 2004, through June 30, 2005.

Advantages to the contract: The City of Asheville will continue to partner with Buncombe County, taking the opportunity to continue utilization and support of one consolidated animal shelter serving all citizens of Buncombe County. In addition, the City is not forced to own and operate its own animal shelter facility due to this arrangement.

Disadvantages to the contract: The City is continuing to subsidize Buncombe County's Animal Shelter program, by paying for animals taken to the shelter facility by Asheville City residents. Buncombe County government currently pays for this service for citizens in unincorporated areas of the county, which to some, may be viewed as an inequitable level of service.

City staff recommends the adoption of the resolution for animal shelter services for the term of July 1, 2004 through June 30, 2005.

Assistant City Attorney Curt Euler responded to various questions from Councilwoman Bellamy, some being, but are not limited to what are the service hours on the weekends for the shelter, how long have we had an agreement with the Humane Society and how is the City's relationship with the Humane Society.

Discussion surrounded the City of Asheville residents (who are also County residents) paying a fee to take animals to the shelter, while Buncombe County government pays for this service for Buncombe County residents.

Vice-Mayor Mumpower and Councilwoman Bellamy felt that the City should only enter into the agreement for a 30-day period in order to give the "political powers" to meet and discuss this inequitable issue with the County. They felt that if we enter into a year contract, there would be no incentive or negotiation tool for Buncombe County to discuss this issue.

City Attorney Oast explained that the agreement does have a 30-day termination notice.

Mayor Worley explained that our disagreement over the fee is with Buncombe County and the agreement is with the Asheville Humane Society. Therefore, he felt it would be appropriate to enter into the contract with the Humane Society and discuss the fee with Buncombe County

City Manager Westbrook said that he would get Council information on how many animals the City of Asheville takes to the shelter.

Councilman Davis moved to adopt Resolution No. 04-149, with the understanding that the Mayor will discuss this issue (and other issues already pending) with Buncombe County. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Vice-Mayor Mumpower and Councilwoman Bellamy voting "no."

RESOLUTION BOOK NO. 28 – PAGE 301

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ADOPTION OF AN ORDINANCE DIRECTING THE DWELLING LOCATED AT 86 CRAYTON ROAD BE DEMOLISHED

Mayor Worley announced that 86 Crayton Road has been demolished and the public hearing will not be held.

B. PUBLIC HEARING TO CONSIDER THE CLOSING OF NELSON STREET

RESOLUTION NO. 04-150 - RESOLUTION PERMANENTLY CLOSING NELSON STREET

Mayor Worley opened the public hearing at 5:46 p.m.

Assistant Public Works Director David Cole said that this is the consideration of permanently closing Nelson Street. The public hearing was advertised on June 18, 25, July 2 and 9, 2004.

N. C. Gen. Stat. sec. 160A-299, grants cities the authority to permanently close streets and alleys without regard to whether they are public, private or have actually been opened.

Pursuant to said statute, the property owners adjoining Nelson Street have requested the City to permanently close Nelson Street to public use. The property owner would like the street closed for better access to his building.

Closure of Nelson Street will have no impact on the ingress and egress for any of the abutting properties. There are six lots that abut this section of right-of-way. There is an easement reservation for BellSouth. They are identified as PIN Nos. 9648.09-05-4512; 9648.09-05-3847; 9648.09-06-3004; 9648.09-06-3216; 9648.09-06-4488 and 9648.09-05-7718.

City staff recommends City Council adopt a resolution permanently closing Nelson Street.

Mayor Worley closed the public hearing at 5:48 p.m.

Upon inquiry of Councilman Newman, Mr. Cole said he didn't feel there would be any access problems to the adjoining City of Asheville property if they decided to develop it.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-150. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Newman voting "no."

RESOLUTION BOOK NO. 28 – PAGE 302

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 27 CATAWBA STREET FOR THE CONSTRUCTION OF A QUADRAPLEX RESIDENTIAL BUILDING IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3136 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 27 CATAWBA STREET FOR THE CONSTRUCTION OF A QUADRAPLEX RESIDENTIAL BUILDING IN AN RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Councilman Davis moved to excuse Mayor Worley from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Mayor Worley relinquished the meeting to Vice-Mayor Mumpower.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Vice-Mayor Mumpower opened the public hearing at 5:55 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Heard said that this is the consideration of the issuance of a conditional use permit for property located at 27 Catawba Street for the construction of a quadraplex residential building in an RS-8 Residential Single-Family High Density District.

The property owner (W-G Ventures, LLC) has requested a conditional use permit for property at 27 Catawba Street. The property is located within the City limits on the south side of Catawba Street west of Broadway Street (City Exhibit 3 – Location Map). Surrounding land uses and zoning include the City's mulch pile to the north and vacant property to the east zoned RS 8, residential and vacant property zoned RS 8 and RM 6 respectively to the south, and residential property zoned RS 8 to the west. Access to the property is from Catawba Street near its intersection with Broadway Street (City Exhibit 3 – Aerial Photo).

There is currently one single-family residence located on the western edge of the property (City Exhibit 4 – Site Plan; and City Exhibit 3 – Elevation Drawing).

The Technical Review Committee (TRC) reviewed the proposed site plan and recommended approval with conditions. The applicant has revised the site plan to address a number of the conditions, but some conditions are still outstanding.

The Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case:

1. That the proposed use or development of the land will not materially endanger the public health or safety;

The project received conditional technical approval from the Water Resources Department, the Fire Department, MSD, Engineering, and other City Departments. The project must meet the technical standards set forth in the Unified Development Ordinance (UDO), the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant;

The project must comply with all City standards in regards to maximum clearing and grading and erosion control.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property;

The UDO requirements and the physical design of the structure help to assure that the building fits within the single-family neighborhood surrounding it. Staff has also determined that the additional traffic generated will not adversely impact the existing road conditions or capacity.

4. That the proposed use or development of the land will [illegible] in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located;

Within the surrounding neighborhood there is a range of different building footprint sizes. The footprint of the proposed building falls within this range. The proposed building is two stories in height as are some of the homes in the area. The building also contains only one entrance on its front elevation, as required by the UDO and parking for the building is also located to the rear and will be screened by a mix of trees, shrubs, and fencing. These components help mask the multi-family nature of the structure.

5. That the proposed use or development of the land will generally conform with the Comprehensive Plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City;

The proposed development will comply with all applicable UDO and Standards and Specifications requirements, as well as any of the City's other plans and policies. The project will also help meet one of the City's Smart Growth policies, providing higher density residential infill development.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities:

The project received technical approval from the TRC, which includes representatives of the Water Resources Department, MSD, Engineering, the Fire Department, and Public Works.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The project was reviewed by the Engineering Department during the TRC process and it was determined that the existing roadway conditions and capacity were sufficient to handle any sort of increase generated by the proposed use.

Advantages (Pros) of the proposed development:

- The proposed quadraplex provides a higher density residential use in close proximity to the Reed Creek Greenway and Broadway Corridor.
- The building is designed to resemble a large, single-family residence, rather than a quadraplex.

Disadvantages (Cons):

- Due to the location of the stream on the property, parking for the proposed quadraplex must be located closer to the road and is more visible to passers-by.

In consideration of the above and the adjoining zoning and land uses, the proposed conditional use permit appears to be consistent with the intent and purpose of the UDO.

Staff recommends approval and issuance of a conditional use permit with the following conditions (1) All outstanding TRC conditions are addressed and detailed plans are reviewed by TRC after approval by City Council; and (2) Parking areas do not encroach into setbacks.

Mr. Gerald Green, representing the developer, spoke in support of the project and that they have tried to design the unit to fit in Montford Historic District even though it is outside the district. They are not sure at this time what the rental rate will be; however, they do hope to keep them in an affordable range.

Ms. Katia Seminole, area resident, spoke in opposition of the quadraplex. She felt the property was too small for a quadraplex. She pointed out that Catawba is a narrow street, with no sidewalks. She said Catawba Street is used frequently by residents in the north part of Montford to get to Merrimon Avenue. She felt that there will be probably 12 people in the entire unit and there are only 7 parking spaces on the property with no room for on-street parking. She also felt the sign posted on the property advertising this meeting was too small and that she had to get out of her car to read the notice.

Ms. Susan Jones, resident on Catawba Street, said that she was not notified by the City of Asheville of this meeting. She agreed there is a lot of traffic on Catawba and no place for on-street parking.

After rebuttal, Vice-Mayor Mumpower closed the public hearing at 6:10 p.m.

Upon inquiry of Councilman Dunn, Mr. Green said that there is no room for on-street parking, however, he was willing to add another parking space on the property, however, it will require some landscaping to be deleted. He pointed out that they wanted to preserve some green space at the beginning of Montford and not have a parking lot as an introduction into historic Montford.

When Councilwoman Jones asked if the developer might be willing to reduce the number of units from 4 to 3 to accommodate parking, Mr. Green said that given the choice, from a financial standpoint, they would prefer to add additional parking on the property. He felt that some of the residents will chose to use alternative uses of transportation, like bikes and walking to their destinations, due to the location of the property.

Councilwoman Jones asked what the traffic plan will be on Catawba once the Health Adventure is built across the street from this property. Mr. Heard said that since they have had no formal submittal from the Health Adventure it would be premature to make any assumptions and that the City's Traffic Engineer will have to review the project.

Regarding parking, Councilwoman Bellamy questioned the topography of the area across the street where the City's mulch pile is located.

Mr. Heard clarified the parking space allowance by saying that 8 parking spaces would be the maximum allowed under the UDO on the site. The developer could go above that if the parking provided was of a pervious material.

Councilwoman Jones supported this project and hoped that in the future there would be more research done regarding traffic and parking. She also challenged developers to build well-built multi-family units in all neighborhoods throughout the City.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3136, granting a conditional use permit for property located at 27 Catawba Street for the construction of a quadraplex residential building in an RS-8 Residential Single-Family High Density District, subject to the following conditions: (1) All outstanding TRC conditions are addressed and detailed plans are reviewed by TRC after approval by City Council; (2) Parking areas do not encroach into setbacks; and (3) There be at least 7 off-street parking spaces, with allowance of an additional one without further Council approval. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 239

At 6:30 p.m., Mayor Worley formally took over the meeting from Vice-Mayor Mumpower.

D. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF TWO LOTS LOCATED ON FORSYTHE STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/ CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR THE CONVERSION OF AN EXISTING CHURCH TO A FOUR UNIT APARTMENT BUILDING

ORDINANCE NO. 3137 - ORDINANCE REZONING TWO LOTS LOCATED ON FORSYTHE STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/ CONDITIONAL USE

ORDINANCE NO. 3138 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR TWO LOTS LOCATED ON FORSYTHE STREET TO ALLOW FOR THE CONVERSION OF AN EXISTING CHURCH TO A FOUR UNIT APARTMENT BUILDING

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:31 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Designer Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of a request from the owners of the property (Jason Eller and Vanessa Cram) to rezone two lots located on Forsythe Street from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Use; and the issuance of a conditional use permit to allow for the conversion of an existing church to a four unit apartment building (City Exhibit 3 -- Location Map and Aerial Photo).

The 2025 Asheville City Development Plan recommends for the Broadway area north of the Central Business District to become a mixed-use higher density neighborhood corridor. In addition within walking distance to the project site along the Merrimon Avenue corridor, is noted as a likely site for an urban village type of development. Little change is noted for the neighborhoods off of these primary corridors except that the 2025 Plan notes the need to provide a mixture of housing types to serve varied residential needs of the community. Finally, the 2025 Plan recommends the adaptive re-use of older structures as a tool for preservation and renewal in neighborhoods.

In 2002, properties along Broadway Street one block from this project were zoned to the newly created Neighborhood Corridor District. The property is located within the City limits in the central area of the City. The site is the former site of the Johnson Memorial Church, which has replaced this structure with a new one across the street from the subject properties.

The area surrounding the subject properties in all directions are zoned RS-8, residential single-family high density. This area includes single-family uses save the church use on Forsythe Street.

310

The project proposes the conversion of the former church sanctuary and classrooms to four residential units. The plans do not illustrate the expansion of the existing buildings (City Exhibit 3 – Site Plan). In addition the plans portray retaining the existing steps and ramp into the building for access. As proposed under RM-16 zoning, the size of the lot would only need to be .25 acre. At .33 acre, the 2 parcels provide additional space on the plan for open space. The plan as proposed includes 7 parking spaces but a handicapped accessible space may be required so the parking area could be rearranged. The planting plan illustrates some parking area landscaping, some street trees and required bufferyards. Staff is proposing to work with the developers to come up with a landscaping proposal while acknowledging the somewhat restricted space for the project. Outstanding issues identified during the Technical Review Committee (TRC) review are also proposed to be conditions of the approval. No other environmental or safety concerns were noted for the project (City Exhibit 3 – Elevation Photos).

RS-8 Zoning District is developed to provide areas for high density single-family residential uses where the infrastructure is in place to support this type of development. A limited number of other non-residential uses are allowed to support a residential neighborhood.

RM-16 Zoning District is developed to set aside areas for high density multi-family uses with a broad range of housing types. RM-16 also allows other non-residential uses including limited institutional, public and commercial uses appropriate within high density residential areas.

Because this is a conditional use rezoning, if approved, the only use of the site that would be allowed would be the four residential uses as proposed in this plan. Deviating from the plan would require a modification of the conditional use permit following an approval process similar to what we are undertaking now.

City Council must take formal action as set forth in section 7-9-9(c) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)).

1) **That the proposed use or development of the land will not materially endanger the public health or safety.** The project has been reviewed by the Technical Review Committee (TRC). The project will have to meet State Building Code requirements before the building can be occupied for apartment use. No other safety concerns were noted.

2) **That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** Since the project is using an existing site there will be minimum changes to the natural or topographic features of the site.

3) **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The project is not expected to injure the value of adjoining or abutting properties. In fact, the conversion of the existing, vacant church building to apartments would likely improve the appearance and maintenance of the site, which should have a positive impact on the surrounding neighborhood

4) **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The project is proposing to adaptively re-use existing structures with no building expansion. The project is in harmony with the scale, bulk, coverage, density and character of the area or neighborhood.

5) **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project will provide housing that is needed in the community and matches goals from the City Plan 2025 to provide a variety of housing types at a variety of prices in neighborhoods throughout the City. In addition adaptive re-use of existing structures is also encouraged in the plan.

6) **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Requirements of utility providers will be met for this project. An Asheville Transit route travels within a block of this site.

7) **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** This project was considered at the TRC and it was felt that traffic would not be negatively impacted by this small project.

PROS:

- Provides a mixture of housing types in the community.
- Provides for the adaptive re-use of an existing structure to a use that complements the neighborhood.
- The proposed project requires a minimal visual change in the neighborhood.

CONS:

- Adds a multifamily project to a single family neighborhood (a potential plus)

Staff recommends approval of the rezoning request. The Planning and Zoning Commission, at its June 2, 2004, meeting voted to recommend approval of the request with outstanding TRC being addressed.

Mr. Gerald Green, representing the developer, spoke in support of the project. He said the developers want the property to retain the character of the church that was built in the 1920's. He explained the parking and that they are talking with the church across the street for shared parking.

Ms. Jan Howard, Kenilworth resident, spoke in support of the project in that the developers have done an excellent renovation on her street.

Mr. Fred English, East Asheville resident, questioned if the units will be affordable housing.

After rebuttal, Mayor Worley closed the public hearing at 6:48 p.m.

Upon inquiry of Vice-Mayor Mumpower, Mr. Green explained what they have done to address the concern of a neighbor regarding car lights exiting the off-parking parking.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3137, to rezone two lots located on Forsythe Street from RS-8 Residential Single-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Use. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 244

Councilman Newman moved for the adoption of Ordinance No. 3138, granting a conditional use permit on two lots located on Forsythe Street in order to allow for the conversion of an existing church to a four unit apartment building, subject to the following conditions: (1) All outstanding TRC conditions being met. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 246

At 6:55 p.m., Mayor Worley announced a short break.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 04-151 - RESOLUTION AUTHORIZING AMENDMENTS TO THE ARENA LICENSE AGREEMENT WITH THE NATIONAL BASKETBALL DEVELOPMENTAL LEAGUE

Civic Center Director David Pisha said that this is the consideration of a resolution authorizing the City Manager to enter into an agreement with the National Basketball Developmental League (NBDL). The previous NBDL contract provided that the NBDL could extend the agreement for an additional seven years. They chose not to exercise that option but instead requested some revisions to the agreement.

As the City entered into contract renegotiations with the NBDL, the overriding philosophy employed was that any changes made would not detrimentally affect the City regarding the financial bottom line of the contract.

The NBDL requested that the rental of the arena be lowered from $5,260 per game to $4,500, representing a reduction of $760 per game. All other NBDL cities were requested to lower per game rent. The rent for the upcoming season has been set at $4,500 per game versus last season's per game rent of $5,260, resulting in an annual revenue loss of $17,480.

In order for the City to capture this loss revenue in per game rent, the following changes were negotiated, so that when added back cumulatively, more than make up for the reduction in per game rent.

In the previous agreement, the City collected certain ancillary revenues. These included concession profits, facility fees and suite and signage commissions. However, a provision in that prior agreement allowed the NBDL to receive any of the City's ancillary revenues until the City's share of those revenues exceeded $75,000. That provision no longer applies in the new agreement. As result, based on last season's numbers, projections suggest approximately $13,500 in additional revenue to the Civic Center from concessions, facility fees and suite and signage commissions.

Finally, in the new agreement, the NBDL also agreed to begin paying for certain concession labor charges, saving the City at least $2,000 per year. They have also agreed to pay for any equipment charges that may result in a cash payment by the City to a third party supplier, thus saving the City further monies that when added cumulatively, should insure the City retains equivalent revenue earnings as reflected in the prior contract.

Advantages to approving NBDL contract:

- The City is now able to share in the first dollar of any ancillary revenues, thus, when combined with other minor revisions noted above, will make up the differential in per game rent reduction, thus ensuring revenues equal to those in the previous contract.

- If the NBDL sees any improvement in either attendance or ancillary revenues in the upcoming season, the City stands to benefit more financially than under the previous contract.

- The City now has the ability to severe the contact on a yearly basis, just as the NBDL. Under the previous contract, only the NBDL could severe the contact during the three (3) year period.

Disadvantages: None noted.

City staff recommends City Council authorize the City Manager to sign the new NBDL agreement.

Vice-Mayor Mumpower asked if the Civic Center Commission had reviewed the contract. Mr. Pisha replied that they had not reviewed the final agreement, however, they were apprised that negotiations were on-going with the NBDL and there was a timing problem. Vice-Mayor Mumpower said that he would vote in favor of this good agreement, however, in the future he will not vote in favor of any action if the Civic Center Commission did not participate in the decision-making process. He felt that we have this advisory Commission and we need to use them, along with their liaison Councilman Davis.

Councilwoman Bellamy publicly thanked Alfred White, Altitude Team President, for his outstanding service to the Asheville community and the tremendous commitment to the community and the NBDL.

On behalf of City Council, Mayor Worley also thanked Mr. White and welcomed Mr. Rudy Bourg who will be replacing Mr. White.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-151. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 304

VI. OTHER BUSINESS:

A. I-26 CONNECTOR

Councilman Newman asked Council to allow a short presentation by Mr. Michael Moule and Dr. Joseph Passonneau, technical experts, regarding the I-26 Connector. He said that in 2002, the Metropolitan Planning Organization (MPO) Transportation Advisory Committee (TAC), who had Council representation by former-Councilman Brian Peterson and Councilwoman Jones (now Vice-Mayor Mumpower and Councilwoman Jones), made a decision to approve the traffic predictions available at that time, which predicted traffic volumes on the Connector of around 140,000 a day, but the N.C. Dept. of Transportation (NC DOT) was working on a new traffic model which was completed in 2003 which predicted significantly lower traffic volumes. The TIA made a recommendation in 2002 to support an 8-lane alignment based on the information they had at the time. But the staff's recommendation, which was approved by the TAC, was to re-visit the issue if the new traffic model showed significantly different numbers. Since the number have come back at a much lower level than original predictions, the NC DOT will be holding a public hearing on July 14, 2004, to get community input and give the community an opportunity to ask questions about the project. On July 15, 2004, the MPO will be holding their monthly meeting, but their agenda does not include any action on this issue at this time. He felt this presentation may have some information that could be helpful to City Council in understanding what the new traffic model means for the future of the Connector and what may be the best way to move the project forward.

It was Mayor Worley's understanding that Mr. Moule, who works in Tampa, Florida, will not be in town next week, so Council wouldn't have the opportunity to hear his presentation.

Vice-Mayor Mumpower objected to the presentations on the basis of timing. He said Council is being placed under tremendous political and personal preference pressures to address what is a technical decision. He would have a hard time hearing presentations from one side during a televised meeting over an issue that is not on our agenda. He felt to have these presentations at Council's next worksession, like we normally would and should do, would be great. But to adapt our agenda to hear from one side, he would argue procedurally is not appropriate.

Councilwoman Jones supported Councilman Newman because valiant efforts were made to have to the NC DOT representatives at this meeting and she was truly disappointed they were not here to respond to Council. City Council is working hard to obtain data and to not hear from the intelligence we have is not doing a service to Asheville.

Mayor Worley did say that the City did not ask the NC DOT representatives to attend this meeting until the middle of last week and since they have several people involved in their presentation that are essential to their public presentation tomorrow, they could not be here due to scheduling conflicts. He did say that the NC DOT was prepared to have someone at this meeting to answer questions but not to give the presentation. After talking with them yesterday, it was decided that that really wasn't in the best interest to not be able to receive the presentation and yet give the appearance of getting information from them.

Vice-Mayor Mumpower did say all of Council wants to make the most informed decision we can. The idea of learning from as many people as we can makes sense. He just has concern with the procedure by which we are doing that. There is a danger of further politicizing this decision, which just clouds the issue further. He did state that some of the pressures to get to this tonight have changed, in that the TAC is not likely to vote on this matter for another month, so we have plenty of time to learn and deliberate and try to find the best way to move forward.

Mr. Michael Moule, Principal Transportation Engineer from Tampa, Florida, and former City of Asheville Traffic Engineer, gave a brief presentation based on traffic analysis to City Council supporting why he fells that 6 lanes is adequate for the I-26 Connector. He reviewed different charts containing information about level of service A-F and 6 vs. 8 lane capacities. He then showed Council samples of large cities with no freeways greater than 6 lanes, including Portland, Oregon, and Santa Barbara, California. In addition, he stated five cities that have or are removing majority highways.

Dr. Joseph Passonneau, professional in highway engineering, briefed Council on his achievements to date stating that he designs roads and the important point is that automobile traffic damages the corridors it goes through. Secondly, if citizens are not involved from the beginning to the end, projects will not be successful.

Mr. Moule and Dr. Passonneau then responded to various questions from Council, some being, but are not limited to: what is the loss of travel time between a 6 lane vs. an 8 lane; how much land will be needed for 6 lanes vs. 8 lanes; has the NC DOT prepared an analysis of the impact of the residential properties which would have to be displaced; are bike lanes factored into Mr. Moule's analysis; and is the character and beauty of an area factors to consider when transportation planners design projects.

Upon inquiry of Vice-Mayor Mumpower, Mr. Moule said that he would be happy to make his presentation to the TAC if allowed.

At Councilman Newman's request and City Council's consensus, the Mayor asked the City Manager to place this item on the next Council worksession agenda.

B. RECOGNITION

Vice-Mayor Mumpower thanked several people for their work with the Hillcrest community midnight basketball activity, which is a project associated with the overall For Our Kids Program, which he and Councilwoman Bellamy share responsibilities in.

C. CLAIMS

The following claims were received by the City of Asheville during the period of June 11-24, 2004: Sammy Smith (Water), Guillermo M. Ortiz (Streets), Marc Micek (Streets), Casey Holfolter (Fire) and Terry Roegge (Civic Center).

The following claims were received during the period of June 25-July 8, 2004: Gregg Matia (Sanitation), Malvern Hills Park (Parks & Recreation), Robert W. Oast (Sanitation), Marie McDonald (Streets), Civic Center (Civic Center) and Dicie L. Hart (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

The following residents encouraged City Council to take a strong role in representing their concerns about the proposed 8 lanes and not to underestimate what the I-26 Connector would mean for the City and the region: Brian Peterson, Andy Euston, Louis Langford (President of the West Asheville Business Association), Bill Boeheim, Lula Heetderks (President of the West End/Clingman Avenue Neighborhood), and Ms. Kathleen Riddle.

Ms. Sharon Tabor and another resident of the St. Dunstan's neighborhood, shared with Council pictures and asked City Council to reverse their decision to not perform a zoning study the St. Dunstan's Road area in May 2004. and to authorize the Planning Department to proceed with the study to reduce the current zoning of St. Dunstan's Circle, St. Dunstan's Road and Grindstaff Road from the current zoning of RS-8 to RS-4. This request is based on several reasons, including the safety of neighborhood children which has increased +500 in three years; traffic and safety hazard for residents; mentally handicapped residents in group homes who wander away; current lot sizes; and the topography of the area. She said that 68% of the residents are in favor of the RS-4 designation.

Mr. Mike Fryar said that all businesses have to have a permit to do business in Asheville, all except for drug-dealers.

Ms. Leslie Kulba thanked City Council for paving and replacing sidewalks.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:31 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 20, 2004 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Next Community Meeting – August 31, 2004, East Asheville Community Center

Approved Purchase of Property on Pinner Road for the Asheville Regional Airport Authority

Summary: The consideration of a resolution accepting an Offer of Sale of Land from Grace Henninger for land off Pinner Road for $111,321 for the Asheville Regional Airport Authority.

The property off Pinner Road is located adjacent to and west of the Asheville Regional Airport in a neighborhood with a mix of site built and manufactured homes and somewhat rural character. It is generally rectangular in shape and contains 5.859 acres. It is level to moderately rolling and wooded. Pines are the predominate trees typical of farm land left fallow for a number of years. Its highest and best use per the appraisal is low density residential as permitted by the zoning (Limestone, R-LD). It is proposed to be acquired for future expansion of the Airport. The property will be paid for by the Airport and will be included in the Airport master lease.

The property was appraised by Richard Smith, SRA, and reviewed by Joseph Moore, appraiser at $108,500. An offer in that amount was conveyed to the owner, Grace Henninger and Mrs. Henninger responded with an offer to sell the property at $111,321. Ed Vess, Real Estate Manager, reviewed the appraisals and recommended that the offer be accepted and fair market value be established at $111,321 based on the offer to sell being within 3% of the appraisal and review and the efficiency of a prompt agreement.

The positive aspects of the proposed acquisition are:

1. Offers the opportunity to acquire land within the projected Airport expansion area while it is undeveloped.
2. The savings realized in not having to pay for potential improvements and relocation of occupants later on will offset the cost of the property.
3. It is a voluntary sale at fair market value.
4. It gives the Airport control of the property to ensure that no incompatible use occurs.
5. Will expedite the process when expansion of the Airport occurs in that one less property will have to be acquired.

The negative aspects are:

1. Removes property from the tax base.
2. Removes residential land from the market.

Approval of the resolution will establish $111,321 as the just compensation for the property and accept the Offer of Sale of Land from Grace Henninger for that amount.

City staff and the Airport Authority recommend adoption of the resolution accepting an Offer of Sale of Land from Grace Henninger for land off Pinner Road for $111,321 for the Asheville Regional Airport Authority.

Set Public Hearing on August 24, 2004, to Close Unnamed Alley off South French Broad Avenue

Summary: The consideration of a resolution of intent to close an unnamed alley off South French Broad Avenue and set a public hearing on August 24, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close to public use as a public street an unnamed alley off South French Broad Avenue.

Public Works Department staff has researched and determined that this alley is not a City maintained street. Closure of this alley will not deny any of the abutting properties a reasonable means of ingress or egress. There are six lots that abut this section of right-of-way. They are identified by PIN Nos. 9648.05-29-1708, 9648.05-29-0747, 9648.05-29-0716, 9648.05-29-0668, 9648.05-19-9786 and 9648.05-19-9645. All abutting property owners except Bost Bakery (9648.05-19-9645) have joined in the petition to close.

City staff recommends that City Council adopt the resolution setting a public hearing for August 24, 2004, to close an unnamed alley off South French Broad Avenue.

Offer to Purchase Property at the Corner of Wyoming Road and Keebler Road

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property at the corner of Wyoming Road and Keebler Road in the Kenilworth community.

A bid has been received from Innova Homes LLC in the amount of $4,400 for the purchase of land at the corner of Wyoming Road and Keebler Road in the Kenilworth Community.

The land at the corner of Wyoming Road and Keebler Road is an irregular triangle shaped residential zoned lot comprising 0.07 acre±. From street grade it slopes up substantially to the rear property line and is covered with non-significant trees, vines and brush. The size, shape and topography render the lot unsuitable as a home site. The subject parcel is a remnant of property acquired at the time Wyoming Road was improved several years ago and is situated diagonally across from the park. The tax value is $4,400. The bid from Innova Homes LLC, owner of an adjacent parcel is in the amount of $4,400. Innova proposes to construct a house on the adjacent property for sale. The proposed construction is consistent with the Strategic Plan policy of encouraging infill development.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A non-buildable lot will be assembled with an adjoining parcel to provide a more coherent land use pattern

5. The sale of this lot to Innova, while not essential to the proposed infill development, will enhance the development by improving the access.

Planning & Development staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

Solicitation of All Formal Bids by Electronic Means

Summary: The consideration of a resolution authorizing City staff to solicit invitations for all formal bids by electronic means.

The City of Asheville has invited the solicitation of bids by advertising same in the Asheville Citizen Times for a number of years. Such legal advertisements are expensive and lately have only generated low interest. A few years ago, the N. C. General Assembly amended N.C.G.S. §143-129, to allow cities to use electronic means to advertise for bids without also having to advertise same in a newspaper of general circulation. A number of cities currently advertise their formal contracts exclusively by electronic means and Asheville desires to join those cities.

The positive aspect of advertising by electronic means is that it reaches the same intended audience as newspaper advertisement at a substantial reduction in cost.

The negative aspect of advertising by electronic means is that it only reaches those who are electronically connected.

City staff recommends approval of the resolution authorizing City staff to solicit invitations for all formal bids by electronic means.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place these items on the next formal City Council agenda.

FOREST MANAGEMENT PLAN

Mr. David Hanks, Interim Water Resources Director, said that the forestry management study was the result of an airplane crash in the watershed area in 2002. Due to the overgrowth within the watershed and inaccessibility of roads it was extremely difficult for fire and rescue workers to reach the downed airplane. This prompted the City of Asheville and Town of Black Mountain fire chiefs to request accessibility and maintenance of the watersheds to be looked at. This included looking at the potential for fire and fire fighting ability within the watershed based upon its current status. It also included concerns of accessing large areas of the watershed where trees were down and overgrowth did not allow for vehicles and/or equipment to be brought in. The forester was given direction that proper management of the forest was the primary concern of the study and to take a comprehensive look at all aspects of the forest and give professional guidance on how the watershed should best be managed. The primary objectives were to maintain the functions of the forest contributing to water quality and to reduce the risk of catastrophic loss by fire, insects or disease to preserve the ability of the forest to function as a watershed.

The Forest Management Plan lists specific items that need to be addressed within the watershed. Many of the recommendations within the plan require additional staff or outsourcing the propose work. This is just the first step in a several step process.

Mr. Hanks said that the forestry management consultant firm of Wildwood Consulting, LLC was hired to take a comprehensive look at all aspects of the North Fork and Bee Tree watersheds, including current state of the forests, including trees, shrubs, underbrush, grassy areas, roads, streams, wildlife in the watersheds and maintenance of the watershed to ensure high quality water is allowed to flow in to the two reservoirs.

Mr. Edward B. Hicks, Forester with Wildwood Consulting, LLC, gave Council a brief summary of the plan for North Fork and Bee Tree Watersheds. He said the primary objectives to the plan is to (1) maintain the functions of the forest contributing to water quality; (2) reduce the risk of catastrophic loss by fire, insects or disease to preserve the ability of the forest to function as a watershed; and (3) provide other such services as may be desirable that are not in conflict with the primary purpose of the watershed. Within the board objectives, more specific objectives included (1) maintain the water quality functions of interception, filtration and retention of rainfall; (2) protect and improve forest health; (3) improve and maintain existing interior access for fire control and emergency services; (4) promote and increase native biodiversity; (5) provide and improve critical habitat for wildlife species such as black bear, ruffed grouse, wild turkey and neo-tropical migratory songbirds; (6) provide sites for re-establishment of the American chestnut; (7) maintain a scenic view from the Blue Ridge Parkway; and (8) generate periodic income from small selective timber harvests.

Mr. Hicks then explained in detail his general recommendations as follows:

WATER QUALITY:

1. ROADS AND TRAILS

First priority is primary roads. Secondary roads are also very important for fire control access, but will require more work. Many are located near streams and frequently cross streams.

- Identify secondary roads important to be maintained as access for fire control, including those not currently utilized, mapped or named and marked on the ground. Identify those roads and trails that should be closed due to poor design or location.
- Upgrade primary and secondary roads where needed with gravel and water control structures. (ditches, broad based dips, crown the road where necessary, locate turnouts well away from stream crossings, gravel approaches to stream crossings, dig sediment traps at existing located turnouts near streams)
- Repair existing bridge structures (replace rotten boards) on primary and secondary roads.
- First priority on secondary road repair is to gravel approaches to stream crossings, repair existing bridges and divert water off of the roads and into the woods away from streams and crossings, where possible. Utilize sediment traps where turnouts are necessary in proximity to streams.
- Seed cut banks and bare soil surfaces with creeping red fescue (CRF) to stabilize soils and slow water on road surfaces. Creeping red fescue is shade tolerant with a low growth habit. Strips of CRF planted on the downhill side of roads at broad based dips will slow water diverted into the woods.
- Bands of creeping red fescue established in the road, angled downhill at 30° toward the outside edge of the road will slow water flow on steep grades and divert water off of the road. An outfall must be provided on the outside edge of the planting to prevent water from re-entering the road.
- In locations where the road is enclosed by steep banks on both sides, heavily seed the entire surface to slow water flow and create an outlet at the first possible location. Steep cut banks should be graded back to a 3/1 slope where possible to allow establishment of a CRF cover. Cut banks are a continual source of erosion and stream sedimentation.

- Close and rehabilitate old roads and trails that are not serviceable due to poor design or location. Grade cut banks back to 3/1 slopes, construct water bars and turnouts and seed road beds and cut banks with CRF.
- Reduce the number of ford type stream crossing crossings where possible. Replace with bridges where possible, or consider closing roads that ford streams but are not necessary for access.

2. STREAMSIDE MANAGEMENT ZONES

Maintain a system of streamside management zones (SMZs) around the reservoirs and along tributary streams. SMZ width should be determined primarily by the slope of the surface adjacent to the water body, and the relative size (category) of the water body. There is a chart in the Plan that indicates suggested SMZ widths based on slope and category. In application, widths may vary, based on factors affecting erosion hazard, such as soil type and area drained.

Management activities allowed within the Primary SMZ are restricted to those necessary to maintain or improve roads, fire pre-suppression or control, and control of invasive exotic species.

Management activities allowed in the Secondary SMZ area include road maintenance, fire pre-suppression or control, invasive exotic species control, single tree selection timber harvest, crop tree release and understory manipulation for regeneration purposes. The primary consideration is to maintain a nearly contiguous canopy. Exceptions may be allowed on a case by case basis as long as water quality is ensured and the variance furthers objectives set forth in the plan.

Outside of the SMZ zones, all of the aforementioned activities may take place, as well as small group selection or such other forest practices as may be deemed appropriate for the watershed.

FIRE CONTROL AND EMERGENCY SERVICES:

Fire pre-suppression efforts should be focused on two issues. The first is ensuring that fire control crews and other emergency service personnel have rapid access to as much of the watershed as is practical and good maps and road signs to find their way around. Current conditions do not meet that need. Secondary roads have bridges with rotting or missing boards and trees are continually falling across roads. Roads exist that are not shown on current maps and bears keep tearing down wooden road signs that identify roads and streams.

The second issue is controlling the spread of invasive exotic species that will, if left unchecked, change the nature of the fire hazard in the watershed. At this point, the hazard is evident, but control is possible. Failure to act soon will have the same effect as failure to attack a wildfire as soon as it is detected. Delay will allow the situation to progress to the point that control is not an option. The consequences may be permanent.

- Place signage at road intersections and named stream crossings identifying road numbers and streams crossed for ease of navigation by fire crews. Consider aluminum or vinyl flat signs, stenciled letters on trees or signs placed on fence posts. Experiment with sign types and placement to find a system that the bears will not tear down.
- Repair existing bridges and add sufficient cover (at least 12 inches) over existing culverts to ensure the culverts will not be crushed.
- Cut trees from the slopes above roads for a distance of approximately 50 feet and any trees below the roads that are leaning toward the road to reduce treefall across the

access roads. Where the ground is level on both sides of a road, only the trees leaning towards the road need to be cut.

- Chinese silvergrass and Nepalese browntop infestations should be treated to control their spread. Both of these invasive exotics have the capability of growing in shaded conditions. They add a flashy fuel component to the forest that will increase the incidence and severity of wildfires if not controlled.

Fire suppression should be closely coordinated with the NC Division of Forest Resources. In the event of a wildfire within the watershed, one employee should be designated to man the gate until all suppression crews have left the watershed.

- A tube of maps should be kept in a location where they are available 24 hours a day for watershed personnel. The person designated for gate duty should take the tube with him and hand out maps to any fire control personnel entering the property. If time permits, the location of the fire should be marked on the maps.
- Helipads should be kept mown and accessible by service trucks. Roads leading to helipads are a high priority to upgrade and maintain.
- Radio frequencies should be compatible between Forest Service radios and watershed radios to facilitate communications

FOREST REGENERATION

A forest regeneration system is important to meet several management objectives. Manipulation of the forest to ensure that northern red oak and white oak are regenerated over time, as opposed to red maple, will preserve and improve habitat for all hard mast dependent species. Creation of small early successional areas will benefit species dependent on soft mast for part of their diet and species dependent on ground cover for nesting sites, browse, forage or cover. These species include black bear, wild turkeys, ruffed grouse and a wide variety of birds. Ruffed grouse will continue to utilize the areas long after they cease providing early successional conditions.

Several forest regeneration systems may be employed to meet the objectives. One system is small group selection. Under the small group selection system, small pockets of timber are harvested to create a number of small openings (.5 to 2 acres, depending on shape and species composition) within a stand. These will comprise 10-15% of the stand. Approximately 10-15 years later, the stand will be revisited and another 10- 15% of the stand will be harvested in small pockets. This process is repeated continually. All of the stand will have been included in a small group by the time 75 to 100 years have passed, but the first areas treated will have 75 to 100 year old trees in pockets throughout the stand. At no time is the canopy removed from more than about 15% of the area in a stand, and that area is scattered all over the entire stand. Different stands are treated each year to provide areas of early successional areas for wildlife and to encourage oak regeneration.

Small group selection will allow oak regeneration to develop within the edges of the stand adjoining the small openings, where light is sufficient for oaks, but inadequate for yellow-poplar. Yellow poplar will probably dominate the center of the small openings on the better sites. The mix of yellow-poplar and oak may help deter gypsy moths if an infestation were to occur. Solid stands of oak are highly susceptible.

Shelterwood cuts offer the opportunity to create two-aged stands. These are beneficial to grouse, bear, white-tail deer and a variety of birds. The trees selected for shelter and the density of the shelterwood can be used to manipulate species composition of future stands.

Regeneration using small clearcuts will also be appropriate under certain conditions. Where advance oak regeneration is present, small clearcuts would allow the regeneration of a site to oak species, while providing important early successional areas for wildlife. Clearcut sizes would be determined by conditions, but anticipated clearcut sizes would be between 5 and 10 acres.

Single tree selection has not been shown to be an effective system for regeneration of shade intolerant species, such as oak, ash, hickory and yellow-poplar, however, individual trees may be harvested to meet other objectives other than regeneration. They may be selected for harvest to manipulate species composition in the overstory and to enhance conditions for mast production, particularly in the secondary buffer zones. It may be useful in crop tree management, where crop trees are selected for masting ability and are favored by removing individual crown competitors to increase the available light to the crop tree.

It is important to maintain as many "tools of management" for use as possible to deal with variable conditions and objectives. No single system is appropriate for all areas.

WILDLIFE MANAGEMENT:

Wildlife management recommendations are based on several objectives and considerations. The Asheville Watersheds have one of the highest densities of black bears in western NC. They act as a reservoir for the species, providing a safe haven for rearing young and vital natural food supplies. Improving the variety, timing and quantity of the food supply will help support the bear population. According to Wildlife officials, bears benefit from a diversity of habitat types, each providing food during different times of the year.

Ruffed grouse populations are in decline in western NC, but they are present in the watershed in small numbers. Improving habitat for ruffed grouse will help ensure their continued presence in the area. Grouse will take advantage of small group cuts, but they are not the beset system for their habitat. The areas are too small to contain home ranges. Clearcuts or shelterwood/two age cuts are far better for grouse.

Neo-tropical songbirds utilize the watershed annually. Some species require early successional habitat for nesting and forage; others prefer the mature closed canopy conditions that are prevalent on the watersheds. Creating a diversity of habitats will benefit a number of species that are not well served by existing conditions. Partial harvests, such as thinnings and shelterwood cuts, help develop mid-stories and under-stories that are beneficial for many songbirds.

Creating some limited areas of early successional vegetation will meet several of these objectives. Grouse will benefit from both early successional vegetation and from the young seedling/sapling stands that will grow out of these areas. The bears and some neo-tropical bird species will benefit primarily from the early successional areas. To maintain the benefit, a few early successional areas should be created every few years.

- The clearing of 50 feet of trees above the access roads will create significant areas of early successional plants. Soft mast production should be high in these areas for several years. The areas should be cleared on about every 10 years
- Mowing the helipads will maintain additional areas. The edges of the helipads already produce sassafras berries, blackberries, wineberries and sumac. The woody species nay need to be cut back every 3 years to prevent tree development in species such as sassafras.
- Small group selection cutting, small shelterwood cuts and small clearcuts will create small openings throughout the lower elevations of the watershed. These systems offer

the opportunity to periodically create new successional areas, replacing those that grow up and close crown. (See Timber Management section)

FOREST HEALTH:

It is worth pursuing asking the US Forest Service or the Park Service to release *Pseudoscymnus tsugae* into the watershed area in an attempt to control the hemlock woolly adelgid populations and preserve the eastern and Carolina hemlocks.

It is highly recommended that existing stands and clumps of Chinese silvergrass and Nepalese browntop be treated for control while that option is still viable. This may be a narrow window of opportunity. The Chinese silvergrass is found in small patches scattered throughout the watershed, as well as extensively in one 10-acre stand in the main valley. The source of infestation is the dam of North Fork Reservoir, which was planted with Chinese silvergrass. Chinese silvergrass is very shade tolerant and highly flammable. Dead stems are retained as new stems emerge, creating a flashy contiguous fuel capable of carrying a hot fire very rapidly through a hardwood forest. On steep slopes, a fire in heavy silvergrass ground cover would be very difficult to stop. The sprinkling of silvergrass throughout the watershed now will become large stands of silvergrass in the future. It is a prolific seed producer.

Monitoring for gypsy moths should be an ongoing effort. This is accomplished using small cardboard traps with pheromone attractant baits.

A plan of action should be in place to deal with a new gypsy moth infestation found within the watersheds. My recommendation is to treat any infestation aggressively with *Bacillus thuringiensis kurstaki* (B.t.k.), a naturally occurring organism found in soils. This organism is utilized by organic growers for control of caterpillar pests in food crops. It has no effect on bees, fish, birds, mammals or water supplies. It is broken down by sunlight and other organisms within 3-7 days after application and does not reproduce or accumulate in the environment. It is only effective on caterpillars that are in their 1st, 2nd or 3rd instar stage (have not molted more than twice). These caterpillars will be less than 5/8 inch long. Timing of treatment is important. Generally, the month of May is the time to treat with B.t.k., preferably early May. The earlier an infestation is treated, the smaller the area will be that requires treatment. This is not a "wait and see" type insect.

There is no action to be taken regarding sudden oak death at this time. Any landscaping planting done around the facilities should be confined native species grown locally. Plants grown outside of the region and sold locally may carry the fungus on the plants or in the soil. Rhododendrons and camelias are potential carriers, but are not the only ones.

The American Chestnut Foundation is very close to producing chestnut trees that have the good characteristics of American chestnut, but with blight resistance. The field along the main road in North Fork Watershed would be an ideal place for out-planting a test plot of the latest progeny. As proven resistant seedlings become available, the watersheds would be excellent places to re-introduce the American chestnut. Members of the Foundation who have contributed to the development of the resistant species will be given a priority in obtaining the resistant seedlings. He recommended that the City join the Foundation and participate in the final phases of research and development. This would involve very little expense, time or intrusion, but would allow the watershed to participate in the early phases of American chestnut restoration. Membership in the American Chestnut Foundation is only $40.00 per year, although a larger contribution would be appreciated.

America chestnuts were once the largest mast producer for wildlife. Their re-introduction would be in line with the goals for both wildlife and forest health.

SCENIC VIEW:

The view from the Blue Ridge Parkway is a consideration in management of the watersheds. The activities recommended in this plan will have a minimal impact on views from the Parkway. Openings created for improved fire control access, for wildlife habitat improvement or tree regeneration will be small enough to be largely screened from view by surrounding trees. Any visible impact that may be discernable will be more than offset by the multiple benefits from the activity.

Mr. Hicks said the specific recommendations will be incorporated into a 10-year schedule of activities. Included in the activities will be an annual schedule for inventory of compartments. Information collected will include species composition, basal areas, volume by product, understory and ground cover conditions, site productivity, fire hazard, road and trail conditions, exotic invasive species and insect and disease assessment.

Mr. Hicks and Mr. Hanks answered several questions/comments from Council, some being but are not limited to: how many of the 22,000 acres would have to be damaged for it to be considered a catastrophic loss; explain the different phases of the plan and what the phases would include; do we have an inventory of bridges; how many miles of roads could adversely impact water quality; is it accurate to say that a watershed entirely forested may produce less overall water quantity but the quantities of water are more consistent; if we proceed with "daylighting," will that create the potential for more problems with exotic species; what is the realistic prospect for a fire in the watershed that has the level of intensity and scale to be a risk of water quality; if there was a large fire, what would that mean for water quality; is our watershed at risk for a fire; explain the difference of small group selection and small clearcutting; if the City wants to promote wildlife, how much clearcutting is envisioned; what kind of vehicles would be used for s fairly small logging operation; is the primary problem of water quality sedimentation more associated with road construction and landing pads for the forestry operations than the forestry operation itself; are we limiting forest activities on the watershed to activities that can be done in the immediate proximity of the roads since we aren't going to build more roads; what would the increase in sedimentation from forest activities mean to the water quality; are fire towers still used for fire prevention; what is the likely herbicide that would be used to treat the Chinese silvergrass and how long would the treatment take; is there a model that duplicates the recommendations made in the Plan; can fire lines be used for small group selection; is there any chance the City can obtain some predator beetles from the U.S. Forest Service; are any recreational activities being contemplated in the plan; has there been any recent biological study or inventory done on the property; what are the long-term prospects to repopulate chestnut in Western North Carolina; can the City carry out the objectives in the Plan under the current conservation easement; and who determines the view of the Blue Ridge Parkway.

Councilwoman Bellamy felt it would be helpful to color-code the primary roads vs. the secondary roads. Mr. Hicks responded that that type of information will have to be coordinated with the fire chiefs because they will be the ones traveling the roads. Mr. Hanks also said that he anticipated maybe 3-4 main roads and then cross-connections.

Upon inquiry of Councilman Newman, Mr. Hick said that the kinds of things in this Plan will not affect water flow or water quality in any way.

Councilman Newman agreed that the City did need to control the Chinese silvergrass and Nepalese browntop while that option is still viable. Mr. Hicks explained that to have an effective management of the problem, a herbicide should be used, but in the sensitive areas along the watershed, hand-pulling would probably be the best solution.

Councilman Newman requested scientific information on what the implications and risks are for fires in our part of the country. He also requested additional information on oak forests being converted into maple forests. He felt it would be useful to have scientific information from an inventory on the biological and ecological resources on the property for long-term management of the property.

Upon inquiry of Councilwoman Jones, Mr. Hicks said the removal of the Chinese silvergrass and Nepalese browntop would be about $300-400 per acre and there is approximately 15 acres total (but scattered throughout the watershed). He noted that didn't include the cost of the hand-pulling that will be required.

Vice-Mayor Mumpower felt it was a good suggestion for the City to join the American Chestnut Foundation in order to participate in the final phases of research and development.

Vice-Mayor Mumpower felt further research might be warranted of other model watershed management plans with recommendations such as the ones proposed before Council.

Councilman Davis said that the Tree Commission supports the proposed plan with the following recommendations: (1) management of the watershed forests is essential; (2) the forest management process should be transparent and accountable; (3) it is unlikely that clear cuts will be necessary to meet the stated objectives of the plan; (4) "daylighting" roads as a method of preserving access should be used sparingly; and (5) revenues generated from harvested timber should be used to offset the cost of the forest management plan.

Councilman Newman explained how the loss of hemlocks is bad for our ecosystem. He suggested adding this as a legislative priority to request our legislators seek more funding to help preserve hemlocks.

Mayor Worley explained that this is not a plan to log the watershed for revenue, but to improve wildlife habitat and access for fire control. This is not a revenue-generated plan. We anticipate taking the small revenue generated and put it into the road system. If the plan is approved, it will still be up to City Council to determine how much, if any, of the selective cutting we will do. City Council will have the opportunity to review each year what they intend to do.

Mr. Rusty Painter, representing the Conservation Trust of North Carolina, reviewed with Council what the conservation easement will allow the City to do with the property. Councilman Newman wondered if there was any need for the City to modify their easement with the Conservation Trust since Asheville was one of the first cities to have this type of easement and now other cities have gone through a similar process. Mr. Painter said that the Trust would like to work closely with the City on management of the watershed. He did state that most of what Mr. Hicks recommended do not conflict with the easement's two primary objections, which are to not impair the view of the Blue Ridge Parkway and to maintain the water quality functions.

City Manager Westbrook asked for Council's approval of the plan to give staff general policy guidance which will allow staff, on an annual basis, to work on parts of the plan, pursuant to the overall policy. If staff gets into a particular area and it needs a specialized study, they would bring that back to City Council for approval before moving forward. Again, the City wants to actively manage the watershed and will come back to Council for interim approvals to do that. He anticipated coming back to Council before the next budget with the first proposal.

Councilwoman Jones said that as we move forward, it is very important for the City to listen to the watershed advocates as well.

Councilman Newman said there have been significant questions what this plan is about. Other than the question of recreation, he questioned if the City really wants to engage in forestry activities on the watershed and if so, at what scale. If there is not going to be any recreation activity on the property, he felt we should just state that there will be no public access. Again, he advocated a biological inventory of the property. He felt there are three different scenarios on how we can look at the management of the property: (1) preservation-type approach; (2) forest activity but in a very limited nature, like keeping roads open, etc.; and (3) open-ended kind of forestry operation. All alternatives are legitimate to consider, but he felt the draft plan is very general and not clear what type of scenario we will be approving.

Mayor Worley said he didn't think we needed any more studies to determine whether recreation should be on the property. We've had a security assessment report and in the present world climate, recreation is precluded in the short-term, but there may be some considerations to change in the long-term. If recreation activities are ultimately allowed, he didn't think it would be inconsistent with the plan. He felt the biological survey is a good idea, but he didn't think that should hold up adoption of the plan. Regarding the extent to which we would engage in forestry activities, he understands that as we would move forward with the plan, and then there would be further study and further approvals before any of those practices are engaged in, if they are engaged in at all.

City Manager Westbrook agreed with Mayor Worley regarding moving forward with the plan. He said that if Council wants a biological survey performed, it should be done prior to Phase I. He said staff will find out the cost and length of time necessary, so we can have that in hand prior to actually getting into whatever Phase I would be.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

At 5:20 p.m., Mayor Worley announced a short break.

DOWNTOWN SOCIAL ISSUES TASK FORCE FINAL REPORT

Ms. Sasha Vrtunski, City Development Director, said that the Downtown Social Issues Task Force has prepared its final report on graffiti and that they will present its final findings on public drunkenness and panhandling in August.

She said the Task Force broke their work up by topics: Graffiti, Panhandling, Public Drunkenness and Homelessness. City Council has already heard the report regarding the 10-year Plan to End Homelessness and taken action.

Plan advantages include: (1) Removal of graffiti within 48 hours has been proven to be a deterrent to graffiti artists and vandals; and (2) These recommendations provide both "carrots and sticks" to combat the problem of graffiti in downtown.

Plan disadvantages include (1) The Volunteer program is quite ambitious and may have to be adjusted over time; and (2) There are some property owners that feel that 48 hours is too short of a time for them to remove graffiti, while at the same time supporting the concept in general.

A letter has been received from the Downtown Commission, which stated that they unanimously voted to support the recommendations of the Task Force. During their discussion, they discussed the 48 hours given to property owners to clean up graffiti. There were some initial concerns, but members were satisfied that the intent is to get graffiti off of buildings as soon as possible, and not to punish property owners. The presence and availability of the volunteer group to remove graffiti right away seems to be a fair alternative for property owners. There was some discussion as to whether or not the 48-hour period should be considered as business hours. There was also discussion of the two-week period for replacing glass when it has been acid etched by vandals. The Task Force felt that as long as property owners were making an effort to have their glass replaced, there shouldn't be any penalties.

Ms. Kim MacQueen and Ms. Kitty Brown, members of the Downtown Social Issues Task Force, said that the Task Force took the approach of recommending stiffer penalties for vandals while reducing the incentive for doing graffiti by asking property owners to remove graffiti within forty-eight (48) hours. This has been a proven approach in other cities; when graffiti is removed within the first 48 hours, the incentive for future vandalism is greatly reduced. In other cities building owners are required to remove the graffiti within the 48-hour period, or be faced with large fines. The Task Force recognized that this could be a large burden on property owners and worked to make the program as easy as possible. In conjunction with recommending such an ordinance, a companion volunteer clean-up group would be set up through Quality Forward to be able to respond to instances of graffiti, where the property owner has signed up to allow them to clean his or her property. This approach has the potential to get graffiti off of downtown buildings quickly with no penalties to building owners.

The Task Force is also recommending that the City install additional kiosks around downtown to provide spaces for flyers; create a website about the graffiti abatement program; support the Asheville mural project; and provide additional street police officers as a deterrent. Finally, the Task Force is also asking that City Council ask the District Attorney's office prosecute offenders to the greatest extent possible and seek full restitution for property owners.

Ms. MacQueen and Ms. Brown then briefly described the following recommendations, along with action steps for each one:

1. We recommend that the City of Asheville, in cooperation with Quality Forward, the Asheville Downtown Association, organizations like Project STEAM and Buncombe Alternatives, private property owners, business owners, and community volunteers, commits to removing *graffiti* within 48 hours after its appearance has been reported.
    - We propose a pilot removal program on a smaller section of downtown to be followed by its implementation throughout the central business district.
    - The program would involve the implementation of a graffiti reporting hotline at Quality Forward which would dispatch a volunteer force of "graffiti busters" to remove reported graffiti within 48 hours.

2. We recommend that the City pass a local ordinance which requires building owners to either remove all graffiti themselves within 48 hours of its being reported or to grant permission for their property to be cleaned by graffiti volunteers.
    - Violations of this ordinance would be enforced with a penalty of $25 a day for each day the graffiti remains after notice to the building owner.
    - In the case of acid etching, the release will allow the volunteers to cover the graffiti etching with a larger geometric etching or allow the owner to opt out of volunteer repair and agree to replace the window glass within 2 weeks.
    - It is also recommended that the City create a low interest loan fund to aid building owners victimized by acid etching who choose to replace their glass.

3. We recommend that the City create a web page describing Asheville's graffiti abatement program with a hot link to Quality Forward's website which would describe their role in the graffiti abatement program.

4. We recommend support of the Asheville Mural Project, a program of public art murals, as a viable deterrent to graffiti vandalism creating opportunities to develop neighborhood ownership and pride.

5. We recommend that the City add five additional round legal posting sites (similar to the library poster kiosk but much smaller) appropriately spaced around downtown in an effort to reduce and concentrate sticker/flyer graffiti

6. We recommend that the City Council issue a resolution to the District Attorney's office requesting:
   - The DA prosecute graffiti offenders, and in particular repeat offenders and acid etchers, to the fullest extent of the law;
   - The DA seek awards of full restitution to property owners for damage;
   - First-time offenders be sentenced to 100 hours of participation in graffiti cleanup and repair under the auspices of an organization like Buncombe Alternatives; and
   - Repeat offenders and acid etchers be required to perform 500 hours of service in cleanup efforts.

7. We support a greater police presence on the street as a deterrent to graffiti and similar forms of vandalism.

8. Upon hearing the interest for a legal graffiti wall during public input sessions, the Task Force suggests the following:

   - The graffiti subcommittee will entertain proposals from individuals who are interested in coordinating such a legal wall. Proposals should include location, monitoring the site (loitering, letter, profanity), maintenance, etc. It is our intention that a legal wall be on private property and be privately monitored and maintained.

   After reviewing proposals, the subcommittee will make further recommendations to City Council regarding legal graffiti walls.

Ms. Brown said the Task Force believes the recommendations submitted constitute a plan of action which can involve all sectors of our community. They support the development of a response to graffiti by which the Asheville community takes an active role, with local government, in discouraging this aggravating and destructive form of vandalism.

Ms. MacQueen explained how the recommendations relate to the entire social issues "program." She said the Social Issues Task Force has made recommendations aimed at discouraging graffiti. It is their hope and intention that the recommended approach also serves as a positive model of community cooperation aimed at solving pressing social issues. They expect the message sent by discouraging graffiti and encouraging community responsibility and cooperation will have a positive impact on all of the conditions and behaviors the Task Force has been asked to address.

Communities can change through the application of negative energy, such as fear, intimidation, repression, destruction, and punishment. Or they can change through exhibitions of mutual respect, responsibility, and consideration for others. Our recommendations require that a sense of collective responsibility to be shared by the citizens of downtown and city government. We believe that in exercising this collective responsibility we should honor the diversity of downtown Asheville. We should also distinguish between positive contributions to that diversity and acts of thoughtless self-indulgence. Acts like graffiti vandalism serve only to divide the community.

Ms. Brown said that graffiti contributes to a perception of uncaring neglect that some take as permission to further damage our community. This abuse can take the form of everything from littering to blocking elderly pedestrians on city sidewalks to public drunkenness. If we as a community set higher standards, we create an environment wherein people recognize their best behavior is expected and appreciated.

The Asheville Mural Project, as part of our graffiti abatement program, can help communicate values of respect and affection for place, creativity, tolerance, and beauty. It was included as part of our recommendations because we believe that a project such as this can foster the community spirit, pride and involvement that brings a community together. We do not want to alienate our young people. Channeling their expression into public art projects is an opportunity for inclusion, cooperation, and civic responsibility to grow.

Social conditions are more complicated than behaviors and may require extended cooperation of multiple and varied interests. Just as we wish to enhance our collective sense of ownership and responsibility for this "place" by our cooperation on solutions to problem behaviors, we wish to create a commitment to and appreciation of our people--all of our people. By encouraging the community as a whole to take a stand against graffiti, we will begin setting the kind of standard for mutual respect and mutual effort that can extend to the rest of the social issues addressed by the task force.

City staff recommends City Council adopt the Downtown Social Issues Task Force's Graffiti recommendations. City Council may want to consider the 48-hour period to be business hours. City staff will evaluate each of the recommendations for legal sufficiency, and if any recommendation is unable to be carried out for legal reasons, staff will notify Council. Upon Council direction, staff will work on a draft ordinance for graffiti removal.

Council members thanked the Task Force for working so diligently on this problem and spending the enough amount of time and effort to come to Council with these recommendations.

Councilwoman Bellamy hoped that the N.C. Dept. of Transportation will respond quicker than they have in the past.

Ms. MacQueen and Ms. Brown responded to various questions/comments from Council; some being, but are not limited to: can funds be earmarked for clean-up; how much time does the volunteers spend cleaning up on a Saturday; are the property owners fined if the volunteers don't clean the graffiti off in 48 hours; and has voluntary compliance been a problem.

Councilman Dunn questioned whether it's appropriate to fine a property owner for an illegal act on their own property that they did not do. He felt it wasn't fair to fine the property owner after 48 hours if the owner wants to clean it off on his own timetable. Some owners may want it repainted with a certain paint to maintain the type of finish they have on their walls.

Councilman Mumpower explained how he personally felt this basically punishes the victims who have been vandalized. He felt this effort is initially founded on a strong volunteer initiative, but it will probably wind up on the property owner.

Councilman Davis, business owner downtown, said that he has had six occasions of graffiti on his business and it is expensive and inconvenient to the property owner. He felt that perhaps the Task Force missed the opportunity to get the broader segment of the community involved in the Task Force, even though he understood you can't make people participate in meetings. He felt that 48 business hours is an appropriate amount of time to have the graffiti removed because it will hopefully discourage the people from coming back. However, there are a lot of absentee landlords which may not be able to work within the 48 hour time period. His problem is this is placing the burden on the property owners and he was hesitant to proceed with the penalty phase. He questioned who would be liable if a volunteer injured himself while removing the graffiti, i.e., falling off a ladder. He supported the additional kiosks, the Asheville Mural Project, and looked forward to the one-month pilot program to see how well Quality Forward will handle this on-going maintenance task. He felt we should encourage property owners to remove the graffiti within the 48 hours and make sure they know there is a resource that can remove the graffiti if they want to use it.

Councilwoman Jones felt the one-month pilot program is a good start. She said that if any organization can handle volunteers, it's Quality Forward and the City of Asheville is fortunate to have that organization. She felt that as far as maintaining the removal program in the future, if it becomes a problem, then at that time we can begin to discuss possible solutions. The Task Force has brought to Council creative ways with innovative ideas to combat this problem with the use of volunteers and the only other alternative is to use tax dollars.

Vice-Mayor Mumpower wondered if we have exhausted our options in terms of creative and enforcement policies. Police Chief Hogan said that the police take graffiti very seriously and he will discuss this issue with his personnel and with the District Attorney's office.

Vice-Mayor Mumpower didn't think we have exhausted our options. He said that there are other variables to be considered, like private property rights, etc., before Council can make an informed decision. Based on those variables, he felt there should be additional research, which might include asking our Police Chief to find creative enforcement opportunities with the District Attorney's assistance, possible funding in support for the volunteer and educational initiatives, and maybe a reward program as an incentive to tell people this is not okay.

On behalf of City Council, Mayor Worley thanked Ms. MacQueen and Ms. Brown and the entire Task Force for working diligently on this very difficult problem.

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this item on the next formal City Council agenda.

THE RIVERLINK URBAN RIVERFRONT MASTER PLAN

Ms. Karen Cragnolin, RiverLink Executive Director, said that this is the consideration of a resolution adopting the Wilma Dykeman Riverway Master Plan as part of the Comprehensive Plan for the City of Asheville.

Several years ago, the City contracted with RiverLink for the preparation of a master plan for the urban areas of the French Broad and Swannanoa rivers. Later, the scope for this plan was broadened to include what is now called the Wilma Dykeman Riverway concept.

Mr. Joe Minicozzi, planner with RiverLink, reviewed the plan with Council stating that working with a large, broad-based group of citizens and with City staff, RiverLink and its consultants have completed an Urban Riverfront Master Plan that envisions nodes of relatively dense urban development in a scenic riverfront setting. The plan capably marries land use, transportation, water quality, and economic development goals in a manner that implements City Sustainable Economic Development Task Force and Smart Growth objectives. Under the plan, the main road linking the two rivers will become a unified transportation corridor; economic development opportunities and strategies are identified and mapped out; and a land use pattern consistent with traditional development design throughout the City is encouraged. Additionally, environmentally sensitive restoration of the rivers to promote public access, recreation, and commerce is to be accomplished through plan implementation.

He explained the considerable public involvement in the development of this plan. Additionally, RiverLink received preliminary feedback from City Council concerning the direction of the plan in January of this year. Cost estimates are $2 Million for 17 miles for a total of $34 Million project.

Key future actions for the City called for in the plan include:

- Continued support for moving the Riverway project forward.
- Continued involvement in the recreational improvements called for in the plan.
- Consideration of changes to zoning requirements to implement key plan components.
- General support for private sector redevelopment of properties as proposed in the plan.

Pro's

- Major new transportation initiative has the potential to relieve traffic congestion and spur new economic development.
- Potential to dramatically increase tax base through private sector redevelopment.
- Strong public support for proposal due to its comprehensive treatment of urban riverfront issues, including economic development, transportation, recreation and beautification.

Con's

- May result in displacement of some existing uses along the river area through market forces or road widening.

In addition to the plan meeting or exceeding more than 100 goals and strategies in the City's 2025 Plan, the plan supports the following Goals and Objectives of the City Council's Strategic Operating Plan:

Economic Development Goal # 3, Objective A - Mobilize collective resources and goals by implementing a unified regional economic development plan. Riverfront redevelopment has been a regional goal since the Sustainable Economic Development Task Force made it a priority area in its strategic plan report. Consequently, the Urban Riverfront Master Plan can be considered regional in scope as a critical economic development tool.

Natural and Built Environment Goal # 2 - Increased greenway benefits equitably throughout Asheville. The Urban Riverfront Master Plan contains a greenway network that links the north, central and east parts of the City in a continuous fashion.

City staff recommends City Council adopt the Wilma Dykeman Riverway Master Plan as part of the Comprehensive Plan for the City of Asheville.

Upon inquiry of Vice-Mayor Mumpower of where the funds will come from for implementation of the plan, Ms. Cragnolin said that they are relying on the Amendment One – Self Financing Bonds, noting that most projects are paid for by the N.C. Dept. of Transportation highway funds, as well as other appropriations. Vice-Mayor Mumpower felt that to rely on this type of funding does not realistically support the realities of the plan.

Vice-Mayor Mumpower said that to commit the City to a plan of this magnitude without some budget estimates does not seem prudent. He understood that the plan will be implemented incrementally, but he was unable to develop a sense of that process. He felt the City should have more clarify on the how, when, and how much before we back into a commitment on this good endeavor.

Mayor Worley saw this plan as a vision and not a funding commitment. With a vision in place, it is easier for developers to come in and invest.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

WEED & SEED GRANT FOR POLICE DEPARTMENT

Police Chief Bill Hogan said that this is the consideration of application for the Weed and Seed Grant administered by the U. S. Dept. of Justice, Office of Community Capacity Development.

The U.S. Dept. of Justice Weed and Seed grant is one facet of their Weed and Seed initiative. The program is designed to combat violent crime in a specific geographic area with a four-pronged approach: law enforcement, community policing, prevention/intervention/ treatment, and neighborhood restoration. Law enforcement is the "weeding" part of the program. Community programs aimed at prevention, intervention and treatment and at neighborhood restoration are the "seeds." Community policing is the bridge between the two. The program requires the support and involvement of the local US Attorney.

The maximum grant award is $225,000. At least half of the grant funds must be used for law enforcement. Both the weeding and the seeding activities of the program are based on the strategic plan and budget written by the steering committee and submitted with the application for official recognition in mid-October. Decisions on grant applications are expected to be made in the early spring 2005. Any funds awarded are expected to be available in October of 2005 and must be spent by October of 2006. Program recognition and opportunity to apply annually for grant funding is limited to a term of five years.

This is a long-term approach to crime reduction. Program requirements include a full-time site coordinator, and strongly encourages a "safe haven," in or accessible to the community and open hours that are convenient to residents, to provide services. There are no grant funds to renovate or acquire buildings. The Department of Justice requires academic or other research partners to evaluate the program's success.

The Weed and Seed program is one that allows several departments and community entities to come together for a common goal. This approach could produce a positive, collaborative outcome. It allows the community to state their desires and work, with other agencies to produce a healthy, cohesive community. The law enforcement element consists primarily of suppression activities. These activities include enforcement, adjudication, prosecution, and supervision efforts designed to target, apprehend, and incapacitate violent street criminals who terrorize neighborhoods and account for a disproportionate percentage of criminal activity. The program expects the recognized site to use existing programs already in place and bring in the elements that are missing to make it a success, not re-invent the wheel. The Police Department will form a Steering Committee from multiple agencies. The budgeting decisions and the strategic plan, including program goals, objectives, activities, tasks, and standards for success all come from the steering committee. The program's focus on community involvement, enhancing existing programs, planning for sustainability of the funding beyond the grant horizon, and building community capacity provide a good theoretical basis for long-term community improvement.

Weed and Seed is designed to operate in a specific, identified neighborhood (minimum population 3,000) rather than the city at-large.

This is a selective program, in that 25% of the proposed programs receive official recognition. Of the areas that achieve official recognition, only 60% of those applied will receive any funds.

While at least half of any grant money is required to be spent on law enforcement, that amount does not automatically go to fund more officers. There will be pressure to use part of that required law enforcement money for community policing (not necessarily with APD officers), there will be pressure to limit the law enforcement portion of any grant funds to only the required 50%, and since "enforcement" includes prosecution, there might be some pressure from that front, too.

While at least half of any grant money is required to be spent on law enforcement, that amount does not automatically go to fund more officers. There will be pressure to use part of that required law enforcement money for community policing (not necessarily with APD officers), there will be pressure to limit the law enforcement portion of any grant funds to only the required 50%, and since "enforcement" includes prosecution, there might be some pressure from that front, too.

Long-term sustainability and the capacity for improvement are stressed by the literature. There is an expectation that the city will continue its commitment to the process.

Pros:

- The Weed and Seed program allows City departments and community entities to come together for a common goal.
- Grant funds can be used for police officer overtime.
- There is no local match for this grant.

Cons:

- Before grant submittal, a steering committee must be appointed to develop a community-devised strategic plan and budget.
- It's suggested that a consultant is needed to assist in the facilitation and program creation of the strategic plan. This will require an outlay of money by the city before the grant monies are available. None of the grant monies may be used for this function.
- The timeline to apply for this program this year is extremely tight.

Strategic Operating Plan and Focus Area:

This program would enhance the focus area, "Critical Services & Infrastructure." goal #4, *"Develop programs and policies to defeat street level drug problems and crime."* Depending on the "seeding" programs included by the steering committee, it could also further task #2 of the focus area "Housing Opportunities," goal #4, objective B: *"Increase the number of citizens transitioning from public housing to affordable housing and from rental housing to home-ownership"*

At the request of Councilwoman Jones, Police Chief Hogan said that he would be happy to contact her for additional names from agencies who are willing to participate on the Committee.

Councilwoman Jones hoped that the Housing Authority HOPE 6 Committee and this Steering Committee work together.

Councilwoman Bellamy passed out a brochure from the Raleigh Weed & Seed Program and explained the huge impact that program is making in Raleigh. She talked about the impact the program is also making in Gastonia.

It was the consensus of City Council to make application for the Weed and Seed grant next year since the grant process for this year's deadline is fast approaching (August 29, 2004) and the Steering Committee will need adequate time to develop a strategic plan.

I-26 CONNECTOR

Councilman Newman said that Michael Moule will be providing the N.C. Dept. of Transportation (NC DOT) the information he presented to City Council at their July 13, 2004, meeting. He was looking forward to hearing the results of the discussions between Mr. Moule and the NC DOT. He was hopeful that NC DOT will report back that there is an opportunity for a smaller footprint with an adequate number of lanes.

At 7:25 p.m., Mayor Worley announced a short break.

VACATE AND CLOSE 1086 HENDERSONVILLE ROAD

Due to the lateness of the hour, Councilman Dunn requested, and City Council concurred, to accept the hard copy of the power-point presentation by Housing Code Coordinator Jeff Baker and proceed to the public hearing on the matter at the July 27, 2004, meeting.

STORMWATER BEST MANAGEMENT PRACTICE DEMONSTRATION PROJECT

Transportation Planner Elizabeth Teague said that this is the consideration of a resolution authorizing the City Manager to negotiate an easement agreement with Thomas and Virginia Honea (landowners), and to direct staff to proceed work with North Carolina State University/Cooperative Extension Service Water Quality Group to utilize an EPA 319 grant to construct and maintain a stormwater mitigation facility as part of the Clingman Forest Greenway.

This project supports the Asheville 1998 Greenway Master Plan and 2003 Update, The 2001 West End/Clingman Neighborhood Citizens Master Plan, and the Clingman Forest Greenway Master Plan, as well as Goal #1 of the "Natural and Built Environment" Focus Area of the Council's 2004 Strategic Operations Plan, "to enhance and preserve air and water quality through comprehensive efforts." It supports:

- Objective C – developing greenways in strategic locations that improve water quality, and the task of securing easements for greenway development; and
- Objective D – complying with Federal NPDES Phase II Stormwater Rules, and the task of partnering with other agencies to develop educational and outreach programs to improve stormwater run-off.

This project was developed in partnership with the Clingman Forest Steering Committee, landowner's Thomas and Virginia Honea, water quality and stream restoration specialist Jon Calabria of NCSU, and City Parks and Recreation and Engineering Department staff. It will utilize EPA 319 funds obtained through NCSU's Cooperative Extension Service Water Quality Group to reimburse the City of Asheville for the purchase of an easement of approximately 0.3 acres and to fund NCSU to design and construct a stormwater wetland to detain and filter stormwater run-off from the Clingman Forest area and the proposed greenway. The project will:

1. Develop a "first flush" constructed wetland plan that incorporates engineering design, necessary permits, a reconstruction process and pre-and post-stream reconstruction monitoring;
2. Improve water quality to an urban stream, enhancing the Clingman Forest environment and beautifying the proposed greenway corridor;
3. Implement and evaluate the stormwater wetlands restoration as a model for other stormwater treatment facilities and BMPs in the City; and
4. Construct signage describing restoration practices employed for education purposes and establish a demonstration area for workshops and tours.

The positives of this project are that:

- It utilizes EPA 319 funds for easement acquisition and construction costs to the benefit of partners NCSU, community stakeholders, and the City – all easement acquisition and BMP development costs will be covered by the grant funds;
- It will establish a Stormwater BMP demonstration site that will be a resource into the future for Asheville Middle School classes, NPDES Phase II educational programs, and other community stormwater initiatives.
- It will improve an urban stream while managing urban run-off.
- It will enhance the proposed Clingman Forest Greenway, cleaning-up and restoring a polluted area.

The negatives of this project are that:

- It will require time from City staff to manage the easement acquisition process and to coordinate with NCSU on administrative needs for their grant and on BMP construction.
- Once constructed, the facility will need to be monitored and maintained by City staff as a stormwater BMP and as part of the greenway.
- If not properly designed and constructed, the facility could retain standing water for long periods.

Staff recommends that City Council adopt the resolution authorizing the City Manager to move forward with easement acquisition and development of the project.

Upon inquiry of Vice-Mayor Mumpower, Ms. Teague said that the City is still working with the land owners on the actual purchase price (hopefully not over $12,000) and what the easement boundaries will be.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place this item on the next formal City Council agenda.

UPDATE OF REQUEST TO NC DOT TO RENAME "AMBOY ROAD"

Councilman Davis met with Irby Brinson, Anthony Butzek and Jeff Richardson and reviewed the request to NC DOT to rename "Amboy Road" to "Bob Pressley Memorial Roadway." Councilman Dunn was unable to attend the meeting. Councilman Davis suggested, after talking with the race people from WNC, that a memorial be done somewhere at the park, rather than name a road for Mr. Pressley. The advantages are that (1) a Memorial is what is called for in the Master Plan; and (2) a Memorial wall will provide opportunity to honor all famous race people in WNC, not just Mr. Pressley. Councilman Davis said that he has talked with Karen Cragnolin, Executive Director of RiverLink, and she is very supportive of the idea. Mr. Brinson and Mr.

Richardson are working on potential private dollar sponsors to pay for the memorial wall. Mr. Brinson's staff can design the wall internally. Councilman Davis will help make the final determination of the list of honorees.

City Attorney Oast reported to Council that they have found no one with the name "Amboy" in the chain of title.

It was the consensus of Council to ask Councilman Davis to move forward in the direction of a memorial, with an anticipated dedication in the spring.

HARD DRUG INTERDICTION – A BRIDGING OPPORTUNITY

Vice-Mayor Mumpower said that based on a conversation with the Police Chief and the City Manager, he would not be making a presentation on this item at this time.

BOARDS AND COMMISSIONS:

It was the consensus of City Council to instruct the City Clerk to arrange for interviews with John Kiser and Ross Dryer for an alternate vacancy on the Board of Adjustment.

Vice-Mayor Mumpower said that on July 9, 2004, an email was received from Mr. Peter Crosa, Chairman of the Civic Center Commission, requesting the Civic Center Commission be reduced from 11 to 7 members, ensuring the certainty of a quorum with at least 4 members. He explained that it has been difficult to reach a quorum at the monthly meetings. They feel the reduction will improve functionality of the Commission and that a reduced number will still assure a talented and diverse group of members. He then presented an alternative request, if Council does not feel it's in their best interest to reduce the membership to 7 – reduce the membership from 11 to 9 members. After discussion, it was the consensus of Council to instruct the City Attorney to amend the Civic Center Commission ordinance by reducing its membership from 11 to 7 members and to revisit the membership reduction in six months.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint John Broadbooks to the Civic Center Commission.

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Stephanie Cooper, Alexander Maitland and James Lewis to the Police Officers & Firefighters Disability Review Board.

It was the consensus of City Council to instruct the City Clerk to arrange for interviews with Matthew Marquis, Suzanne Jones and Jaan Ferree for a vacancy on the Historic Resources Commission. In addition, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Keith Hargrove to the Historic Resources Commission.

City Council directed the City Clerk to readvertise the vacancies on the Fair Housing Commission and the Planning and Zoning Commission.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:08 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – July 27, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Col. Ray Green, Veteran of the US Air Force, led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Worley gave the invocation.

I. PROCLAMATIONS:

A. UPDATE ON MEMORIAL STADIUM AND SPECIAL RECOGNITION

Vice-Mayor Mumpower, Chairman of the Memorial Stadium Task Force, briefly updated City Council on the activities taking place for the historic Memorial Stadium renovation by showing a general overview of what is proposed and the Veteran's Memorial concept. He thanked Asheville Splash for their participation in the turf, which was largely donated by them. He feels this will be a powerful memorial, which will be a nice addition to Asheville and our region, with very little City dollars being spent.

Mr. Jim Drummond, President of the Asheville Youth Sports Program, explained the role the Asheville Youth Sports Program played in this recognition and introduced Ms. Wanda Little. He explained that Ms. Little is Leonard Little's mother. Leonard is a former Asheville High graduate and football player with the St. Louis Rams. Mrs. Little was honored to present the City of Asheville with a check in the amount of $15,000 from her son for the Memorial Stadium scoreboard. She stated her son was unable to attend the ceremony due to this being his first day of training camp. He asked that she relay to the City that this is the beginning of an effort to try to touch this community in a positive way.

On behalf of City Council, Vice-Mayor Mumpower thanked Mrs. Little and her son Leonard for his generous contribution.

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 13, 2004, AND THE WORKSESSION HELD ON JULY 20, 2004

B. RESOLUTION NO. 04-152 - RESOLUTION AMENDING THE 2004 SCHEDULED CITY COUNCIL MEETINGS TO (1) CANCEL THE AUGUST 3, 2004, WORKSESSION; (2) ADD A COMMUNITY MEETING ON AUGUST 31, 2004, AT 7:00 P.M. AT THE EAST ASHEVILLE COMMUNITY CENTER LOCATED AT 906 TUNNEL ROAD, ASHEVILLE, NC.; AND (3) CANCEL THE OCTOBER 26, 2004, FORMAL CITY COUNCIL MEETING

RESOLUTION BOOK NO. 28 – PAGE 305

C. RESOLUTION NO. 04-153 - RESOLUTION APPROVING THE PURCHASE OF PROPERTY OFF PINNER ROAD FOR THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

Summary: The consideration of a resolution accepting an Offer of Sale of Land from Grace Henninger for land off Pinner Road for $111,321 for the Asheville Regional Airport Authority.

The property off Pinner Road is located adjacent to and west of the Asheville Regional Airport in a neighborhood with a mix of site built and manufactured homes and somewhat rural character. It is generally rectangular in shape and contains 5.859 acres. It is level to moderately rolling and wooded. Pines are the predominate trees typical of farm land left fallow for a number of years. Its highest and best use per the appraisal is low density residential as permitted by the zoning (Limestone, R-LD). It is proposed to be acquired for future expansion of the Airport. The property will be paid for by the Airport and will be included in the Airport master lease.

The property was appraised by Richard Smith, SRA, and reviewed by Joseph Moore, appraiser at $108,500. An offer in that amount was conveyed to the owner, Grace Henninger and Mrs. Henninger responded with an offer to sell the property at $111,321. Ed Vess, Real Estate Manager, reviewed the appraisals and recommended that the offer be accepted and fair market value be established at $111,321 based on the offer to sell being within 3% of the appraisal and review and the efficiency of a prompt agreement.

The positive aspects of the proposed acquisition are:

1. Offers the opportunity to acquire land within the projected Airport expansion area while it is undeveloped.
2. The savings realized in not having to pay for potential improvements and relocation of occupants later on will offset the cost of the property.
3. It is a voluntary sale at fair market value.
4. It gives the Airport control of the property to ensure that no incompatible use occurs.
5. Will expedite the process when expansion of the Airport occurs in that one less property will have to be acquired.

The negative aspects are:

1. Removes property from the tax base.
2. Removes residential land from the market.

Approval of the resolution will establish $111,321 as the just compensation for the property and accept the Offer of Sale of Land from Grace Henninger for that amount.

City staff and the Airport Authority recommend adoption of the resolution accepting an Offer of Sale of Land from Grace Henninger for land off Pinner Road for $111,321 for the Asheville Regional Airport Authority.

RESOLUTION BOOK NO. 28 – PAGE 306

D. RESOLUTION NO. 04-154 - RESOLUTION OF INTENT TO CLOSE A PORTION OF AN UNNAMED ALLEY OFF SOUTH FRENCH BROAD AVENUE AND SETTING A PUBLIC HEARING ON AUGUST 24, 2004

RESOLUTION BOOK NO. 28 – PAGE 307

E. RESOLUTION NO. 04-155 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY AT THE CORNER OF WYOMING ROAD AND KEEBLER ROAD IN THE KENILWORTH COMMUNITY

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property at the corner of Wyoming Road and Keebler Road in the Kenilworth community.

A bid has been received from Innova Homes LLC in the amount of $4,400 for the purchase of land at the corner of Wyoming Road and Keebler Road in the Kenilworth Community.

The land at the corner of Wyoming Road and Keebler Road is an irregular triangle shaped residential zoned lot comprising 0.07 acre±. From street grade it slopes up substantially to the rear property line and is covered with non-significant trees, vines and brush. The size, shape and topography render the lot unsuitable as a home site. The subject parcel is a remnant of property acquired at the time Wyoming Road was improved several years ago and is situated diagonally across from the park. The tax value is $4,400. The bid from Innova Homes LLC, owner of an adjacent parcel is in the amount of $4,400. Innova proposes to construct a house on the adjacent property for sale. The proposed construction is consistent with the Strategic Plan policy of encouraging infill development.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A non-buildable lot will be assembled with an adjoining parcel to provide a more coherent land use pattern
5. The sale of this lot to Innova, while not essential to the proposed infill development, will enhance the development by improving the access.

Planning & Development staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 28 – PAGE 308

F. RESOLUTION NO. 04-156 - RESOLUTION AUTHORIZING SOLICITATION OF ALL FORMAL BIDS BY ELECTRONIC MEANS

Summary: The consideration of a resolution authorizing City staff to solicit invitations for all formal bids by electronic means.

The City of Asheville has invited the solicitation of bids by advertising same in the Asheville Citizen Times for a number of years. Such legal advertisements are expensive and lately have only generated low interest. A few years ago, the N. C. General Assembly amended N.C.G.S. §143-129, to allow cities to use electronic means to advertise for bids without also having to advertise same in a newspaper of general circulation. A number of cities currently advertise their formal contracts exclusively by electronic means and Asheville desires to join those cities.

The positive aspect of advertising by electronic means is that it reaches the same intended audience as newspaper advertisement at a substantial reduction in cost.

The negative aspect of advertising by electronic means is that it only reaches those who are electronically connected.

City staff recommends approval of the resolution authorizing City staff to solicit invitations for all formal bids by electronic means.

RESOLUTION BOOK NO. 28 – PAGE 309

G. RESOLUTION NO. 04-157 - RESOLUTION APPROVING THE CLINGMAN FOREST GREENWAY PROJECT AND AUTHORIZING THE CITY MANAGER TO PURCHASE AN EASEMENT FOR SAID PROJECT

Summary: The consideration of a resolution authorizing the City Manager to negotiate an easement agreement with Thomas and Virginia Honea (landowners), and to direct staff to proceed work with North Carolina State University/Cooperative Extension Service Water Quality Group to utilize an EPA 319 grant to construct and maintain a stormwater mitigation facility as part of the Clingman Forest Greenway.

This project supports the Asheville 1998 Greenway Master Plan and 2003 Update, The 2001 West End/Clingman Neighborhood Citizens Master Plan, and the Clingman Forest Greenway Master Plan, as well as Goal #1 of the "Natural and Built Environment" Focus Area of the Council's 2004 Strategic Operations Plan, "to enhance and preserve air and water quality through comprehensive efforts." It supports:

- Objective C – developing greenways in strategic locations that improve water quality, and the task of securing easements for greenway development; and
- Objective D – complying with Federal NPDES Phase II Stormwater Rules, and the task of partnering with other agencies to develop educational and outreach programs to improve stormwater run-off.

This project was developed in partnership with the Clingman Forest Steering Committee, landowner's Thomas and Virginia Honea, water quality and stream restoration specialist Jon Calabria of NCSU, and City Parks and Recreation and Engineering Department staff. It will utilize EPA 319 funds obtained through NCSU's Cooperative Extension Service Water Quality Group to reimburse the City of Asheville for the purchase of an easement of approximately 0.3 acres and to fund NCSU to design and construct a stormwater wetland to detain and filter stormwater run-off from the Clingman Forest area and the proposed greenway. The project will:

1. Develop a "first flush" constructed wetland plan that incorporates engineering design, necessary permits, a reconstruction process and pre-and post-stream reconstruction monitoring;
2. Improve water quality to an urban stream, enhancing the Clingman Forest environment and beautifying the proposed greenway corridor;
3. Implement and evaluate the stormwater wetlands restoration as a model for other stormwater treatment facilities and BMPs in the City; and
4. Construct signage describing restoration practices employed for education purposes and establish a demonstration area for workshops and tours.

The positives of this project are that:

- It utilizes EPA 319 funds for easement acquisition and construction costs to the benefit of partners NCSU, community stakeholders, and the City – all easement acquisition and BMP development costs will be covered by the grant funds;
- It will establish a Stormwater BMP demonstration site that will be a resource into the future for Asheville Middle School classes, NPDES Phase II educational programs, and other community stormwater initiatives.
- It will improve an urban stream while managing urban run-off.
- It will enhance the proposed Clingman Forest Greenway, cleaning-up and restoring a polluted area.

The negatives of this project are that:

- It will require time from City staff to manage the easement acquisition process and to coordinate with NCSU on administrative needs for their grant and on BMP construction.
- Once constructed, the facility will need to be monitored and maintained by City staff as a stormwater BMP and as part of the greenway.
- If not properly designed and constructed, the facility could retain standing water for long periods.

Staff recommends that City Council adopt the resolution authorizing the City Manager to move forward with easement acquisition and development of the project.

RESOLUTION BOOK NO. 28 – PAGE 310

H. RESOLUTION NO. 04-158 - RESOLUTION AUTHORIZING THE SALE OF TWO LOTS ON MCDOWELL STREET TO LIVINGSTON STREET LLC

Summary: The consideration of a resolution authorizing the Mayor to convey Disposal Parcels 75A and 75B on McDowell Street to Livingston Street LLC in the amount of $33,000.

On July 13, 2004, the City Council directed the City Clerk to advertise for upset bids on Disposal Parcels 75A & B. The advertisement ran in the Asheville Citizen-Times on July 16, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Livingston Street LLC in the amount of $33,000 was not upset and the sale to Livingston Street LLC should be approved.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- A non-buildable lot will be assembled with an adjoining parcel to provide a more coherent land use pattern.

Approval of the resolution will authorize the sale of the property to Livingston Street LLC for the amount of $33,000.

Community Development staff recommends adoption of the resolution authorizing the Mayor to convey Disposal Parcels 75A and 75B on McDowell Street to Livingston Street LLC in the amount of $33,000.

RESOLUTION BOOK NO. 28 – PAGE 311

I. ORDINANCE NO. 3139 - ORDINANCE REDUCING THE MEMBERSHIP OF THE CIVIC CENTER COMMISSION FROM 11 TO 7 MEMBERS

Summary: The consideration of an ordinance reducing the size of the Civic Center Commission from 11 to 7.

At its July 20, 2004, worksession, Council indicated that it wished to reduce the size of the Civic Center Commission from 11 to 7 members. There are currently 4 vacancies on the Commission, so no action to appoint or remove members is necessary. The schedule of appointments to the Commission is such that the terms (3 years in length) of 3 current members will expire within a year, 3 the next year, and one after that. While this staggering is not as evenly distributed as it could be, it appears that little would be gained by changing the term of any current member.

Considerations:

- With eleven members, it was sometimes difficult to muster a quorum.
- A seven member board will allow for more efficient operation, while still permitting a diversity of skills and interests to be represented.

If Council desires to reduce the membership of the Commission from 11 to 7, adoption of the ordinance is recommended.

ORDINANCE BOOK NO. 21 – PAGE 261

J. RESOLUTION NO. 04-159 - RESOLUTION APPOINTING A MEMBER TO THE CIVIC CENTER COMMISSION

Summary: The consideration of a resolution reappointing John Broadbooks to the Commission.

The terms of John Broadbooks, John Hutchby, Larry Smith and Paul Homyak, as members of the Civic Center Commission, expired on June 30, 2004. In addition, there is also an unexpired term until June 30, 2006, left by Lisa Michie.

On July 9, 2004, a request was received from Mr. Peter Crosa, Chairman of the Civic Center Commission, to reduce the membership of the Civic Center Commission from 11 to 7 members, ensuring the certainty of a quorum with at least 4 members. It has been difficult to reach a quorum at the monthly meetings. They feel the reduction will improve functionality of the Commission and that a reduced number will still assure a talented and diverse group of members. If Council did not feel it's in their best interest to reduce the membership to 7, he suggested an alternative to reduce the membership from 11 to 9 members. After discussion at Council's worksession on July 20, 2004, it was the consensus of City Council to instruct the City Attorney to prepare the proper paperwork to reduce the Commission from 11 to 7 members and to revisit the issue in six months.

Also at City Council's worksession on July 20, 2004, City Council instructed the City Clerk to prepare the proper paperwork to reappoint John Broadbooks to serve a three year term, term to expire on June 30, 2007, or until his successor has been appointed.

Staff recommends City Council adopt a resolution reappointing John Broadbooks to the Civic Center Commission.

RESOLUTION BOOK NO. 28 – PAGE 312

K. RESOLUTION NO. 04-160 - RESOLUTION APPOINTING MEMBERS TO THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

Summary: The terms of Stephanie Cooper, Alexander Maitland and James Lewis, as members on the Police Officers' & Firefighters Disability Review Board, expired on July 19, 2004.

On July 20, 2004, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Ms. Cooper, Mr. Lewis and Dr. Maitland to each serve an additional two year term respectively, terms to expire July 19, 2006, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 313

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Dunn and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON SPRINGSIDE PARK DRIVE OFF WHITE PINE DRIVE FOR THE CONSTRUCTION OF A 60 UNIT APARTMENT COMPLEX (KENILWORTH FOREST VILLAGE APARTMENTS) IN AN RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Mayor Worley said that this public hearing was originally scheduled for May 25, 2004, but continued at the applicant's request until this date.

Mayor Worley then said that a letter was received on July 16, 2004, from Land Planning Collaborative, P.A., stating that "On behalf of the developer, Virginia May, I am withdrawing our application for the July 27th hearing before City Council." Therefore the public hearing will not be held.

B. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING BLANKENSHIP AVENUE

Mayor Worley announced that a letter was received on July 27, 2004, from Ms. Patsy Meldrum, stating that "Our client, Teresa Cathey, has decided to withdraw her request to close Blankenship Avenue. We withdraw the request on behalf of Teresa Cathey and Cheryl S. Warren, owners of the property identified on the Buncombe County tax maps as PIN 9617-14-44-5768. Please note that there are two other property owners whose names appeared on the petition to close Blankenship Avenue and we do not represent those parties. You will need to inquire of them whether or not they wish to proceed."

Since the petition is still active, Mayor Worley opened the public hearing at 5:22 p.m.

Assistant Public Works Director David Cole said that this is the consideration of a resolution to permanently close Blankenship Avenue between Smoky Park Highway and Brookside Circle. This public hearing was advertised on July 2, 9, 16 and 23, 2004.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys without regard to whether they have actually been accepted as city maintained streets.

Pursuant to this statute, the adjoining property owners have requested the City close Blankenship Avenue, extending north from its intersection with Smoky Park Highway to its intersection with Brookside Circle.

Public Works Department staff has researched and established that this portion of right-of-way is not a City maintained street and its closure will not deprive any property owner of a reasonable means of ingress or egress to their property. This portion of right-of-way is abutted by three lots, identified by PIN Nos. 9617.14-44-5768; 9617.14-44-3873; and 9617.14-44-3740.

However, the City's Traffic Engineer has determined that Blankenship Avenue provides an important connection between Brookside Circle and Smoky Park Highway. Though not a City maintained right-of-way, Blankenship Avenue is signed, has a gravel surface and is used by pedestrian and vehicular traffic. Consequently, City staff advises that closing Blankenship Avenue without any alternate provisions for a transportation connection would be contrary to the public interest.

On Thursday, May 27, 2004, the Traffic Engineer and Assistant Director of Public Works met with Patsy Meldrum, counsel for petitioner Teresa Cathey, to discuss staff concerns about closing Blankenship Avenue. Ms. Meldrum was vague about the needs underlying her client's request to close the street. Consequently, it was difficult to generate alternatives that might satisfy both Ms. Cathey's interests and the City's interests in preserving connectivity.

Assuming that setbacks from Blankenship Avenue's right-of-way could be a concern, staff offered two potential alternative solutions: 1) to relax setback requirements from Blankenship Avenue or 2) to support closure of the right-of-way under an agreement that the petitioners provide a 20-foot public access easement in its place. Either alternative would have the same effect on setback requirements as closing the street, but would preserve the public's right to use the right-of-way for travel. However, Ms. Meldrum has indicated that her client is not amenable to either of these alternatives and wishes to pursue the petition to close Blankenship Avenue over staff objections.

Though intent to close Blankenship Avenue has not yet been advertised or posted, the Public Works office has received three telephone calls from local residents objecting to the closure. The primary concern voiced was that the street is used as a pedestrian access for people walking to and from Brookside Circle and The Lunch Box, a restaurant on Smoky Park Highway. Closing this right-of-way would require that these people walk along Brookside Circle and Smoky Park Highway, neither of which have sidewalks.

Progress Energy, BellSouth Telephone, and Charter Communications (cable television) all have aerial lines on Blankenship Avenue. Additionally, BellSouth has underground conduit (approximately 4-feet wide) along the eastern margin of right-of-way. Easements must be provided or arrangements made by the petitioners to relocate these utilities in order to close Blankenship Avenue.

Based on its importance as a connection between Brookside Circle and Smoky Park Highway, it is the opinion of City staff that closing Blankenship Avenue is contrary to the public interest. Therefore staff recommends against adoption of a resolution to permanently close Blankenship Avenue.

Mr. Alan Ditmore said any decision made by Council will have an effect on the rich and poor.

Mayor Worley closed the public hearing at 5:30 p.m

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Newman moved to not close Blankenship Avenue. This motion was seconded by Councilwoman Bellamy and carried unanimously.

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTIES LOCATED AT 40 ROBERTS STREET FOR THE CONSTRUCTION OF SINGLE-FAMILY CONDOMINIUM UNITS, USING THE DEVELOPMENT STANDARD BONUS

ORDINANCE NO. 3140 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTIES LOCATED AT 40 ROBERTS STREET FOR THE CONSTRUCTION OF SINGLE-FAMILY CONDOMINIUM UNITS, USING THE DEVELOPMENT STANDARD BONUS

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:31 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of the issuance of a conditional use permit for properties located at 40 Roberts Street for the construction of single-family condominium units, using the development standard bonus.

The 2025 Asheville City Development Plan encourages a variety of housing types and products to meet the growing needs of the community. Affordable housing even for small projects is important to encourage throughout the community.

A mixed-use project is currently under review along Roberts Street for two parcels at the corner of Trade Street. Adjacent to the Roberts-Trade project the property was zoned to RM-16 in 2001 (City Exhibit 3 – Aerial Photo).

The property is located within the City limits in the central area of the City (City Exhibit 3 – Site Plan). The site overlooks the River area and is located within the recently completed

WECAN Citizens Master Plan. The plan recommends a variety of in-fill housing types using architectural styles sympathetic to the neighborhood.

The developers are seeking approval for a Conditional Use Permit using the Developers Standard Bonus to allow 5 single family homes on 2 parcels with a combined acreage of .34 acre. Conditional Use Review through this process determines such things as property line setbacks and lot size. Heights of any structures in this project are limited to 50' and the project is reviewed to assure that it will fit in with the environmental and architectural character of the neighborhood. To qualify for the Developers Standard Bonus the project must exhibit exceptional site and or environmental context within the surrounding neighborhood. The project must also provide a minimum of one unit at an affordable price (20% of the units offered). The developer standard ordinance allows up to 200% density bonus of the underlying density in residential multi-family districts.

The areas to the east north and south of the surrounding the subject properties are zoned RM-8, residential multi-family medium density. The properties on the west side of Roberts Street are zoned Commercial-Industrial. The surrounding area includes some vacant properties and single-family uses. The area adjacent to the project on the south side is Park Place, an older neighborhood with densities similar to the current proposal.

The developer has submitted a site plan which portrays the locations and layout for the 5 residential units. Although the setbacks are somewhat reduced for typical RM-8 zoned areas, the project will not be out of keeping with community norms. The proposed facades of the 5 residential units are complimentary to the neighborhood fabric. The house drawings are similar to that described in the WECAN Citizen Master Plan under types of in-fill housing recommended for the neighborhood. The homes will be sold condominium style with the property in common ownership (City Exhibit 3 – Façade Drawings).

The Technical Review Committee (TRC) reviewed the project at their June 21, 2004, meeting. In addition the developer asked that alternative compliance for the limited landscaping requirements be considered. The Public Works Department suggested that the City Arborist be consulted for alternative compliance and encouraged tree preservation for existing trees. Other outstanding issues identified during the TRC review are also proposed to be conditions of the approval. No other environmental or safety concerns were noted for the project.

Because this is a conditional use permit, if approved, the uses on the site are limited to those applied for during this permit review process. The site plan and building façade elevations are submitted for approval. Deviating from the plan would require a modification of the conditional use permit following an approval process similar to what we are undertaking now.

City Council must take formal action as set forth in section 7-9-9(c) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)).

1) That the proposed use or development of the land will not materially endanger the public health or safety. **The project has been reviewed by the Technical Review Committee. The project will have to meet State Building Code requirements for new construction. No other safety concerns were noted.**

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures

348

proposed by the applicant. **The site naturally has a steep grade from the street up to the rear of the property. The houses will step up the hillside along with the grade.**

3) **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The project is not expected to injure the value of adjoining or abutting properties. There is a substantial amount of un-developed property in the area. The investment in this project will encourage redevelopment of other vacant lots too.

4) **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The project as proposed is developed after other nearby existing residential areas. The proposed building styles are reminiscent with a modern twist of the traditional housing forms found in the neighborhood. The project is in harmony with the scale, bulk, coverage, density and character of the neighborhood.

5) **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project will provide housing that is needed in the community and matches goals from the City Plan 2025 to provide a variety of housing types at a variety of prices in neighborhoods throughout the City. In-fill projects are important to the continuing strength of the City center. Affordable residential units are needed all over the City.

6) **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Requirements of utility providers will be met for this project. An Asheville Transit route travels within a few blocks of this site along Clingman Avenue and Haywood Road.

7) **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** This project was considered at the TRC it was felt that traffic would not be negatively impacted by this small project.

Pros:

- Provides an in-fill housing project in the community.
- The neighborhood will have an affordable residential unit nearby.
- Positive re-development will begin on Roberts Street.

Cons:

- Adds a multifamily project to a single-family neighborhood (a potential plus).
- Project includes on-street parking on Roberts Street, which may act to slow traffic through the area (a potential plus).

The project provides a site-specific plan to develop housing in a way that fits the neighborhood produced master plan. Affordable housing is needed in all area of the City. The plan will provide a new housing product in a predominately single-family neighborhood. Neighborhood impact is minimal when considering traffic issues or the project's visual character and harmony. In addition the 7 standards that must be considered for Conditional Use Permits all appear to be met as noted previously.

The Planning and Zoning Commission at their July 7, 2004, meeting voted to recommend approval of the Conditional Use Permit with conditions that the outstanding TRC issues are satisfied. Staff also recommends approval of the rezoning request.

Mr. Whit Rylee, property owner, used photos (Applicant Exhibits 1-9) to support the permit and described how they tried to match the neighborhood fabric with this plan.

Upon inquiry of Councilwoman Bellamy, Mr. Rylee said the styles are widely spread throughout the neighborhood.

Upon inquiry of Councilman Newman, Mr. Rylee said that at least one of the homes will be affordable at $130,000 and the other homes will be in the range of $150,000-$225,000.

When Councilwoman Bellamy asked how much time the builder has to complete the development, City Attorney Oast said that unless Council puts a limit on the time, there is not set time for completion. He said the key component is how long the builder has to start the development. If Council wishes to add a time restriction as part of the permit, Council may wish to hear from the developer if that is realistic before the condition is imposed.

Councilwoman Bellamy was concerned that the developer will take 3-5 years to complete the project. Using a photo (Applicant Exhibit 10), Mr. Rylee showed his progress to date on one home and that he hopes to be in that house by Christmas. He already has the funding in place to build the next four homes next year, but it really depends on the economy on when the homes sell.

After rebuttal, Mayor Worley closed the public hearing at 5:52 p.m.

Vice-Mayor Mumpower was surprised that the designs fit into that neighborhood since they are magnified dramatically what exists there now. Mr. Glines responded that it's a creative blend of materials and between historic and new modern, especially fitting in with the artsy River District so close.

Councilwoman Bellamy wondered if Council could request, via the conditional use permit, that the fixtures be moved off the front of the house with the different type of gingerbread ornaments. Mr. Glines felt that City Council can make that a condition.

Councilwoman Bellamy asked Mr. Rylee if he saw a need for that many type of ornaments. Mr. Rylee responded that he doesn't want to hurt the neighborhood and will try to keep to what their desire is.

Councilwoman Bellamy explained that she has spent a lot of time in this neighborhood helping to put the WECAN Citizen Master Plan together. She agreed the neighborhood is changing. But, when they tried to obtain a historic designation, it was denied because a lot of development that occurred did not blend in. The neighborhood has worked very hard to seek that designation and she doesn't want that possible designation jeopardized. Mr. Rylee responded that he felt the historic designation was denied, not because things have been built there because there hasn't been a home built on that side of the hill since 1949, but because there has been such a loss of historic structures that they don't find it a cohesive neighborhood. Whether or not homes are built there or not is not going to solve that problem for the neighborhood. In the Master Plan adopted by the community, there are a lot of different historic details, which may or may not be existing there today nor may not have ever existed in that neighborhood. What they have tried to do is to say this is a historic neighborhood that has different styles and the plan seems to encourage people to try to interpret the styles into structures. That is what he tried to do in these homes. These will be newer buildings that will also have the scale and character of the historic neighborhood. It meets the Department of Interior Standards to get the neighborhood declared historic.

Councilman Newman moved for the adoption of Ordinance No. 3140, granting a conditional use permit for properties located at 40 Roberts Street for the construction of single-family condominium units, using the development standards, subject to the outstanding TRC issues being satisfied. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 262

D. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF TWO LOTS ON ROBERTS STREET FROM RM-8 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO NEIGHBORHOOD CORRIDOR DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO ALLOW FOR A MIXED-USE DEVELOPMENT

ORDINANCE NO. 3141 - ORDINANCE REZONING TWO LOTS ON ROBERTS STREET FROM RM-8 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO NEIGHBORHOOD CORRIDOR DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3142 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR TWO LOTS ON ROBERTS STREET TO ALLOW FOR A MIXED-USE DEVELOPMENT

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:04 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of a conditional use zoning request of two lots on Roberts Street from RM-8 Residential Multi-Family Medium Density District to Neighborhood Corridor District/Conditional Use, and a request to issue a conditional use permit to allow for a mixed-use development.

The West End Clingman Plan, developed as part of the 2010 Comprehensive Plan, identifies this area for residential development.

Although not yet adopted, this project supports the WECAN Citizens Master Plan initiative that identifies this area for small-scale, mixed-use development.

The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth and transportation policies and affordable housing. The project proposes a medium-density, mixed-use development that is designed to serve and blend in with the surrounding neighborhood (City Exhibit 3 – Location Map). The site is within walking distance to transit service and is located within 1 mile of the City's Central Business District and park services (Aston Park). Additionally, the proposed zoning of NCD, is in accordance with the future land use and transportation plans which has this area targeted for redevelopment as a neighborhood corridor.

A conditional use rezoning to CB-1 for a similar mixed-use development was approved by City Council in July 2000, for the larger of the two tracts (PIN# 1762). This approval, however, expired and the property reverted back to the RM-8 zoning district.

The parcel to the south of the site was rezoned to RM-16 in July 2002.

The applicant, Binna Green, is seeking a conditional use rezoning of two vacant parcels of approximately .2 acres, located on the corner of Roberts Street and Trade Street. The site is located less than a mile west of downtown in the "Chicken-Hill" area of the West End/Clingman neighborhood. Both properties are currently zoned RM-8.

Properties across Roberts Street west of the site are zoned Commercial Industrial and have the potential of being developed to a high intensity use. A transition is needed between the high intensity use and the adjacent residential area. The mixed-use development proposed is considered to be low impact and would provide an effective transition between the two areas.

The West End/Clingman Avenue Neighborhood Plan was developed as part of the 2010 Comprehensive Plan. In recent months, a cooperative effort by residents, designers, community leaders, and city staff has been underway to develop and update the long-range development plan for this area. It is hoped that the plan will be ready for consideration by the end of 2004 making it relevant to the evaluation of this project.

Although not yet officially adopted by the City, in context of the subject property, the plan calls for the promotion of Residential and Arts District infill development along Roberts St. The subject property is located on the fringe of the Arts District, Single Family District, and the Commercial Industrial District making it an ideal candidate for a conditional use rezoning to allow for a combination of art production and retail along with loft residences, serving as an appropriate transition use between the three districts.

The purpose of the RM-8 zoning district is to establish a diverse medium density multi-family and single-family district in areas where public infrastructure is sufficient to support such densities. The purpose of the Neighborhood Corridor District is intended to foster medium density, mixed-use development opportunities that are economically viable, pedestrian oriented, and that contributes character to the built environment.

The conceptual master plan provided with the report was revised to address several Technical Review Committee (TRC) comments that were made at their June 21, 2004, meeting (City Exhibit 3 – Conceptual Master Plan). Subsequently, the Planning and Zoning Commission reviewed the proposal at their July 7, 2004, meeting and made a 5-0 vote in favor of the project subject to the conditions outlined by TRC and staff.

Revisions to the plan include: impervious surface calculations, Alternative Compliance for Landscaping, and elevations addressing the Design and Operation Standards. The plans also reflect changes in size and square footage of each building and also address a building setback variance and parking location variance that was approved by the Board of Adjustment on Monday, June 28, 2004 (City Exhibit 3 – Building Elevations).

- Building A located closest to Roberts Street proposes approximately 2,341 square feet of artist studio retail space on the lower floor and 2 residential units on the second floor.
- Building B located towards the rear of the lot will house 4 residential units, two units per level.

As part of the project, the applicant is proposing to develop an unopened alleyway along the eastern side of the property in order to provide access to the parking spaces proposed. The plan also illustrates the applicant's request for alternative compliance in regards to the landscaping required for the project. Staff feels that the alternative landscape plan submitted meets the intent of the ordinance by providing an effective buffer where required.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety.

   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

   The project site is relatively flat. Grading will be necessary to accommodate storm water and erosion control requirements, and other proposed site improvements. More extensive grading may be necessary to develop the alleyway located east of the site where the land begins a gradual increase in slope.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

   The proposed use is as small-scaled, low-impact mixed-use development that will be compatible with surrounding residential development. The building located to the rear of the property where adjacent lots are zoned RM-8, will house 4 residential units. The commercial aspect of the project will front Roberts Street where adjacent properties are zoned Commercial Industrial. This project would provide an effective transition and buffer between the commercial industrial property and the residential neighborhood.

4. That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The proposed use of the property as artist studio retail space and residential apartments serves as an effective transition between commercial and residential land. The proposed building design demonstrates small-scale pedestrian-oriented development that will contribute to the character of the neighborhood.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

   The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth and transportation policies and affordable housing. The project proposes a medium-density, mixed-use development that is designed to serve and blend in with the surrounding neighborhood. The site is within walking distance to transit service and is located within 1 mile of the City's core downtown area. Additionally, the proposed zoning of NCD is in accordance with the future land use and transportation plans which has this area targeted for redevelopment as a neighborhood corridor.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

   The subject site is located near a current bus route. Additionally, the proposed development was reviewed by the City's Technical Review Committee that includes representatives of the Water Resources Department, Fire Department, Engineering Department, Public Works Department, and Public Works Department.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

   Roberts Street serves as a connection between the residential and commercial areas of the neighborhood. Trade Street is a narrow, one-way street that empties onto Club Road. An increase in traffic is not expected to occur from the proposed low impact development.

Pros:

1. The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth and transportation policies and affordable housing.
2. The proposed use and development is supported by the future land use and transportation plans in this area.
3. Although not yet officially adopted, the proposed project is supported by the WECAN Citizens Master Plan in the type of use and building design proposed for this area.
4. The project site is centrally located and within walking distance of the City's core downtown area and the River District.

Cons:

1. Power lines and utility easements render part of the property unusable and relatively small for the number of buildings and off-street parking spaces that are proposed.
2. Due to the size of the lot and hardships created by the location of power lines and utility easements, Alternative Landscape Compliance will need to be considered in order meet the buffer requirements for the project.
3. An unopened alleyway will need to be developed in order to utilize the majority of off-street parking spaces proposed for this project. This will increase the overall amount of grading necessary for the project.

The site plan and building elevations provided for this project supports the intent and goals of the proposed rezoning to Neighborhood Corridor District by it's design and scale, orientation and relation to the street and services offered to the neighborhood and the surrounding area. The proposed project meets many goals of smart growth and infill development and will also provide several affordable rental units to the neighborhood. Additionally, the proposed development will provide a needed transition between the Commercial Industrial properties located across from the subject site on Roberts Street and the residentially zoned properties located east of the site. With conditional use zoning, the site plan and building design are regulated to ensure that this use remains low-impact to provide the desired transition.

Based on the proposed development and the seven findings staff recommends approval of the project subject to the conditions outlined by the Technical Review Committee. The Planning and Zoning Commission reviewed the proposal at their July 7, 2004, meeting and made a 5-0 vote in favor of the project subject to the conditions outlined by TRC and staff.

Mr. Gerald Green, representing the developer, spoke in support of the project and its contribution to the ongoing renovation of the West End/Clingman Avenue neighborhood.

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:12 p.m.

Upon inquiry of Councilman Davis, Planning & Development Director Scott Shuford said that to accommodate the proposal, staff has recommended the use of the NCD zoning. NCD would typically be applied to a larger area of property such as a section of a road corridor and we understand there may be concerns about its application on this scale. In this case, both the WECAN Citizens Master Plan and the Riverfront Urban Master Plan (which will be considered for adoption by Council later in this meeting) call for this type of development in this immediate area. Consequently, staff was comfortable using NCD but only on a conditional use zoning basis. Since Council has adopted neither plan to date, staff used the NCD/Conditional Use to minimize any precedent for Council consideration and adoption of these plans and any future zoning pattern that implements them while still accommodating the developer's proposal.

Councilman Davis was concerned that City Council is using the conditional use zoning tool is being applied a lot and wondered if we are losing the effect of straight rezonings. He thought that when we first started using that tool, it was to be used sparingly, but we seem to be using it more and more. With infill development we will probably find that a more useful too, but it seems like we are making zonings fit wherever we want it to fit and losing the intention of straight zoning efforts. He suggested meeting informally with the Planning & Zoning Commission or perhaps a task force to look at some of the planning we do in the future. Mr. Shuford said that he would be happy to give Council a report on its application and how we've used it. He did say that staff has tried to use it appropriately as a tool to balance a person's desire to make effective use of their property and the neighborhood's interest in seeing what that use would be. He also felt it would be appropriate to schedule a Planning & Zoning Commission worksession to talk about this issue.

Councilwoman Bellamy did not support the Neighborhood Corridor District being applied in this instance.

Vice-Mayor Mumpower moved to adopt Ordinance No. 3141 to approve the conditional use rezoning for two lots on Roberts Street from RM-8 Residential Multi-Family Medium Density District to Neighborhood Corridor District/Conditional Use. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilwoman Bellamy voting "no."

ORDINANCE BOOK NO. 21 - PAGE 257

Vice-Mayor Mumpower moved to adopt Ordinance No. 3142 to issue a conditional use permit for two lots on Roberts Street to allow for a mixed-use development, subject to the conditions outlined by the Technical Review Committee. This motion was seconded by Councilman Davis and carried on a 6-1 vote with Councilwoman Bellamy voting "no."

ORDINANCE BOOK NO. 21 – PAGE 259

E. PUBLIC HEARING TO CONSIDER THE CONDITIONAL USE ZONING OF 200 CHARLOTTE STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL USE; AND THE ISSUANCE OF A CONDITIONAL USE PERMIT TO EXPAND A PARKING AREA AND PROVIDE PARKING LOT LANDSCAPING TO MEET THE REQUIREMENTS OF THE UNIFIED DEVELOPMENT ORDINANCE

ORDINANCE NO. 3143 - ORDINANCE REZONING 200 CHARLOTTE STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND COMMUNITY BUSINESS I DISTRICT TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL USE

ORDINANCE NO. 3144 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR 200 CHARLOTTE STREET TO EXPAND A PARKING AREA AND PROVIDE PARKING LOT LANDSCAPING TO MEET THE REQUIREMENTS OF THE UNIFIED DEVELOPMENT ORDINANCE

Oaths were administered to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process by stating that this is a two-part process. It requires rezoning, which is a legislative act, and the issuance of a conditional use permit, which is a quasi-judicial site-specific act. Even though the public hearing on those two items will be combined, all the testimony needs to be sworn and two votes will need to be taken. The first vote will be to grant the rezoning to the conditional use district category and the second vote will be to issue the conditional use permit. If Council runs into a situation that it votes to rezone, Council doesn't have to issue the conditional use permit on the same night.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property. If the rezoning passes by the three-fourths vote, then the conditional use permit is subject to a simple majority vote.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 6:25 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of a request to rezone property located at 200 Charlotte Street from RM-16 Residential Multi-Family High Density District and Community Business I District to Community Business I District/Condition Use, and a request to issue a conditional use permit to expand a parking area and provide parking lot landscaping to meet the requirements of the Unified Development Ordinance (UDO).

The Future Land Use and Transportation Plan of the 2025 Asheville City Development Plan recommends a mixed-use corridor along Charlotte Street.

No recent zoning actions have taken place in this area.

The property is located within the City limits in the north area of the City. This proposal is a Conditional Use Rezoning to provide adequate facilities for a parking lot expansion. The parcel is located at 200 Charlotte Street and is used as a medical office. The parcel which is .71 acre is split zoned between CB-1 towards Charlotte Street and RM-16 in the rear area of the lot. The portion of the parcel along Charlotte is zoned CB-1 and the rear of the parcel is zoned RM-16 (City Exhibit 3 – Location Map and Aerial Photo).

The project came to the attention of the Planning and Development Department because of a complaint regarding grading, clearing and parking lot expansion on the site without a permit. This current submittal is provided to remedy the situation. The project seeks approval to expand the parking area to the north side of the parcel and provide a landscape buffer on the west side of the parcel. Commercial parking is not allowed on residentially zoned land so the rezoning is a requirement for this (City Exhibit 3 – Site Plan).

Outstanding issues identified during the Technical Review Committee (TRC) review are also proposed to be conditions of the approval. Since the TRC meeting the agent for the project, Mr. Hewitt has provided a plant species list which is only lacking evergreen trees for the buffer planting. He has also noted the intention to provide 14 parking spaces for the parking area (a reduction from what is illustrated on the plan). This may change the exact layout for the parking lot to provide for additional area for landscaping. Finally staff recommends closing the east driveway but will accept closing the west driveway instead if elevation changes are an issue. No other environmental or safety concerns were noted for the project.

RM-16 Zoning District (residential multi-family high density) is developed to set aside areas for high density multi-family uses with a broad range of housing types. RM-16 also allows other non-residential uses including limited institutional, public and commercial uses appropriate within high density residential areas.

Community Business I District (CB-1) is established to provide areas for medium-density business and service uses serving several residential neighborhoods. The CB-1 district is designed to be located along streets which serve multiple residential neighborhoods and provide pedestrian connections and safe vehicular access.

Because this is a conditional use rezoning, if approved, the only use of the site that would be allowed would be the office use and parking lot as proposed in this plan. Deviating from the plan would require a modification of the conditional use permit following an approval process similar to what we are undertaking now.

City Council must take formal action as set forth in section 7-9-9(c) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)).

1. That the proposed use or development of the land will not materially endanger the public health or safety. **The project has been reviewed by the TRC with a few safety comments noted.**

2. That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant. **The property is very urban in nature. New construction is happening on adjacent properties. Landscaping proposed and existing will make the site attractive and will provide the necessary buffering.**

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The project is not expected to injure the value of adjoining or abutting properties.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** The project is closely associated with Charlotte Street. The project is compatible with uses in place on Charlotte Street.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** The project is providing investment in an existing parcel and business. Development and re-investment in existing businesses matches goals from the City Plan 2025 to strengthen the business climate for the City.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** Requirements of utility providers will be met for this project. All utility needs can be met at this site.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** This project was considered at the Technical Review Committee it was felt that traffic would not be negatively impacted by this small project.

Pros:

- Provides an adequate buffer space to nearby residentially zoned land.
- Maintains the existing visual character for this section of Charlotte Street.

Cons:

- The rezoning reduces RM-16 zoned property (although CB-1 allows a similar residential density).
- The site has the potential to change to other CB-1 uses if approved through the conditional use approval process (a potential plus).

The project provides a site specific plan to expand a parking area for the medical office use. The project will be adequately landscaped from adjacent residential uses following requirements for such in the UDO. The existing uses on the site meet the requirements for CB-1 zoning.

The Planning and Zoning Commission, at its July 7, 2004, meeting, voted 5-0 to recommend approval with conditions that the outstanding TRC issues be satisfied. Staff also recommends approval of the rezoning request.

After hearing no rebuttal, Mayor Worley closed the public hearing at 6:30 p.m.

Upon inquiry of Mayor Worley, Mr. Glines said that if the property was entirely zoned Community Business I there would not have been a problem regarding the parking lot expansion.

Mr. Glines responded to some questions from Councilman Newman about the number of parking spaces.

Councilman Davis moved to adopt Ordinance No. 3143 to approve the conditional use rezoning for property located at 200 Charlotte Street from RM-16 Residential Multi-Family High Density District and Community Business I District to Community Business I District/Condition Use. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 264

Councilman Davis moved to adopt Ordinance No. 3144 to issue a conditional use permit for property located at 200 Charlotte Street to expand a parking area and provide parking lot landscaping to meet the requirements of the UDO, subject to the outstanding TRC conditions being satisfied. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 266

F. PUBLIC HEARING TO CONSIDER ORDINANCE TO CLOSE AND VACATE THE DWELLING LOCATED AT 1086 HENDERSONVILLE ROAD

City Attorney Oast said that just prior to this meeting, the attorney for the owner of the property said that they would like to work with the City Attorney's Office to negotiate a potential resolution and asked that the matter be continued until the next formal meeting.

Councilwoman Bellamy moved to continue the public hearing until August 10, 2004. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

Councilman Dunn felt that Council might be setting a precedent in allowing property owners to come in at the last minute and try to negotiate a settlement, when they have in fact had ample opportunity to meet our Housing Code.

At 6:39 p.m., Mayor Worley announced a short recess.

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 04-161 – RESOLUTION ADOPTING THE WATERSHED MANAGEMENT PLAN

Mr. David Hanks, Interim Director of Water Resources Director, said that this is the consideration of a resolution adopting a Forest Management Plan for North Fork and Bee Tree Watersheds.

The forestry management consultant firm of Wildwood Consulting, LLC was retained by the City to provide a forest management plan at the North Fork and Bee Tree watersheds, including the current state of the trees, shrubs, underbrush, grassy areas, roads, streams, wildlife, and maintenance to ensure high quality water flow in to the two reservoirs. Secondly to make recommendations on areas requiring improvement. The plan is the first step in a five to ten year planning process, which will establish best forestry management practices for proper management of the watersheds.

Mr. Hanks said that the forestry management study was the result of an airplane crash in the watershed area in 2002. Due to the overgrowth within the watershed and inaccessibility of roads it was extremely difficult for fire and rescue workers to reach the downed airplane. This prompted the fire chiefs of the City of Asheville and Town of Black Mountain to request accessibility and maintenance of the watersheds. This included analyzing the potential for fire and fire fighting capabilities in the watershed based upon its current status. It also included analyzing large areas of the watershed where trees were down and overgrowth did not allow for emergency and maintenance vehicles and/or equipment to be brought in. The forester's primary direction is the proper management of the forest through Best Management Practices in order to maintain the functions of the forest contributing to water quality and to reduce the risk of catastrophic loss by fire, insects or disease. Any watershed maintenance, including tree removals, grass removal and road improvements will be accomplished in compliance with the Asheville Watershed Conservation Easement.

Staff will bring an annual plan to City Council outlining specific details of what will be done within the watershed for approval.

City staff recommends City Council adopt a Forest Management Plan for North Fork and Bee Tree Watersheds.

Mayor Worley made perfectly clear is that this is not a logging plan. There are one or two references to logging, or clear-cutting between 5-10 acres, in the plan itself. One thing that came out of Council's worksession discussion on July 20, 2004, is that those references are inconsistent with our conservation easement which prohibits any logging of even-aged trees. That effectively prohibits any logging, and, again, the plan itself was never intended to be a logging plan.

Mayor Worley said that the public hearing comment period will be limited to one hour. Comments will be taken first from individuals whose names appear on the sign-up sheet.

Ms. Leslee Kulba spoke in support of the management plan. She was disturbed with a lot of the materials and exaggerated, out of context information being circulated in the community that this is a clear-cutting document. She urged the community to become informed before circulating misinformation.

Mr. Eric Gorny, property owner adjoining Bee Tree Reservoir, spoke in support of the plan. He is concerned about the lack of access for the fire departments to control fires. Being a hunter, he explained how thinning and clear-cutting is necessary for new growth to feed the wildlife.

The following individuals, who were basically in support of a good management plan, spoke against adoption of this management plan for several reasons, some being, but are not limited to: there is nothing in the plan about the role of the watershed and the larger Black Mountain conservation area; there is no mention in the plan that there is a conservation easement; there are a number of provisions in the plan that would violate the conservation easement, e.g., clear-cutting; the plan poses an unnecessary risk to our water supply; the plan is vague and inadequate with regard to protecting water quality; the plan suggests engaging in practices which have the potential to reduce water quality and reduce the ability of the forest to filter and capture water; the number, location and method of logging practices suggested in the plan are not clearly defined; permissive loosely defined documents, such as this plan, can be used by polluters and economic-interests to profit without consequences while degrading a public resource; the plan provides neither a baseline inventory of the watersheds natural resources or documentation for the lands ability to capture and clean incoming water, plans falls short of serving as a guiding document which outlines the future of management in the watershed; plan only provides a brief introduction of the management possibilities and far-fetched worse case scenarios; the plan should include clear goals that have been agreed upon by a variety of stakeholders and outline objectives; objective should be matched with significant scientific recommendations for action and contingency; the public should be allowed to be part of the planning process; prior to developing a plan, there should be a baseline forest inventory and assessment, complete inventory and survey of current conditions of local flora and fauna, an analysis of the cumulative and environmental impacts to determine how proposed activities will alter the watershed landscape, a visual quality analysis from the Blue Ridge Parkway to ensure the areas highly visible from the Parkway are not negatively impacted, and a cost benefit analysis of the economics of managing the property, a road analysis to identify the critical roads that must be maintained and those roads that should be decommissioned, and public input; the Blue Ridge Parkway, Conservation Trust for North Carolina and other key partners and interest groups were not contacted to ask for their thoughts on the plan; timber harvesting methods in the plan appear to violate the intent and letter of the conservation easement; potential visual impacts to the Parkway view areas have not been evaluated as part of the planning process; need water management plan, not a forest management plan; rare and endangered species are not addressed; control of exotic invasive species is extremely important but cutting 50-foot strips at roads and small clear-cuts will open up new areas for the invasive species to thrive; we cannot create 50-foot roads in all parts of our mountainous region in the off chance of a fire or a plane crash, maintenance of the current roads should be adequate and all emergency vehicles should carry chainsaw equipment when entering the watershed; question of the City's consultant competence regarding birds; logging is part of every habitat recommendation; 50-foot road maintenance recommendation is overkill; study found that "timber harvest through its effects on forest structure, local micro-climate and fuel accumulation has increased fire severity more than any other recent human activity"; an organization that specialize in the management and protection of drinking watershed water should be consulted; conservation easement needs to be updated by placing the entire property in a protective easement that prevents commercial logging; we should not damage our drinking watershed because we have the technology to make polluted surface water drinkable; an expert committee needs to be formed to advise the development of a management plan for the watershed using experts in soils, plant and animal life, hydrology, etc.; there are other options to management the watershed; the plan exaggerates the risk of catastrophic fire beyond reason; disagreement with Miscanthus Sinensis being "shade tolerant" and with the proposed fire scenario laid out in the plan regarding the plant; City's consultant has no knowledge about what measures are currently in place to monitor and prevent forest fires; detrimental effects of herbicides on the water quality; who will implement the plan; if you don't removal all the invasive species, they will grow back; and concerns for lack of enforcement of the management plan

Mr. Hugh Irwin, Conservation Planner with the Southern Appalachian Forest Coalition (two pages of information from the Southern Appalachian Forest Coalition and a map)
Ms. Gracia O'Neill, Outreach Coordinator for Clean Water for North Carolina
Mr. Ben Prater, Staff Ecologist for the Southern Appalachian Bio-Diversity Project (bibliography of watershed research; photo petition; and petition requesting Council "reject any and all proposals to allow commercial logging in the Asheville watershed.")
Mr. Gary Johnson, representing the Blue Ridge Parkway (letter dated July 27, 2004, from Daniel W. Brown, Superintendent, Blue Ridge Parkway)
Ms. Alyx Perry, WildLaw sustainable forestry program
Mr. Carl Nyberg, Asheville resident
Ms. Charlotte Goedsche, Secretary of the Elisha Mitchell Audubon Society

Mr. Monroe Gilmore, Coordinator of the Swannanoa Valley Alliance for Beauty and Prosperity (Comments of Monroe Gilmore, SVABP Coordinator)
Mr. Bud Howell
Ms. Susan Andrew, forest ecologist with special interest in watershed ecology and function (pictures of her daughters)
Ms. Robin Cape, Board Member of the Woodfin Water District
Mr. Bob Gale, Ecologist with Western North Carolina Alliance (information on ecological aspects within the Asheville watershed proposal)
Ms. Julie Brandt, representing Asheville Park People Advocating Real Conservancy
Mr. Alan Ditmore
Ms. Carol Wilson

Mr. Rusty Painter, Director of Land Protection for the Conservation Trust of North Carolina, read a prepared statement stating that they "are the holder of a conservation easement on 17,356 acres of the Asheville Municipal Watershed. The primary purpose of the easement is to protect the property's ability to provide a clean, safe and plentiful source of drinking water. The easement also protects the nationally significant natural areas within the watershed and the scenic vistas from the Blue Ridge Parkway. The Asheville City Council now begins a public process to consider possible forest management activities on this property and we encourage Asheville citizens to participate in this process. The Conservation Trust will continue to work with the Asheville City Council to ensure that the intent and terms of the conservation easement are honored and that any management plan respects the restrictions in the conservation easement." He said the City's consultant Mr. Hicks has done the job he was hired to do. He looks forward to working with Council to continue to resolve this issue and find a compromise and a way we can manage the property in a way that suits everyone and still respects the constraints of the easement.

Councilman Dunn initiated a brief discussion about the need for cooperative partnership with the Blue Ridge Parkway especially regarding a permit for the Swannanoa River bridge at Azalea Road Park.

Mr. Edward B. Hicks, Forester with Wildwood Consulting, LLC, said he has listened to all the comments. He agreed that this is not a complete plan and it is not intended to be complete. This plan stops at the general recommendations. At this point they are trying to get Council and public input before they give specific recommendations. On an area this large, if you present specifics and then you get input, someone may say they didn't want to go that direction at all, there is a lot of wasted time. He is not asking for blank authority. He will be happy to work with the Conservation Trust of North Carolina, the Park Service and other interested parties who would like to participate as we refine the process and get more details in the plan. He said the conservation easement clearly says no even-aged management, so the small 10-15 acre clear-cut ideas, which were not for actually oak regeneration but for early successional habitat for grouse, will be removed from the plan as one of the recommendations.

Mr. Hicks said that they are asking for a 50-foot area to improve road maintenance basically to reduce the area where there will be probable tree fall across the roads. There is only one person to maintain 65 miles of roads in the watershed and it would be fine for them to carry chainsaws but he doesn't have the time to keep all the roads clear. The idea is to take parts of those roads where we see a particular hazard and clear back about 50 feet. There will be places where we may not clear all the trees because we are trying to promote white oak and northern red oak. Also, we will not be clearing the roads that go across the stream-heads. It's not even-aged management from the standpoint we are not regenerating the trees. We would come back with a chainsaw to cut down the tree form vegetation. Regarding expense to maintain this, he said that every year you would do several stretches of road on maybe a 10-year rotation. The idea is that every year you harvest a little from the small group selections and individual tree selections to generate revenue to pursue the maintenance that is recommended in other areas.

Mr. Hicks said that the final plan will be very intentional about our water quality not being negatively impacted. He hoped to enhance the water quality not by logging, but taking some of the revenue from the logging and improving the roads so that conditions that exist now can be improved and reduce the sedimentation into the watershed.

Considerable discussion followed. Mr. Hicks and Mr. Hanks responded to various questions and comments from Council, some being, but are not limited to: why shelterwood cuts are not removed from the plan; discussion of aged stands; has there been discussion with the Conservation Trust about whether or not the clearing along the roads is an even-aged technique; is it true that Chinese silvergrass tends to spread more quickly in areas that have full sunlight; how have you researched the conclusion that daylighting the roads by 50-feet may not have an aesthetic impact on the Parkway views, especially in the winter; what steps are being taken to avoid the impact on water quality; what type of problems can occur if there isn't a 50-foot road maintenance; should we be concerned about a fire in our watershed and what is the real likelihood of a catastrophic fire; even if we do get rid of the Miscanthus, it is still quite a common species in our community; if we do more activities to open up the watershed, are we at a higher risk having an on-going maintenance problem of Miscanthus; how is Miscanthus spread; what is the best way to get rid of Miscanthus; how many miles of roadway is proposed for the 50-foot daylighting; has the City looked at the other area municipalities management plans to see what kind of direction they are moving forward with; and, have we explored the options of commercial logging or total preservation of the watershed property.

Upon inquiry of Vice-Mayor Mumpower, Mr. Hicks said they are seeking direction on this general plan in order to present Council with specific details. Again, this is not a complete plan. After direction is received by Council and the public, Mr. Hicks said that he will meet with the Conservation Trust of North Carolina, the Park Service and other interested individuals to write specific recommendations over a 10-year period. These recommendations will be brought back to Council on an annual basis, after having a session with the stakeholders, with a plan for the next year. He said it will all be in stages and this is the stage where they receive Council and public comment.

Councilman Davis agreed that the plan is very open-ended and he personally doesn't want any logging in the watershed. If we are going to daylight that large of area, he feels that would make itself more available to a heavier scale of logging and that is a concern. He was, however, certain that we did need a plan for watershed management and the Tree Commission agreed. He felt it was important to know how many miles of primary roadway we are talking about in order to access the secondary areas before we proceed. He wondered if it would be better off to hire a few extra crew people to do road maintenance rather than to go in and do a 50-foot daylighting and logging operation. He felt that we should call the document a watershed management plan, which better fits what we are doing. We have to come to terms with the fact that the wildlife habitat management is probably not the most important thing in the plan and he personally did not want to get into that type of management. He suggested that once the plan is formulated each year, after public input, with specific recommendations on what they would like to accomplish in the coming year, that it be taken to the Tree Commission for review prior to being presented to Council. There are mechanisms already in place to get the public input. And, he felt there may be the potential in the future for recreation in the watershed, more specifically in the Bee Tree watershed.

Councilman Dunn felt we are just wanting to lower the odds of having a catastrophic fire. Mr. Hicks said that he didn't think we can lower the risk of having the fire, but what they are trying to do is have some security that if we have their fire, we can get to it in a timely fashion. The slopes on the watershed are very steep and any roads that are running straight up, we will try to close those. We are looking to daylight the roads that are going around the topography climbing at a fairly slow angle.

Councilman Newman said that the plan is very open-ended. Council has to think about the policies we make now, which we might have a certain understanding of, but in ten years from now, a future Council or a future forester who is responsible for implementing the plan, could read this plan and interpret it to do much more extensive forestry than you are describing, because it is pretty broad. You could theoretically not violate that plan and cut a lot of timber off that watershed. City Manager Westbrook responded that it would be the staff's responsibility to proceed with the policy Council set. Mayor Worley also responded that future Council's could hire another forester and go in a total different direction.

Councilwoman Jones said that there is a lot of knowledge in the community and she has learned a lot from the public's input. She didn't feel that there was an urgency to adopt the plan right now and suggested we bring in the public to utilize the amount of knowledge they have to take us to the next place.

Councilman Newman's main goal is to protect the water quality. He asked Mr. Hanks, who responded, questions regarding whether it would be worthwhile to look at recreation activity at Bee Tree and if it would be consistent with protecting our water quality.

Upon inquiry of Mayor Worley, Mr. Hanks said that if Council approves this plan, no activity would start this year but that staff will develop the next step of the plan and bring it back to Council as part of the next year's budget. He said we don't have funding this year to start the process. He anticipated that in approximately six months, we would meet with the stakeholders, e.g., the Conservation Trust of North Carolina, Blue Ridge Parkway, Forest Service, Tree Commission, et al., and show them what the staff will be recommending with the possible cost estimate to see if the next stage can be implemented.

City Manager Westbrook said we are requesting approval of a broad, general public policy that staff can move forward on. Then we will come back and hone it down each year. There are several questions, but he feels those will be answered on an annual basis on a much smaller scale than the basic plan.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved to approve the adoption of the amended Forest Management Plan (as just presented by Mr. Hicks), which includes the removal of the small 10-15 acre clear-cuts, keeping the shelterwood cuts as a potential possibility and the 50-foot clearing along the primary roads as a option. This motion was seconded by Councilman Dunn.

Councilman Dunn asked Vice-Mayor Mumpower for a friendly amendment to change the name of the Plan to "Watershed Management Plan." Vice-Mayor Mumpower accepted the amendment.

Councilman Newman moved to amend the motion that we accept the information presented to Council and approve all parts of the proposed plan as presented, (1) including all the activities of removing exotic species (including Miscanthus) from the watershed; actions to maintain and rehabilitate roads and bridges on the property; close roads that are impacting water quality; improve signage on the watershed property; the activities that are proposed to restore American chestnuts on the property and manage the hemlock woolly adelgid infestation; and other specific recommendations that are in the plan, but defer a decision to implement any logging activities on the property until we develop a more comprehensive watershed plan; and (2) that we create an advisory task force of citizens to gather more public input on the development of a more comprehensive watershed plan that takes a look at some of the recreational issues that have been raised as a possibility, but doesn't necessarily preclude silviculture as a tool that can be used on the watershed, and hopes to gather a more thorough biological inventory of the property that we have so that whatever decisions we make is based on good science. This motion was seconded by Councilwoman Jones.

Councilwoman Bellamy suggested that the task force also consist of experts in soil, plant and animal life, and hydrology.

Vice-Mayor Mumpower understands Councilman Newman's intent to post limits before anything is done, but he felt the limits already exist. We are voting to ask our staff to press forward with developing a more specific sequential plan extended over time and to artificially impair their ability to do that by removing too many options is not something he personally would be comfortable in doing and he doesn't think it is necessary.

Councilman Davis said that if we accept the plan, it won't move forward until we get the specifics we have asked for in a more narrowed form. He would be comfortable in leaving the logging portion in the plan since it will not move forward until staff comes back with a more narrow plan after having received public input. In an effort to move the process along and get to the next level, he will support the original motion.

Councilwoman Jones noted that Council has a wonderful resource in Councilman Newman who has worked in the environmental area for ten years.

Mayor Worley said that if we adopt the plan tonight, nothing takes place until next year and until we have an opportunity to develop the specific plans for whatever will take place. That will be brought back to Council for approval as part of next year's budget. He would be supportive of adopting the plan with that in mind. He suggested adopting the plan but put a restriction that specifically says no logging activities until we have consulted with the Conservation Trust of North Carolina, Blue Ridge Parkway, and whoever else might be necessary for that consulting. Then, whatever comes out of that as a proposed plan will come back to Council for approval.

Councilman Newman explained the intent of his motion. He felt that it is different to say we are going to move forward with the consensus items, but we are going to put together a team of people with areas of expertise and different fields to come up with a comprehensive watershed plan. This is a plan that includes logging, more or less. He is not, in his motion, wanting to necessarily close the door on that question, but if we approve this plan we have approved a plan that includes more or less logging. That is the distinction in his mind and why he would prefer the way his amended motion is phrased.

Councilman Dunn said that a few trees are going to have to be cut down and if we have to cut them down, why don't we sell them. We are not talking about funding the City budget. The City has many plans already in place and felt we now needed a watershed management plan to make sure we are being good stewards of our resource.

Councilman Davis felt he could support the suggestion made by Mayor Worley.

Upon inquiry of Councilwoman Bellamy, Mayor Worley supported a task force but he felt that Council may have to work on how that is formulated and what the qualifications might be to serve on it. He wasn't sure if he was prepared to put that in his suggestion at this time, but it is something we need to seriously consider.

Councilwoman Bellamy said that we haven't brought out the financial ramifications of this plan. We can't even get a Water Authority budget approved by the three bodies necessary and wondered if this will be a major part of that budget. If Council is in agreement on formulating a task force, she felt it was important for Council to agree on how the task force's recommendations will be received.

Councilman Newman moved to call the question on his amendment to the original motion. This motion was seconded by Councilwoman Jones and carried unanimously.

The amendment to the motion made by Councilman Newman and seconded by Councilwoman Jones was defeated on a 3-4 vote, with Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "no."

Councilwoman Bellamy requested the original motion be rescinded so Council can vote on each part of the plan separately. Mayor Worley explained the motion was to adopt the plan as presented.

Mayor Worley then moved to amend the original motion to adopt the plan as presented tonight by Mr. Hicks with the additional provision that there be no logging activities until after a consultation with the Conservation Trust of North Carolina, the Blue Ridge Parkway, and whoever else might be necessary for that consulting, and a clear plan for any such activities be prepared in consultation with them and then brought back to City Council for final approval. This motion was seconded by Councilman Davis.

Mayor Worley supported an advisory group to review and offer additional input, but he would rather not deal with that in a motion now, but to give Council time to develop that motion in terms of qualifications of who might be on that task force and deal with that at a subsequent meeting.

The amendment to the original motion made by Mayor Worley and seconded by Councilman Davis carried on a 5-2 vote, with Councilwoman Jones and Councilman Newman voting "no."

The amended original motion as follows carried on a 4-3 vote, with Mayor Worley, Vice-Mayor Mumpower, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Bellamy, Councilwoman Jones and Councilman Newman voting "no": To adopt the Watershed Management Plan as presented tonight by Mr. Hicks with the additional provision that there be no logging activities until after a consultation with the Conservation Trust of North Carolina, the Blue Ridge Parkway, and whoever else might be necessary for that consulting, and a clear plan for any such activities be prepared in consultation with them and then brought back to City Council for final approval.

At 9:50 p.m., Mayor Worley announced a short break.

RESOLUTION BOOK NO. 28 – PAGE 314

B. MOTION RECEIVING THE FINAL REPORT OF THE DOWNTOWN SOCIAL ISSUES TASK FORCE ON GRAFFITI

Ms. Sasha Vrtunski, Director of City Development, explained that the Downtown Social Issues Task Force broke their work up by topics: Graffiti, Panhandling, Public Drunkenness and Homelessness. City Council has already heard the report regarding the 10-year Plan to End Homelessness and taken action. Because each of these issues is so complicated, the Task

Force is coming to Council in July with their graffiti recommendations and in August with the panhandling and public drunkenness recommendations.

The Task Force took the approach of recommending stiffer penalties for vandals while reducing the incentive for doing graffiti by asking property owners to remove graffiti within forty-eight (48) hours. This has been a proven approach in other cities; when graffiti is removed within the first 48 hours, the incentive for future vandalism is greatly reduced. In other cities building owners are required to remove the graffiti within the 48-hour period, or be faced with large fines. The Task Force recognized that this could be a large burden on property owners and worked to make the program as easy as possible. In conjunction with recommending such an ordinance, a companion volunteer clean-up group would be set up through Quality Forward to be able to respond to instances of graffiti, where the property owner has signed up to allow them to clean his or her property. This approach has the potential to get graffiti off of downtown buildings quickly with no penalties to building owners.

The Task Force is also recommending that the City install additional kiosks around downtown to provide spaces for flyers; create a website about the graffiti abatement program; support the Asheville mural project, and provide additional street police officers as a deterrent. Finally, the Task Force is also asking that City Council ask the District Attorney's office prosecute offenders to the greatest extent possible and seek full restitution for property owners

Advantages

- Removal of graffiti within 48 hours has been proven to be a deterrent to graffiti artists and vandals.
- These recommendations provide both "carrots and sticks" to combat the problem of graffiti in downtown.

Disadvantages

- The Volunteer program is quite ambitious and may have to be adjusted over time.
- There are some property owners that feel that 48 hours is too short of a time for them to remove graffiti, while at the same time supporting the concept in general.

City staff recommends City Council adopt the Downtown Social Issues Task Force's Graffiti recommendations. City Council may want to consider the 48-hour period to be business hours. City staff will evaluate each of the recommendations for legal sufficiency, and if any recommendation is unable to be carried out for legal reasons, staff will notify Council. Upon Council direction, staff will work on a draft ordinance for graffiti removal.

Mr. Patrick Whalen, Chair of the Downtown Social Issues Task Force and the Graffiti Sub-Committee, and Graffiti Sub-Committee members Ms. Leslie Huntley, Ms. Kitty Brown, and Ms. Kim MacQueen each addressed the concerns expressed by Council at their July 20, 2004, worksession on the recommendations presented. They explained that hundreds of hours by volunteers were spent in developing and understanding the problem of graffiti and then researching solutions and approaches tried by other cities. They highlighted the findings which are provided in detail with supporting research, reasoning and examples of model program in the 125 pages of the report and supporting appendix.

Sub-Committee members responded to Council's prior concerns/comments, some being, but are not limited to: how important it is for the quick removal of graffiti; who is responsible for the quick removal of graffiti – City government, property owners, volunteers or graffiti offenders; why the Committee is recommending a program of large community volunteers to remove graffiti cost-effectively and in order to heighten community-wide awareness of the problem; the research of over 50 cities that have various problems with graffiti; in cities where they take responsibility for the clean-up, they end up back-charging the property owner anyway at much higher rates than the fines the Committee is suggesting; property owners who do not remove the graffiti quickly are actually hurting the entire neighborhood by encouraging graffiti on adjacent buildings and near-by areas; as opposed to punishing the building owner with a fine or a City with clean-up charge, they felt it was important that we as a community aid the victim because the City might not be able to afford to, therefore they recommend the fine only if the building owner would neither clean the building themselves nor allow volunteers to clean it; volunteer clean-up crew is a challenge but it is working in other cities; and building owner liability.

The following are the recommendations, along with action steps for each one:

1. We recommend that the City of Asheville, in cooperation with Quality Forward, the Asheville Downtown Association, organizations like Project STEAM and Buncombe Alternatives, private property owners, business owners, and community volunteers, commits to removing *graffiti* within 48 hours after its appearance has been reported.
    - We propose a pilot removal program on a smaller section of downtown to be followed by its implementation throughout the central business district.
    - The program would involve the implementation of a graffiti reporting hotline at Quality Forward which would dispatch a volunteer force of "graffiti busters" to remove reported graffiti within 48 hours.

2. We recommend that the City pass a local ordinance which requires building owners to either remove all graffiti themselves within 48 hours of its being reported or to grant permission for their property to be cleaned by graffiti volunteers.
    - Violations of this ordinance would be enforced with a penalty of $25 a day for each day the graffiti remains after notice to the building owner.
    - In the case of acid etching, the release will allow the volunteers to cover the graffiti etching with a larger geometric etching or allow the owner to opt out of volunteer repair and agree to replace the window glass within 2 weeks.
    - It is also recommended that the City create a low interest loan fund to aid building owners victimized by acid etching who choose to replace their glass.

3. We recommend that the City create a web page describing Asheville's graffiti abatement program with a hot link to Quality Forward's website which would describe their role in the graffiti abatement program.

4. We recommend support of the Asheville Mural Project, a program of public art murals, as a viable deterrent to graffiti vandalism creating opportunities to develop neighborhood ownership and pride.

5. We recommend that the City add five additional round legal posting sites (similar to the library poster kiosk but much smaller) appropriately spaced around downtown in an effort to reduce and concentrate sticker/flyer graffiti

6. We recommend that the City Council issue a resolution to the District Attorney's office requesting:
    - The DA prosecute graffiti offenders, and in particular repeat offenders and acid etchers, to the fullest extent of the law;
    - The DA seek awards of full restitution to property owners for damage;
    - First-time offenders be sentenced to 100 hours of participation in graffiti cleanup and repair under the auspices of an organization like Buncombe Alternatives; and

- Repeat offenders and acid etchers be required to perform 500 hours of service in cleanup efforts.

7. We support a greater police presence on the street as a deterrent to graffiti and similar forms of vandalism.

8. Upon hearing the interest for a legal graffiti wall during public input sessions, the Task Force suggests the following:

   - The graffiti subcommittee will entertain proposals from individuals who are interested in coordinating such a legal wall. Proposals should include location, monitoring the site (loitering, letter, profanity), maintenance, etc. It is our intention that a legal wall be on private property and be privately monitored and maintained.

   After reviewing proposals, the subcommittee will make further recommendations to City Council regarding legal graffiti walls.

Task Force members then explained what a thorough 18-month investigative job they did in compiling this exhaustive report. Because of the discussion by Council at the July 20, 2004, worksession when the recommendations were submitted, the Task Force members were disappointed when City Council asked them to go back and research more. They suggested that in the future if Council creates a task force, they should be treated with more respect or the process needs to be altered. They only ask that Council accept their recommendations and that the Council put the same amount of time into any changes to their recommendations, as the Task Force put into making the recommendations. It will be up to Council to implement some, all or none of them.

Mr. Alan Ditmore, Leicester resident, felt the recommendations should be rejected because any rise in downtown rents will cause more homelessness.

Ms. Patricia Wald, employee on Broadway Avenue, appreciated the efforts of the Task Force, however, was appalled of penalizing the property owners for the actions of criminals. She felt the Police Department should make more of an effort to catch the graffiti criminals, send them to jail and fine them as well.

Ms. Rosanna Coates also spoke against fining property owners for the actions of graffiti criminals.

Mr. Bill Stamey urged Council not to penalize the people who own the property. He would be willing to pay more in his tax dollars to get the City to remove the graffiti.

Councilman Newman explained that part of the proposal is that the property owners can call Quality Forward and be placed on a list where the Quality Forward volunteers would remove the graffiti. If they are placed on the list, they would not be fined under any scenario. That option is out there for property owners to escape the burden of removing the graffiti themselves.

Ms. MacQueen clarified the recommendation in that they are mostly calling for a volunteer graffiti removal force, which is going to be operated out of Quality Forward, where we have a cadre of volunteers who are going to go onto property owners property with their permission and remove that graffiti for free. Should we find a property owner (absentee or one who just doesn't care), we would like to be able to ensure that there is a method to get that graffiti removed as well. The fine is Part B of the recommendation, with Part A being the volunteer graffiti removal force.

Councilwoman Bellamy felt that Council needs to decide how to deal with the recommendations they receive (prior to them being received) from the various task forces and committees they appoint. She thanked the Task Force for their 18-months of hard work on this difficult topic.

Councilwoman Jones was sorry that the Task Force felt they were not treated with respect. Council is well-intended and Council needs to figure out a better way of relaying that. She felt the report was impressive.

Councilman Dunn also was sorry the Task Force didn't think they were treated with respect. Sometimes Council has to give constructive criticism where they feel it is appropriate. He has a problem with this being limited to just the downtown because there is graffiti all over the City. He supported the recommendations, except he would not support fining property owners.

Vice-Mayor Mumpower said he did not mean to be disrespectful or inconsiderate at the July 20 worksession when he raised questions. Council is faced with a parade of issues and they have to be dealt with in a fairly brief time. When Council sees something they have a philosophical disagreement, they are compelled to raise a flag. He did not want to encourage a momentum of penalizing the victim. He thought his comments were on the basis of inquiry with the rest of Council and the Task Force vs. a criticism of the Task Force and if it came across that way, it was not intended. He felt there is a lot we can do before we go this far. Our Police Chief has some ideas and he thinks there are some models that show stronger law enforcement can make a difference. The volunteer effort sounds great, but his personal concern is that if we start out with that volunteer effort, he doesn't believe we will be successful in sustaining it, and if you don't, it comes back to the property owners and City taxpayers. He supported getting the volunteer effort started and seeing how it works. He would support Council creating a budget item for some rewards for catching the graffiti vandals. If graffiti is on your property, it's a form of community terrorism, not art. Council has concerns about the recommendations, but that doesn't mean we don't appreciate the work of the Task Force. He apologized for the pressures of the parades that Council has to deal with, but he doesn't apologize for trying to get to the best place for the most people.

Councilman Davis apologized that the Task Force felt disrespected. Being a former member of the Planning & Zoning Commission and a member on various other committees, he can understand the frustration the Task Force felt. He appreciated the hard work that has gone into the research. He has read the report and he assumed the worksession was the place where questions were asked. He is a small business owner in the downtown and has painted graffiti off his walls so he understands the problem. He does have several questions, e.g. how do we collect the fines, how to do impose the fines, and how do we enforce it.

Mayor Worley said that Council created the Task Force and charged them with a number of things to study and research, including graffiti, public drunkenness, panhandling and the issue already being implemented regarding homelessness. The two reports submitted have indicated they have done an outstanding job in that charge. Council does appreciate the efforts of the Task Force. Regardless of what actions the City takes or doesn't take, the effort is greatly appreciated. The bottom line is that the City could not function without the services provided by volunteers and this is one example of those services.

Councilman Davis moved to receive the report of the Downtown Social Issues Task Force on Graffiti, and that City staff be instructed to evaluate the recommendations for legal sufficiency and report back to Council on how to proceed further. The motion implies no decision on whether Council will implement any or all of the recommendation contained in the report. This motion was seconded by Councilwoman Bellamy and carried unanimously.

Upon inquiry of Councilman Newman of a timeline, City Manager Westbrook said that staff will look at this issue and all the other issues we are working on for Council and come back as soon as possible with what we think the timeline will be. If the timeline is not quick enough, then Council can re-prioritize our issues and we will move forward. Councilwoman Bellamy wanted to make sure the Police Chief is implementing ideas he thinks is appropriate.

C. RESOLUTION NO. 04-162 - RESOLUTION ADOPTING THE WILMA DYKEMAN RIVERWAY MASTER PLAN AS PART OF THE COMPREHENSIVE PLAN FOR THE CITY OF ASHEVILLE

Planning & Development Scott Shuford said this is the culmination of a fairly long process that has involved extensive public input and considerable consultant expertise. This is a private sector plan in which economic development is a clear focus. The plan takes the approach that if you provide the vision and the enthusiasm, the private sector will take over and move it forward. The City's role under this plan is basically a fairly small role. The City would help support the riverway project and since that will be a state highway project, that is not a monetary support. That's a support from the standpoint of lobbying and trying to get it to occur. There will be some future zoning changes and regulatory changes that will be necessary to implement the plan and make it move forward. There will continue to be the same sort of incremental enhancement of recreational opportunities along the riverfront. In addition, there needs to be support from Council for private sector redevelopment so that when people come forward with redevelopment that is in keeping with the general direction of this plan and others in the City along the riverfront, that receives appropriate Council support.

Ms. Karen Cragnolin, Executive Director of RiverLink, introduced her Board members present, and said that several years ago, the City contracted with RiverLink for the preparation of a master plan for the urban areas of the French Broad and Swannanoa rivers. Later, the scope for this plan was broadened to include what is now called the Wilma Dykeman Riverway concept.

Working with a large, broad-based group of citizens and with City staff, RiverLink and its consultants have completed an Urban Riverfront Master Plan that envisions nodes of relatively dense urban development in a scenic riverfront setting. The plan capably marries land use, transportation, water quality, and economic development goals in a manner that implements City Sustainable Economic Development Task Force and Smart Growth objectives. Under the plan, the main road linking the two rivers will become a unified transportation corridor; economic development opportunities and strategies are identified and mapped out; and a land use pattern consistent with traditional development design throughout the City is encouraged. Additionally, environmentally sensitive restoration of the rivers to promote public access, recreation, and commerce is to be accomplished through plan implementation.

There has been considerable public involvement in the development of this plan and the extent of this involvement will be detailed to Council in the presentation of the plan. Additionally, RiverLink received preliminary feedback from City Council concerning the direction of the plan in January of this year.

Key future actions for the City called for in the plan include:

- Continued support for moving the Riverway project forward.
- Continued involvement in the recreational improvements called for in the plan.
- Consideration of changes to zoning requirements to implement key plan components.

- General support for private sector redevelopment of properties as proposed in the plan.

Pro's

- Major new transportation initiative has the potential to relieve traffic congestion and spur new economic development.
- Potential to dramatically increase tax base through private sector redevelopment.
- Strong public support for proposal due to its comprehensive treatment of urban riverfront issues, including economic development, transportation, recreation and beautification.

Con's

- May result in displacement of some existing uses along the river area through market forces or road widening.

The plan supports the following Goals and Objectives of the Strategic Operating Plan:

Economic Development Goal # 3, Objective A - Mobilize collective resources and goals by implementing a unified regional economic development plan. Riverfront redevelopment has been a regional goal since the Sustainable Economic Development Task Force made it a priority area in its strategic plan report. Consequently, the Urban Riverfront Master Plan can be considered regional in scope as a critical economic development tool.

Natural and Built Environment Goal # 2 - Increased greenway benefits equitably throughout Asheville. The Urban Riverfront Master Plan contains a greenway network that links the north, central and east parts of the City in a continuous fashion.

Mr. Shuford said that City staff recommends City Council adopt the Wilma Dykeman Riverway Master Plan as part of the Comprehensive Plan for the City of Asheville.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower supported the Plan, but with some qualifications. He felt we are downplaying the importance of the plan. He feels it is the project of the century. When you look at the scope and impact of what is being proposed, it will lay a touch on this City that will change us profoundly forever. He personally felt that it will, eventually, involved significant City dollars. He knows RiverLink has great success in reaching into other generous pockets and have helped get things happen and he doesn't doubt they will do that from this point forward.

Councilwoman Jones moved for the adoption of Resolution No. 04-162. This motion was seconded by Councilman Davis and carried unanimously.

Ms. Cragnolin presented City Council with a check in the amount of $50,000 for the bridge at the French Broad River Park Phase 4.

RESOLUTION BOOK NO. 28 – PAGE 315

D. RESOLUTION APPOINTING A MEMBER TO THE BOARD OF ADJUSTMENT

Vice-Mayor Mumpower said that this is the consideration of appointing an alternate member to the Board of Adjustment.

Bradley Taylor has resigned as an alternate from the Board of Adjustment, thus leaving an unexpired term until January 21, 2006.

On July 20, 2004, it was the consensus of City Council to instruct the City Clerk to arrange interviews for Ross Dryer and John Kiser.

Councilwoman Bellamy moved to delay the appointment of this alternate position and re-advertise the vacancy. This motion was seconded by Councilman Davis and carried unanimously.

E. RESOLUTION NO. 04-163 - RESOLUTION APPOINTING MEMBERS TO THE HISTORIC RESOURCES COMMISSION

Vice-Mayor Mumpower said that this is the consideration of appointing members to the Asheville-Buncombe Historic Resources Commission.

The terms of Keith Hargrove and Kevan Frazier, as members on the Asheville-Buncombe Historic Resources Commission, expired on July 1, 2004.

At City Council's worksession on June 15, 2004, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Keith Hargrove to serve a three year term, term to expire on July 1, 2007, or until his successor has been appointed.

At City Council's worksession on July 20, 2004, City Council instructed the City Clerk to arrange interviews for Suzanne Jones, Jaan Ferree and Matthew Marquis. Mr. Marquis was unable to attend the interview.

After Council members spoke in support of both candidates interviewed, Suzanne Jones was unanimously appointed to serve a three year term, term to expire July 1, 2007, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 316

VI. OTHER BUSINESS:

Claims

The following claims were received during the period of July 9-15, 2004: Vincent Ross (Sanitation), Elizabeth Bryson (Fire), Ledgewood Village (Fire), Ledgewood Village (Water), Edith McCants (Sanitation), Daniel Sherlin (Sanitation) and Charles Williams (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Rosanna Coates, adjoining property owner to 27 Catawba Street, explained that she recently purchased her property but was not notified of Council's public hearing to issue a conditional use permit for 27 Catawba Street on July 13, 2004. City Manager Westbrook said that he would have City staff investigate any options for Ms. Coates, but that the City of Asheville obtains the addresses for mailings from Buncombe County.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 11:22 p.m.

Magdalen Burleson	Charles R Worley
CITY CLERK	MAYOR

Tuesday – August 10, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Col. Ray Green, Veteran of the US Air Force, led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Mumpower gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Councilwoman Bellamy asked that Consent Agenda Item "J" be removed from the Consent Agenda due to a conflict of interest.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 27, 2004

B. RESOLUTION NO. 04-164 - RESOLUTION SELLING PROPERTY AT THE CORNER OF WYOMING ROAD AND KEEBLER ROAD IN THE KENILWORTH COMMUNITY TO INNOVA HOMES, LLC

Summary: The consideration of a resolution authorizing the Mayor to convey property at the corner of Wyoming Road and Keebler Road to Innova Homes, LLC, in the amount of $4,400.

On July 27, 2004, the City Council directed the City Clerk to advertise for upset bids on a parcel of land at the corner of Wyoming Road and Keebler Road in the Kenilworth Community.

The land at the corner of Wyoming Road and Keebler Road is an irregular triangle shaped residential zoned lot comprising 0.07 acre±. From street grade it slopes up substantially to the rear property line and is covered with non-significant trees, vines and brush. The size, shape and topography render the lot unsuitable as a home site. The subject parcel is a remnant of property acquired at the time Wyoming Road was improved several years ago and is situated diagonally across from the park. The tax value is $4,400. The bid from Innova Homes LLC, owner of an adjacent parcel is in the amount of $4,400. Innova proposes to construct a house on the adjacent property for sale. The proposed construction is consistent with the Strategic Plan policy of encouraging infill development.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

- A non-buildable lot will be assembled with an adjoining parcel to provide a more coherent land use pattern
- The sale of this lot to Innova, while not essential to the proposed infill development, will enhance the development by improving the access.

The advertisement for upset bids ran in the Asheville Citizen-Times on July 30, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Innova Homes, LLC, in the amount of $4,400 was not upset and the sale to Innova Homes, LLC should be approved.

Planning Department staff recommends adoption of the resolution authorizing the Mayor to convey property at the corner of Wyoming Road and Keebler Road to Innova Homes, LLC, in the amount of $4,400.

RESOLUTION BOOK NO. 28 – PAGE 317

C. RESOLUTION NO. 04-165 - RESOLUTION APPROVING A GRANT FROM THE FEDERAL AVIATION ADMINISTRATION

Summary: The consideration of a resolution approving a grant from the Federal Aviation Administration in an amount not to exceed $2,764,492.

The Federal Aviation Administration (FAA) has offered a grant agreement to the Asheville Regional Airport. This grant, in an amount not to exceed $2,764,492, is for the project consisting of: construct service road (Perimeter Road, Phase III), update Airport Master Plan Study (Terminal Area Plan and Forecast), expand apron (includes rehabilitation), expand maintenance building, and install perimeter fencing.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-29.

RESOLUTION BOOK NO. 28 – PAGE 318

D. RESOLUTION NO. 04-166 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF INSURANCE, OFFICE OF STATE FIRE MARSHAL, AND N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM, FOR MAINTAINING THE PERMANENT SAFETY SEAT CHECKING STATION

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Insurance, Office of State Fire Marshal, for maintaining the currently established permanent safety seat checking station and procurement of additional equipment for Asheville Fire and Rescue Department; and an associated budget amendment, in the amount of $4,000, to receive the grant money.

The City of Asheville Fire and Rescue Department requested $4,000 from the Office of State Fire Marshal to maintain the permanent child safety seat checking station and for equipment to assist in this project. City staff was successful in obtaining those funds. We received the grant in order to purchase additional safety seats and associated equipment and to add graphics to a trailer supplied in an earlier grant.

Pros:

- No matching funds are required.
- These funds will significantly enhance our ability to effectively provide quality safety seat equipment and associated devices.
- Currently, the trailer that was awarded in an earlier grant has no markings or graphics to identify it as Asheville Fire and Rescue and to promote the safety program.

Cons: None noted.

City staff recommends City Council authorize the City Manager to enter into an agreement with the N.C. Dept. of Insurance, Office of State Fire Marshal, for maintaining the currently established permanent safety seat checking station and procurement of additional equipment for Asheville Fire and Rescue Department; and adopt the associated budget amendment, in the amount of $4,000, to receive the grant money.

RESOLUTION BOOK NO. 28 – PAGE 319

E. ORDINANCE NO. 3145 - BUDGET AMENDMENT TO ACCEPT GRANT FUNDS FROM THE N.C. DEPT. OF INSURANCE, OFFICE OF STATE FIRE MARSHAL, AND N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM, FOR MAINTAINING THE PERMANENT SAFETY SEAT CHECKING STATION

See Consent Agenda "D" above.

ORDINANCE BOOK NO. 21 - PAGE 271

F. RESOLUTION NO. 04-167 - RESOLUTION APPROVING ACCESS TO MILLS RIVER WATER TREATMENT PLANT FOR WETLANDS PLANT TRANSFER

Summary: The consideration of a resolution approving access to Mills River Water Treatment Plant for wetlands plant transfer.

Dr. Tom Burnet of the Mills River Watershed Conservation Group has requested permission to remove and transfer wetlands plants from the river bank and surrounding areas along City of Asheville property at the Mills River Water Treatment Plant to adjacent properties that require bank stabilization. Dr. Burnet is part of the environmental project in the Mills River area to oversee the protection and continued improvement of water quality of the Mills River.

Dr. Burnet has requested access to City of Asheville property on August 20 and 21, 2004, to remove small amounts of the following plants:

Genus	Species	Common Name	Wet Class	Notes
Andropogon	virginicus	Broomsedge Bluestem	FAC-	WA-inv
Carex	frankii	Frank's Sedge	OBL	WA
Carex	lupulina	Hop Sedge	OBL	WA
Carex	scoparia	Broom Sedge	FACW	WA
Carex	vulpinoidea	Fox Sedge	OBL	WA
Cyperus	esculentus	Chufa Flatsedge	FAC	WA-inv
Echinochloa	crus-galli	Barnyardgrass	FACW-	WA-nn?

Helenium	autumnale	Common Sneezeweed	FACW+	WA
Juncus	gymnocarpus	Pennsylvania Rush	OBL	WA
Juncus	tenius	Poverty Rush	FAC	WA-inv
Scirpus	cyperinus	Woolgrass	OBL	WA

WA = Water Authorty (City of Asheville land)
inv = invasive, nn = non-native

Indicator categories

Code	Wetland Type	Comment
OBL	Obligate Wetland	Occurs almost always (estimated probability 99%) under natural conditions in wetlands.
FACW	Faculative Wetland	Usually occurs in wetlands (estimated probability 67%-99%), but occasionally found in non-wetlands.
FAC	Faculative	Equally likely to occur in wetlands or non-wetlands (estimated probability 34%-66%).
FACU	Faculative Upland	Usually occurs in non-wetlands (estimated probability 67%-99%), but occasionally found on wetlands (estimated probability 1%-33%).
UPL	Obligate Upland	Occurs in wetlands in another region, but occurs almost always (estimated probability 99%) under natural conditions in non-wetlands in the regions specified. If a species does not occur in wetlands in any region, it is not on the National List.

Dr. Burnet plans on transferring some of these plants to adjacent properties which are having storm water runoff problems which are eroding the river banks. The transfer of wetlands plants will help stabilize the river banks and help promote water quality by decreasing runoff in to the river. Access will be from 8:00 am to 5:00 pm and requires picture identification, signage of liability waiver and restoration of any plant removal areas if requested by staff.

City staff recommends City Council approve access to Mills River Water Treatment Plant river bank area for wetlands plant removals.

RESOLUTION BOOK NO. 28 – PAGE 320

G. RESOLUTION NO. 04-168 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT FOR GRANT FUNDS THROUGH THE N.C. PARKS AND RECREATION TRUST FUND TO ASSIST WITH RENOVATIONS TO MEMORIAL STADIUM

Summary: The consideration of a resolution authorizing the Mayor to enter into a grant agreement for $248,800 with the N.C. Dept. of Environment and Natural Resources, Division of

Parks and Recreation, for funds through the N.C. Parks and Recreation Trust Fund, for the renovation of Memorial Stadium; and an associated budget amendment, in the amount of $263,800, to receive the grant funds and donations for the project.

Resolution No. 04-26 approved by the Asheville City Council on January 27, 2004, authorized the City Manager to enter into the grant agreement with the N.C. Dept. of Environment and Natural Resources, for the renovation of Memorial Stadium. The State of North Carolina requires the Mayor sign the agreement, therefore, the resolution is being brought back to Council for ratification and authority for the Mayor to sign.

The budget amendment of $263,800 consists of a grant from the State of North Carolina, N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation in the Parks and Recreation Trust Fund and $15,000 from donations. The budget amendment supports the ongoing fundraising campaign to raise funds to support the renovations at Memorial Stadium.

Pros:

- Compliance with the grant guidelines as required by the State of North Carolina
- City can move forward in the grant award process in preparation to implement the grant
- City can implement the project and expend the funds to start work on the next phase of work at Memorial Stadium

Cons: None noted.

The Parks and Recreation Department recommends City Council authorize the Mayor to enter into a grant agreement with the N.C. Dept. of Environment and Natural Resources, Division of Parks and Recreation, for funds through the N.C. Parks and Recreation Trust Fund, and to adopt the budget amendment, in the amount of $263,800, to receive the grant funds and donations for the renovations at Memorial Stadium.

RESOLUTION BOOK NO. 21 – PAGE 321

H. ORDINANCE NO. 3146 - BUDGET AMENDMENT TO REFLECT GRANT FUNDS RECEIVED AND DONATIONS TO ASSIST WITH THE RENOVATIONS TO MEMORIAL STADIUM

See Consent Agenda "G" above.

ORDINANCE BOOK NO. 21 - PAGE 273

I. MOTION SETTING A PUBLIC HEARING ON AUGUST 24, 2004, TO AMEND THE CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

Summary: The consideration of a motion to set a public hearing on August 24, 2004, to consider amending the Annual Consolidated Action Plan for the Community Development Block Grant and HOME programs.

City Council approved the 2004 Action Plan for the CDBG and HOME programs on April 13, 2004. Noted in that plan was the need for later amendment to allocate an additional $161,843 in HOME funds for the new American Dream Downpayment Initiative (ADDI).

Staff requested proposals from outside agencies to operate the ADDI program, and the Asheville Regional Housing Consortium Board has reviewed the proposals submitted and made recommendations for allocating the funds. Since this constitutes a substantial amendment to the Action Plan, a public hearing is required.

Details of the proposed allocation will be provided prior to the public hearing.

Pros:

- The public hearing is necessary in order to utilize the additional funds

Cons: None noted

City staff recommends City Council set a public hearing on August 24, 2004, to consider amending the 2004 Action Plan.

J. BUDGET AMENDMENT FOR MOUNTAIN HOUSING OPPORTUNITIES NORTHPOINT COMMONS

This item was removed from the Consent Agenda due to a conflict of interest.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA DUE TO A CONFLICT OF INTEREST

ORDINANCE NO. 3147- BUDGET AMENDMENT FOR MOUNTAIN HOUSING OPPORTUNITIES NORTHPOINT COMMONS

Vice-Mayor Mumpower moved to excuse Councilwoman Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilwoman Jones and carried unanimously.

Summary: The consideration of a budget ordinance, in the amount of $25,000, to recognize repayment by Mountain Housing Opportunities (MHO) of a HOME Predevelopment Loan and to budget those funds toward the construction of the same project, Northpoint Commons.

Mountain Housing Opportunities was awarded $25,000 in HOME funds as a Predevelopment Technical Assistance Loan in the 2001 Consolidated HOME and CDBG Action Plan. Such loans are due for repayment when permanent funding for the project is available but are forgivable if the project does not go ahead. The 2002 Action Plan provided for $395,000 for project construction, including the anticipated proceeds of the loan repayment.

Since the project is now moving forward, the loan has been repaid. A budget ordinance is required to recognize receipt of the $25,000 and to budget it to construction of Northpoint Commons.

Community Development staff recommends adoption of the budget amendment, in the amount of $25,000.

Councilman Newman moved for the adoption of Ordinance No. 3147. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ORDINANCE TO CLOSE AND VACATE THE DWELLING LOCATED AT 1086 HENDERSONVILLE ROAD

Mayor Worley said that this public hearing was originally scheduled on July 27, 2004, however, the attorney for the owner of the property said that they are working with the City Attorney's Office to negotiate a potential resolution and asked that the matter be continued until August 10, 2004.

Mayor Worley said that the property owner has removed the person from the unfinished basement and has committed to make the remaining repairs prior to September 14, 2004. Therefore, City staff requests that this public hearing be continued until September 14, 2004.

Councilwoman Bellamy moved to continue the public hearing until September 14, 2004. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CLOSE ROBERTS ROAD EXTENSION

RESOLUTION NO. 04-169 - RESOLUTION TO PERMANENTLY CLOSE ROBERTS ROAD EXTENSION

Mayor Worley opened the public hearing at 5:10 p.m.

Assistant Public Works Director Dave Cole said that this is the consideration of a resolution to close Roberts Road Extension. This public hearing was advertised on July 16, 23, 30 and August 6.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close to public use as a public street Roberts Road Extension.

Closure of this section of right-of-way will not deny any of the abutting properties a reasonable means of ingress or egress. There are two lots that abut this section of right-of-way. They are identified by PIN Nos. 9657.10-35-4414 and 9657.10-35-6577. All abutting property owners have joined in the petition to close.

City staff recommends that City Council adopt the resolution to close Roberts Road Extension.

Mr. David Day, abutting property owner, asked City Council for their support in closing Roberts Road Extension.

Mayor Worley closed the public hearing at 5:15 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-169. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 322

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROPOSED ADDITION TO THE BUNCOMBE COUNTY DETENTION FACILITY LOCATED AT 20 DAVIDSON STREET

ORDINANCE NO. 3148 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROPOSED ADDITION TO THE BUNCOMBE COUNTY DETENTION FACILITY LOCATED AT 20 DAVIDSON STREET

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:16 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Planning & Development Director Scott Shuford submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Shuford said that this is the consideration of the issuance of a conditional use permit for the proposed addition to the Buncombe County Detention Facility located at 20 Davidson Drive.

The 2025 Asheville City Development Plan and the Center City subsection supports the efforts to group together the governmental uses downtown. These plans also encourage infill development at locations where the infrastructure is in place to service those uses at the least amount of cost. The Smart Growth Policy also supports these common sense efforts.

Asheville City Council approved an earlier version plan for the Buncombe County Detention Center addition on 8-26-03.

Nearly a year ago, the City Council reviewed the Buncombe County Detention Center addition. Since then the County has re-worked and expanded the building and has changed the design significantly. The parcel for the project is bordered by streets on 3 sides; Davidson Street, Marjorie Street and Valley Street (City Exhibit 3 – Location Map). The project requires a conditional use permit because it is a governmental use. The proposed new jail facility will be located on most of the lot, which totals .67 acre. The new structure will be 92,453 square feet and comparable to a 6 story building. The prior proposal contained about 53 thousand square feet (City Exhibit 3 – Elevation Drawings). The proposed facility will share the existing detention center entrance on Davidson Street. A second entrance along the Marjorie Street façade will be used rarely at first but may have greater application with a future addition. The overall height of the building will not exceed the balustrade of the City Hall building. The height issue was a requirement from City Council in the agreements to sell the lot to Buncombe County (City Exhibit 3 – Site Plan).

The new facility will provide two 40-person dorms (one for men and one for women) as part of the work release program. The other portion of the facility will provide three 40 person cell pods as part of the expansion of the prison facilities. The three 40 person cell pods can be retrofitted at a future date to accommodate twice as many prisoners.

Because this is a conditional use permit, if approved, the uses on the site are limited to those applied for during this permit review process. The site plan and building façade elevations are submitted for approval. Deviating from the plan would require a modification of the conditional use permit following an approval process similar to what we are undertaking now.

For Detention Center Facilities in the Central Business District, these additional special requirements also apply. City Council must state if the project meets or does not meet each of the standards for Detention centers, jails and related correctional facilities found in section 7-16-2(c) of this chapter.

Design Standards- The project must comply with the design guidelines for projects located in this area: The project was reviewed by the Downtown Commission for compliance with the design guidelines. The Downtown Commission voted to approve the design and allowed a variance for fewer openings for the street facing facades because of the special nature of the use. The project appears to meet the design guidelines for downtown.

Fencing- No chain link, barbed wire, razor wire or similar fence material shall be used in areas that are visible from adjacent properties or from the public way unless specifically permitted by the City Council. No fenced areas are proposed on the plan.

Lighting- Lights in pedestrian areas and parking lots shall not exceed 16 feet in height. All lights other than those in public pedestrian areas including security lights shall be full cut-off type fixtures, and shall not produce direct glare or light trespass on adjacent properties. Lighting provided as a part of the project will comply with these requirements.

Signage- All signage must be reviewed and approved as part of the conditional use permit application. City Council may attach conditions addressing the location, size, number, and illumination of signs based upon circumstances related to the location and impact of the sign. The detention center additions will share an entrance with the Buncombe County Detention Center located on Davidson Street. No additional signage will be required.

Operational Standards- No outdoor speaker systems shall be permitted. Vehicle entering and or leaving the facility shall not use sirens or emergency lights unless responding to an emergency. No outdoor speaker systems are proposed for the project and vehicles will not use sirens unless responding to an emergency.

Loading and unloading- All loading and unloading areas shall be located internally on the site and screened from view from adjacent properties and public ways. All loading and unloading activities shall take place between the hours of 6:00 am and 9:00 pm unless specifically waived by the City Council. Loading and unloading of inmates will take place as part of in the existing detention facility inside to the building.

Exercise yard – Exercise yards and other outdoor activity areas shall be located internally on the site and screened from view from adjacent properties and public ways. Exercise yards are inside the building and are not visible from adjacent properties or public ways.

Vehicle storage - All vehicles associated with the use shall be stored in an enclosed or screened area. The vehicle storage area may be screened with vegetation, fences, a combination or fences and landscaping material or other means designed to effectively screen the stored vehicles from adjacent properties and the public way. No vehicles will be stored on the property. Parking provided by the parking area at the corner will be used by Buncombe County employees.

City Council must take formal action as set forth in section 7-9-9(c) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2 (c)).

1. **That the proposed use or development of the land will not materially endanger the public health or safety.** The proposed development will comply with all health and safety requirements.

2. **That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.** This site is an infill site and given this context the proposal is compatible with the site. In addition the highest point of the roof of the detention center addition will be below the balustrade of the City Hall Building. This will protect the view of City Hall from other vantage points from east and south.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.** The project is within what may be considered the government complex. This is the best location for this special use. Because the design is integrated into the existing detention facility this will minimize any negative spillover to adjacent uses.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.** This area of downtown is quite urban in form. The new structure will be smaller than neighboring buildings and will reinforce this urban fabric by fronting on the street at the sidewalk level. The design of the new facility was approved by the Downtown Commission as a part of the Downtown Design Review for new construction.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.** This detention facility would be ill placed most anywhere else in the downtown area. Expanding the use adjacent to the other detention facility will simplify operations for both. This proposal is more fiscally sustainable in the long run.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.** The project was reviewed by utility and safety providers. No items of concern were noted.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.** The detention center addition is not expected to generate a large number of additional trips or create a traffic hazard.

In summary, the County is seeking to take care of its space needs for the Detention Center by providing a well-designed addition connecting to the main facility. The management of the new facility can be handled in a fiscally conservative manner through shared facilities, access and operations. The location of the expansion in the government complex area of downtown provides some reassurances to the downtown business and residential community. The design will not negatively impact the views of City Hall and County Courthouse.

Pros:

- The proposed addition is appropriately located adjacent to the existing detention facility.
- The proposed design is a seamless match to the existing detention facility.
- Views of City Hall and Buncombe County Courthouse are protected.

Cons:

- Expanding detention facilities is controversial to some people.
- The prime real estate is not available for other office or governmental uses.

The TRC Commission at their July 19, 2004, meeting voted to recommend approval of the Conditional Use Permit with conditions that the outstanding TRC issues are satisfied. Staff also recommends approval of the rezoning request.

Mr. Harry Pilos felt this is probably a good plan, however, the County still owns the Union Transfer Building and he felt they needed to first consider what will happen to that building because it is difficult for private development to build something that is compatible to the growth in that area.

Upon inquiry of Mayor Worley, City Attorney Oast said that Council can't place a condition on this permit unless there was some substantial connection, e.g., geographical. And, as far as the disposition or the use of another property, he felt placing a condition would be a stretch.

Councilman Davis said that there is a subcommittee being formed in the Downtown Commission to look at the governmental use of lands on slopes and in other places in the City. He said that he would be happy to keep the Council informed as work progresses.

After rebuttal, Mayor Worley closed the public hearing at 5:30 p.m.

Upon inquiry of Councilman Dunn, Mr. Jon Creighton, Director of Planning and Development for Buncombe County, explained that this addition will not be the end. When the existing jail was built in the early 1990's they were projecting that around 2002 they would start experiencing over-crowding. Last year the average daily population was 359 and the capacity is 356. Our current projections show that around 2012 we will begin experiencing over-crowding again. As the community grows, we need larger facilities to accommodate the community. It's a fine line of what you can afford and how far can you go out in the future in order to meet those needs.

Upon inquiry of Councilwoman Jones, Mr. Creighton said that the expansion will cost approximately $23 Million. He said that the EMS expansion was cost-prohibitive and will not be in the future expansion area.

Councilwoman Jones was it was discouraging to think that in 10 years we will have doubled the amount of people in the criminal justice system. She wished the $23 Million could be used for our education system and after-school programs that could keep people out of the criminal justice system. She calculated that each bed costs taxpayers $115,000. She was concerned that the schools are not getting the funding that they need, but we find money to build larger jails.

Upon inquiry of Councilman Newman, Mr. Shuford said that there were no concerns that the expansion will adversely impact the other revitalization efforts on other adjacent properties.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford said that in the 2025 Plan there is a provision made to encourage a Master Plan. Also, there is a provision in the City-County agreement to transfer the property to the County that they work together towards the development of a Master Plan. He agreed that having a better idea of what the County's future plans are on the property that they own in this area and throughout downtown will be helpful as people in invest in our area and we try to maximize other property for private sector purposes, opposed to governmental purposes.

Councilwoman Bellamy felt that it would be nice for people to look forward to some other development coming into Asheville on this side of town that is inviting and welcoming to our City, opposed to the large jail facilities. Mr. Shuford responded that Council has, in their Strategic Operating Plan, asked staff to work on gateway plans and the College Street/Charlotte Street area is a big gateway to our downtown and it will figure prominently in our plans.

Councilman Davis moved for the adoption of Ordinance No. 3148, granting a conditional use permit for the proposed addition to the Buncombe County Detention Facility located at 20 Davidson Drive, subject to the outstanding Technical Review Committee conditions being satisfied. This motion was seconded by Councilman Dunn and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 277

D. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF RECENTLY ANNEXED PROPERTIES KNOWN AS THE HENDERSONVILLE ROAD AREA TO COMMERCIAL BUSINESS II DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT AND INDUSTRIAL DISTRICT

ORDINANCE NO. 3149 - ORDINANCE TO ZONE RECENTLY ANNEXED PROPERTIES KNOWN AS THE HENDERSONVILLE ROAD AREA TO COMMERCIAL BUSINESS II DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT AND INDUSTRIAL DISTRICT

Mayor Worley opened the public hearing at 5:42 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, said that this is the consideration of an ordinance to zone recently annexed properties known as the Hendersonville Road area to Commercial Business II District, Commercial Industrial District and Industrial District. This public hearing was advertised on July 30 and August 6, 2004.

The 40 properties make up the Hendersonville Road Area that was annexed on June 30, 2004. They are located in the block bounded by Hendersonville Road to the north, Buck Shoals Road to the south, Old Shoals Road to the west, and Glen Bridge Road to the north. Surrounding land uses are varied with large industrial properties to the north, commercial establishments to the east, residential properties to the south, and commercial businesses to the west. These surrounding properties, as well as the parcels in the annexation area until initially zoned by the City, are subject to Buncombe County's Limestone Township Zoning Ordinance. Only the properties to the east across Hendersonville Road are currently in the City's jurisdiction; they are zoned CBII.

According to Buncombe County Tax information and field observation, there are a variety of land uses within the annexation area. A number of banks, retail businesses, and offices along with a post office and a few multi-family buildings are located along Hendersonville Road to the east of the area. Numerous properties fronting on Glen Bridge Road and Walden Drive in the area's center contain office/warehouse or multi-purpose type commercial buildings. Some large vacant properties are also located along Walden Drive. The Day International Plant is located on the largest and westernmost parcel in the annexation area. The properties fronting Hendersonville Road are presently zoned Community Service (CS) under Buncombe County's Limestone Zoning Ordinance, while the remaining parcels are zoned Employment (EMP), an office/wholesale/industrial district.

The Planning and Development Department recommends an initial zoning of Community Business II (CB-II), Commercial Industrial (CI), and Industrial (IND) Districts for the area as shown on the Exhibit A map. Staff recommends CB-II for the area along Hendersonville Road since it mirrors the zoning to the east across Hendersonville Road and accommodates the existing uses in the proposed district. Commercial Industrial (CI) zoning seems appropriate for the existing commercial and office/warehouse uses along Walden Drive, Glen Bridge Road, and Buck Shoals Road. Vacant properties in the proposed district can also be developed according to the CI zoning district, which allows a wide range of commercial and industrial uses. The Industrial (IND) designation accommodates the existing industrial use of the large Day International plant.

Advantages (Pros)
- The proposed zoning accommodates existing uses in the proposed districts.
- Non-conforming use situations, if any, are minimized.
- CB-II zoning for the west side of Hendersonville Road continues the pattern set by the CB-II zoning across the highway.

Disadvantages (Cons)
- None

In consideration of the above and the adjoining zoning and land uses, the proposed initial zoning appears to be consistent with the intent and purpose of the Unified Development Ordinance.

Staff recommends approval of the proposed initial zoning of the properties within the recently annexed Hendersonville Road Area. The Planning and Zoning, by a unanimous vote of 5-0 at its July 7, 2004, meeting, recommends approval as well.

Mayor Worley closed the public hearing at 5:46 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Upon inquiry of Councilwoman Bellamy, Mr. Heard said there will be no non-conforming uses associated with this initial zoning.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3149. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 282

E. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF RECENTLY ANNEXED PROPERTIES KNOWN AS THE SWEETEN CREEK ROAD AREA TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT, RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT, COMMUNITY BUSINESS I DISTRICT, HIGHWAY BUSINESS DISTRICT AND INSTITUTIONAL DISTRICT

ORDINANCE NO. 3150 - ORDINANCE TO ZONE RECENTLY ANNEXED PROPERTIES KNOWN AS THE SWEETEN CREEK ROAD AREA TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT, RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT, COMMUNITY BUSINESS I DISTRICT, HIGHWAY BUSINESS DISTRICT AND INSTITUTIONAL DISTRICT

Mayor Worley opened the public hearing at 5:48 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, said that this is the consideration of an ordinance to zone recently annexed properties known as the Sweeten Creek Road area to RS-4 Residential Single-Family Medium Density District, RM-16 Residential Multi-Family High Density District, Community Business I District, Highway Business District and Institutional District This public hearing was advertised on July 30 and August 6, 2004.

The 190 properties make up the Sweeten Creek Road Area that was annexed on June 30, 2004. Most of the properties are located on the east side of Sweeten Creek Road south of the Royal Pines subdivision and north of Pensacola Avenue. Included are also properties on the west side of Sweeten Creek Road south of Buck Shoals Road.

Surrounding land uses include primarily single-family residences to the north, east and west that are currently zoned as part of Buncombe County's Limestone Township Zoning Area Properties to the west across Sweeten Creek Road include a number of commercial properties, a place of worship, and a large vacant parcel. Zoning districts for these properties, which are in the current City limits, are Institutional (INST), Commercial Industrial (CI), and Industrial (IND).

According to Buncombe County Tax information and field observation, there are a variety of land uses within the annexation area. Two large condominium developments as well as some large vacant and residential properties are located the north of the area. Further south along Sweeten Creek Road a nursing home facility is located on three lots and further south of that are two large undeveloped properties. Single-family subdivisions occupy land along both sides of Weston Road to the east of the area. South of Weston Road land use is mostly multi-family residential with a commercial properties located south of Buck Shoals Road. The properties are presently zoned a mixture of Single-Family Residential (R-1), Residential (R-2), and Commercial Service (CS) under Buncombe County's Limestone Zoning Ordinance.

The Planning and Development Department recommends initial zonings of Residential Single-Family Medium Density (RS-4), Residential Multi-Family High Density (RM-16), Community Business I (CB-I), Institutional (INST) and Highway Business (HB) Districts for the area.

Staff recommends RM-16 for much of the area on the east side of Sweeten Creek Road since it would accommodate the high density condominium and multi-family developments located in area as well as allowing vacant and single-family lots to be redeveloped for multi-family use. RS-4 zoning appears to be well suited for the single-family lots in the subdivisions along Weston Road to the area's east. INST is a good fit for the three properties along Sweeten Creek road that contain a nursing home and rehabilitation center. On properties immediately to the south, the INST zoning would accommodate the planned mixed use development of two larger vacant parcels and the existing use of two properties containing a BellSouth phone service station and a PSNC pumping station, respectively, and allow for the appropriate redevelopment of the parcels in the future. An individual parcel at the five-point intersection of Sweeten Creek Road and Pensacola Avenue was deemed appropriate for CB-I zoning, allowing small scale office/business uses, by the Planning & Zoning Commission. Finally, HB would allow the continued use of four properties in the Sweeten Creek/Buck Shoals/Hendersonville Road triangle as commercial establishments.

According to staff's research, only one non-conforming use would be created, where a duplex currently exists in the area proposed for RS-4 zoning. The proposed zoning designations are also similar to the current Limestone Township Zoning for the area, which remains in effect until zoned by the City.

Based on comments from members of the public at their meeting on July 7, 2004, the Planning & Zoning Commission voted to amend the initial zoning districts proposed by staff for the following six (6) properties:

PIN# 9654.14-43-3218	RM-16 to INST/RS-4
PIN# 9654.14-42-4818	RM-16 to INST/RS-4
PIN# 9654.14-42-4606	RM-16 to INST
PIN# 9654.18-42-2491	CB-II to INST
PIN# 9654.18-42-5531	CB-II to INST
PIN# 9654.18-41-6502	RM-16 to CB-I

Advantages (Pros)
- The proposed zoning pattern accommodates existing land use uses in the area.
- The proposed zoning allows for the appropriate development/redevelopment of large vacant and single-family lots.
- Non-conforming use situations are minimized.

Disadvantages (Cons)
- One non-conforming situation, a duplex in the proposed RS-4 district, would be created.

In consideration of the above and the adjoining zoning and land uses, the proposed initial zoning appears to be consistent with the intent and purpose of the Unified Development Ordinance.

Staff recommends approval of the proposed initial zoning for the properties within the recently annexed Sweeten Creek Road Area as proposed. The Planning and Zoning Commission, by a unanimous vote 5-0 of at its July 7, 2004, meeting, has recommended approval of the initial zoning as well. As referenced above, the Planning and Zoning Commission members opted to amend staff's proposed zoning for six (6) parcels based on comments received from members of the public. These amendments are reflected in the current proposed zoning being considered by City Council.

Mayor Worley closed the public hearing at 5:55 p.m.

Upon inquiry of Vice-Mayor Mumpower, Mr. Heard said that any property owner that had a concern had their concerns satisfied at the Planning & Zoning Commission meeting.

Upon inquiry of Councilman Newman, Mr. Heard explained that said that the residential capacity allowed in the Institutional District is 16 dwelling units per acre.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3150. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 216

F. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF RECENTLY ANNEXED PROPERTIES KNOWN AS THE HEATHBROOK AREA TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3151 - ORDINANCE TO ZONE RECENTLY ANNEXED PROPERTIES KNOWN AS THE HEATHBROOK AREA TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 6:07 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, said that this is the consideration of an ordinance to zone recently annexed properties known as the Heathbrook area to RS-8 Residential Single-Family High Density District. This public hearing was advertised on July 30 and August 6, 2004.

The unzoned properties make up the Heathbrook Area that was annexed on June 30, 2004. They are located along Heathbrook Circle in the Biltmore Park Subdivision north of Long Shoals Road. Surrounding land uses include single family residential to the north and vacant/common area to the east, south, and west. The area is completely surrounded by RS-8 zoning.

According to Buncombe County Tax information and field observation, there are single-family homes located on all of the lots except two, which are used as common open space for the subdivision.

The Planning and Development Department recommends an initial zoning of Residential Single-Family High Density (RS-8) District for the properties. The intent of the RS-8 District is to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development.

Advantages (Pros)
- Continues the zoning pattern of properties surrounding the annexation area, which are zoned RS 8.
- Single-family homes are a permitted use in the RS-8 District.
- No non-conforming use situations would be created.

Disadvantages (Cons)
- None

In consideration of the above and the adjoining zoning and land uses, the proposed initial zoning appears to be consistent with the intent and purpose of the Unified Development Ordinance.

Staff recommends approval of the proposed initial zoning of the unzoned properties known as the Heathbrook Annexation Area The Planning and Zoning, by a unanimous vote of 5-0 at its July 7, 2004, meeting, recommends approval as well.

Upon inquiry of Councilwoman Bellamy, Mr. Heard said there will be no non-conforming uses associated with this initial zoning.

Mayor Worley closed the public hearing at 6:10 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3151. This motion was seconded by Councilwoman Bellamy and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 289

G. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF RECENTLY ANNEXED PROPERTIES KNOWN AS A PORTION OF THE DEAVERVIEW AREA TO COMMUNITY BUSINESS I DISTRICT

ORDINANCE NO. 3152 - ORDINANCE TO ZONE RECENTLY ANNEXED PROPERTIES KNOWN AS A PORTION OF THE DEAVERVIEW AREA TO COMMUNITY BUSINESS I DISTRICT

Mayor Worley opened the public hearing at 6:11 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department, said that this is the consideration of an ordinance to zone recently annexed properties known as a portion of the Deaverview area to Community Business I District. This public hearing was advertised on July 30 and August 6, 2004.

The unzoned properties are part of the Deaverview Road Area that was annexed on June 30, 2004. They are located at the intersection of Deaverview Road and Pisgah View Road. Surrounding land uses and zoning include single family residential and a mobile home park to the north that are not zoned, a church and convenience store zoned CB-I, unzoned residential and vacant properties to the south zoned, single-family residential and a mobile home park to the west that are not zoned.

According to Buncombe County Tax information and field observation, there are a convenience store, restaurant and associated parking located on the two parcels at the northwest corner of the intersection. The third lot across the street has a single-family home constructed on it.

The Planning and Development Department recommends an initial zoning of CB-I for the three properties. The purpose of the CB-I District is to provide areas for medium-density business and service uses serving several neighborhoods.

Rezoning the properties to CB-I would allow the owners of the convenience store and restaurant to continue their operations and allow the owner of the single-family home to continue that use or redevelop the property for uses permitted in the CB-I District.

Advantages (Pros)
- Continues the zoning pattern of properties directly east across Pisgah View Road, which are zoned CB-I.
- The convenience store located on two of the parcels is a permitted use in the CB-I District.
- The property owner of the third parcel can redevelop the property for use permitted in the CB-I District or continue the residential use.

Disadvantages (Cons)
- None

In consideration of the above and the adjoining zoning and land uses, the proposed initial zoning appears to be consistent with the intent and purpose of the Unified Development Ordinance.

Staff recommends approval of the proposed initial zoning of the three unzoned properties in the Deaverview Road Annexation Area. The Planning and Zoning, by a unanimous vote of 5-0 at its July 7, 2004, meeting, recommends approval as well.

Upon inquiry of Councilwoman Bellamy, Mr. Heard said there will be no non-conforming uses associated with this initial zoning.

Upon inquiry of Mr. James Carpenter, Mr. Heard explained that Mr. Carpenter's property is not in the zoning area.

Mayor Worley closed the public hearing at 6:18 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3152. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 292

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

VI. OTHER BUSINESS:

Vice-Mayor Mumpower announced a farewell ceremony Thursday, August 12, 2004, for the North Carolina Army National Guard's 105th Military Police Company headquartered in Asheville, N.C. The ceremony will occur at 11:30 a.m. at the Trinity Baptist Church at 216 Shelburne Road.

Vice-Mayor Mumpower announced that on Saturday, August 21, 2004, there will be a community day at the Deaverview Community Housing Development, which is a project associated with the overall For Our Kids Program, which he and Councilwoman Bellamy share responsibilities in.

Vice-Mayor Mumpower announced upcoming vacancies on various boards and committees.

Vice-Mayor Mumpower thanked City Manager Westbrook and his staff for a well-designed and easy to read budget book.

Councilwoman Jones acknowledged the passing of Ms. Thelma Caldwell, former Executive Director of the YWCA, who was an important figure in this community who made a positive impact on hundreds of women and children.

The following claims were received by the City of Asheville during the period of July 16-29, 2004: CP&L (Water), BellSouth (Water), Mission Hospital (Streets), Kyle E. Corn (Police), Don Farrow (Water), Kelly Snead (Water) and Joe Bowman (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Fred English urged City Council to help in any way possible for the visually impaired citizens in our community.

Closed Session

At 6:23 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Eugene Ellison, Howard McGlohon, Eagle/Market Street Development Corporation and the City of Asheville – G.S. 143-318.11 (a) (3); and (2) to establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate – G.S. 143-318.11 (a) (5). This motion was seconded by Councilwoman Jones and carried unanimously.

At 7:45 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Councilman Dunn and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 7:45 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 17, 2004 - 3:00 p.m.

Worksession

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

CONSENT AGENDA:

Exchange of Interests in Real Property with Buncombe County

Summary: The consideration of a resolution authorizing the Mayor to convey the City's interest in property on Millbrook Road to Buncombe County in exchange for easements over County-owned real property located at Hominy Creek Park and Recreation Park.

The City and Buncombe County have negotiated an exchange of the City's interest in property on Millbrook Road for greenway easements over the County's property at Hominy Creek Park and Recreation Park. The property on Millbrook Road (PIN Nos. 9638.07-67-0634 and 9638.11-67-1425) includes two contiguous lots owned by the County and City comprising 1.4 acres. The property has a tax value of $50,000. The County proposes to donate the property with restrictions to the Buncombe County Rescue Squad for a new facility.

The proposed greenway easements are over property owned by the County at Hominy Creek Park (PIN No. 9637.01-16-5732) comprising 1.5 acres and at Recreation Park. (PIN No. 9668.13-04-6364) comprising 1.5 acres. The proposed Hominy Creek Greenway will connect Hominy Creek Park to Amboy Road Park. The Azalea Park Greenway will connect Azalea Park to Recreation Park and Swannanoa River Road (NC 81). The total value of the greenway easements would be approximately comparable to the City's interest in the Millbrook Road property.

The positive aspects of this transaction are:

- It is mutually beneficial to the City and the County.
- The County will be able to donate the land to the Rescue Squad for a needed facility.
- The City will acquire needed greenway easement at no cost.
- It is an opportunity for local government collaboration for the benefit of the community.
- It involves only publicly owned property and does not remove any property from the tax base.
- The City receives real estate interests of comparable value for its interest in the Millbrook Road property as opposed to donating it.

A negative aspects is:

- The property on Millbrook Road will remain in public ownership and not be returned to the tax base.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. G. S. 160A-271.

Planning & Development staff recommend adoption of the resolution authorizing the Mayor to convey the City's interest in property on Millbrook Road to Buncombe County in exchange for easements over County-owned real property located at Hominy Creek Park and Recreation Park.

Offer to Purchase Property at the Corner of Bartlett and Nelson Streets

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property at the corner of Bartlett Street and Nelson Street in the East Riverside community.

A bid has been received from Ray Quate, in the amount of $4,000, for the purchase of a parcel of land at the corner of Bartlett Street and Nelson Street in the East Riverside Community.

The land at the corner of Bartlett Street and Nelson Street is a rectangular shaped parcel comprising 0.13 acre+ (37'X151.9'). It is generally level at street grade and slopes up gradually to the rear. It is covered with grass. The long narrow shape renders the parcel unsuitable as a homesite. The subject parcel is a cut-out from a 5.73 acre property acquired from the Housing Authority which is now a part of Murray Hill Park. Based on an opinion letter dated July 28, 2004, by L. Ted Prosser, the value of the cut-out parcel is $4,000. The bid from Ray Quate, owner of an adjacent parcel is in the amount of $4,000. Mr. Ouate plans to renovate the building on the adjoining parcel with attention to preservation of historic architectural characteristics. The main floor on Depot Street will be three artist's studios and on the second floor will be five apartments with inside parking. Some of the apartments will be one bedrooms and are expected to be within the affordable range. He plans to assemble the subject parcel with the property he owns to provide access to the parking and a buffer.

The proposed renovations are consistent with the Strategic Plan policies of encouraging a strong small business environment and increasing the supply of affordable housing.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A small parcel will be assembled with an adjoining parcel to provide a more efficient land use.
5. The sale of this lot to Mr. Quate will facilitate the proposed re-development by providing necessary access.

Planning & Development staff along with Parks & Recreation staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

Offer to Purchase Property located on Courtland Avenue (Lot #11)

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located on Courtland Avenue.

The subject property is an RS-8 Residential Single-Family High Density District zoned parcel located on Courtland Avenue comprising approximately 0.14 acre (PIN No. 9649.17-01-0636). The Fair Reuse Value for the parcel, based on an appraisal dated April 21, 2004, by Gwen M. Keller is $6,000.00. The proposed land use for the property in the Head of Montford Redevelopment Plan is for residential development.

Ross B. Parkinson has submitted a bid to purchase the property in the amount of $6,000, and he proposes to build a single-family residence for his home.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- The sale of this lot will afford the opportunity for infill development.

Approval of the resolution will establish a minimum price of $6,000 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. sec. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing advertisement for upset bids for property located on Courtland Avenue.

Offer to Purchase Property located on Courtland Avenue (Lot #12)

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located on Courtland Avenue.

The subject property is an RS-8 Residential Single-Family High Density District zoned parcel located on Courtland Avenue comprising approximately 0.15 acre (PIN No. 9639-20-91-9684). The Fair Reuse Value for the parcel, based on an appraisal dated April 21, 2004, by Gwen M. Keller is $6,000.00. The proposed land use for the property in the Head of Montford Redevelopment Plan is for residential development.

Samuel Koerber has submitted a bid to purchase the property in the amount of $6,000, and he proposes to build a single-family residence for his home.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- The sale of this lot will afford the opportunity for infill development.

Approval of the resolution will establish a minimum price of $6,000 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. sec. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing advertisement for upset bids for property located on Courtland Avenue.

Pack Square Renaissance Project Budget

Summary: The consideration of a resolution approving the Pack Square Renaissance Project budget as adopted by the Pack Square Conservancy.

The agreement for the Pack Square Renaissance development between the Pack Square Conservancy (PSC) and the City requires that the Asheville City Council approve the budget for the project. In early July, the PSC adopted a revised budget for the project that represents the current cost projections based on the approved design.

Please note that in approving the PSC budget, there is absolutely no commitment on the City's part to any funding participation beyond what we have committed to in the agreement.

The revenue to pay for construction costs will come from private donations and grants secured by the Pack Square Conservancy.

City staff recommends City Council approve the resolution approving the PSC budget for this project as adopted by the Pack Square Conservancy.

After Ms. Carol King, President of the Pack Square Conservancy, explained the revenue sources, Councilwoman Bellamy asked if the campaign report could be put in writing.

Mayor Worley asked that the record show that City Council has received this information and instructs the City Manager to place these items on the next formal City Council agenda.

DOWNTOWN SOCIAL ISSUES FINAL REPORTS

Panhandling

Planning & Development Director Scott Shuford said that the Downtown Social Issues Taskforce is making recommendations to further deal with panhandling in the downtown area. The recommendations are relatively simple, combining a public relations campaign with the collection of funds to be given to those non-profit agencies that help the homeless. This approach has been used in many other cities in the United States and Canada. The Asheville Downtown Association Foundation has been identified as the appropriate organization to collect and distribute funds from the locked boxes and boxes placed in businesses.

Legal staff has advised that if Council direct staff to permit the locked boxes, it will start a precedent to allow other groups to put out collection boxes on the sidewalk. Otherwise, the City would be open to litigation under the First or Fourteen Amendment of the Constitution. To avoid this situation, the City could collect these funds itself but that would then require additional staff time in administration and coordination. In other cities where boxes have been put out on the street, there have not been large amounts of funds collected. Thus it would not seem worthwhile for the City to take on this function. Staff is therefore recommending that the collection of funds as a part of the campaign to divert money from the panhandlers be kept to the downtown businesses. This same recommendation was echoed in the public input and focus groups on this recommendation.

Advantages

- All of the panhandling recommendations, with the exception of the request for a greater police presence and locked boxes in some sidewalk locations, do not require any public funding or subsequent City Council action; civic groups in the community would undertake most of the action items.
- The recommendations build on the ordinance passed by City Council in November 2002.
- Reducing the amount of money given to panhandlers is an important part of reducing the panhandling activity in the community.
- The public relations campaign is a positive way for our community to relate to visitors that Asheville is an urban place with urban problems, but that the community does care about its homeless population and is working proactively to alleviate those conditions.

Disadvantages

- Approval of locked boxes on City sidewalks for the purpose of collecting funds will result in the possibility of other groups pursuing this strategy.

- There have been concerns raised by the public about the lock boxes being a target for vandalism and robbery. The intent of the Task Force is that the lock boxes be burglar proof and repainted frequently.
- Coordination of the public relations campaign and money collection/distribution will be a challenge, but it has been accomplished in other cities. Again, this will be the responsibility of a private non-profit.

City staff recommends City Council accept the Downtown Social Issues Task Force's Panhandling report and directs the City Manager to bring back to Council, at a later date, recommendations for changes to City ordinances, where appropriate.

Mr. Dwight Butner, member of the Downtown Social Issues Task Force sub-committee on panhandling, presented City Council with their research and final recommendations on panhandling.

He then briefly described the following recommendations, along with action steps for each one:

1, Through the Asheville Downtown Association and the Asheville Downtown Association Foundation, implement a comprehensive program entitled "Real Change vs. Spare Change". The first goal of this program is to direct funds being donated to panhandlers to those institutions currently addressing the consequences of poverty and homelessness, drug and alcohol abuse. The second goal in this program is to make panhandling more difficult and less rewarding by redirecting the funds away from the panhandlers themselves, instead to the agencies established which address the conditions fostering panhandling behaviors. The third goal of the program is to distribute information about the availability of support services not only to the panhandlers themselves but to the public at large and to raise awareness of the potential consequences of donating directly to an individual. The fourth goal of this program is to provide the entire downtown community with a vehicle through which they can individually and collectively address panhandling and the various other social issues affecting downtown. The steps to implement this program follow:

A. Locate four locked collection boxes throughout downtown to receive both money and feedback cards. Collection displays will also be located throughout downtown businesses and offices that choose to participate.

B. Develop information brochures for distribution detailing the services, locations and hours of operation of the various relief agencies, while at the same time urging individuals to make contributions at the various collections boxes for the benefit of the disadvantaged.

C. Implement a public relations campaign through the use of posters and rack cards that encourages downtown visitors and residents to make donations for the benefit of the homeless in the collection boxes for distribution to the various relief agencies instead of to the panhandlers themselves.

D. In conjunction with the same campaign establish an urban neighborhood watch program. The vehicle for this program will be feedback cards providing downtown business owners and residents a means to pass on information to the police, Quality Forward, and the various relief agencies about activities and behaviors that they observe in downtown. These postcard size documents can be dropped in the locked collection boxes or mailed to the Downtown Association.

2. Maintain the current panhandling ordinance but review the enforcement process for effectiveness. Based upon the level of current enforcement, devise strategies to improve the implementation of the ordinance.

In conclusion, several examples of the types of programs we are suggesting are included in the various appendices. We were particularly impressed with the programs instituted in Baltimore, Maryland and Jacksonville, Florida. but there were many examples of the strategies employed in various parts of the country. We cannot stress enough the necessity of implementing a multifaceted approach to this and all the social issues facing downtown. It is unlikely that these issues will go away and it is imperative that we institute programs that will have a lasting impact on the conditions, which we'll continue to face.

Upon inquiry of Councilman Davis, Mr. Butner said that the money collected will go to Asheville Downtown Association and they will re-direct funds to those institutions currently addressing the consequences of poverty and homelessness, drug and alcohol abuse.

During discussion, Mr. Butner responded to various questions and comments from Council, some being but are not limited to: are more cities implementing panhandling laws; is there a reluctance in the court system to enforce the ordinances; what communities have locked collection boxes; are the collection boxes financially viable; and if collection boxes are not used, is there an alternative plan.

Upon inquiry of Councilwoman Jones, City Attorney Oast explained his First Amendment concerns. He felt that any attempt to regulate panhandling or the ability to give money are subject to First Amendment concerns.

Councilwoman Jones felt City staff could craft the program to meet the goals of the Downtown Social Issues Task Force and the City's goals without opening up the possibility of other groups pursuing this strategy of locked collection boxes.

Councilwoman Bellamy hoped that staff take into consideration and support the service providers who are trying to help people short and long term.

On behalf of City Council, Mayor Worley thanked Mr. Butner and the Task Force for their time and effort in compiling this report on this very important issue.

It was the consensus of City Council to accept the Downtown Social Issues Task Force's panhandling report and direct the City Manager to bring back to Council, at a later date, recommendations for changes to City ordinances, were appropriate, and subject to City Attorney review.

Public Drunkenness

Planning & Development Director Scott Shuford said that public drunkenness was picked by the Downtown Social Issues Task Force at the beginning of its work as an important issue to be tackled. As the center for social services, shelters and public life in general, downtown has the highest concentration of homeless individuals in Asheville. A subpopulation of the homeless community is made up of alcoholics who are often inebriated on the streets. Of this group there is also a subset of people who chronically are being arrested for drunk and disorderly behavior or taken to the emergency room because of their physical state.

These recommendations have the goal of reducing the tolerance for such behavior, while supporting some programs that will help solve the problem over the short and long term. As City Council and the County Commissioners have jointly appointed the Ten Year Plan to End

Homelessness Task Force, some of these recommendations (Numbers 2 & 3) may overlap with that group's work and not require immediate Council action.

Advantages

- Housing First models have been proven to cost the public sector less funds overall, reducing costs in police manpower, jail time and emergency hospital visits.
- A detox center available around the clock would be a vast improvement over the current system where inebriates are taken to either the hospital or the jail.
- The additional sales tax could provide much needed funds to go directly to detox and/or treatment centers.

Disadvantages

- Some restaurant and bar owners are opposed to the potential ½% additional sales tax on beer and wine.
- The recommendation on Inebriate Safety Zones raises some constitutional issues and may be difficult to enforce.
- The recommendation on not allowing closed containers in public parks may be pre-empted by State law.

City staff recommends City Council accept the Downtown Social Issues Task Force's Public Drunkenness report and directs the City Manager to bring back to Council, at a later date, recommendations for changes to City ordinances, where appropriate.

Mr. Pat Whalen, Chair of the Downtown Social Issues Task Force, presented City Council with their final recommends on public drunkenness.

He then briefly described the following recommendations, along with action steps for each one:

1. Recommend that the City of Asheville petition the authority with control over existing ABC local tax collections to dedicate locally collected funds to improve detox and treatment availability and/or seek legislation from the state giving authority to pass a local ½% sales tax on beer and wine with the funds earmarked for such improvements in detox and treatment.

2. Recommend that the City of Asheville establish a Housing First program providing housing for our most difficult, chronic, and expensive to manage alcohol-dependent homeless.

3. Recommend that the City of Asheville, in concert with the County and already existing local service resources, establish an emergency detox/treatment/recovery center similar to the Healing Place in Raleigh or the jail-based public inebriate program in Roanoke, VA.

4. Recommend that the City of Asheville pass an ordinance in which the city recognizes certain Inebriate Safety Zones. These Zones would be limited to streets and adjacent sidewalks in downtown, which experience a combination of heavy pedestrian traffic, substantial vehicular traffic, and substantial on-street parking. It is expected these Area's would be limited to downtown's busiest vehicular and pedestrian arteries where there is on-street parking. These Zones would be selected: 1) because the areas have consistent problems with some individuals presenting themselves in an extremely inebriated condition, with insufficient control of their motor faculties; and 2) because of the heavy car and pedestrian traffic on these streets and the reduced sight lines caused

399

by the many parked cars, in these areas such individuals create significant danger for themselves and for innocent third parties, particularly children and the elderly. The special restriction for these Zones would be that individuals with more than 10 convictions involving alcohol or substance abuse related offenses over any twelve-month period, thereby having proven themselves to be a potential danger to themselves and others in such areas, would be prohibited from entering the areas for one year.

5. Recommend that the City of Asheville pass an ordinance against possession or use of alcoholic beverages, whether open or closed, in city parks without permission from the City Parks and Recreation Director or the City Manager.

6. Recommend that the City Council, in light of the seriousness of the problems and dangers to themselves and others created by chronically inebriated individuals, issue a proclamation to the District Attorney's office requesting: that said office prosecute repeat offenders charged with alcohol or substance abuse related offenses to the extent the law allows, that they seek to discourage the use of "time served" as an appropriate sentence for such repeat offenses, and that they seek, recommend, and encourage the longest available jail sentences for repeat offenders, in an effort to reinforce individual responsibility in such repeat offenders, to improve and reinforce the effectiveness of our local police, and to encourage said offenders to take advantage of recovery opportunities created by the community.

During discussion, Mr. Whalen responded to various questions and comments from Council, some being, but are not limited to: concern of a non-elected entity (ABC Board) using taxpayer money; what other cities are using the Inebriate Safety Zones; what percentage of the downtown area is envisioned to have Inebriate Safety Zones; how many beds are in the current Detention Facility; maybe a percentage of beds in the Detention Facility should be set aside for chronic offenders; and how much consensus was there on a local ½% sales tax on beer and wine.

Councilman Davis spoke about the need for enforcement by the City.

Mayor Worley explained how this issue and the panhandling issue tie into the Ten Year Plan to End Homelessness.

Upon inquiry of Vice-Mayor Mumpower about a timeframe on staff recommendations, City Manager Westbrook said that this is a complex problem in which the City will have to work with Buncombe County and other agencies. He felt it would take approximately 3-4 months before he could bring back final recommendations for changes. Or, he said he could bring back the priorities in all other departments and let City Council prioritize them if Council feels the 3-4 month timeframe is too long.

After a brief discussion initiated by Councilman Newman, it was the consensus of Council to come back to a worksession with a list of staff's priorities and possibly also a list of things the City can do short-term regarding this issue. Also, in the interim, the City Manager will begin dialogue with Buncombe County.

On behalf of City Council, Mayor Worley thanked Mr. Whalen and the Task Force for their time and effort in compiling this report on this very important issue.

At 4:55 p.m., Mayor Worley announced a short break.

UDO AMENDMENT REVIEWS

City Attorney Oast said that these Unified Development Ordinance amendments are being brought before City Council in order that staff may respond to questions Council may have prior to the public hearings, which have been scheduled on August 24, 2004. He advised Council that it would be inappropriate for Council to receive comments from the public at this worksession.

Provision for Public Safety Plans for Certain Temporary Uses

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to provide for public safety plans for certain temporary uses.

This code amendment provides for public safety plans for certain temporary uses. Certain temporary uses, such as a motorcycle rally last year, result in significant public safety concerns and public expenses. The proposed amendment would require the submittal of a public safety plan and a way for public expenses associated with the temporary use to be recouped.

The amendment has been routed to the Coalition of Asheville Neighborhoods, CREIA, and the Council of Independent Business Owners (CIBO) for review and comment. Based on comments from CIBO, the amendment has been revised to clarify to what types of uses public safety plans may be required and to include language about coordination with non-City emergency management operations.

On August 4, 2004, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0. City staff recommends approval of the proposed code amendment as well.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford said that he solicit comments on this amendment from the Buncombe County Tourism Development Authority and the Economic Development Commission.

Mayor Worley expressed concern of how the City will distinguish between different groups. City Attorney Oast said that he would research this issue and address it prior to formal adoption of the ordinance.

It was the consensus of City Council to continue the public hearing that is scheduled for August 24, 2004, in order to give City staff ample time to respond to concerns raised.

Technical Corrections and Clarifications

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purposes of filling in missing information, correcting mistakes, resolving discrepancies and clarifying the ordinance.

Working with the Unified Development Ordinance (UDO) on a daily basis, the Planning & Development staff has noted a number of instances where the ordinance contains discrepancies, is incomplete, or needs clarification. Staff has compiled a list of these issues and proposes the following amendments to correct these situations and make the UDO a clearer document for staff and public use. The proposed amendments deal with a variety of issues throughout the ordinance.

Pros –

- The UDO will be more easily understood and interpreted by staff and the public.
- The intent of the ordinance will be made clearer and less subject to legal challenge.

Con –

- None.

The Planning and Zoning Commission recommended approval of these code amendments on August 4, 2004, by a unanimous vote of 6-0. City staff recommends approval of the proposed code amendments.

Mr. Heard briefly explained the clarifications to the ordinance.

City staff recommends approval of the proposed code amendments to the Unified Development Ordinance for the purposes of filling in missing information, correcting mistakes, resolving discrepancies, and clarifying the ordinance.

City Attorney Oast responded to Councilman Dunn who was concerned about changing the word "church" to "places of worship." He strongly recommended Council retain the words "places of worship."

Councilman Dunn and Councilwoman Bellamy said that they would like to vote on the amendment to Section 7-8-21 (b) to change "Churches" to "Places of Worship" separately.

It was the consensus of Council to have two separate ordinances prepared – one with the amendments presented and one with the amendment to Section 7-8-21 (b) to change the word "Churches" to "Places of Worship."

Mayor Worley asked that the record show that City Council has received this information and instructed the City Manager to place this public hearing on the next formal City Council agenda. City Attorney Oast said that he would research whether another public hearing would be required to separate out the amendment to Section 7-8-21.

CONSIDERATION OF CONDITIONAL USE ZONING AS A DEVELOPMENT TOOL

Planning & Development Director Scott Shuford said that at the July 27, 28804, City Council meeting, concern was raised about the frequency of use of conditional use zoning (CUZ) as a development tool; separate but related concerns were raised about the potential for CUZ to be considered "spot zoning" and its arbitrary use by staff for "control" purposes. This report addresses these issues, provides possible alternatives to CUZ, and makes several specific recommendations.

When adopted in early 2000, staff anticipated that CUZ would generally be more frequently used than "straight" rezoning. Staff research concerning CUZ found that most communities with this development tool end up using it as their predominant rezoning tool. This is due to its chief advantage over straight rezoning: It allows the establishment of a known use and site plan as opposed to the potential of an extensive list of uses and site design limited only by standard setbacks, height, and landscaping/buffer requirements.

However, in Asheville, CUZ activity in 2003 and 2004 has not reflected that pattern (due to time constraints, I did not research back further). The following table illustrates a summary of Planning and Zoning Commission reviews of rezonings, CUZs, and conditional use permits (CUPs) over those two years. In 2004, it should be noted that while five of the rezoning cases were "initial" zonings of property (one case involved NCDOT conversion property off College

Street near the tunnel and the other four were zoning of recently-annexed areas), rezonings would still outnumber CUZs this year even if these five cases were discounted.

ZONING ACTIVITY BY TYPE – 2003 & 2004

YEAR	REZONING	CUZ	CUP
2003	19	8	2
2004 (TO DATE)	20	8	3

"Spot zoning" potential. CUZ was established by the City in February 2000. Please note that concerns about "spot zoning" were raised at that time. "Spot zoning" is a difficult issue, especially in a community like Asheville where property development has occurred over such a long period of time and where our growth management policies promote infill and adaptive reuse.

One thing to keep in mind is how the NC Supreme Court handled this issue in the 1980s in what is known as the *Chrismon* case. The Court found that spot zoning had occurred in a particular situation but noted an important factor – there was a public benefit associated with the particular case. This allowed the Court to find that spot zoning was not problematic or illegal where a public benefit was secured, but where there was only a private benefit, spot zoning was inappropriate and illegal. If we can demonstrate that a particular rezoning or CUZ-ing promotes an existing public policy, it is not automatically a legal concern even if it appears to be (or actually is) spot zoning.

Having said that, however, we should approach this issue with a great deal of caution. First, the public benefit needs to be clear and substantial in relationship to the private benefit. Second, there should be some evidence that the proposed use is relatively similar to surrounding uses or that the intent of the proposed zoning takes differences between surrounding uses and those allowed in the proposed zoning into account (e.g., zoning a single lot in a neighborhood to Neighborhood Business).

Taking the Roberts Street CUZ from last month as an example, using the above information it is clear that the proposal did not represent illegal spot zoning because it was supported by a wide range of City policies and plans and because the uses in the surrounding area were relatively similar in impact and scale.

Arbitrary use. He would like to think that this concern is mitigated somewhat by the information contained under the frequency of use table above, but the following information is also provided for your consideration. Of the nine CUZ cases in 2004, two could have possibly been supported by staff as straight rezonings: The Biltmore Pointe development in Oakley and the 673 Sand Hill Road case. However, conditions imposed by Council allowed a number of neighborhood concerns and compatibility issues to be addressed.

Using maps, he explained how staff would not have supported straight rezoning proposals for the following cases for the listed reasons:

- West Asheville Baptist Church temporary buildings (institutional encroachment)
- Trinity United Methodist Church parking lot (commercial encroachment)
- Liberty Road office/residential reuse of an existing house (nonresidential encroachment; illegal spot zoning)
- Charlotte Street parking lot (commercial encroachment)
- Forsythe Street church conversion (too dense residential zoning)
- Roberts Street NCD mixed use project (potential to create a compelling precedent for NCD zoning of the entire corridor; size of the parcel)

403

We did not support the CUZ for the office use on Arlington Street.

Alternatives.

Greater or entire reliance on straight rezoning – Staff can certainly adopt this approach but, as indicated above, there will be fewer cases that we can support and fewer opportunities to resolve neighborhood issues while allowing beneficial development to occur. It is our strong impression that the development community accepts and embraces CUZ as a development tool and that neighborhoods have greatly benefited from its careful application.

Pros:
- Less staff discretion (also a con)
- Less legislative discretion (also a con)
- Greater range of uses allowed for property owner (also a con)

Cons:
- Less staff discretion (also a pro)
- Less legislative discretion (also a pro)
- Greater range of uses allowed for property owner (also a pro)

Parallel zoning code – During your budget discussion, we proposed the development of a parallel zoning code that would basically allow new urbanist development by right in selected areas while still allowing the option for property development under the existing UDO provisions. Having such a code in effect would have potentially allowed the Liberty Road, Forsythe Street, and Roberts Street cases to be uses by right.

Pros:
- Promotes a desired land use pattern and mix of uses
- Allows choice in style of development (also a con)
- Could reduce the number of CUZ cases

Cons:
- Choice can result in incompatible mixture of new urbanist and suburban developments
- Potential compatibility issues if applied over too much of the City

Comprehensive review of zoning pattern of much, if not all, of the City – This approach could be taken to effect a comprehensive zoning/rezoning of the City to attempt to eliminate conflicting zoning patterns and allow a more frequent use of straight rezoning. Based on my practical experience, such efforts rarely fully accomplish the goal due to changes in market forces, technology, and attitudes about development over time. For example, the process that implemented the UDO was intended to result in such an outcome (and can arguably be said that it has achieved that outcome to an extent).

Pros:
- Could eliminate conflicting zoning patterns
- Allows a more frequent use of straight rezoning

Cons:
- Time-intensive
- Repeats fairly recent UDO process
- Loses effectiveness over time

Conditional zoning – Charlotte and other cities in NC have obtained legislative authority for *conditional zoning* which is very similar to CUZ except the action happens in one step instead of two (CUZ requires approval of both a rezoning and a CUP). Developers are held to specific site plans and uses approved by the governing boards just as in CUZ, but the process is legislative, not quasi-judicial. Having this tool would allow us to stop requiring sworn testimony and for Council members to not be restricted in their discussions of cases outside the hearing by the prohibition of *ex parte* communications. Staff is very interested in obtaining such authority for Asheville in order to simplify our procedures and to increase the ability of Council to get relevant information.

Pros:
- Simpler procedure
- Allows more flexibility in information gathering

Con:
- Could be used even more often than CUZ or straight rezoning (possibly a pro)

City staff recommends that until we are able to replace CUZ with conditional zoning that we continue to utilize CUZ as a zoning tool due to its ability to provide development flexibility and address compatibility issues. We remain interested in pursuing the parallel code as a companion to CUZ. We do not recommend elimination of CUZ or undertaking another comprehensive rezoning effort.

There was a brief discussion surrounding the report.

Councilman Newman was pleased with the conditional use zoning process, however, he wasn't pleased that City Council is not able to talk or listen to people outside of the public hearing.

It was the consensus of City Council to (1) continue to utilize the CUZ as a zoning tool; (2) work to obtain legislative authority for conditional zoning; and (3) instruct City staff to pursue the parallel code as a companion to the CUZ.

DEVELOPMENT REVIEW PROCESS TEAM

Building Safety Director Terry Summey said that this is the consideration of appointing members to serve on the "2004 Development Review Process" Team.

As part of this year's budget approval process, City Council postponed action on some recommended Building Safety Department permit fee changes, including an adjustment in the affordable housing rebate program, in order to allow for the independent evaluation of our permitting process. At the 2002 City Council retreat, staff presented a summary of our successes in implementing the year 2000 recommendations of that Development Process Review Team. That team was established in 1999 to evaluate the development review process that existed at that time. The team was led by former Mayor Russ Martin and included the following team members:

- Brett Cannady
- Dale Groce
- Ted Prosser
- Ron Butler
- Rod Hudgins
- Ben Slosman
- Patti Glazer
- Danie Johnson
- Pat Whalen

The 2004 Development Review Process Team, once appointed, would meet frequently in order to develop recommendations for your consideration in a timely fashion. The team would clearly identify problems and concerns, to receive information and reports from staff regarding these issues, and to develop recommendations for improving our processes. These issues and recommendations, once finalized, will be forwarded to Council for your consideration and action, on or before Council's September 28th Council meeting.

City staff recommends contacting the members of the 1999 team to determine their willingness to serve on the 2004 Development Review Process Team, with Marvin Slosman replacing his late father, Ben. This will ensure continuity of the review team and allow for comparative analysis of the changes made to our processes since 2000. Additionally, John Mark Stroud of the Asheville Chamber has expressed an interest in serving on the 2004 Team. The following is a proposed list of members recommended by Councilman Dunn and City staff:

Task force volunteers recommended by Councilmember Dunn:
- Brian Anderson (owner of Anderson Family Homes)
- Larry Buckner (Manager of Blossman Gas – Plbg. Dept.)
- Brett Cannady (Contractor)
- Chamber of Commerce (as given to Jim Westbrook)
- John Van Dyke (works for George Morosani)
- Samartha Forrest (she is legislative co-chair of Asheville Board of Realtors - Program Director; she is an attorney by profession)
- Buddy Gaither (CEO of "Milko")
- Russell Knight (residential contractor)
- Bill Newman (Taylor/Murphy)
- Nancy Padgett (she was nominated to serve as a Rep. for Homebuilders Association by Steve Royster – President of H.A.)
- Bill Stamey (builder)
- Tim Turner (land surveyor)
- Winston Pulliam (Pulliam Properties)
- Terry Vorst (builder)
- Representative to be appointed by the Asheville Architect's AIA Chapter

Other possible task members very involved with the development and permitting processes:
- Kirk Boone or Bob Galloway (KCB Construction Co.)
- Johnny Chandler (Buncombe Construction; Project Manager)
- Harry Giezentanner (affordable housing – modular)
- Rick Grant (Beverly-Grant; developer/contractor)
- Steve Grigg or Danny Shope (Grigg Electric)
- Al Knapp (White and Williams; mechanical contractor)
- Carroll Hughes (Spaceplan Architects)
- Jane Mathews (Mathews Architecture)
- True Morris (Mission/St. Joseph Hospitals; Engineering Dept. Director)
- Ron Moser (affordable housing)
- Allen Roderick (Heartwood renovations)
- Tom Vorst (general contractor)

Staff Member support to the Process Review Team:
- Building Safety Department (Terry Summey)
- Engineering Department (Cathy Ball)
- Fire Department (Greg Grayson)
- Planning Department (Scott Shuford)
- Water Department (David Hanks)

Staff recommends that Council appoint the Process Review Team.

Councilman Dunn spoke in support of appointing new people.

Councilwoman Bellamy suggested each person submit an application and that Council hold interviews for this significant Task Force.

Councilwoman Jones felt this was going to be more of a focus group and didn't understand how fee review got included into this process since we don't include fee review in other groups.

Building Safety Director Terry Summey suggested two more people and felt that the Task Force could be as many people as are interested – the list is not inclusive. He will then break them into different focus groups and bring back recommendations to Council at their September worksession. At this point he would like to get direction from Council to start the process.

Councilman Newman did not want the focus group's intent to be misinterpreted. It is a focus group of the development community formed to give City Council feedback on the development and permitting process.

It was the consensus of Council to appoint former Mayor Russ Martin as the Chair of the focus group and if he felt an outside facilitator would be useful that the City use it's resources. City staff will verify if the following members are interested in serving on the focus group: the 1999 Development Process Team Members, John Mark Stroud, City staff members outlined above, Councilman Dunn's suggested members, other suggested members outlined above, and others who may be interested. After staff compiles the report from the focus group, they will bring it back to Council at the September worksession. At that time City Council may need to delegate individual issues to an existing appropriate committee for further study, or to solicit applications to appoint a new committee.

BOARDS/COMMISSIONS

It was the consensus of City Council to reappoint Sherry Fitzpatrick and Mary Robertson to the Americans with Disabilities Act Compliance Committee. At the suggestion of Councilwoman Bellamy, it was the consensus of City Council to discuss at a future worksession ways to expand the role of the ADA Compliance Committee..

It was the consensus of City Council to instruct the City Clerk to readvertise for the vacancy on the Asheville-Buncombe Fair Housing Commission.

It was the consensus of City Council to instruct the City Clerk to arrange interviews with Eric Zetterholm and David Brown for the Planning & Zoning Commission. In addition, Cindy Weeks is a candidate, however, it is not necessary for her to be interviewed.

It was the consensus of City Council to instruct the City Clerk to (1) arrange interviews with Kimberly Campton and Maureen Grozier for the at-large position the River District Design Review Committee; (2) appoint Richard Hall to the member of RiverLink Board of Directors; (3) reappoint Ken Fulford as a design professional; (4) reappoint Hunt Mallett, as a owner of property within the District); (5) appoint Jane Mathews as a design professional; (6) re-advertise for an owner of property within the District; and (7) re-advertise for a member of the RiverLink Board of Directors.

It was the consensus of City Council to instruct the City Clerk to (1) arrange interviews for Victor Trantham and Ripley Hotch for the vacancy of an owner/operator of a hotel, motel or other taxable tourist accommodation with 100 or fewer rental units; and (2) re-advertise for the individual who is involved in the tourist business but who does not own or operate a hotel, motel or other taxable tourist accommodation. In addition, City Attorney Oast was instructed to review the language of the statute for an interpretation of the "individual who is involved in the tourist business but who does not own or operate a hotel, motel or other taxable tourist accommodation." It was also City Council's consensus to discuss, at a future worksession, what the role of the City's representatives on the Buncombe County Tourism Development Authority should be and then ask the City Manager to arrange a meeting with our representatives to outline Council's expectations of their representatives.

CLOSED SESSION:

At 7:25 p.m., Councilwoman Bellamy moved to go into closed session for the following reasons: (1) To consider the qualifications, competence, performance, character, or fitness of an individual, public officer or employee. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (6); and to prevent disclosure of information that is privileged or confidential pursuant to the laws of North Carolina, specifically, the Personnel Privacy Act, N. C. Gen. Stat. sec. 160A-168. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (1); and (2) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (4). This motion was seconded by Councilman Dunn and carried unanimously.

At 8:00 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Councilwoman Jones and carried unanimously.

ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:00 p.m.

Magdalen Burleson
CITY CLERK

Charles R Worley
MAYOR

Tuesday – August 24, 2004 - 5:00 p.m.

Regular Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Col. Ray Green, Veteran of the US Air Force, led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 10, 2004, AND THE WORKSESSION HELD ON AUGUST 17, 2004

B. RESOLUTION NO. 04-170 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY THE CITY'S INTEREST IN PROPERTY ON MILLBROOK ROAD TO BUNCOMBE COUNTY IN EXCHANGE FOR EASEMENTS OVER COUNTY-OWNED REAL PROPERTY LOCATED AT HOMINY CREEK PARK AND RECREATION PARK

Summary: The consideration of a resolution authorizing the Mayor to convey the City's interest in property on Millbrook Road to Buncombe County in exchange for easements over County-owned real property located at Hominy Creek Park and Recreation Park.

The City and Buncombe County have negotiated an exchange of the City's interest in property on Millbrook Road for greenway easements over the County's property at Hominy Creek Park and Recreation Park. The property on Millbrook Road (PIN Nos. 9638.07-67-0634 and 9638.11-67-1425) includes two contiguous lots owned by the County and City comprising 1.4 acres. The property has a tax value of $50,000. The County proposes to donate the property with restrictions to the Buncombe County Rescue Squad for a new facility.

The proposed greenway easements are over property owned by the County at Hominy Creek Park (PIN No. 9637.01-16-5732) comprising 1.5 acres and at Recreation Park. (PIN No. 9668.13-04-6364) comprising 1.5 acres. The proposed Hominy Creek Greenway will connect Hominy Creek Park to Amboy Road Park. The Azalea Park Greenway will connect Azalea Park to Recreation Park and Swannanoa River Road (NC 81). The total value of the greenway easements would be approximately comparable to the City's interest in the Millbrook Road property.

The positive aspects of this transaction are:

- It is mutually beneficial to the City and the County.
- The County will be able to donate the land to the Rescue Squad for a needed facility.
- The City will acquire needed greenway easement at no cost.
- It is an opportunity for local government collaboration for the benefit of the community.
- It involves only publicly owned property and does not remove any property from the tax base.
- The City receives real estate interests of comparable value for its interest in the Millbrook Road property as opposed to donating it.

A negative aspects is:

- The property on Millbrook Road will remain in public ownership and not be returned to the tax base.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. G. S. 160A-271.

Planning & Development staff recommend adoption of the resolution authorizing the Mayor to convey the City's interest in property on Millbrook Road to Buncombe County in exchange for easements over County-owned real property located at Hominy Creek Park and Recreation Park.

RESOLUTION BOOK NO. 28 – PAGE 324

C. RESOLUTION NO. 04-171 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY AT THE CORNER OF BARTLETT AND NELSON STREETS

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer to purchase property at the corner of Bartlett Street and Nelson Street in the East Riverside community.

A bid has been received from Ray Quate, in the amount of $4,000, for the purchase of a parcel of land at the corner of Bartlett Street and Nelson Street in the East Riverside Community.

The land at the corner of Bartlett Street and Nelson Street is a rectangular shaped parcel comprising 0.13 acre+ (37'X151.9'). It is generally level at street grade and slopes up gradually to the rear. It is covered with grass. The long narrow shape renders the parcel unsuitable as a homesite. The subject parcel is a cut-out from a 5.73 acre property acquired from the Housing Authority which is now a part of Murray Hill Park. Based on an opinion letter dated July 28, 2004, by L. Ted Prosser, the value of the cut-out parcel is $4,000. The bid from Ray Quate, owner of an adjacent parcel is in the amount of $4,000. Mr. Ouate plans to renovate the building on the adjoining parcel with attention to preservation of historic architectural characteristics. The main floor on Depot Street will be three artist's studios and on the second floor will be five apartments with inside parking. Some of the apartments will be one bedrooms and are expected to be within the affordable range. He plans to assemble the subject parcel with the property he owns to provide access to the parking and a buffer.

The proposed renovations are consistent with the Strategic Plan policies of encouraging a strong small business environment and increasing the supply of affordable housing.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the upset bid process.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.
4. A small parcel will be assembled with an adjoining parcel to provide a more efficient land use.
5. The sale of this lot to Mr. Quate will facilitate the proposed re-development by providing necessary access.

Planning & Development staff along with Parks & Recreation staff recommends adoption of the resolution which will initiate the sale of the property through the upset bid process.

RESOLUTION BOOK NO. 28 – PAGE 326

D. RESOLUTION NO. 04-172 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE FOR UPSET BIDS FOR PROPERTY LOCATED ON COURTLAND AVENUE (LOT #11)

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located on Courtland Avenue.

The subject property is an RS-8 Residential Single-Family High Density District zoned parcel located on Courtland Avenue comprising approximately 0.14 acre (PIN No. 9649.17-01-0636). The Fair Reuse Value for the parcel, based on an appraisal dated April 21, 2004, by Gwen M. Keller is $6,000.00. The proposed land use for the property in the Head of Montford Redevelopment Plan is for residential development.

Ross B. Parkinson has submitted a bid to purchase the property in the amount of $6,000, and he proposes to build a single-family residence for his home.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- The sale of this lot will afford the opportunity for infill development.

Approval of the resolution will establish a minimum price of $6,000 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. sec. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing advertisement for upset bids for property located on Courtland Avenue.

RESOLUTION BOOK NO. 28 – PAGE 327

E. RESOLUTION NO. 04-173 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE FOR UPSET BIDS FOR PROPERTY LOCATED ON COURTLAND AVENUE (LOT #12)

Summary: The consideration of a resolution authorizing the City Clerk to advertise an offer of purchase for upset bids for property located on Courtland Avenue.

The subject property is an RS-8 Residential Single-Family High Density District zoned parcel located on Courtland Avenue comprising approximately 0.15 acre (PIN No. 9639-20-91-9684). The Fair Reuse Value for the parcel, based on an appraisal dated April 21, 2004, by

Gwen M. Keller is $6,000.00. The proposed land use for the property in the Head of Montford Redevelopment Plan is for residential development.

Samuel Koerber has submitted a bid to purchase the property in the amount of $6,000, and he proposes to build a single-family residence for his home.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.
- The sale of this lot will afford the opportunity for infill development.

Approval of the resolution will establish a minimum price of $6,000 and initiate the sale of the property through the upset bid process as provided in N. C. G. S. sec. 160A-269.

Planning & Development staff recommends adoption of the resolution authorizing advertisement for upset bids for property located on Courtland Avenue.

RESOLUTION BOOK NO. 28 – PAGE 328

F. RESOLUTION NO. 04-174 - RESOLUTION APPROVING THE BUDGET FOR THE PACK SQUARE RENAISSANCE PROJECT AS ADOPTED BY THE PACK SQUARE CONSERVANCY

Summary: The consideration of a resolution approving the Pack Square Renaissance Project budget as adopted by the Pack Square Conservancy.

The agreement for the Pack Square Renaissance development between the Pack Square Conservancy (PSC) and the City requires that the Asheville City Council approve the budget for the project. In early July, the PSC adopted a revised budget for the project that represents the current cost projections based on the approved design.

Please note that in approving the PSC budget, there is absolutely no commitment on the City's part to any funding participation beyond what we have committed to in the agreement.

The revenue to pay for construction costs will come from private donations and grants secured by the Pack Square Conservancy.

City staff recommends City Council approve the resolution approving the PSC budget for this project as adopted by the Pack Square Conservancy.

RESOLUTION BOOK NO. 28 – PAGE 329

G. RESOLUTION NO. 04-175 - RESOLUTION AMENDING THE 2004 SCHEDULED CITY COUNCIL MEETINGS TO DELETE THE SEPTEMBER 7, 2004, WORKSESSION

RESOLUTION BOOK NO. 28 – PAGE 332

H. RESOLUTION NO. 04-176 - RESOLUTION REAPPOINTING MEMBERS TO THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Summary: The terms of Sherry Fitzpatrick and Mary Robertson, as members on the Americans with Disabilities Act Compliance Committee expired on August 22, 2004.

At City Council's worksession on August 17, 2004, City Council instructed the City Clerk to prepare the proper paperwork to reappoint Sherry Fitzpatrick (representing the disabled community representative) and Mary Robertson (representing the disabled community) as members of the Americans with Disabilities Act Compliance Committee, to each serve an additional three-year term respectively, terms to expire August 22, 2007, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 333

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Bellamy moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN UNNAMED ALLEY OFF SOUTH FRENCH BROAD AVENUE

RESOLUTION NO. 04-177 - RESOLUTION PERMANENTLY CLOSING AN UNNAMED ALLEY OFF SOUTH FRENCH BROAD AVENUE

Mayor Worley opened the public hearing at 5:07 p.m.

Public Works Director Mark Combs said that this is the consideration of a resolution of intent to close permanently close an unnamed alley off South French Broad Avenue. This public hearing was advertised on July 30, August 6, 13 and 20, 2004.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close to public use as a public street an unnamed alley off South French Broad Avenue.

Public Works Department staff has researched and determined that this alley is not a City maintained street. Closure of this alley will not deny any of the abutting properties a reasonable means of ingress or egress. There are six lots that abut this section of right-of-way. They are identified by PIN Nos. 9648.05-29-1708, 9648.05-29-0747, 9648.05-29-0716, 9648.05-29-0668, 9648.05-19-9786 and 9648.05-19-9645. All abutting property owners except Bost Bakery (9648.05-19-9645) have joined in the petition to close. This closing is subject to the retention of easements extending the full length and width of said alley by Bell South and Progress Energy for the operation and maintenance of public utilities.

City staff recommends that City Council adopt the resolution permanently closing an unnamed alley off South French Broad Avenue.

Mr. John Ellis urged City Council to permanently close the unnamed alley.

Mayor Worley closed the public hearing at 5:10 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 04-177. This motion was seconded by Councilwoman Bellamy and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 334

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED BETWEEN ZILLICOA ROAD AND MONTFORD AVENUE, IDENTIFIED AS CAMPUS CREST AT ASHEVILLE, TO CONSTRUCT A 152-UNIT APARTMENT COMPLEX

ORDINANCE NO. 3153 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED BETWEEN ZILLICOA ROAD AND MONTFORD AVENUE, IDENTIFIED AS CAMPUS CREST AT ASHEVILLE, TO CONSTRUCT A 152-UNIT APARTMENT COMPLEX

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Worley opened the public hearing at 5:11 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit for property located between Zillicoa Road and Montford Avenue, identified as Campus Crest at Asheville, to construct a 152-unit apartment complex (City Exhibit 3 – Location Map).

The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth and transportation policies. The project utilizes the existing zoning on the lot to create a sustainable medium-density residential development within the City Limits in a location were the existing infrastructure is capable of supporting the proposed use. The project will assist in meeting the demands of student housing for the area. The project proposes shuttle service to UNC-A for its residents and is also within walking distance to the University. The project will also provide a bus shelter and transit stop on Montford Avenue. The project is also located within close proximity of parks, greenway systems (Reed Creek Greenway) and many other viable shopping venues.

Some recent rezoning include: 2002: Broadway Corridor Rezoning to Neighborhood Corridor District; 2003: Rezoning of 2 lots on the corners of Stames and Flint from Neighborhood Business to RM-8; 2004- Conditional Use Rezoning on Catawba Street from RS-8 to RM-8 for the construction of a quadraplex.

On May 28, 2004, Campus Crest Developers, LLC, submitted a conceptual master plan for the construction of a large-scale multi-family development to be located within the Highland Park office complex located off of Zillicoa Street. The property will be subdivided from the main tract to create a 16.85-acre parcel that will house the development.

The property, zoned Institutional, allows for a density of 16 units per acre. Based on the acreage, up to 269 units could be constructed (City Exhibit 3 – Site Plan). The developer is proposing 154 units, a density of approximately 9 units per acre. The development will function and cater towards student housing. Individual bedrooms (each with their own bathroom) will be rented, with its occupants sharing the other common facilities within the unit such as the kitchen, living area, etc.

The project will consist of 11 buildings. Buildings 1-10 will consist of 14, 3-bedroom units; and Building 11 will consist of 14, 2-bedroom units. They will be constructed in a 4-3 story split design (4 stories in the front, 3 stories in the back) with a maximum height of 37-4' feet. Amenities to the complex include: a 2-story clubhouse, a multi-functional sport court, open court yard areas between each building, a designated loading area for shuttle transportation to UNC-A, and transit stop with bus shelter on Montford Avenue. Open space, in excess of the standard City requirement, is shown in multiple locations throughout the development. Sidewalks and trails will provide pedestrian connectivity within the development and to Zillicoa Street and Montford Avenue.

The site plan illustrates proposed access from Zillicoa Street and Montford Avenue with a 462-space parking lot connecting the two ends. (The North Carolina State Building Code-Fire Volume, adopted by the City of Asheville, requires a development of this size to either have 2 points of access to the development (one of which must connect to a public street) or requires all buildings to be sprinklered.)

A 15-foot type "A" buffer is required along the West, East and South sides of the property, all of which are heavily wooded. The project will be heavily buffered from adjoining properties by the preservation of existing vegetation supplemented with additional plant materials as needed.

The site plans presented to the Planning and Zoning Commission on August 5, 2004, were revised to address several Technical Review Committee (TRC) comments and also addresses other site plan changes. These include: an increase in the number of units (from 152 units to 154 units), decrease in number of bedrooms (from 456 bedrooms to 448 bedrooms), clarification of building heights and design, an increase in the number of parking spaces (from 446 spaces to 462 spaces – 14 spaces over the maximum permitted), design change to the parking area to include a loop road, changes to the landscaping, sidewalk connections to the street, addition of a transit stop and bus shelter on Montford Avenue, proposed dumpster location, a shuttle bus loading area, multi-functional sport court, open area courtyards between the buildings, and elevation changes.

The changes to the plans address a majority of the conditions outlined in the TRC staff report (City Exhibit 4 – Original Proposed Building Façade; and City Exhibit 5 – New Conceptual Elevation). For items not yet addressed, detailed plans will need to be resubmitted to the TRC for final review, should Council decide to approve the project.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)).

1) That the proposed use or development of the land will not materially endanger the public health or safety.

The proposed project has been reviewed by City staff and has the potential of meeting all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2) That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.

The existing site is heavily wooded and straddles a relatively steep ravine that contains a tributary of Reed Creek. Significant grading of the site and containment of the tributary will be necessary to develop the property as proposed. The site, however, has been designed in a manner that somewhat more environmentally sensitive by concentrating the development on the more level areas within the ravine to limit land disturbance at its bank and to preserve existing vegetation around the perimeter of the property. Additionally, the project must comply with all City Standards in regards to maximum clearing and grading, erosion control, and maximum slope for streets.

A condition has also been added to the project for the developer to work with staff to ensure water quality issues in regards to Reed Creek, are addressed through the design and monitoring of stormwater run-off infrastructure.

3) That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.

The existing site is heavily wooded. The developers have designed the project so that the buildings along the west side of the property are not closer than 80 feet to the property line. Because the development is being concentrated within the lower areas of the ravine, land disturbance around the immediate perimeter of the property will be minimal to none. The landscape plans provided indicate that all existing perimeter vegetation is to be preserved to meet the City's Landscape requirements, supplementing with additional vegetation, if needed.

Although, this project is not being developed within the Montford Historic District overlay, the architects for the project are working with staff to ensure that the design and architectural features of the buildings are compatible with those found in the surrounding neighborhood.

4) That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The apartment buildings will be located at least 80 feet away from properties along the south and west sides of the site. Additionally, they are being constructed within the lowest parts of the site, which will assist in providing visual relief from the full scale and height of the buildings. Furthermore, the developers are proposing buildings constructed of high-quality materials and are also working with staff to ensure that the design and architectural features of the buildings are compatible with those found in the surrounding neighborhood.

In addition, the existing vegetation around the perimeter of the property will be preserved, supplementing with additional vegetation as needed, to meet the City's landscape buffer requirement.

5) That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.

The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth and transportation policies. The project utilizes the existing zoning on the lot to create a sustainable medium-density residential development within the City Limits in a location were the existing infrastructure is capable of supporting the proposed use. The project will assist in meeting the demands of student housing for the area. The project proposes shuttle service to UNC-A for its residents and is also within walking distance to the University. The project will also provide a bus shelter and transit stop on Montford Avenue. The project is also located within close proximity of parks, greenway systems (Reed Creek Greenway) and many other viable shopping venues.

6) That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.

There is currently no transit service available on Broadway. The subject site is, however, located within walking distance of existing transit service on Montford Avenue. Additionally, the development proposes a new transit stop and bus shelter near the Montford Avenue drive entrance and also proposes a passenger loading area within the development for shuttle service to UNC-A.

The City's TRC, which includes representatives of the Water Resources Department, Fire Department, Engineering Department, Public Works Department, and Planning Department, has reviewed the proposed development.

7) That the proposed use will not cause undue traffic congestion or create a traffic hazard.

The Campus Crest development is proposed with access to Broadway and Montford Avenue. Montford Avenue is a collector street, and it is appropriate to provide such access for a residential development. The Traffic Impact Analysis submitted for the project predicts only 20% of development traffic using Montford Ave, which is reasonable considering the primary destinations will be UNC-A, downtown, and I-26, all of which are more accessible via Broadway, with its ample lanes, higher speeds, and more direct route. The traffic on Montford Avenue would increase by about 300 cars per day (36 during the peak hour, or one every 1 minute 40 seconds during peak hour).

The design of the Montford Avenue access will be required to use a traffic calming technique called a "driveway link" segment, in which the access is designed to look like a residential driveway, making it further less attractive than the Zillicoa/Broadway driveway, which will look like a public street. This design should further limit the traffic volume using Montford Avenue to those destined in the neighborhood.

At their June 21, 2004, meeting, the TRC reviewed the Conceptual Master Plan and voted unanimously to recommend approval of the project, subject to the conditions outlined in the staff report and the following additional conditions:

1. Construction traffic is to be routed away from Montford Avenue.
2. Traffic calming measures are to be implemented on site.
3. A handicapped accessible route must be provided to the transit stop.

Pros:

1. The project is supported by numerous goals and strategies in the plan relating to infill development, smart growth and transportation policies.
2. The proposed use and development is supported by the future land use and transportation plans for this area.
3. The project will assist in meeting the needs of student housing in close proximity to UNC-A's campus.
4. The site has been designed in a manner that works with the existing topography by concentrating the majority of the development in the lower levels of the ravine. This will reduce the amount of grading needed at the top of the bank where a thick vegetative buffer exists. It will also reduce the over-all visual appearance of the height and scale of the project from neighboring properties.
5. The project, catered towards student housing, is located less than a mile from the campus of UNC-A, making the use of other modes of transportation such as walking, bicycling and shuttle and transit service, more appealing and readily available.
6. The project is located within close proximity of parks, greenway systems (Reed Creek Greenway) and other viable shopping venues.

Cons:

1. The existing site is heavily wooded and consists of a relatively steep ravine with an unnamed tributary of Reed Creek that runs in the center of the property.
2. Due to the existing topography, significant grading of the site will be necessary to develop the site, as proposed.
3. Although the project will have to comply with current stormwater regulations to control the quantity of run-off, it will not address "water quality". Due to the natural topography of the land and lack of any proposed filtration methods, the run-off from the parking lot may contribute to the degradation of Reed Creek.
4. The number of parking spaces proposed for the development seems excessive due to information provided from the UNC-A Facilities Manager who indicated that only 64% of the student population housed on campus at UNC-A own cars.
5. Although a majority of the traffic is likely to use Zillicoa Street to Broadway, an increase of traffic is expected on Montford Avenue. The City, however, will require the developer to design the Montford driveway connection with traffic calming elements that will make it less appealing.

On August 5, 2004, the Planning and Zoning Commission voted unanimously (6-0) to recommend approval of the project subject to the following conditions:

1. Staff and TRC recommendations be met.
2. No fee in lieu of sidewalks be permitted.
3. Placement of electronic pedestrian crossing signals at crosswalks, if permitted by NCDOT; placement of crosswalks of design and/or color to clearly delineate them, if permitted by NCDOT. **(Alternate language suggested by staff: A crosswalk crossing Zillicoa shall be added at Broadway. Material shall be white thermoplastic meeting NCDOT standards.**

Both crosswalks crossing Broadway shall be upgraded to high-visibility type crossings. Markings may be ladder-style or piano-key style, similar to City markings in the downtown area. Material shall be white thermoplastic meeting NCDOT standards.)

4. Placement of transit stop and shelter at the Zillicoa/Broadway entrance; **(Alternate language suggested by staff: A transit pad shall be provided at the intersection of Broadway & Zillicoa to provide for potential future service along Broadway. The pad shall be concrete, 13' long x 8' wide, with cross-section meeting the City's sidewalk specifications. The pad shall be attached to, but shall not overlap, the sidewalk. Location shall be in the south corner of the intersection along Broadway, or other location approved by staff.)**
5. Placement of low-level/impact lighting, but sufficient to accommodate safety; **(Alternate language suggested by staff: All site lighting shall be equipped with 90-degree cut-off fixtures and oriented away from surrounding properties; a lighting plan shall be implemented to minimize light trespass.)**
6. Architectural design of the buildings in compliance with Montford area sufficient to satisfy staff (staff had already noted the design was sufficient). **(Alternate language suggested by staff: The developer shall continue working with staff to ensure that the proposed structures are architecturally compatible with the surrounding neighborhood.)**
7. Eliminate one of the Zillicoa Drive entrances, but only if compliant with State Fire Regulations; this included meeting and working with the Fire Marshal on this issue.
8. Developer must cooperate with staff, Parks and Recreation, Asheville Greenway Commission and John Calabria of NCSU Extension Service in development of a plan for water quality and storm water issues. **(Alternate language suggested by staff: Best Management Practices (BMP's) shall be utilized to address water quality issues; at a minimum, the updated EPA water quality standards shall be met, along with any conditions imposed by the Asheville City Engineering office.)**

Based on the seven findings, staff recommends approval of the conditional use permit with the conditions outlined by the Technical Review Committee, Planning and Zoning Commission's recommendation and the following added conditions:

1. The developer shall work with city staff and other independent groups to address water quality issues in the design and monitoring of stormwater run-off infrastructure.
2. All parking spaces over the maximum number of spaces permitted must be constructed with pervious paving and comply with additional landscaping requirements.
3. The dumpster should be relocated to an internal location within the site to reduce its impact on neighboring properties and discourage traffic from proceeding onto Montford Avenue.
4. All buildings must comply with the Institutional District height standards.
5. The developer is required to contact the Corps of Engineers office to determine appropriate permits required for developing over a tributary stream. Any permits required, are to be obtained prior to the issuance of the zoning permit.
6. A sidewalk connection along Zillicoa to Broadway shall be provided in a location approved by staff.
7. The driveway access on Montford Avenue shall be constructed with traffic calming elements as required by the City's Traffic Engineer.

Mr. Albert Sneed, attorney representing the developer, said that the City's Traffic Engineer and the Fire Marshal require the road to go all the way through to Montford. The developer would prefer not to have the road go to Montford. If there needs to be some kind of road to Montford, the developer would like to have a road with a gate on it that the Fire Department could "break down" if they needed to get in the apartment complex.

Mr. Chris Eller, Civil Design Concepts and Engineer of record on the project, said they did try to preserve as many of the existing trees as possible, arranged the buildings in a cluster fashion to preserve a perimeter buffer of trees, and noted the elevation of the buildings are set at an elevation that will minimize impacts to surrounding property owners. They did meet with the neighborhood and they have tried to incorporate many of their concerns. They have agreed to add a bus stop at Broadway as well as the one requested by City staff at Montford. He has met with the Fire Department staff to discuss ways of potentially limiting the access off of Montford. He said the access is more of an operational concern, however, he understands the Fire Department would allow the Montford access to be an ingress only, being gated or bollard controlled. The developer would be open to that or to eliminate the Montford access entirely. This could be a potential compromise to eliminate some of the neighborhood concerns. We have hired an environmental consultant to work directly with the Corps of Engineers and they did get a notification of jurisdictional determination from the Corps of Engineers stating that they concurred with their consultant that there were no U.S. waters or wetlands on the properties of any significance that would require permitting through the Corps of Engineers. The owners have met with representatives from the N.C. State University Extensive Service and looked at potential water quality devices that could be used. We have worked with that group on other projects in the region and feel confident that what the developer is proposing will satisfy and be an extreme enhancement to water quality at this project site. He noted that water quality is not a requirement of the UDO standards, but it has been recommended by neighborhood concerns. The developer has agreed to do water quality in addition to stormwater detention volume control. This will be an additional $30,000 spent to address water quality issue. We have relocated the dumpster to be centrally located in the project. We agreed to put a sidewalk in from Zillicoa (where the current project entry is) down to Broadway and have agreed to do traffic calming measures within the development as well. A Traffic Impact Analysis (TIA) was performed on the project and it concluded that it would have no adverse impacts on the surrounding intersections. The project incorporates many smart growth principles. We feel the project clearly meets the seven standards for conditional use approval.

Mr. Mike Hartnett, partner with Campus Crest Communities, said that early in the process, they started communicating with the neighbors by hosting a reception and then holding another meeting. Two issues repeatedly came up. One was the entrance onto Montford. Our initial conceptual plan did not include an entrance onto Montford, but City staff felt this entrance was required. We are fine with our road ending as a cul-de-sac, or a knock down gate or bollards for emergency entrance only, or a very residentially scaled small entrance. The other issue was how is this property going to impact the Montford neighborhood. There are three tangible items that might affect the neighborhood – traffic, quality of our finished community product, and the behavior of our residents. Regarding traffic, we feel that most of our traffic flow (80%) will be going toward the main entrance on Broadway. Regarding quality of our development, we have spent consideration time and effort on the architecture and design. People will probably never get a real site line on this property from Montford because we will be keeping the existing 80-foot tree buffer along Montford as well as the topography that slopes down onto the property. Regarding management, Campus Advantage is a management company out of Austin, Texas, and he personally feels they are one of the best in the United States. They manage over 5,000 beds in several states. We are confident in their ability to educate the residents on policies and enforce those policies. This will be a high quality housing option for a growing population at UNC-A, which will be managed by nationally recognized firm. This project may free up rental housing inventory throughout the community making options available to other families who are finding it difficult to rent affordably in Asheville. And, this will be a nice infill development within the City limits where there is a lot of urban sprawl going on these days.

Responding to Mr. Sneed, Mr. Hartnett showed pictures from houses across the street to where the project will be constructed (Applicant Exhibits 1, 2 and 3). Again, his plans are to keep the existing 80-foot width of vegetation from Montford right-of-way down to their property line.

Responding to Mr. Sneed, Mr. Hartnett said that the developer is approaching $100,000 already in engineering, architecture, Army Corps of Engineer consultants, and traffic engineer - not including our time as developers.

Mr. Hartnett did not feel this project will have any negative impact on adjacent property owners. They will be building a $15 Million asset, which will be nicely maintained.

Mr. Michael Peter, President of Campus Advantage, which is a student housing management company, said that they manage over 5,000 beds. He explained the credentials of his senior staff. They are involved in several professional organizations that are dedicated to student housing and student development. The cornerstone of our approach is grounded in the fundamentals of student development and residence life. We have a national director of residence life whose sole job is to oversee the social and educational programming that takes place at each one of our properties. At this property we have slated 6 Resident Assistants (RA) living on site. He said an RA is typically a student staff member, with substantial GPA's and student leaders. Each RA will be responsible for approximately 50 residents. We also have a resident director who oversees the RA staff. And, they have an on-site manager. That is just the residence life staff. Using a chart (Applicant Exhibit 4), he showed Council the proposed organizational structure. He said this is different than other student housing because we have staff living on-site 24 hours, 7 days a week. There is interactive staff participation in everything that goes on There is always a RA on call and there is always a RA on duty during the 24-hour period of time. The resident director or the general manager must remain on-site. He said all rental contracts require a guarantor to sign and that guarantor needs to be someone that is responsible for that student (normally a parent). The importance of the guarantor is not only in terms of us collecting rent, but also any violations of the lease will instantly result in a letter to both the tenant and the guarantor of the lease and it outlines what that violation was. We have a zero tolerance drug policy, which is written in our lease and in our rules and regulations. If the issue is drug use, the student will be immediately evicted from the property. We have similar rules regarding conduct and behavior. If certain behavior rises to the level that it requires an eviction, we undergo an eviction. Regarding alcohol, there is no open consumption of alcohol allowed on the property – regardless of age. We have quiet hours every weekday beginning at 10:00 p.m. and the sports court is closed at 10:00 p.m. also. On weekends that time is extended to 11:00 p.m. If we get a call from a resident complaining about noise, the RA will ask the person to turn it down whether it is quiet hours or not. Regarding parking, all our residents will be given a parking permit, which they will pay for each semester for the privilege of parking. Typically the permit is $25-$50 per semester. We enforce the parking in our lots. We will have designated visitor parking. During the day, we have our maintenance team walking the property picking up as well as observing the parking. Regarding recreation, each RA is required to provide one social and one educational event for their pod each month. In addition, the entire RA staff is required to provide a building-wide activity educational and social each month. These units are fully-furnished and the entire program is structured is structured with students in mind, so this not a program that would be enticing to anyone other than the student or the parent of a student. Mr. Peter submitted to Council the Resident Assistant Manual (Applicant Exhibit 5).

Ms. Janice Brummit said that she is on the Board of Trustees at UNC-A, but her statement is not an official UNC-A statement. She explained to Council some of the needs they have on the campus. This fall their enrollment was 2829 students. Currently on campus they have 1,191 beds available. The freshman enrollment is 705 and freshman must live on-campus. Historically our students are well-behaved and they come for an education, not to party. As in any case, there are incidents where students are not well-behaved but we have rules in place to take of those incidents when they do happen. Our student body is very conscious environmentally, morally and socially about what happens in our community. There is a need in our community for affordable housing and this project is close to campus where they can ride their bikes.

Upon inquiry of Councilman Newman about why there hasn't been more of a position from UNC-A, Ms. Brummit said that they are a public institution and this is a private development. Many legal ramifications are associated with when a public institution steps out and endorses a private development. Again, she is not speaking for the Board of Trustees of UNC-A, but when you endorse a project, it becomes an alienation between the community and the University. The University of North Carolina is a good neighbor and we don't want that to be slandered in anyway for any cause. But, we also want to be very cognizant of the fact that our students need a safe environment to live and have easy access to campus. She feels this is a win/win for UNC-A, but she cannot speak for the University, only as a private citizen. She did say that UNC-A is always willing to work with the community for a win/win situation.

Councilman Newman felt there are opportunities to coordinate some of the transportation issues, especially since UNC-A has just hired a transportation planner. He is not asking for an endorsement, but wondered if there would be more opportunities to do some planning together. Ms. Brummit responded that UNC-A is always willing to work with the community for a win/win situation.

Upon inquiry of Councilwoman Jones, Ms. Brummit said that other dormitories are planned on campus, but that still not meet the needs that we have. They anticipate the campus growth over the next 10 years to be about 4,500 student and we don't see that type of growth of housing on campus. The problem with building dorms is timing. Private entities can build a residence much more quickly off campus. Another issue is they have to transplant parking spaces when they build new dorms and this would alleviate some of those issues on our campus.

Mr. Scott Hughes, property owner of 19 Zillicoa, spoke in support of the project noting that he will see the project right out his back window. He spoke highly of UNC-A and in fact his firm has hired a number of UNC-A graduates. UNC-A is land-locked and in need of housing for their students. This project is a great solution for part of UNC-A's housing needs and it's being done with private dollars. City-wide traffic might be reduced if housing for the students remains close to campus. The nature of the property and the planned use should direct much of the traffic to the Broadway area. Buffering will make the development less obvious and on-site management should keep noise and security issues to a manageable level. This is another investment in the lives of the students that come here looking for knowledge and community.

Mr. Sneed summarized an email from Jim Barrett (Applicant Exhibit 6). He said Mr. Barrett is a resident of Montford and an advocate for more affordable housing. He wanted to urge approval of this development for some of the following reasons: (1) Asheville needs more affordable housing units; (2) this development will increase the supply of units for students, thus increasing the supply of affordable units for the entire City. Students currently occupy units around town that could otherwise be used for lower income families; (3) private construction of this complex will create taxable apartments and land and save the taxpayers from having to build one or more at UNC-A; (4) students will be able to bike and walk to campus decreasing the need for cars and other transportation and this should reduce air pollution; and (5) Broadway is an under-utilized four-lane thoroughfare that can accommodate traffic from a multi-family apartment complex. The complex is virtually adjacent to I-26. Broadway is or should be on the City bus route.

Vice-Mayor Mumpower inquired about the reading of emails prior to this public hearing. City Attorney Oast said that since the emails are from people who are not at the public hearing, and also regarding the email that Mr. Sneed read from Mr. Barrett, Council cannot ask questions to those people and in Superior Court that would be hearsay evidence. Mr. Sneed responded that the fact is Mr. Barrett is President of the Affordable Housing Coalition, he is head of Pisgah Legal Services and a resident of Montford.

The following individuals spoke against the conditional use permit and/or offered additional conditions to the permit. Reasons for denial and additional conditions are as follows, but are not limited to: loss of forest will destroy the beauty of the area and allow further air pollution; request to eliminate access on Montford Avenue due to traffic concerns; if access on Montford is necessary, suggestion for a gated or limited access entrance for emergency vehicles only; TIA count was one day instead of three days and relied on data two years old; Montford Avenue is already under strain with traffic with the new Chamber of Commerce building, two schools and the new Health Adventure; it is only an assumption that the majority of trips from this development will go to Broadway, because they will also go to places for entertainment, shopping and jobs and Montford will be the most viable route; hope that staff will work with the developer to assure the site plan on saving the trees and lighting is met; $500 per unit is not affordable housing; there will be at least 600 students in one spot (400 residents and 200 friends) which will cause a lot of noise problems; the Historic Resources Commission should become involved in this development; if the project fails in the next three years, who will be responsible for the project; this is not smart growth; if the City wants infill housing to provide affordable housing close to downtown, why are there expensive condos in downtown Asheville; the developers are using education as a guise to achieve their goal; the development will be on a creek which eventually leads to the French Broad River which we have been trying to clean up; forest provides for a buffer and barrier of sounds from I-26; noise from project will echo up out of the ravine to Klondyke and Montford residents; project is catered to a transient population; request to slow the process to see if there are other options available; Campus Crest is student housing and not mix-use development, the project is not in keeping with the traditional Montford neighborhood pattern; the project will be built on a steep slope in an environmentally sensitive area; only economic development of this project will be to the developers; the Montford Historic District is a tourism attraction but won't stay that way when it starts to look like Tunnel Road; property values will be adversely affected with a 456 person complex in the neighborhood; there are only mild traffic calming devises proposed; the project might not be profitable enough to stay student housing and managed in the way presented, but in a few years it may become low-income housing; heavy traffic and excessive speeding on Montford Avenue is an ever increasing problem and no measures have been taken to remedy these problems; there will be excessive cut-through traffic onto Montford even if the main entrance is on Broadway; speed on Montford Avenue should be lowered since the average speed is 35 mph; traffic study on Montford Avenue by developer is misleading; housing should be integrated into the neighborhood and just concentrated in one area; don't corrupt the neighborhood and disturb the delicate balance of homes with more traffic and people who are not invested in the neighborhood; people invest a lot of money to renovate their homes and their re-sale value will be decreased due to the proximity of large single-family apartments; if there is no Montford access, then students will use other area streets to cut-through to get to Montford; there is documented loud noise calls in the past three years from a 24-unit apartment complex for students and this will be 150 units; there isn't guaranteed oversight for the project; Campus Advantage's website only shows 2-3 active properties under management; and need to look at the bigger picture of Broadway and Montford how they are intertwined:

Mr. Fred English
Mr. Gerald Green, Montford resident
Mr. Tim Schaller, Montford resident (Neighborhood Exhibit 1)
A 20-year resident of Montford
Mr. James Revels, Montford resident
Ms. Linda Palmer, Montford resident
Ms. Dee Eggers, Montford resident
Ms. Terry Walton, Montford resident
Ms. Mary Jo Brezny, Montford resident (Neighborhood Exhibit 2)
Ms. Constance Richards, Montford resident
Mr. Kerry Shackelford, Panola Street resident

423

Ms. Elizabeth Hunter, Panola Street resident
Ms. Rebecca Goldson, Montford resident

The following individuals spoke in support of the conditional use permit and/or offered additional conditions to the permit. Reasons for approval and additional conditions are as follows, but are not limited to: the project meets the need of the community; request the developer not grade right up to Zillicoa but leave the stand of mature trees; request the developer enhance the planting on Zillicoa to allow for a vegetation screen; request to eliminate access on Montford Avenue due to traffic concerns; adjoining business on Zillicoa has on-street parking and students will be tempted to use those spaces which will be detrimental to the business; request the developer to internalize the loop system to help protect parking on Zillicoa; encourage the developer to use features in the Reed Creek Greenway Plan regarding creative stormwater management opportunities; Campus Crest project, because of their interest in stormwater mitigation, can be a model that demonstrates how collaboration will produce solutions that balance the goals of all the stakeholders; and recommend Campus Crest meet the EPA's Revised Water Quality Standards:

Mr. Steve Buie, adjoining property owner
Ms. Billie Buie, adjoining property owner
Mr. Kevin Hogan, Pearson Drive resident
Ms. Megan Gordon, Montford resident

When Mr. Schaller began reading a letter that was someone handed to him regarding one of the partners of the Campus Crest project being under federal litigation by the Securities and Exchange Commission for fraud, Mr. Sneed objected. He asked Mr. Schaller if he knew of the contents of the letter of his own personal knowledge. Mr. Schaller replied no. City Attorney Oast questioned the relevance of the information. Mayor Worley sustained the objection. (Neighborhood Exhibit 1)

Ms. Brezny pointed out that the staff report submitted as City Exhibit 3 states that Mr. Barry Lowe is the applicant on the project and he is no longer associated with the project. She felt the entire process is null and void and should have to be re-reviewed. City Attorney Oast responded that the owner is still Highland Park, LLC, and is still behind the application. If Mr. Lowe signed as a representative, then he had the authority to sign on behalf of the owner. The fact that Mr. Lowe is no longer associated with the owner makes no difference.

Responding to Mr. Sneed, Mr. Peter said that Campus Crest manages 9 properties at 9 different colleges. He has been in student housing since 1985 and in March of 2003, Campus Advantage was incorporated. They now employ 150 employees. He pointed out that the rent cost includes a full telecom package, all utilities paid and each unit is fully-furnished.

Responding to Mr. Sneed, Mr. Hartnett said that over the past 2-1/2-3 years he has personally developed and been an owner of 3,000 beds at different universities. He and his construction partners personally guarantee the $11 Million construction loan and they would not do that without the proper due diligence and study of the market.

Upon inquiry of Councilman Newman, Mr. Hartnett said that the only coordination with the other universities is that the university will sometimes allow them a website on their off-campus student housing page. They have no interactive management relationship. Occasionally they get to market and advertise on campus.

Upon inquiry of Councilman Dunn, Mr. Hartnett said that he has been doing student housing for four years. Their properties are well-maintained and range from 95-100% leased with a waiting list.

Upon inquiry of Councilwoman Jones, Mr. Hartnett said that by industry standards this is a relatively small project. He personally likes to develop properties in the 300-450 bed range. It makes good economic sense and you can get a good sense of community there.

When Councilwoman Jones asked about the management team, Mr. Hartnett said that the management of student housing is a critical cog for the success of this project. He has used traditional apartment management people in the past, but student housing is different. The parents and students are your customer and resident lifestyle programming is essential. Campus Advantage was recommended to him by several people in the industry and he flew to Austin, Texas, to check their corporate headquarters and one of their sites. They do satisfaction surveys, the monitor students and parents frequently. They are very interactive on what is working and what isn't working. He was very impressed with their work and feels fortunate to have them as part of their team.

Councilwoman Jones asked about parking for the project. Mr. Hartnett said that their parking standard is one parking space per bed. The national average for student apartments is a one to one ratio. Most universities require freshmen to leave their cars at home and live on campus, but when they become sophomores, they want their car to have the freedom to drive. We think it's an advantage for us as a provider of housing to have one space per resident.

Councilman Newman asked if Mr. Hartnett if it was accurate that 64% of the students on campus have cars. Mr. Hartnett said that the reason that percentage may be low could be because they aren't places to park their car or the places that are available are cost prohibitive.

Councilman Newman asked if Mr. Hartnett would be willing to discuss the amount of parking in the project to minimize the impact. Mr. Hartnett felt that was a technical issue, but conceptually speaking they have discussed parking. We feel strongly that we would like to have one space per bed and enough parking spaces for staff. But, realizing the amount of impervious coverage that we are creating, we have revised our plan and when we go back before staff for final review, we have a number of pervious parking spaces. At the front end of the cars as they go into those pervious spaces, we have rain gardens. Those are some of the systems we are putting into place for the water quality feature.

Responding to Mr. Sneed, Mr. Peter said that if parking is cut, the students will go somewhere else to live if they want to keep their car. Ideally we tried to make accommodations for guests. Since there is always a flux when people go home for the weekend, it's rare that the parking lot is 100% full so we use those spaces for visitors. Our way to manage the use of the lot is through a parking permit process and we regularly tow non-residents.

At 7:15 p.m., Mayor Worley closed the public hearing and announced a short recess.

Mr. Anthony Butzek, the City's Traffic Engineer, explained the reasons why he is recommending keeping the connection on Montford Avenue. Montford Avenue is a collector street, and it is appropriate to provide such access for a residential development to a collector street than filtering through the local streets. We expect the three primary destinations for most people from the development to be UNC-A, downtown and I-26. He feels that 80% of the traffic will use Broadway and the Zillicoa access since Broadway has ample lanes, higher speeds, and is more of a direct route. We do expect there to be some destinations to the Montford area where people would be more likely to use Montford Avenue as that access. Closure of the Montford access would increase trip length somewhat for people destined to the Montford area from this development. They would have to cut through on some of the local streets to get back to the Montford area. The next concern would be the potential use of some of those local streets as cut-throughs. If the Montford access is not provided, there is a lot of potential in this area for cut-through traffic (City Exhibit 6). The nature thing for people to do is use Zillicoa Street to go up to

Montford Avenue. Again, we prefer people to use the collector street rather than use the local streets to make that connection to Montford. The Fire Department would like to have the access on Montford and they have indicated that a majority of their calls would use Montford Avenue opposed to Broadway. Having a gated access is a possibility, but it would increase their response time to have to unlock and re-lock the gates at each call. Access to a public street has been raised as a concern. Zillicoa Street is a private street and the City has no control over the fate of that street, so again, we would like to have this development have access to a public street, such as Montford Avenue. Staff has recommended that a special type of driveway be used on the Montford Avenue connection in order to ensure that it looks more like a driveway, whereas the entrance on Zillicoa would look more like a street, to further demonstrate that Zillicoa is the main access. He explained the "driveway link" concept (City Exhibit 7), referred to as the traffic calming measure, is not traffic calming for Montford Avenue, but it is an intent to discourage the use of the driveway, be less convenient, and to fit in better with the neighborhood.

Upon Vice-Mayor Mumpower of the traffic counts, Mr. Butzek said that the development was required to have a TIA and he has reviewed the results and concurs in general with those results (City Exhibit 8).

Upon inquiry of Councilman Davis, an audience member said that the Housing Authority said there are about 150 units with 400 residents in Klondyke Apartments.

When Vice-Mayor Mumpower asked about the speed limit on Montford Avenue, Mr. Butzek said that the posted speed limit is 30 mph, but the average speed limit is 35 mph.

Councilman Davis asked what the distance is between the two curb-cuts on Zillicoa and if we keep the Montford access do we need both curb-cuts on Zillicoa. Mr. Eller responded that the curb-cut distance is roughly 350-feet. One of the reasons we have both access points is because we don't physically have the room for a fire truck to turn around at the end.

Councilwoman Jones said that with or without this development there are several traffic concerns on Montford Avenue. Mr. Butzek said that there isn't anything currently proposed on Montford to slow traffic down. He did say that Montford certainly qualifies for a neighborhood traffic calming program. We have a significant backlog of streets needing traffic calming that we are working through. His long-term plan would certainly be to get some kind of traffic calming to mitigate on Montford from the Cullowhee to Hill Street. However, there are currently no plans to do that. The biggest challenge to do that now is allocating the amount of money that we have reserved for traffic calming. The Kenilworth Road project is going forward and subsequent to Kenilworth Road we would be looking at all of the priorities to determine which ones were most needing. Council can prioritize that list.

Mayor Worley said that the normal process for Council would be to first institute the neighborhood traffic calming process and if there is the support that meets our traffic calming criteria, then Council can choose to change whatever priorities we want to. Councilwoman Jones was satisfied to let the process move forward in the normal methods and that we are open to allocating those funds in addition to the traffic calming.

Councilwoman Jones confirmed that there was no traffic calming on Montford to go along with this project. Mr. Butzek replied that there is not, but one of the TRC comments was to keep in mind the possibility of traffic calming on Montford Avenue. The final determination was that the traffic impact of this development may not justify this developer being responsible for those costs, but that is certainly a possibility if Council wishes.

Upon inquiry of Vice-Mayor Mumpower of what might be proposed for traffic calming, Mr. Butzek said that he would need to get a lot of neighborhood input. He has heard they don't want speed humps but something that looks better. Beyond that he doesn't know what the neighborhood's will is as far as what Montford Avenue should look like. Montford Avenue also falls into the Historic Resources Commission's jurisdiction and that adds another element of consideration. He does not have an idea of how much the traffic calming on Montford would cost.

Councilman Dunn felt that since the project has yet to be built we have some time to address traffic calming on Montford Avenue.

Upon inquiry of Councilman Newman, Mr. Butzek explained that the 80/20 split for vehicles using Zillicoa vs. Montford certainly contains some subjectivity and there is a margin for error, however, he feels it is a reasonable assumption.

Councilman Newman suggested there be one-way ingress into the development from Montford Avenue, which could be used for emergencies. Theoretically it could cut the traffic on Montford by 50%. Mr. Butzek's most significant concern is the enforcement issue because there is very little way to control that short section of driveway if someone goes the wrong way. He doesn't think it creates a dangerous situation, however, he would not recommend it since enforcement is virtually impossible.

When Councilman Davis asked if the ingress of the driveway could be constructed to make it difficult to exit and hard to make any left turns, Mr. Butzek wasn't able to think of any design pattern for that at this time.

Mr. Sneed questioned if there were no road into Montford from this project, would it be illegal, or is the road just a matter of preference. Mr. Butzek couldn't respond for certain, however, he didn't know of anything illegal about it. The two issues raised by the Building Safety Department was the need to connect to a public street as opposed to a private connection and the need to have two connections. He believed that since the buildings are sprinklered, the two connections are not necessary. He could not respond to whether just connecting to a private street is adequate.

Upon inquiry of Councilman Newman about a shuttle bus, Mr. Butzek said that the traffic study recommended that the developer consider, due to the high percentage of trips will be destined for UNC-A, developing some sort of shuttle system. That is a good recommendation and might reduce the need for residents to have cars. We have not recommended that be a requirement for the project.

Councilman Newman asked if the City performs an analysis of cumulative developments near one another, since projects individually may not produce much traffic, but collectively they could make a big difference in traffic. Mr. Butzek replied no. However, City Engineer Cathy Ball said that anytime a project is considered, we look at the projects that have occurred in the past. For instance, if this project is approved, a developer would have to consider the traffic from this project in looking at the evaluation of the next project. Also, we are looking at Montford Avenue in the in the north area to see what improvements can be made in that area to help with traffic flow as well. We are trying to cumulatively look at the problems and each project has to consider the impact of another project.

Ms. Ball recommended that instead of making a decision on traffic calming on Montford at this meeting, that staff come back at the next worksession and bring Council a comprehensive overview of what is going on with traffic calming, where the priorities lists are and then let Council make that decision at that point in time.

Councilman Newman felt that traffic calming is an important issue, but he thinks that the shuttle bus concept, and things like that actually need to be explored in a much more meaningful specific way. We are dealing with a big student housing development and there are going to be a meaningful percentage of students who don't have cars. UNC-A is already doing some things to partner with the City around transit. We can slow traffic down, but part of the goal needs to be to lower the number of cars and give people some viable transportation choices. There are things that the City can potentially do to help be part of that solution.

Vice-Mayor Mumpower asked if it is possible to maintain access and decrease convenience at the Montford access. Mr. Butzek said that the developer is already proposing speed bumps throughout their development and we can certainly look at that and see if there are opportunities at that particular location to make sure that we are inconveniencing it as much as possible within reason.

When Vice-Mayor Mumpower asked about the buffering on Zillicoa, Ms. Hamel said that our ordinance requires only street trees, however, the developer has been very willing to explore options. If the neighborhood wants additional buffering, the developer seems very open to being able to provide that. Council may wish to add that as a condition to the project, if Council should choose to approve it.

Upon inquiry of Vice-Mayor Mumpower regarding noise, Ms. Hamel said that the City has a noise ordinance. Mr. Hartnett said that they address the noise issue in the way we manage the property. Mr. Peter also said that noise is addressed by the on-site staff and there are reasonable limits that are acceptable.

Upon inquiry of Councilman Davis, Mr. Peter said that in addition to the residence life staff there is typically 7 or 8 full-time employees, e.g., a general manager, bookkeeper, receptionist, maintenance chief, and assistant maintenance chief, who will almost all be hired locally.

When Councilman Davis asked about on-site security provisions, Mr. Peter said that the safety provisions in place involve the front-desk being open from 8:00 a.m. – 10:00 p.m. every day, an RA on-call and another RA on-duty that do regular rounds and note problems on their logs. The logs then go to the general manager. On weekends or during special events we have a budget for additional either off-duty police officers, where allowed, or private security firms.

Upon inquiry of Councilman Davis, Mr. Peter described the outdoor sports court and the amenities inside the clubhouse.

At the request of Councilman Dunn, Mr. Peter reviewed the disciplinary process. He said they do allow each general manager on-site a degree of discretion. If there is a violation write-up, a meeting is scheduled for the resident, along with letters sent to the resident and the guarantor. It depends on the circumstances, but if we had 2 or 3 noise violations from the room, we would begin the eviction process because that affects our ability to market and lease this property. In the lease there is language that addresses violations of the rules and regulations. Additionally, each student is given a student handbook when they move in that spells out the specifics, which they have to sign and which is then incorporated into the lease itself.

Upon inquiry of Vice-Mayor Mumpower, Mr. Peter said that the leases can be year-round, not just by semester.

Councilman Davis asked about provisions for married students and children. Mr. Peter said that because of the structure of the units there is not a single property that has a family. A family could rent at a multi-family development much cheaper and satisfy the needs that they have for children.

Councilwoman Jones said that since each RA has to hold one social and one education event, could they possibly hold one community service event once a semester to further build a relationship with the neighborhood. Mr. Peter said that they would be open to that, however, it is all dependent upon participation. We occasionally have an event, like cleaning up the streets, where the RA's are participating but none of the residents.

Upon inquiry of Councilman Dunn, Mr. Peter said that if they have a student that is no longer enrolled in school and they had violations, they would be evicted.

When Vice-Mayor Mumpower asked about the buffering along Zillicoa, Mr. Eller said that if they could re-route the sidewalk through the trees, they could potentially save at least a 10-15 foot buffer along the upper portion of Zillicoa that directly abuts the Buie property. Mr. Shuford recommended the following condition: "A landscape buffer containing the equivalent landscape material as a Type-D buffer should be provided along the Zillicoa Street frontage; in addition, on-site tree retention shall be in accordance with the master plan provided by the developer." (City Exhibit 9)

Mayor Worley asked if sidewalks can meander through trees as opposed to being constructed right on the road. Mr. Butzek said that is a good suggestion as there is no rule that says sidewalks have to go in a straight line.

Mr. Eller said that it will be challenging to get the Type-D buffer sidewalk because of the topography.

Councilman Newman felt there were too many parking spaces in the project. We might be able to solve the problem of buffering on Zillicoa by eliminating some of the parking in that area.

When Councilman Newman asked about the noise ordinance, City Attorney Oast explained the noise ordinance. He said the first person we look to is the person actually making the noise and if we don't get satisfaction that way, we then look to the property owner. Violations escalate per offense from $50 for the first violation up to $300 for the fourth and subsequent violations.

Councilman Newman asked if we can tailor some specific noise standards to this project and make it part of the conditional use permit, since it is a unique project having this many students in one place. That way, the owner has a good incentive to not have noise ordinance complaints in the first place. City Attorney Oast said that he would have to research that if Council directs him. Under our current noise ordinance, which is pretty effective, our difficulty is with enforcement. The more special requirements you put on a project, the more difficult it will be to enforce. Another issue Council may encounter is that if you base it only on calls received, you may have a problem substantiating the calls. City Manager Westbrook felt it might be best to see what happens in retrospect since we are dealing with the unknown. That may pose more of a penalty than necessary.

Councilwoman Bellamy was concerned if we could defend the ordinance if challenged if we have a $1,500 penalty for one project and a $300 penalty for everyone else. City Attorney Oast said that we might have a problem with that. One thing we could do is monitor the situation for a year after the project is opened and re-visit it to see if any additional measures are necessary.

Councilman Newman said another way might be to look at the noise ordinance as a whole and see if there might need for an amendment to address the kind of situation if there is a chronic violator - there may need to be a different penalty structure.

Mr. Peter stated that if the fines are $300 per incident that is a very sufficient monetary motivation for us to curb what would be any noise problems.

Vice-Mayor Mumpower suggested we bring back the noise ordinance for review at a future worksession since it was last amended in 2000.

Upon inquiry of Councilwoman Bellamy regarding security, Mr. Peter said that they do not currently provide free room and board for police officers with their police cars, but that is an option they can look at.

Councilman Davis felt that there is a good management team in place, but he wasn't sure there was an adequate number of Ra's.

Councilwoman Bellamy wanted to be sure the 80-foot buffer would remain on Montford. Mr. Shuford suggested Council adopt the following condition: "A landscape buffer containing the equivalent landscape material as a Type-A buffer should be provided along the Montford Avenue frontage; in addition, on-site tree retention shall be in accordance with the master plan provided by the developer." We feel that is the most we can get equivalent landscaping material in and still be able to accommodate a meandering sidewalk. (City Exhibit 9)

Councilwoman Jones suggested a condition that the project shall be continuously managed by a professional management firm similar to the one presented tonight be added to the permit, if approved.

Councilman Newman said that this is a project he wants to say yes to, however, an outstanding issue is that we have to manage the traffic. He felt there are some creative things we can do in partnership with UNC-A and the transit system to create some alternatives to take the edge off some of the traffic impacts in the neighborhoods. Therefore, Councilman Newman moved to continue this matter for one month in order to have conversations with UNC-A's transportation planner, the developers, City staff (including the Transit Department) to see if there are any ideas that could be viable to help reduce the traffic impacts associated with this project. This motion was seconded by Councilwoman Jones.

Councilman Davis said that since this is not sanctioned by UNC-A he was unsure that they would come to the table providing transportation solutions. Also, considering the available parking at UNC-A, students will be discouraged from driving over there every time they have a class. He felt this is a very walkable area and there will be bicycle use. From a transportation standpoint, he felt our Transit Commission could work with UNC-A on a shuttle bus system, but these are unknowns at this time and can't probably be solved in one month.

Councilman Newman understands that we won't be able to come up with solutions to solve all of our transportation problems, but his concern is that if we approve the project as proposed tonight, there won't be a lot of incentive for people to sit down and talk. UNC-A is making plans to grow in our community and we should be supportive of that. But, if they are going to grow, then with projects of this intensity and scale, we need to be talking about ways to manage some of the adverse traffic impacts of the growth as it happens.

Mr. Sneed said that if the project is delayed one month, because of marketing, building the project and being ready for school opening, it is essentially put off for a one year.

Mayor Worley agreed with Councilman Newman about the transportation issues. He said we have been working with UNC-A to provide improved transit. That partnership could be expanded and ideally if we could find some sort of funding source, either from UNC-A or the City or in combination, to perhaps expand the frequency of the bus routes. But that partnership is, and should be, with UNC-A, not with this apartment complex or any apartment complex. We are trying to reach out to provide a public service at the private sector level and he thinks we are over-reaching.

Councilman Newman agreed it's not the developer's problem, but if we are going to find solutions that are going to work, it's going to take UNC-A, the City and the private sector creating the incentives to encourage people to use alternatives. He felt all the partners are necessary to maximize the opportunities.

Upon inquiry of Councilwoman Bellamy, Ms. Hamel said that the minimum number of parking spaces, based on the number of units, is 294 spaces and the maximum parking spaces allowed is 448 spaces. The developer is actually 14 spaces over the maximum. Mr. Hartnett said that they are asking for one space per resident and enough parking for staff. He said they have 48 parking spaces that are pervious spaces that they were not required to provide, but they did that to work on stormwater management. He said that they would be willing to reduce their parking spaces to 448 realizing that 48 of those are pervious.

Councilman Newman would prefer to see the reduction of parking spaces less than 448. Again, he wants to create some real alternatives and incentives for students so they will not bring their car. Another consideration for him is the footprint/scale of the project. He said the main footprint is not the buildings, but the parking lot. If we reduced parking spaces, it would at least allow us to have more buffering on Zillicoa. Mr. Hartnett responded that unit density on this property is less an 10-units per acre, which by multi-family standards is quite low. If we were developing the number of units that we could, by right, we probably would end up having that number of parking spaces. He is confident that they will have a shuttle bus agreement, but cannot confirm that right now. He did note, however, that there is a shuttle bus turn-around near the clubhouse.

Vice-Mayor Mumpower felt that dropping the parking spaces down to the maximum makes sense. He was, however, concerned that Council is discussing policy matters and applying them to the project. He was comfortable with providing some opportunity for dialogue and moving forward.

Upon inquiry of Councilwoman Bellamy, Mr. Shuford said that the previous suggested condition does allow for buffering on Zillicoa. However, there is a row of about 22 parking spaces near Zillicoa and if that row were deleted, you could have an additional 18-feet to add to the Zillicoa buffer area. He did note that the Zillicoa side is the non-residential side, whereas, Klondyke is residential so it is more appropriate for there to be a bigger buffer in that area.

Councilwoman Bellamy asked if we can add a condition to the permit to create dialogue with UNC-A's transportation planner, the developers, City staff (including the Transit Department) to see if there are any ideas that could be viable to help reduce the traffic impacts associated with this project. She said the City can't make UNC-A come to the table, but with this condition on the permit, the developers have to come to the table.

The motion made by Councilman Newman and seconded by Councilwoman Jones to continue the this matter for one month in order to have conversations with UNC-A's transportation planner, the developers, City staff (including the Transit Department) to see if there are any ideas that could be viable to help reduce the traffic impacts associated with this project failed on a 2-5 vote, with Councilwoman Jones and Councilman Newman voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilwoman Bellamy, Councilman Davis and Councilman Dunn voting "no."

Councilman Davis moved for the adoption of Ordinance No. 3253, granting a conditional use permit for property located between Zillicoa Road and Montford Avenue, identified as Campus Crest at Asheville, to construct a 152-unit apartment complex, subject to the following conditions:

1. Technical Review Committee, Planning & Zoning Commission (as stated in the manner by City staff) and City staff recommendations be met.
2. No fee in lieu of sidewalks be permitted.
3. A crosswalk crossing Zillicoa shall be added at Broadway. Material shall be white thermoplastic meeting NCDOT standards. Both crosswalks crossing Broadway shall be upgraded to high-visibility type crossings. Markings may be ladder-style or piano-key style, similar to City markings in the downtown area. Material shall be white thermoplastic meeting NCDOT standards.
4. A transit pad shall be provided at the intersection of Broadway & Zillicoa to provide for potential future service along Broadway. The pad shall be concrete, 13' long x 8' wide, with cross-section meeting the City's sidewalk specifications. The pad shall be attached to, but shall not overlap, the sidewalk. Location shall be in the south corner of the intersection along Broadway, or other location approved by staff.
5. All site lighting shall be equipped with 90-degree cut-off fixtures and oriented away from surrounding properties; a lighting plan shall be implemented to minimize light trespass.
6. The developer shall continue working with staff to ensure that the proposed structures are architecturally compatible with the surrounding neighborhood.
7. Eliminate one of the Zillicoa Drive entrances, but only if compliant with State Fire Regulations; this included meeting and working with the Fire Marshal on this issue.
8. Best Management Practices (BMP's) shall be utilized to address water quality issues; at a minimum, the updated EPA water quality standards shall be met, along with any conditions imposed by the Asheville City Engineering office.
9 The developer shall work with city staff and other independent groups to address water quality issues in the design and monitoring of stormwater run-off infrastructure.
10. The maximum number of parking spaces shall be 448 of which 48 spaces to be pervious paving.
11. The dumpster should be relocated to an internal location within the site to reduce its impact on neighboring properties and discourage traffic from proceeding onto Montford Avenue.
12. All buildings must comply with the Institutional District height standards.
13. The developer is required to contact the Corps of Engineers office to determine appropriate permits required for developing over a tributary stream. Any permits required, are to be obtained prior to the issuance of the zoning permit.
14. A sidewalk connection along Zillicoa to Broadway shall be provided in a location approved by staff.
15. The driveway access on Montford Avenue be a one-way ingress only and shall be constructed with traffic calming elements as required by the City's Traffic Engineer.
16. That the developer shall participate in dialogue with City staff, including the Transit Services Department staff, the Transit Commission and invite UNC-A to participate to discuss the possibilities that exist to help reduce the traffic impacts associated with this project.
17. A landscape buffer containing the equivalent landscape material as a Type-A buffer should be provided along the Montford Avenue frontage; in addition, on-site tree retention shall be in accordance with the master plan provided by the developer.
18. A landscape buffer containing the equivalent landscape material as a Type-B buffer should be provided along the Zillicoa Street frontage; in addition, on-site tree retention shall be in accordance with the master plan provided by the developer.
19. The project shall be continuously managed by a professional management firm at the same level of on-site staffing as presented during this public hearing; to this end, any

change of management company from Campus Advantage shall require prior approval from the City which shall not be unreasonably withheld.

This motion was seconded by Councilwoman Bellamy.

Councilman Dunn asked if, after the dialogue, City staff recommends an action be taken is the developer required to comply with that action. Councilman Davis said the condition only requires dialogue, however, the developer is already making provisions for a shuttle turn-around.

Councilman Newman moved to amend the motion to reduce the amount of parking (448 spaces) in the project by 15%, with the option that once the project is built out, they would have the option of potentially building out the rest of the parking if it becomes apparent that there is a need for it. This motion was seconded by Councilwoman Jones and failed on a 2-5 vote, with a 2-5 vote, with Councilwoman Jones and Councilman Newman voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilwoman Bellamy, Councilman Davis and Councilman Dunn voting "no."

The original motion made by Councilman Davis and seconded by Councilwoman Bellamy carried on a 5-2 vote with Mayor Worley, Vice-Mayor Mumpower, Councilwoman Bellamy, Councilman Davis and Councilman Dunn voting "yes" and Councilwoman Jones and Councilman Newman voting "no."

Councilwoman Jones hoped that the Montford neighborhood will be contacted so that they can be present to hear the dialogue regarding transit issues. She also hoped that if we have surplus in the past fiscal year, that Council be willing to considered investing that in the Montford neighborhood, so that we can invest in some infrastructure now so that some quality of life can be improved.

ORDINANCE BOOK NO. 21 – PAGE 294

C. PUBLIC HEARING TO AMEND THE 2004 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

RESOLUTION NO. 04-178 - RESOLUTION AMENDING THE 2004 CONSOLIDATED COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

Mayor Worley opened the public hearing at 9:42 p.m.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution approving an amendment to the 2004 Annual Action Plan in order to allocate new funds for American Dream Downpayment Initiative (ADDI) activities. This public hearing was advertised on August 13, 2004.

On April 13, 2004, Asheville City Council approved the 2004 Annual Action Plan for the CDBG and HOME program funds. The plan indicated the need for future amendment in order to allocate an expected additional award of $161,843 in HOME funds for the ADDI Program. These funds can be used solely for downpayment assistance to first-time homebuyers, with special emphasis on public housing, Section 8, and mobile home park tenants.

Staff requested proposals from outside agencies, including non-profits, public housing agencies, and banks, to implement the ADDI program. Three proposals were received. On August 4, 2004, the Asheville Regional Housing Consortium Board of Directors reviewed the proposals and recommended the following allocations:

1. $30,000 awarded to the Housing Assistance Corporation for Transylvania County.
2. $131,843 awarded to Neighborhood Housing Services of Asheville, Inc., for Buncombe and Madison Counties; with at least $30,000 reserved for public housing and Section 8 tenants referred by the Housing Authority of the City of Asheville.

A public hearing is required and has been advertised for the August 24 2004, Council meeting.

Pro: Adoption of the Amendment will allow the Consortium to expend the funds for downpayment assistance in Buncombe, Madison and Transylvania Counties.

Con: None

Community Development staff and the Consortium Board recommend adoption of the resolution approving an amendment to the 2004 Annual Action Plan in order to allocate new funds for American Dream Downpayment Initiative (ADDI) activities.

Mayor Worley closed the public hearing at 9:45 p.m.

Mayor Worley said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Bellamy moved for the adoption of Resolution No. 04-178. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 336

At 9:46 p.m., Mayor Worley announced a short recess.

D. PUBLIC HEARING TO CONSIDER A REQUEST TO APPLY THE MONTFORD AREA LOCAL HISTORIC DISTRICT OVERLAY TO A SPLIT ZONED PARCEL ZONED RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT LOCATED AT 240 PEARSON DRIVE

ORDINANCE NO. 3154 - AN ORDINANCE TO APPLY THE MONTFORD AREA LOCAL HISTORIC DISTRICT OVERLAY TO A SPLIT ZONED PARCEL ZONED RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT LOCATED AT 240 PEARSON DRIVE

Mayor Worley opened the public hearing at 9:55 p.m.

Historic Resources Director Stacy Merten said that this is the consideration of an ordinance to apply the Montford Area Local Historic District Overlay to a split-zoned parcel zoned RM-8 Residential Multi-Family Medium Density District located at 240 Pearson Drive. This public hearing was advertised on August 13 and 20, 2004.

The 2025 Plan calls for the continued effort for the preservation, enhancement, and management of change within local historic districts. The proposed zoning change will continue to protect the integrity of the historic district while allowing for new development on a relatively large parcel which has recently been further subdivided.

The property under consideration was the original site of the structure known as the Dr. Marion C. Millender House. Dr. Millender was a beloved Asheville physician, who lived there to the age of 104. The house was designed by Asheville architect Wm. Henry Lord for Dr. Millender and his wife Mary Mebane White Millender. Complete in 1907, it is one of the largest residences in Montford and is built in the Shingle style. The two-acre parcel was owned by a member of the Millender family from 1902 until 1969. The Montford Area historic district boundary split the parcel with the line running diagonally in a northwest/southeasterly orientation.

The original 2-acre parcel was recently subdivided in June, 2004. All of the new lots are also split, with a portion of each falling within the current historic district boundary. It appears that a mapping error was made at the time of the original designation as it is customary for historic district boundary lines to follow legally recorded property lines, especially in urban areas.

The applicant, Jim Samsel, wishes to preserve the context of the Millender house as well as the integrity of the district at the edge, now that the original lot has been subdivided. The amendment would also clear up any ambiguity regarding design review for new construction.

Pros: The amendment will clear up any ambiguity as to what portion of any new development would be subject to design review.

Cons: Any new construction will be subject to design review, which will lengthen the review process and increase the cost of construction.

The overlay amendment has been reviewed by the Historic Resources Commission and they recommended unanimously in favor of the amendment. Staff concurs with the applicant's concerns and also recommends in favor of the zoning amendment to extend the boundary of the Montford area local historic district overlay. City staff recommends approval as well.

Ms. Marcia Davis, Tacoma Street resident, urged City Council to support the Montford Historic District Overlay request.

Mayor Worley closed the public hearing at 9:57 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Bellamy moved for the adoption of Ordinance No. 3154. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 302

E. **PUBLIC HEARING TO CONSIDER THE REZONING OF A PORTION OF PROPERTY LOCATED AT 86 CRAYTON ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT**

ORDINANCE NO. 3155 - AN ORDINANCE TO REZONE A PORTION OF PROPERTY LOCATED AT 86 CRAYTON ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Worley opened the public hearing at 9:58 p.m.

Urban Planner Kim Hamel said that this is the consideration of an ordinance to rezone a portion of property located at 86 Crayton Road from Commercial Industrial District to RS-8 Residential Single-Family High Density District. This public hearing was advertised on August 13 and 20, 2004.

Although not specific to the immediate neighborhood, the Future Land Use and Transportation Plan of the 2025 Asheville City Development Plan identifies the intersection of Sweeten Creek Road and Interstate 40 as the dividing point between a Urban/Neighborhood Corridor to the north and a Gateway Corridor to the south. The Sustainable Economic Development Strategic Plan identifies a shortage of industrial zoned properties as one of its top priority issues to be addressed in our area.

Rezoning of a 23.5-acre lot from CI to HB in 2003. The lot is located off of Crayton Road, west of the site, on the opposite side of the railroad right of way.

The subject site is located off of Crayton Road on approximately 4.97 acres. The lot is currently vacant and is split zoned RS-8 (in the front and rear sections of the lot) and CI (located within the center of the lot). Surrounding land uses and zoning include single family residential uses to the north and east zoned RS-8; residential and vacant commercial property zoned Highway Business (HB) and RS-8 located west of the site (with the Highway Business (HB) lot located across a railroad right-of-way); and commercial and residential property zoned Commercial Industrial (CI) and RS-8 to the south.

The subject site is located in a densely developed single-family neighborhood in the Oakley area of East Asheville. The site is accessed from Liberty Street off of Fairview Road, which turns into Crayton Road. Just south of the site a road barrier has been placed across Crayton Road to prevent commercial traffic from entering the residential neighborhood. This came as a request from the community as part of the new I-40 exit at Sweeten Creek. The two commercial lots along the west and south sides of the property are on the south side of the barrier on Crayton Road and are accessed via Sweeten Creek Road.

On July 19, 2004, the Verdi Group received approval from the Technical Review Committee to pursue an 8 lot single-family subdivision on the RS-8 portion of the lot that abuts Crayton Road. The applicant wishes to pursue the rezoning on the Commercial Industrial (CI) portion of the lot to RS-8 in order to continue the same type of single-family development on the remaining portions of the lot. Under the current Commercial Industrial (CI) zoning, single-family dwelling are not permitted.

Pro's:

- Rezoning the split-zoned parcel to RS-8 will provide consistency in the design of the proposed single-family development.
- Rezoning the CI portion of the lot to RS-8 will inhibit the potential of a high impact use being developed adjacent to an established residential area.
- The rezoning of the lot will be keeping in character with established RS-8 zoning north and east of the site.

Con's

- The 2025 plan and Economic Development Strategic Plan stresses concern over losing valuable industrial zoned property. Staff, has however, discussed this application with the Economic Development Director who has no concerns over the proposed rezoning.

Rezoning the CI portion of this property to RS-8 would provide the applicant an opportunity to construct a single-family development (that may include several affordable-housing units) consistent with the subdivision approved by the Technical Review Committee in July 2004. In consideration of the above and the relationship to the adjoining zoning and land uses in the area surrounding site the proposed zoning change appears to be consistent with the intent and purpose of the UDO.

On August 4, 2004, the Planning and Zoning Commission made a unanimous vote to approve the rezoning as requested. City staff recommends approval as well.

Mr. Gerald Green, representing the developer, spoke in support of the rezoning.

Mayor Worley closed the public hearing at 10:02 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3155. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 304

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR PUBLIC SAFETY PLANS FOR CERTAIN TEMPORARY USES

Councilman Dunn moved to continued this public hearing until September, 14, 2004, in order to give staff time to research concerns raised at the August 17, 2004, worksession. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

G. PUBLIC HEARING TO CONSIDER TECHNICAL AMENDMENTS AND CLARIFICATIONS TO THE UNIFIED DEVELOPMENT ORDINANCE

ORDINANCE NO. 3156 - AN ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO CONSIDER TECHNICAL AMENDMENTS AND CLARIFICATIONS

ORDINANCE NO. 3157 - AN ORDINANCE AMENDING SECTION 7-8-21 (B) AND SECTION 7-8-22 (B) TO CHANGE THE WORD "CHURCHES" TO "PLACES OF WORSHIP"

Mayor Worley opened the public hearing at 10:03 p.m.

Mr. Joe Heard, Director of Development Services with the Planning & Development Department said that this is the consideration of an ordinance to amend the Unified Development Ordinance for the purposes of filling in missing information, correcting mistakes, resolving discrepancies and clarifying the ordinance. This public hearing was advertised on August 13 and 20, 2004.

Working with the Unified Development Ordinance (UDO) on a daily basis, the Planning & Development staff has noted a number of instances where the ordinance contains discrepancies, is incomplete, or needs clarification. Staff has compiled a list of these issues and proposes the following amendments to correct these situations and make the UDO a clearer document for staff and public use. The proposed amendments deal with a variety of issues throughout the ordinance.

Pros –

- The UDO will be more easily understood and interpreted by staff and the public.
- The intent of the ordinance will be made clearer and less subject to legal challenge.

Con –
- None.

The Planning and Zoning Commission recommended approval of these code amendments on August 4, 2004, by a unanimous vote of 6-0. City staff recommends approval of the proposed code amendments.

City staff recommends approval of the proposed code amendments to the Unified Development Ordinance for the purposes of filling in missing information, correcting mistakes, resolving discrepancies, and clarifying the ordinance.

Mayor Worley closed the public hearing at 10:06 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinances and they would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3156, with the deletion of Section 7-8-21 (b) and Section 7-8-22 (b). This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 306

Councilwoman Bellamy was disappointed that in our ordinances we are moving away from using the word "churches." She feels the words "places of worship" is exclusionary.

When Vice-Mayor Mumpower questioned if both the word "church" and "places of worship" could be used, City Attorney Oast requested time within which to research the question.

After a brief discussion, Councilman Newman moved for the adoption of Ordinance No. 3157, amending the following sections: (1) Section 7-8-21(b) is amended by changing "Churches" to "Places of Worship"; and (2) Section 7-8-22 (b) is amended by placing "Places of Worship" under the "Institutional" use category, rather than "Office/business". This motion was seconded by Councilman Davis and carried on a 4-3 vote, with Mayor Worley, Councilman Davis, Councilwoman Jones and Councilman Newman voting "yes" and Vice-Mayor Mumpower, Councilwoman Bellamy and Councilman Dunn voting "no."

City Attorney Oast said that since the ordinance passed on a 4-3 vote, it will require a second reading which will be held on September 14, 2004.

ORDINANCE BOOK NO. 21 – PAGE 312

IV. UNFINISHED BUSINESS:

V. NEW BUSINESS:

A. RESOLUTION NO. 04-179 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH BAY AREA ECONOMICS FOR A HOUSING NEEDS ASSESSMENT AND MARKET STUDY FOR THE ASHEVILLE REGIONAL HOUSING CONSORTIUM AREA

Community Development Director Charlotte Caplan said that this is the consideration of a resolution authorizing the City Manager to enter into a contract for $50,000 with the Bay Area

Economics for a Housing Needs Assessment and Market Study for the Asheville Regional Housing Consortium Area.

In May 2005, the City must submit to HUD a Five Year Strategic Consolidated Plan for the CDBG and HOME programs, covering the period 2005-2010. A required part of this plan is a detailed Housing Needs Assessment and Market Study covering the four counties that make up the Consortium area: Buncombe, Henderson, Madison and Transylvania.

Under the direction of the Consortium Board, staff issued a request for proposals for this study in June 2004, evaluated the proposals, and negotiated a price with the consultant submitting the most responsive proposal. The proposal recommended by the Consortium Board is Bay Area Economics, a woman-owned company in Silver Spring, Maryland, which will complete the required work for a fixed price of $50,000. No local or minority-owned firms submitted proposals.

Funding for the contract has already been budgeted in the HOME Fund, under Member Government Administration.

Advantages:

- The firm is well qualified to carry out this work
- The price is within the range estimated by the Consortium Board
- Approval of the contract will ensure that the study is completed in time to use it in preparing the Strategic Plan later this year.

Disadvantages: None

City staff recommends City Council authorize the City Manager to enter into a contract with Bay Area Economics, in the amount of $50,000, for a Housing Needs Assessment and Market Study for the Asheville Regional Housing Consortium Area.

Councilwoman Jones spoke in support of the resolution and the Housing Needs Assessment and Market Study.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it will not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-179. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 337

B. RESOLUTION NO. 04-180 - RESOLUTION APPOINTING A MEMBER TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Mumpower said that this is the consideration of a resolution appointing a member to the Planning & Zoning Commission.

Sharon Bell has resigned as a member of the Planning & Zoning Commission, thus leaving a vacancy on the Commission until August 14, 2005.

At the City Council worksession on August 17, 2004, City Council instructed the City Clerk to arrange interviews for David Brown and Eric Zetterholm. Cindy Weeks is a candidate, however, it was not necessary to bring her in for an interview.

After Council spoke about the high qualifications of each candidate, David Brown received no votes; Eric Zetterholm received 2 votes; and Cindy Weeks received 5 votes. Therefore, Cindy Weeks was appointed as a member of the Planning & Zoning Commission, to serve the unexpired term of Ms. Bell, term to expire August 14, 2005, or until her successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 338

C. RESOLUTION NO. 04-181 - RESOLUTION APPOINTING MEMBERS TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Summary: The terms of Ed Metz, Marvin Slosman, Gail McCarthy, Ken Fulford, Hunt Mallett, Laura Webb and Robert Camille, as members of the River District Design Review Committee, expire September 1, 2004.

At City Council's worksession on August 17, 2004, City Council instructed the City Clerk to prepare the proper paperwork to (1) appoint Richard T. Hall (one of two members of RiverLink Board of Directors); (2) reappoint Ken Fulford (one of two design professionals); (3) reappoint Hunt Mallett (one of two owners of property located within the River District); and (4) appoint Jane Mathews (one of the two design professionals). All terms are to expire on September 1, 2007, or until their successors have been appointed.

At the City Council worksession on August 17, 2004, City Council instructed the City Clerk to arrange interviews for Kimberly Campton and Maureen Grozier (at large member).

At the City Council worksession on August 17, 2004, City Council instructed the City Clerk to re-advertise for the vacancy of an owner of property within the River District and the member of the RiverLink Board of Directors.

After Council spoke about the high qualifications of each candidate, Maureen Grozier was appointed, as the at-large member of the River District Design Review Committee, to serve a three year term, term to expire September 1, 2007, or until her successor has been appointed. In addition, Council (1) appointed Richard T. Hall (one of two members of RiverLink Board of Directors); (2) reappointed Ken Fulford (one of two design professionals); (3) reappointed Hunt Mallett (one of two owners of property located within the River District); and (4) appointed Jane Mathews (one of the two design professionals). All terms are to expire on September 1, 2007, or until their successors have been appointed.

RESOLUTION BOOK NO. 28 – PAGE 339

D. RESOLUTION NO. 04-182 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Summary: The term of Victor Trantham, as a member on the Buncombe County Tourism Development Authority, expires August 30, 2004. In addition, Mr. Chris Cavanaugh has resigned, thus leaving an unexpired term until August 30, 2005.

At the City Council worksession on August 17, 2004, City Council instructed the City Clerk to arrange interviews for Victor Trantham and Ripley Hotch to fill the vacancy for the owner/operator of hotel, motel or other taxable tourist accommodation with 100 or fewer rental units.

At the City Council worksession on August 17, 2004, it was the consensus of City Council to re-advertise for the vacancy for the individual who is involved in the tourist business but who does not own or operate a hotel, motel or other taxable tourist accommodation.

After Council spoke about the high qualifications of each candidate, Victor Trantham was reappointed to the Buncombe County Tourism Development Authority to fill the vacancy of the owner/operator of hotel, motel or other taxable tourist accommodation with 100 or fewer rental units, to serve an additional three year term, term to expire August 30, 2007, or until his successor has been appointed.

RESOLUTION BOOK NO. 28 – PAGE 340

VI. OTHER BUSINESS:

CLAIMS

The following claims were received by the City of Asheville during the period of July 30-August 12, 2004: Cherokee Road (Fire), Laurie Fisher (Sanitation), Glenn A. Temple (Sanitation), Jamie Jones (Police), Louise Shade (Streets) and N.C. Dept. of Admin. (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Mike Fryar related to Council a problem that he encountered with the Asheville Police Department regarding a stolen vehicle. City Manager Westbrook said that Mr. Fryar's concern is an administrative issue and he is in the process of working on it.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 10:23 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – August 31, 2004
East Asheville Community Center
906 Tunnel Road, Asheville, N.C.

7:00 p.m. – Community Meeting

Present: Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy; Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Attorney Robert W. Oast Jr.; City Manager James L. Westbrook Jr.; and City Clerk Magdalen Burleson

Absent: None

The following topics/concerns were raised by residents and addressed by City Council and City staff: need for traffic calming on Avon Road due to cut-through traffic, excessive speeding, and additional traffic; request for trash cans to be placed in an upright position after collection; increase in cut-through traffic in Redwood Forest community; large trucks leaving Super Wal-Mart site deposit mud on Swannanoa River Road and when it rains, the road is slick; re-seeding in areas on Super Wal-Mart site have not taken place; need for strict City enforcement of conditional use permit standards on Super Wal-Mart site; request for City to use eminent domain process on one property owner on New Haw Creek Road in order to obtain easement for sidewalks in that area; any improvements on Fairview Road resulting from Super Wal-Mart project, e.g., sidewalks or overhead lighting; any anticipated changes to the Police Resource Center in Oakley; request for traffic calming in Oakley community; sidewalk at the intersection of U.S. 70 and Riceville Road needs to be cleaned up; request to make Haw Creek more pedestrian friendly; concern that women are not being hired by the City in non-traditional positions; request for City to actively investigate the incident of vandalism at the Super Wal-Mart site; announcement of Kids America Day; request for more police presence near Sondley Estates; request for City assistance in stopping resident on Lynnstone Court from throwing their trash on Avon Road; City should consider regionalism when renegotiating the Water Agreement; and complaint of cars parking on both sides of the road and not leaving enough space for emergency vehicles or school buses to get through, particularly on Beverly Road.

Mayor Worley adjourned the meeting at 8:17 p.m.

Magdalen Burleson
CITY CLERK

Charles R. Worley
MAYOR

Tuesday – September 14, 2004 - 5:00 p.m.

Regular Meeting

Present:	Mayor Charles R. Worley, Presiding; Vice-Mayor R. Carl Mumpower; Councilwoman Terry M. Bellamy (participated via speaker phone); Councilman Jan B. Davis; Councilman Joseph C. Dunn; Councilwoman Diana Hollis Jones; Councilman Brownie W. Newman; City Manager James L. Westbrook Jr.; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson
Absent:	None

PLEDGE OF ALLEGIANCE

US Marine Brownlow Reeves led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

ADDITIONS TO THE AGENDA

At the request of City Manager Westbrook, City Council added the following actions under Other Business: (1) an ordinance regarding permit and fee waivers to repair structures in designated areas flooded by the effects of Hurricane Frances; (2) a resolution designating the City of Asheville's agent to the N.C. Division of Emergency Management; and (3) an agreement with Complus, Inc., to resolve all issues regarding the Complus Agreement dated October 25, 2001.

At the request of Vice-Mayor Mumpower, City Council added an item to Other Business regarding when City Council will discuss the City's response to the recent disaster from Hurricane Frances.

HURRICANE FRANCES

On behalf of City Council, Mayor Worley thanked City staff, Buncombe County staff, State of North Carolina and Federal Emergency Management Agency for their work in our area during the recent flooding as a result of Hurricane Frances.

Councilman Dunn also thanked our citizens for working together through the tremendous hardship they have encountered over the past week.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 17-23, 2004, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Mayor Worley read the proclamation proclaiming September 17-23, 2004, as "Minority Enterprise Development Week" in the City of Asheville. He presented the proclamation to Mr. Marvin Vierra who briefed City Council on some activities taking place during the week.

B. PROCLAMATION PROCLAIMING SEPTEMBER 27-OCTOBER 1, 2004, AS "THE MEDIATION CENTER WEEK"

Mayor Worley read the proclamation proclaiming September 27- October 1, 2004, as "The Medication Center Week" in the City of Asheville. He presented the proclamation to The

Honorable Earl J. Fowler who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 24, 2004, AND THE COMMUNITY MEETING HELD ON AUGUST 31, 2004

B. RESOLUTION NO. 04-183 - RESOLUTION AUTHORIZING THE PURCHASING DIRECTOR TO DISPOSE OF CITY-OWNED PERSONAL PROPERTY BY PUBLIC AUCTION

Summary: The consideration of a resolution authorizing the Purchasing Director to dispose of City-owned personal property by public auction.

This resolution authorizes the City's Purchasing Division to hold a public auction to dispose of motor vehicles, off-road equipment, and other miscellaneous property declared as surplus by various City departments. The auction is to be held Saturday, October 2, 2004, at 10:00 a.m. in the Public Works Complex, 161 S. Charlotte Street.

Pros:

- Auction returns revenue to the City for items of property that are no longer of economical use in carrying out the City's mission
- Combining surplus vehicles in the same venue with other surplus items generates demand for items that could not be sold by themselves and for which the City would otherwise have to pay to have disposed of

Cons:

- Greater staff resources are required to conduct a local public auction than for an on-line electronic auction
- Selling surplus vehicles at a local public auction rather than through an on-line electronic auction may result in a slightly lower price for the vehicles (this is outweighed by the revenue gain from other items)

Staff recommends adoption of the resolution, which authorizes disposal of surplus property by public auction.

RESOLUTION BOOK NO. 28 – PAGE 341

C. ORDINANCE NO. 3158 - ORDINANCE AMENDING CHAPTER 20 OF THE CODE OF ORDINANCE REGULATING TREES

Summary: The consideration of an ordinance amending Chapter 20 of the Code of Ordinances to clean up amendments.

On September 28, 1999, Ordinance No. 2621 was adopted to split the Tree and Greenway Commission into two separate commissions – Asheville Tree Commission and Asheville Greenway Commission. When the Commission was split, the changes were made to Chapter 2, but not to Chapter 20 (which regulates trees). This housekeeping amendment will amend Chapter 20, sec. 20-3, so as not to conflict with the Tree Commission membership.

Staff recommends City Council adopt an ordinance amending Chapter 20 of the Code of Ordinances of the City of Asheville regarding the Tree Commission membership.

444

ORDINANCE BOOK NO. 21 – PAGE 317

D. RESOLUTION NO. 04-184 - RESOLUTION RENAMING THE FRENCH BROAD RIVER PARK – PHASE IV AS "CARRIER PARK"

Summary: The consideration of a resolution renaming the French Broad River Park – Phase IV as Carrier Park as recommended by the Asheville Parks and Recreation Department and its Advisory Board.

For almost one year, Parks and Recreation staff has worked with a sub-committee made up of representatives from RiverLink, the West Asheville community, and various user groups at the park to solicit names. The following top three names were submitted to the Advisory Board for approval before being submitted to City Council:

RiverLink Park
Tahkeyostee Park
Carrier Park

At the June meeting of the Parks and Recreation Advisory Board, the Board unanimously voted to recommend to City Council that the French Broad River Park – Phase IV be renamed as "Carrier Park." The name "Carrier Park" was selected based upon the fact that the Carrier family was an influential family in the West Asheville area and the park site was the former location of the Carrier airstrip.

Pros:

- By having an official name, staff will be able to give to the general public specific directions for finding this park in relationship to other parks along the French Broad River.
- This name recognizes a historic family in the West Asheville community.
- This name represents a direct tie to a former use of the property.

Cons:

- There may be some resentment from the former racing community for not naming the park after an influential former driver.

The Asheville Parks and Recreation Department and the Parks and Recreation Advisory Board recommend that City Council adopt the resolution approving the renaming the French Broad River Park – Phase IV as Carrier Park.

Mr. Fred English felt City Council should name the park in memory of Bob Pressley.

RESOLUTION BOOK NO. 28 – PAGE 346

E. RESOLUTION NO. 04-185- RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AMENDED FEDERAL AVIATION ADMINISTRATION GRANT AGREEMENT, PROJECT NO. 3-37-0005-29

Summary: The consideration of a resolution authorizing the Mayor to approve an amended Project No. 3-37-0005-29 Grant Offer from the Federal Aviation Administration (FAA) in an amount not to exceed $4,073,492, if additional FAA funding becomes available prior to October 1, 2004.

The Asheville Regional Airport Authority (Authority) has solicited and received construction bids for several of the projects associated with the Project No. 3-37-0005-29 Grant Offer approved by City Council on August 10, 2004. The final bid for the "Expand Apron (includes rehabilitation) Project" was substantially higher than anticipated. The Authority has requested additional federal funding from the FAA to allow the Authority to proceed with this project. The FAA has indicated that there is a possibility that additional grant funding, in the amount of $1,309,000, may become available prior to September 30, 2004, but the Authority would need to be in a position to have a new Grant Offer executed and submitted back to the FAA within a short period of time of receiving the new Grant Offer, due to the Federal Fiscal Year ending September 30, 2004.

The only change in the Grant Offer that Council approved in August for Project No. 3-37-0005-29 will be for the total grant funding provided by the FAA, which was originally $2,764,492.

Project No. 3-37-0005-29 consists of: construct service road (Perimeter Road, Phase III), update Airport Master Plan Study (Terminal Area Plan and Forecast), expand apron (includes rehabilitation), expand maintenance building, and install perimeter fencing.

Staff recommends adoption of the resolution authorizing the Mayor to approve an amended Project No. 3-37-0005-29 Grant Offer from the FAA in an amount not to exceed $4,073,492, if additional FAA funding becomes available prior to October 1, 2004.

RESOLUTION BOOK NO. 28 – PAGE 347

F. RESOLUTION NO. 04-186 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY AT THE CORNER OF BARTLETT STREET AND NELSON STREET TO RAY QUATE

Summary: The consideration of a resolution authorizing the Mayor to convey property at the corner of Bartlett Street and Nelson Street to Ray Quate, in the amount of $4,000.

On August 24, 2004, City Council directed the City Clerk to advertise for upset bids on property at the corner of Bartlett Street and Nelson Street. The advertisement ran in the Asheville Citizen-Times on August 27, 2004, as provided in N. C. Gen. Stat. sec. 160A-269. No response was received. Therefore, the offer to purchase from Ray Quate in the amount of $4,000.00 was not upset and the sale to Ray Quate should be approved.

The land at the corner of Bartlett Street and Nelson Street is a rectangular shaped parcel comprising 0.13 acre+ (37'X151.9'). It is generally level at street grade and slopes up gradually to the rear. It is covered with grass. The long narrow shape renders the parcel unsuitable as a homesite. The subject parcel is a cut-out from a 5.73 acre property acquired from the Housing Authority, which is now a part of Murray Hill Park. Based on an opinion letter dated July 28, 2004, by L. Ted Prosser, the value of the cut-out parcel is $4,000. The bid from Ray Quate, owner of an adjacent parcel is in the amount of $4,000. Mr. Quate plans to renovate the building on the adjoining parcel with attention to preservation of historic architectural characteristics. The main floor on Depot Street will be three artist's studios and on the second floor will be five apartments with inside parking. Some of the apartments will be one bedroom and are expected to be within the affordable range. He plans to assemble the subject parcel with the property he owns to provide access to the parking and a buffer.

The proposed renovations are consistent with the Strategic Plan policies of encouraging a strong small business environment and increasing the supply of affordable housing.

The positive aspects of the transaction are:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.

- It will transfer responsibility for maintenance to the private sector.
- A small parcel will be assembled with an adjoining parcel to provide a more efficient land use.
- The sale of this lot to Mr. Quate will facilitate the proposed re-development by providing necessary access.

Planning & Development staff along with Parks & Recreation staff recommends City Council authorize the Mayor to convey property at the corner of Bartlett Street and Nelson Street to Ray Quate, in the amount of $4,000.

RESOLUTION BOOK NO. 28 – PAGE 348

G. RESOLUTION NO. 04-187 - RESOLUTION ACCEPTING STEGALL LANE AS A PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution to accept Stegall Lane, in the Chunns Cove area, as a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Stegall Lane is a developer-constructed street that has an average paved width of 20 feet and a length of 0.21 miles. Engineering Department Staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Stegall Lane will be added to the official Powell Bill list. A two-year warranty, from the time of Council acceptance, will be required by the developer to cover major failures in the roadway.

Pros:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.
- Homes will be constructed on this roadway increasing the tax base in the City of Asheville.

Cons:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Stegall Lane in the Chunns Cove area as a City maintained street.

RESOLUTION BOOK NO. 28 – PAGE 349

H. RESOLUTION NO. 04-188 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE TRACT I ON CHOCTAW STREET

Summary: The consideration of a resolution directing the City Clerk to advertise an Offer to Purchase property on Choctaw Street.

A bid has been received from Tilman and Sabrina Jackson, in the amount of $17,400, for the purchase of Choctaw Street, Tract 1, PIN No. 9648.10-25-5447, in the East Riverside Redevelopment Project. This bid amount is not less than the appraisal value of $17,400.

Choctaw Street Tract 1 is a residential zoned lot on the north side of Choctaw Street and opposite the intersection with Congress Street comprising 0.224 acre. The parcel is level with the street and sloping up toward the rear line. It is covered with natural vegetation consisting of grass, small trees and brush.

The Jackson's own the adjoining property where they reside. There are no improvements planned for the subject property at this time.

The positive aspects of the transaction are:

1. The sale will be at fair market value as established by the tax appraisal.
2. It will return property not needed for public use to the tax rolls.
3. It will transfer responsibility for maintenance to the private sector.

Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

Community Development staff recommends adoption of the resolution directing the City Clerk to advertise an Offer to Purchase property on Choctaw Street.

RESOLUTION BOOK NO. 28 – PAGE 350

I. RESOLUTION NO. 04-189 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MOTOROLA INC. FOR RADIO SYSTEM MAINTENANCE

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with Motorola, Inc. to provide maintenance coverage for the City's radio system.

Motorola, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of September 1, 2004, through August 31, 2005, has increased by three percent.

The renewal agreement reflects a monthly increase of $1,247.11 and covers additional equipment purchased by the City that has come out of warranty during the past year. The total monthly cost of this service is $12,408.50.

Funds have been appropriated in Account No. 110-1100-415-3001 C44108.

Advantages to the contract: By keeping the radio system in optimal condition the City is able to provide communication services to several outside agencies, thereby improving interagency communications. This ties back to Council's goal of partnerships to improve critical services / infrastructure. These partnerships also help the City recoup some of their investment in the system infrastructure through fees collected for use of the system.

Disadvantages to the contract: None noted.

City staff recommends City Council authorize the City Manager to sign an agreement with Motorola, Inc. to provide maintenance coverage for the City's radio system for the term of September 1, 2004, through August 31, 2005.

RESOLUTION BOOK NO. 28 – PAGE 351

J, ORDNANCE NO. 3159 - BUDGET AMENDMENT TO PROVIDE FUNDING FOR WATER SYSTEM IMPROVEMENT PROJECTS

Summary: The consideration of a budget amendment to the 329 (Water Bond Capital Projects Fund) to reprogram funds to provide additional funding for Annexation Projects and establish funding for Water System Improvement Projects.

There are two new Water System Improvement Projects that require funding. The Bee Tree/Black Mountain Conversion is needed in order to abandon the costly parallel 16-inch water mains that run through the Grovestone property. It will also allow abandonment of the Black Mountain pump station, which would result in savings in operational costs of $60,000/year. The estimated cost of this project is $500,000. The Lutheridge Pumping Station and Reservoir will allow conversion of the Mills River Water Treatment Plant to seasonal operation, which will provide an estimated savings of up to $750,000 per year. Even if seasonal operation is not implemented, the Lutheridge project will allow a reduction in flow from the Mills River Treatment Plant saving up to $100,000 annually in operational costs. The estimated cost of this project is $585,791.

There is insufficient funding in Annexation 2002 (Haywood Rd and CM Doan Area) and Annexation 2003 (Old County Home, Old Haw Creek, and Bell Area). Street restoration costs for Annexation 2002 were more than expected, so additional funding of $45,109 is needed. Annexation 2003 was only partially funded and additional funding of $196,000 is needed at this time.

Funding for the projects listed above will be provided with excess funds from closed out projects, deleted projects, and investment earnings. Excess funds from the following closed projects will be used: $83,231 from Revenue Bonds 2001 General Operations; $351,996 from NCDOT US 74 Phase I; $89,940 from Bee Tree Spillway; $40,629 from NCDOT Brevard Rd 240 to 40; $43,349 from Master Plan Sand Hill; and $69,379 from Critical Needs II. Annexation 2001 is being funded in the 335 fund (Water Major Capital Projects Fund), so the $104, 220 that was budgeted for this will be reprogrammed to fund the projects listed above. Finally there is $544,156 in investment earnings generated from the 2001 Revenue Bonds that will be reprogrammed.

Pros:

- Reprogramming funds for the Black Mountain and Lutheridge Projects will improve the water system as well as reduce annual operating costs.
- Annexation 2002 and 2003 will improve water service and enhance fire protection in newly annexed areas.

Cons: None noted.

Staff recommends that City Council approve a budget amendment to reprogram funds to provide adequate funding for Annexation Projects and establish funding for two new Water System Improvement Projects.

ORDINANCE BOOK NO. 21 – PAGE 318

K. RESOLUTION NO. 04-190 - RESOLUTION AUTHORIZING THE EXCHANGE OF A PORTION OF CITY-OWNED REAL PROPERTY LOCATED OFF MCDOWELL STREET ALONG TOWN BRANCH FOR A PORTION OF REAL PROPERTY LOCATED AT 7 MCDOWELL STREET

Summary: The consideration of a resolution authorizing the Mayor to convey a portion of property off McDowell Street in exchange for a portion of real property located at 7 McDowell Street.

The City and Weston Partners LLC (Weston) have negotiated an exchange of a portion of City owned property off McDowell Street for a portion of the property at 7 McDowell Street on which Weston has a contract to purchase from Victoria Investment Company.

The City's property (PIN No. 9648.10-25-8816) and Weston's property (PIN No. 9648.10-26-8282) share a common boundary line that zigzags back and forth across Town Branch. Weston's property backs up to the east bank of Town Branch and is improved with a medical office building, parking and trees along the creek bank. The City's property lies on the west bank with trees along the creek bank and the remainder of the property in grass. It is part of East Riverside Park, which follows the meanderings of Town Branch from the Southside/Asheland/McDowell intersection to the old Glenn Rock Hotel property. The portions of the properties to be exchanged are those areas where the City's and Weston's properties extend across the creek in an unusable fashion.

The parcels to be conveyed by the City include a 0.003 acre triangle and a 0.085 acre long narrow piece almost entirely covered by a storm drainage easement for a total of 0.088 acre. Weston's parcel is a 0.032 acre triangle. The City's Real Estate Manager has estimated the value of the City's property at $4,100 and the value of Weston's parcel at $4,200. All of the areas to be exchanged are on the creek bank and unsuitable for construction or any sort of economic use.

The positive aspects of the transaction are:

- The exchange will be a fair exchange of value for value.
- It will return property not needed for public use to the tax rolls.
- By incorporating land on the west bank into the park, it will allow greater flexibility for greenway construction on the City's property.
- It will conform the boundary line to the creek as a natural divide and provide a more logical and usable land ownership pattern.

Pursuant to N. C. G. S. 160A-271 a notice was duly published in the Asheville Citizen-Times on September 1, 2004.

Approval of the resolution will authorize the exchange of the properties as provided in N. C. G. S. 160A-271.

Planning & Development staff and Parks & Recreation staff recommend adoption of the resolution authorizing the Mayor to convey a portion of property off McDowell Street in exchange for a portion of real property located at 7 McDowell Street.

RESOLUTION BOOK NO. 28 – PAGE 352

L. RESOLUTION NO. 04-191 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MARTIN ALEXIOU BRYSON, PLLC, FOR TRANSPORTATION PLANNING AND ENGINEERING SERVICES FOR THE LONG-RANGE TRANSPORTATION PLAN

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with Martin Alexiou Bryson, PLLC in the amount of $74,000 for professional transportation engineering and planning services.

The City of Asheville is the Lead Planning Agency for the French Broad River Metropolitan Planning Organization (MPO). The MPO staff works cooperatively with the State of North Carolina to develop and maintain a travel demand model for the region. This model is a computer-based simulation of existing and future travel patterns. Developing and refining the computer travel model is an ongoing, regional project. The model is an essential tool in developing a long-range multi-modal transportation plan for the Asheville urban area.

The State of North Carolina recently completed an extensive process to develop a new travel model for the Asheville area. The model is state of the art in terms of software, complexity, and the effort spent to collect accurate input data. The consulting firm of Martin/Alexiou/Bryson (MAB) developed this model for the N. C. Dept. of Transportation and the MPO.

The MPO is now ready to use the travel demand model to develop the Long Range Transportation Plan and Congestion Management System for the MPO. This will involve testing a variety of solutions to meet our transportation needs in the future. The model will be used to test the effectiveness of various strategies to reduce congestion, manage travel demand, and improve air quality in the Asheville region and French Broad River basin.

This funding for the contract with MAB is a part of the adopted budget for 2004-2005. No budget amendment is required. Eighty percent (80%) of the funding will come from federal funds provided to the MPO. The City of Asheville match for this contract is twenty percent (20%) in the amount of $14,800.

This effort fulfills one of the tasks in the Council's Strategic Operating Plan. This task is identified in the Planning Focus Area under Goal #2: "A multi-modal and congestion management transportation program." This item is part of Objective A, Task 1: "Update long-range transportation plan to incorporate multi-modal uses of transportation options including congestion management plan."

PROS:

- This contract is in support of an identified task in the Council's Strategic Operating Plan and is part of the approved budget and approved Planning Work Program for the MPO.
- Eight Percent (80%) of the funding comes from the federal government.
- The project fulfills federal requirements for local transportation planning.
- Martin Alexiou Bryson is a very capable firm with demonstrated credibility in our region.

CONS:

- The City of Asheville must provide twenty percent (20%) of the funding for this contract, even though the effort will benefit the entire region.

City staff recommends City Council authorize the City Manager to execute a contract with Martin Alexiou Bryson, PLLC in the amount of $74,000 for professional transportation engineering and planning services.

RESOLUTION BOOK NO. 28 – PAGE 353

Mayor Worley said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ORDINANCE TO CLOSE AND VACATE THE DWELLING LOCATED AT 1086 HENDERSONVILLE ROAD

ORDINANCE NO. 3160 - ORDINANCE TO CLOSE AND VACATE THE DWELLING LOCATED AT 1086 HENDERSONVILLE ROAD

Mayor Worley said that this public hearing was originally scheduled on July 27, 2004, however, the attorney for the owner of the property said that they are working with the City Attorney's Office to negotiate a potential resolution and asked that the matter be continued until August 10, 2004.

On August 10, 2004, City staff requested that this public hearing be continued until September 14, 2004.

Mayor Worley opened the public hearing at 5:28 p.m.

Housing Code Coordinator Jeff Baker said that this is the consideration of an ordinance to close and vacate the dwelling located at 1086 Hendersonville Road. This public hearing was advertised on July 16, 2004.

The dwelling at 1086 Hendersonville Road (PIN 9656.05-08-6459) is a wooden structure containing nine dwelling units. Since December of 1998, following the first complaint, City staff has repeatedly worked with the property owners to bring the dwelling into compliance with the Housing Code, to no avail. As of July 27, 2004, the dwelling remained in non-compliance with the Housing Code.

A hearing was held on November 19, 2003, and an Order issued to the owner to render all nine dwelling units compliant with the Housing Code by February 2, 2004. The owner failed to comply with the Order and to date has not completed the required electrical repairs. In addition, with clear notice that they were renting the dwelling units in violation of the Housing Code, the owners exacerbated their non-compliance by renting the unfinished and un-permitted basement.

Prior to the previously scheduled hearing on July 27, 2004, the owners entered an agreement with the City which specified that a negotiated penalty would be paid and all outstanding work would be completed on or before September 14, 2004, or the Housing Division would proceed with enforcement as though there had been no agreement. As of September 10, 2004, there had been no request for a final inspection as required by the negotiated agreement. On September 13, 2004, a request for a final inspection was requested. City inspectors did inspect the dwelling on September 13, 2004, however, they failed the inspection. Therefore, until such time as the dwelling is made to comply with the Housing Code, the dwelling must be closed and vacated as required by the Findings of Fact and Order.

In order to effect this provision the City Council must adopt an Ordinance authorizing the Housing Code Coordinator to cause the dwelling to become vacated and closed.

Staff recommends adoption of an ordinance ordering the dwelling located at 1086 Hendersonville Road vacated and closed until brought into compliance with the City's Housing Code.

Mr. Jeff Baker then reviewed with Council a chronology of events, which began on December 18, 1998, showing various pictures of violations. He then reviewed the summary of the most critical violations as of July 19, 2004 – most of which have not been corrected to date. He explained the process, which ends with either a final inspection or a fine for failure to comply. The fine is $250 and $50 per day after that. The fine for Ms. Tate (the owner) had accrued to $8,400, however, in an effort to work with the owner, the City reduced the fine to $5,000 and entered into a Memorandum of Understanding, which stated that repairs were to be finished by September 13, 2004. They paid the $5,000, however, the repairs were not made. Now, the fine is $8,400 plus 40 days of accrual ($2,000). If compliance is gain, then the matter is settled. If compliance is not gained and if Council approves this ordinance, they will proceed with eviction per state law and place a lien on the property. They are still trying to work with the owner. At this time we are only looking at evicting people from Units 3, 4, 5 and 9.

Mr. Bill Lewis, attorney representing Ms. Tate, said that Ms. Tate is working on the repairs; however, she has run into financial constraints, e.g., $6,000 for a sewer line and $5,000 for the City's fine associated with the Memorandum of Understanding. He said Ms. Tate hired an electrician and was under the impression that all the electrical repair work had been done. He showed Council an invoice to Ms. Tate from Doug Grindstaff Electric Company Inc. dated April 19, 2004. Ms. Tate has requested that City Council postpone taking action on this ordinance for an additional 30 days, as she needs additional time to work on the violations.

Vice-Mayor Mumpower noted that at least Ms. Tate was showing a good faith effort on the electrical violations. When he asked what efforts were made in the other areas to correct violations and if Ms. Tate understands the seriousness of the issue, Mr. Lewis replied that Ms. Tate has contacted a plumber and even though she is limited in her ability to move around because of health issues, he felt she does understand the seriousness.

Councilman Dunn felt that Ms. Tate has had ample time, since 1998, to repair these violations and was concerned that she is now only starting to make an effort on the critical repairs.

When Councilwoman Bellamy asked about the number of tenants currently living in the 9-unit apartment building, Mr. Lewis said that he believed two of the units are not occupied.

Upon inquiry of Councilwoman Bellamy, Mr. Baker said that Ms. Tate is in violation of the Housing Code that was adopted on July 1, 1994, and then amended on October 14, 2003. He said that Ms. Tate did not mention any financial difficulties during the five-year grace period, which began in 1994.

Upon inquiry of Councilwoman Bellamy, Mr. Baker said that time and time again Ms. Tate has asked for extensions and he felt that the City has allowed her adequate time, since 1998, to do the minimal amount of repair work to maintain the property. In addition, through the Housing Code Program, they have tried to encourage people into good management practices and help them understand how to operate their rentals. He has encouraged Ms. Tate to get in touch with the Carolina Real Estate Investment organization in order for them to help her manage her rentals. The City has been proactive in helping Ms. Tate to manage what is great property.

Upon inquiry of Vice-Mayor Mumpower, Assistant City Attorney Martha McGlohon said that the ordinance before Council does not need to be amended to reflect only specific units to be vacated because State law requires the City to comply with the Findings of Fact and Order issued by the Director of Inspections, which state the four units to be vacated.

Upon inquiry of Councilman Newman, Mr. Lewis said that the property has been up for sale, but it has been taken off the market now. It is his understanding that Ms. Tate will try to keep the property and bring it into compliance.

At 6:02 p.m., Mayor Worley closed the public hearing.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Dunn moved for the adoption of Ordinance No. 3160. This motion was seconded by Councilwoman Jones and carried unanimously.

Upon inquiry of Councilman Davis of what happens to the property now, City Attorney Oast said that hopefully the units can be brought into compliance and staff can come back to Council with a request to repeal the Ordinance.

ORDINANCE BOOK NO. 21 – PAGE 321

B. PUBLIC HEARING RELATIVE TO REZONING 58.63 ACRES OF PROPERTY LOCATED OFF OF RACQUET CLUB ROAD, VALLEY SPRING ROAD AND LANCE ROAD, IDENTIFIED AS THE RAMBLE AT BILTMORE FOREST, FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND INSTITUTIONAL DISTRICT

ORDINANCE NO. 3161 – ORDINANCE REZONING 58.63 ACRES OF PROPERTY LOCATED OFF OF RACQUET CLUB ROAD, VALLEY SPRING ROAD AND LANCE ROAD, IDENTIFIED AS THE RAMBLE AT BILTMORE FOREST, FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT TO RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND INSTITUTIONAL DISTRICT

Mayor Worley opened the public hearing at 6:06 p.m.

Planning & Development Director Scott Shuford said that this is the consideration to rezone 58.63 acres of property located off of Racquet Club Road, Valley Spring Road and Lance Road, identified as The Ramble at Biltmore Forest, from RS-2 Residential Single-Family Low Density District to RS-4 Residential Single-Family Medium Density District and Institutional District. This public hearing was advertised on September 3 and 10, 2004.

Mr. Shuford said that the 2025 Asheville City Development Plan recommends expansions and new development in areas where infrastructure is in place to service this development. The Institutional zoning may allow expansion of existing retirement communities in the area, which serves older citizens of Asheville. The proposed RS-4 area would provide another housing product. A wide variety of housing choices are recommended for the Asheville community. The site is well situated to meet needs for transportation and community services.

The Technical Review Committee of the City of Asheville recently reviewed final plans for Gerber Village Phase I, which is located less than a mile away.

The property is located in the extraterritorial jurisdiction (ETJ) area in the southern portion of the City. The 1,000 plus acre parcel is located south of the Blue Ridge Parkway and west of Hendersonville Road and represents one of the last large land tracts in the ETJ area. Although City Council is not reviewing any specific development plan as a part of this rezoning request, the developer has committed to implementing some unique stormwater management systems throughout the entire development. Access to this large parcel will be improved by several connection points to the north and southwest with access to Hendersonville Road.

The initial rezoning request for a 59acre portion of the large parcel was to rezone it Institutional District. The Planning and Zoning Commission was concerned about compatibility of the uses permitted in Institutional District and the surrounding residential areas. The developer offered the Institutional and RS-4 change to the request. This revised configuration of the zoning designation works with their development goals.

The current rezoning request seeks to provide approximately 37 acres as Institutional zoning and approximately 23 acres as RS-4 District. The proposed RS-4 rezoning area provides a transition area of compatible uses for the surrounding RS-2 and RM-6 zoned residential areas. The Institutional portion of the rezoning request is located adjacent to the Deerfield Episcopal Retirement Community which is zoned RM-16. This arrangement will provide suitable buffering and screening to the surrounding community. In addition the Institutional District requires a height transition area when the neighboring parcels are residentially zoned. In those instances, the height of the building must match the residential height maximums within 100' of the residentially zoned property.

Residential Single Family Low Density District (RS-2) is developed to set aside areas for low density housing where environmental constraints are high or view sheds and watersheds are to be preserved. This district is also intended to stabilize and protect the districts residential character. Very limited non-residential uses are allowed in this district.

Residential Single Family Medium Density District (RS-4) is intended to establish medium density single family dwellings and to stabilize and protect the residential character of the district while promoting a suitable environment for single-family living. Limited other non-residential uses are also allowed in this district.

Institutional District is established to reserve land for the development of major educational and medical facilities and other complementary and supporting uses such as health related developments, office developments and public services. Development standards for uses in this district are established to minimize conflict with adjacent land uses. Residential density in the Institutional District is 16 units per acre. If the zoning change is accepted, the height transition area will apply within a 100' distance from residentially zoned property as described above.

The Limestone Township district to the east of this rezoning consideration is zoned R-2 which allows in conjunction with new water and sewer service lines, up to 12 multi-family residential units per acre or roughly 4 units per acre for single family residential development. Any future project in this area will need to be reviewed by the Buncombe County Planning Department and meet their requirements.

Pros:

- The arrangement of the zoning will provide a suitable transition from the low-density residential character of the surrounding area.
- May allow expansion of retirement housing in this area.
- Access to Hendersonville Road may be improved through future development.
- New development here will strengthen the area tax base.
- Future development will be reviewed to meet City and County requirements for access and landscaping, setbacks, etc.

Cons:

- Access can be challenging onto Hendersonville Road from Racquet Club Road.
- Any uses allowed in the Institutional District will be permitted here and some of these uses would require suitable landscaping buffering from neighboring uses.

The request for Institutional District allows uses by right that are already located on neighboring properties in the vicinity. Any development that may be proposed on this site will be subject to the requirements of the City of Asheville Unified Development Ordinance including review for landscaping, site access and setbacks. In addition any structures located within 100 feet of residentially zoned property will be limited to 40 feet in height. This will assure that any development does not over-shadow nearby residential uses. The RS-4 District will provide a suitable transition area between activity on the Institutional portion of the parcel and surrounding residential uses. Furthermore, development of this site will strengthen the area tax base. The site is well situated close to services and to public transit. Wide shopping choices are also located nearby.

The Planning and Zoning Commission at their September 1, 2004, meeting voted 4-0 to recommend approval of the request to rezone the parcel area to Institutional and RS-4. Planning staff recommends approval of the rezoning request as well.

Mr. and Mrs. Robert Harroff, area property owners, spoke against the rezoning in that any change from RS-2 to RS-4 will decrease the value of their property, and also the value of the properties in the adjoining Lance Tract.

Mr. Anthony Walgate, area property owner, fully supported the rezoning.

Mr. Robert Fitch, resident in Crowfields, said that Biltmore Farms management has had great communication with them and have made modifications to address their concerns. Because they are reasonably pleased with their response, the consensus of the Executive Committee of Crowfields is in favor of the rezoning.

At 6:14, p.m., Mayor Worley closed the public hearing.

Upon inquiry of Councilman Newman, Mr. Shuford said that he is not aware of any concerns regarding traffic on Hendersonville Road, however, one of the main problems on that road is the lack of synchronization of the traffic signals and we have funding for that and hope to have it completed in the near future.

When Councilman Newman asked if the City has specific plans for Deerfield, Mr. Shuford said that while it does appear that this would make a lot of sense for the Deerfield Episcopal Retirement Community to expand into this area, should Council rezone the property to Institutional, he cautioned Council that the property can be used for any use allowed in the Institutional classification. The same applies to the RS-4 zoning classification requested. While we have received plans from Biltmore Farms, he has no information that would be useful to council's consideration of the rezoning.

Councilman Newman pointed out that South Asheville is growing fast and wondered at what point will traffic levels on Hendersonville Road become problematic. Mr. Shuford replied that in all likelihood, any development on the 37-acre tract would probably be a Level III review, so Council will have an opportunity to determine whether it is appropriate for the area. Also, a project the size of The Ramble, even though it is mostly large lot/low-impact single-family development, is going to require a Traffic Impact Analysis that will require the developer, no doubt, to do some off-site improvements. Those may include installation of traffic signals and other improvements to the street network to make sure an adequate level of service is maintained.

Councilman Davis said that the existing traffic signals are very close together at where an entrance may be located and he feels it make take some effort to get the signals functional so as not to cause additional traffic problems in that area. Mr. Shuford said that he would take that concern to the Technical Review Committee meeting.

Vice-Mayor Mumpower initiated discussion regarding the fairness of religious-related properties not paying taxes. City Manager Westbrook said that the Buncombe County Tax Assessor is working through the court system and other means to make sure that the non-religious components of a property are properly taxed.

Mr. Shuford acknowledged Vice-Mayor Mumpower's concern that the issue of potential for residential development on this industrial tract to be problematic to our City tax base, however, this particular venue is not the appropriate place to address that issue. If the project comes to Council as a

Level III project then that would be a good time to address those issues. He felt the issue is probably a bigger issue than just this particular rezoning. It may be a policy issue with regard to these types of developments where the use is primarily residential in nature and yet the way they are treated in terms of the provision of services and their paying for those services is a little out of kilter.

City Attorney Oast said that Vice-Mayor Mumpower's concern is a tax policy question, not a land use question. He said these-type issues have been litigated through the courts. To the extent that it bears on land use, it is something we can raise with out legislative delegation. However, this is a rezoning request and it may be fair to presume that it may be developed as an extension of Deerfield, but that is something City Council should not take into consideration in their deliberations.

Councilman Davis said that Deerfield was voluntarily annexed into the City about three years ago. He wondered why the City would want to voluntarily annex that type of property into the City when City residents will have to pay a portion of their services without any enumeration. He felt this issue needs to be addressed.

City Attorney Oast said that the question before Council is a land use question and not a tax policy question and the request should be evaluated as such.

Mr. Shuford pointed out that this property is in our extraterritorial jurisdiction area and it is not annexed into the City at the current time. As a result, Council's decision about this really has no affect on the City's tax base. At the point in time it would come into the City may be the appropriate time to address that issue.

Upon inquiry of Councilman Davis, Mr. Shuford said that it was his understanding that the developer asked if Biltmore Forest had an interest in voluntarily annexing them and Biltmore Forest was not.

Vice-Mayor Mumpower felt a policy discussion in the near future is necessary. Mr. Shuford agreed that Council should talk about this in general. Council's policy discussion could generate changes to the standards for approval for conditional use permits, for example, that would help guide staff when we run into these types of situations.

Upon inquiry of Councilman Dunn, City Attorney Oast said that this is a broader policy concern and since it the property is in the extraterritorial jurisdiction area, the time for that to enter into Council's consideration is when Council annexes.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Ordinance No. 3161. This motion was seconded by Councilman Davis.

Councilman Newman wondered what the right timing would be for dialogue about the tax issues. Further frustration is with the conditional use zoning process. The fact that once we get a specific development brought to us, we are further prohibited from talking to the developers. He would support the rezoning but hoped that in a future worksession Council look at the broader policies that are in front of them. In addition, he hoped that before specific detailed developments are brought forward to Council that we can talk to developers about our concerns of infrastructure and the fairness questions around these kinds of developments.

Mayor Worley asked staff to research what Council's options are, particularly in the conditional use process and bring that report back at an appropriate worksession where we can start getting into that policy discussion and see what tools might be available and what our limitations are on those tools.

The motion made by Vice-Mayor and seconded by Councilman Davis carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 323

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR PUBLIC SAFETY PLANS FOR CERTAIN TEMPORARY USES

ORDINANCE NO. 3162 - AN ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR PUBLIC SAFETY PLANS FOR CERTAIN TEMPORARY USES

Mayor Worley said that this public hearing was continued from the August 24, 2004, meeting in order to give staff time to research questions that arose from the August 17, 2004, worksession.

Mayor Worley opened the public hearing at 6:37 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to provide for public safety plans for certain temporary uses. This public hearing was advertised on August 13 and 20, 2004.

This code amendment provides for public safety plans for certain temporary uses. Certain temporary uses, such as a motorcycle rally last year, result in significant public safety concerns and public expenses. The proposed amendment would require the submittal of a public safety plan and a way for public expenses associated with the temporary use to be recouped.

The amendment has been routed to the Coalition of Asheville Neighborhoods, Carolina Real Estate Investment Association, and the Council of Independent Business Owners (CIBO) for review and comment. Based on comments from CIBO, the amendment has been revised to clarify to what types of uses public safety plans may be required and to include language about coordination with non-City emergency management operations.

On August 4, 2004, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 6-0. City staff recommends approval of the proposed code amendment as well.

Mr. Shuford said that he has sent the amendment to the Buncombe County Tourism Development Authority and they have no concerns.

Mayor Worley closed the public hearing at 6:39 p.m.

Mayor Worley said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3162. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 – PAGE 325

IV. UNFINISHED BUSINESS:

A. SECOND READING OF ORDINANCE NO. 3157 – AN ORDINANCE AMENDING APPROPRIATE SECTIONS OF THE CODE OF ORDINANCES REGARDING CHURCHES AND OTHER PLACES OF WORSHIP

Mayor Worley said that the first reading of Ordinance No. 2157 was held on August 24, 2004, which amended Sections 7-8-21 (b) and 7-8-22 (b) regarding places of worship.

Mayor Worley explained there has been a lot of misinformation regarding this amendment and all it was intended to do was to bring two sections of the Unified Development Ordinance (UDO) in conformity with the rest of the UDO. He read the definition of "places of worship" from the UDO, which specifically includes churches. Because this is the second reading of an ordinance, public comment will not be taken.

Councilman Newman agreed that this is purely a technical housekeeping amendment to make the UDO consistent with the other 24 places in the UDO where we describe religious institutions. It doesn't change any land use or community development process.

Councilwoman Bellamy moved to waive the rules and allow public comment. This motion was seconded by Councilman Dunn and failed on a 2-5 vote, with Councilwoman Bellamy and Councilman Dunn voting "yes" and Mayor Worley, Vice-Mayor Mumpower, Councilman Davis, Councilwoman Jones and Councilman Newman voting "no."

Vice-Mayor Mumpower felt this was becoming a more divisive issue than it should. He felt that since both terms ("churches" and "places of worship") have been used in the UDO and the use of both is inclusive and reasonably covers the spectrum of spiritual frameworks, he would be supportive of using both terms.

Councilman Dunn spoke in support of using both terms, at the very least for a little tradition to continue.

Councilman Newman moved to adopt on the second and final reading Ordinance No. 3157, amending Sections 7-8-21 (b) and 7-8-22 (b) regarding places of worship. This motion was seconded by Councilwoman Jones.

Councilman Newman appreciated the community's underlying concerns to want to fight to maintain the integrity of those institutions, but this is not what is happening. This will have no impact on the health and vitality of churches in our community. Frankly he could support using both terms, however, the amendment by staff makes sense and he will support it.

Mayor Worley stressed that the definition in the UDO of "places of worship" specifically includes churches. He felt it was important to be consistent in the UDO and that is why staff has brought these amendments to Council. They are nothing more than housekeeping, not substantive, changes.

Councilwoman Bellamy felt that the amendment deleting the two references to "churches" affects the spirit of the UDO. She felt that the amendment lessens the significance of churches.

Councilwoman Jones felt it was important not to elevate on religion above another and when one is pulled out and defined and the others aren't included, that is what is happening. The City Attorney has advised Council that if that happens, it opens the City up for lawsuits. We should use our limited resources in the City, not for legal battles, but for making this place a better community, e.g. investing in our water structure, parks, affordable housing, etc. From her perspective, she feels like this captures theologically her Christian tradition.

Councilman Davis said that the term "places of worship" is very inclusive of churches, however, he would not be opposed to using both terms.

Councilman Newman said the City is facing some big important issues, most notably the future of our water system. When Council went through their strategic planning process, Councilman Dunn hoped that this Council could come together and spend the next year focused on the really big important issues – things that will really make a difference in peoples lives. He was not opposed to using both terms, but wondered if we need to be spending our time working on this amendment issue, or some of the other issues.

Upon inquiry of Vice-Mayor Mumpower, City Attorney Oast said that the intent of the amendment was to make all the terms internally consistent and if Council wanted to go with an alternate wording for all of them, then it would not be necessary to send this back to the Planning & Zoning Commission. Regarding the definition, City Attorney Oast said that our Code provides that if a term is not defined, then you rely on the dictionary definition.

Upon inquiry of Councilwoman Jones, City Attorney Oast said that his review of the law indicates that an ordinance that singles out one place of religious assembly and regulates it either more or less strictly than another place of religious assembly may be constitutionally invalid. Similarly, ordinances that attempt to itemize different types of places of worship may be challenged if they leave something out, however inadvertently.

Councilman Davis made a substitute motion to amend Ordinance No. 3157, to replace the words "churches" and "places of worship" with "churches and other places of worship" throughout Chapter 7 of the Code of Ordinances. This motion was seconded by Vice-Mayor Mumpower and carried on a 6-1 vote, with Councilwoman Jones voting "no."

ORDINANCE BOOK NO. 21 – PAGE 312

V. NEW BUSINESS:

A. RESOLUTION NO. 04-192 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE STATE OF NORTH CAROLINA FOR THE DEVELOPMENT OF NATIONAL GUARD FACILITIES AND CITY RECREATIONAL FACILITIES AT RICHMOND HILL, AND FOR THE CONVEYANCE OF CERTAIN REAL PROPERTY INTERESTS TO THE STATE

Parks & Recreation Director Irby Brinson said that this is the consideration of a resolution authorizing the Mayor to enter into an agreement with the North Carolina National Guard for the development of a new Armory at Richmond Hill Park.

The Parks and Recreation Department, along with other City departments, has been working for several months with the North Carolina National Guard for the development of a new Readiness Center to be located on approximately 15 acres at Richmond Hill. The current location of the Armory on Shelburne Road is not meeting the needs of the National Guard Armory and will be closed. This property will revert back to the City of Asheville. In an effort to try to address the Armory's needs and to enhance Parks and Recreation's services at Richmond Hill, the following issues have been agreed upon as part of the overall agreement between both parties.

1. The National Guard Armory will appropriate approximately $7 million to the overall project.

2. The National Guard Armory will develop the entrance road to both the Armory facility and the proposed ballfield complex to meet City standards.
3. The National Guard Armory will rough grade four baseball/softball fields and one multi-purpose soccer/football field.
4. As part of the overall construction of the new Armory facility, a gymnasium will be available for public use operated by the Parks and Recreation Department.
5. Landscaping around the Armory facility will meet the requirements of the Unified Development Ordinance.
6. The entire Armory facility will be fenced.
7. A shared parking area will be constructed at the Armory site for the Armory's use and as overflow parking for the park area.
8. The final design of the Armory facility will be approved by the City of Asheville.
9. All conditions outlined through the conditional use zoning process will be implemented.
10. The master plan will be developed over time to provide enhanced recreation opportunities.

This is an excellent opportunity to provide much-needed recreation facilities in the Richmond Hill area as well as a state-of-the-art Readiness Center for Asheville. In August, 2000, a community meeting was held in the Richmond Hill area. The information gathered from this meeting was used to develop the master plan for this 187-acre property. Another community meeting was held on March 19, 2003, with over 75 people attending to share their issues and concerns. Staff has tried to address these issues to the best of their ability. In addition, this issue was discussed at the Planning & Zoning meeting on April 2, 2003, and the Conditional Use Permit was approved by City Council on April 22, 2003. The agreement will allow for development in accordance with the conditional use permit. The development of the property is contingent on obtaining adequate access across some intervening land owned by a private party, and this contingency will be recognized in the agreement; the City is currently negotiating for the acquisition of that property.

Pros
- Excellent opportunity to develop a recreation complex in Northwest area of City at a low cost.
- Construction of a new Readiness Center will add to the economic development of the community.

Cons
- Concerns have been expressed by some residents in the area about increased traffic.
- A number of trees and vegetation will be disturbed for the construction of this site.

City staff recommends City Council authorize the Mayor to enter into an agreement with the National Guard Armory to develop a Readiness Center and associated park features as outlined by the Conditional Use Permit.

Upon inquiry of Vice-Mayor Mumpower, Mr. Brinson said that the agreement is contingent upon the finalization of the property entrance area, which we are currently in negotiations with the land owner. The National Guard is ready to start their design work and begin development almost immediately.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-192. This motion was seconded by Councilman Dunn and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 354

VI. OTHER BUSINESS:

ORDINANCE NO. 3163 - ORDINANCE AMENDING THE 2004-05 ANNUAL OPERATING BUDGET TO AUTHORIZE PERMIT AND FEE WAIVERS TO REPAIR STRUCTURES IN DESIGNATED AREAS FLOODED BY THE EFFECTS OF HURRICANE FRANCES BEGINNING SEPTEMBER 6-8, 2004

City Attorney Oast explained the ordinance as follows: The City of Asheville adopted the 2004-05 Annual Operating Budget on June 22, 2004, providing for certain permit fees for building and related activities. Following the eye of Hurricane Frances touching down in the state of Florida, substantial rainfall felled upon the City of Asheville, beginning September 6, 2004, through September 8, 2004, causing major flooding of commercial and residential properties. Many of the commercial and residential structures were completely submerged in water. Before re-occupancy of such structures, the City of Asheville must first issue appropriate building and related permits. In an effort to minimize the substantial financial and emotional loss already suffered by certain City of Asheville residents and businesses, staff of the City of Asheville is of the opinion that it is in the best interest of the City to waive building and related permit fees for owners of such properties. NOW THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT (1) Building permit fees for structures suffering flooding damage due to the effects of Tropical Storm/Hurricane Frances from September 6-8, 2004, within the jurisdiction of the City of Asheville, be and are hereby waived beginning on September 9, 2004. Eligibility for this waiver will be limited to structures located within or contiguous to the 100 year flood plain as shown on applicable Flood Insurance Rate Maps for the City of Asheville; (2) The Building Safety Director is further authorized to expedite the processing of permits for repairs to flood damaged structures by waiving the requirement for a City of Asheville Privilege License for N.C. Licensed Contractors; and (3) This budget ordinance amendment will expire on January 1, 2005.

Councilman Newman moved for the adoption of Ordinance No. 3163. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 21 - PAGE 327

RESOLUTION NO. 04-193 – RESOLUTION DESIGNATING CITY OF ASHEVILLE'S AGENT TO THE N.C. DIVISION OF EMERGENCY MANAGEMENT

City Manager Westbrook said that the N.C. Division of Emergency Management requires a resolution designating the City's agent. This resolution will designate William F. Schaefer, Jr., Finance Director, as the primary agent and Cynthia A. Fortune, Finance Operations Manager, as the secondary agent.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Dunn moved for the adoption of Resolution No. 04-193. This motion was seconded by Vice-Mayor Mumpower and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 357

RESOLUTION NO. 04-194 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH COMPLUS, INC., TO RESOLVE ALL ISSUES REGARDING THE COMPLUS AGREEMENT DATED OCTOBER 25, 2001

Transit Services Director Bruce Black said that this is the consideration of a resolution authorizing the City Manager to sign an Agreement with Complus Data Innovations to terminate an existing contract.

Complus Data Innovations (Complus) currently provides contracted services to Parking Enforcement. Complus locates the addresses of persons with delinquent parking citations, sends out notices to those people, and attempts to collect the past due amount from them. The City Of Asheville has now implemented an in-house citation processing and collections system better integrated with the existing systems and software of the City. The new program is expected to save administration costs and increase efficiency and collections. The services of Complus Data Innovations are no longer needed by the City.

Currently, the City Of Asheville pays Complus a fee based on a percentage of all citations collected. That fee is 14% on all in-state citations and 22% on all out-of-state citations. The current contract is not set to expire until February of 2005.

The total fee paid to Complus in Fiscal Year 2004 amounted to $149,546. The total fee for Fiscal Year 2005 to the expiration of the contract is projected to be slightly over $88,000. The City has proposed a contract buy-out to Complus, and they have accepted the proposal. The buy-out price is $70,000.

Pros:

- The level of service (i.e. timeliness of notices etc.) to the public will increase
- The number of collected citations will increase
- The City of Asheville will save money in the administration of its parking program.

Cons:

- Parking Service will have to develop the capacity to look-up delinquent license plate numbers. This is being done at this time, and provisions have been made for the interim.

Staff requests that City Council approves the resolution authorizing the City Manager to sign an Agreement with Complus Data Innovations to terminate an existing contract.

When Vice-Mayor Mumpower asked if Complus was in violation of their contract, Mr. Black replied no, just that they are problematic.

Mayor Worley said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Mumpower moved for the adoption of Resolution No. 04-194. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 28 – PAGE 358

MISCELLANEOUS

At the request of Vice-Mayor Mumpower and after a brief discussion, it was the consensus of Council to have a status report on the City's response to the recent disaster at the next worksession. City Manager Westbrook explained the City's preparation for Hurricane Ivan.

Vice-Mayor Mumpower announced current vacancies on our current boards and commissions, with the application deadline.

Vice-Mayor Mumpower thanked those who participated on Saturday, September 11, 2004, at the Deaverview Community Housing Development, which is a project associated with the overall For Our Kids Program, which he and Councilwoman Bellamy share responsibilities in.

CLAIMS

The following claims were received by the City of Asheville during the period of August 13-26, 2004: Wilma Anderson (Police), Johnny Buckner (Sanitation), Dr. Eleanor Radford (Water), and Sue Buchanan (Water).

The following claims were received during the period of August 27-31, 2004: Norm Inche (Sanitation), Kizzy Allen (Sanitation), David Greenbaum (Water) and Heather Carrigan (Water).

The following claims were received during the period of September 1-9, 2004: Sandy Shaw (Streets), Roy Tipton (Fire), Fred Friedman (Water), Mildred Whitener (Sanitation), Robert Hensley (Water) and Lorraine Sweeney (Parks & Recreation).

These claims have been referred to Asheville Claims Corporation for investigation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Walter Plaue was concerned about a trend he sees in the City of Asheville for an elitist community. He explained how the property in the City is being taken off the tax rolls by tax-exempt organizations, thus forcing the working people to pay all the taxes. He urged Council to give some thought on what direction the City of Asheville should be moving.

Mr. Fred English was concerned that the Pack Square Conservancy was using tax money for the Pack Square Renaissance Project, which he understood they were not going to use. He was opposed to the plans to change the lanes on College Street.

CLOSED SESSION

At 7:48 p.m., Councilman Newman moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff concerning the position to be taken by or on behalf of the public body in negotiating the price or other material terms of a contract for the acquisition of real estate. The statutory authorization is contained in N. C. Gen. Stat 143-318.11(a)(5); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including lawsuits involving the following parties: Eugene Ellison and Howard McGlohon; City of Asheville; and Eagle Market Streets Development Corporation. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilwoman Jones and carried unanimously.

At 8:55 p.m., Councilman Dunn moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Worley adjourned the meeting at 8:55 p.m.
